FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 53 FR 12345.

Rules and Regulations

Federal Register
Vol. 53, No. 231
Thursday, December 1, 1988

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

MERIT SYSTEMS PROTECTION BOARD

5 CFR Part 1201

Practices and Procedures; Regional Office Address Correction

AGENCY: Merit Systems Protection Board.

ACTION: Final rule.

SUMMARY: The U.S. Merit Systems Protection Board is correcting the address of the Seattle Regional Office as listed in 5 CFR Part 1201, Appendix II, item number 10.

EFFECTIVE DATE: December 1, 1988.

FOR FURTHER INFORMATION CONTACT: Mark Kelleher, Deputy Executive Director for Regional Operations, (202) 653–7980.

SUPPLEMENTARY INFORMATION:

List of Subjects in 5 CFR Part 1201

Administrative practice and procedures, Civil rights, Government employees.

Accordingly the Board amends Part 1201 as follows:

PART 1201—[AMENDED]

1. Authority for Title 5 CFR Part 1201 continues to read:

Authority: 5 U.S.C. 1205 and 7701(j).

2. Appendix II to Part 1201, item number 10 in the second paragraph is correctly revised to read as follows:

Appendix II to Part 1201—Appropriate Regional Office For Filing Appeals

BILLING CODE 7400–01–M

DEPARTMENT OF AGRICULTURE

Office of the Secretary

7 CFR Part 15

Nondiscrimination; Revision of Appendix

AGENCY: United States Department of Agriculture (USDA).

ACTION: Final rule.

SUMMARY: The United States Department of Agriculture has determined that public interest requires greater elaboration on the extent of its programs covered by Civil Rights Laws and Regulations. Hence, the Department is revising and updating the Appendix for Subpart A which lists Federally assisted programs. In addition, the Department is promulgating under Subpart B, a list of direct assistance and Federally conducted programs and activities of the Department covered under agency program statutes.

EFFECTIVE DATE: January 3, 1989.

FOR FURTHER INFORMATION CONTACT: Anthony M. Thielen, Compliance, Complaints and Adjudication Division, Office of Advocacy and Enterprise, Equal Opportunity, United States Department of Agriculture, Washington, DC 20250, Room 0101–South, phone (202) 447–5543.

SUPPLEMENTARY INFORMATION: A proposed rule was published in the **Federal Register**, May 6, 1988 (53 FR 16283). Three comments relating to Appendix B were received, one noting that an additional program should be included; a second noting an error in the title of a program; and a third noting a program incorrectly listed as two separate programs. The new program is administered by the Agricultural Stabilization and Conservation Service. It is the Colorado Salinity Control Program, Pub. L. 93–920, 43 U.S.C. 1592, and has been added to Appendix B as number 36. Proposed numbers 36 through 58 have been redesignated as 37 through 59 respectively. The corrected program title is number 53 under Appendix B and has been revised to read "Permits for Use of National Forests and National Grasslands." Numbers 59 and 60 as proposed was one program only, namely, "Meat and Poultry Inspection Operations Program." Hence, proposed number 59 was deleted. The Director, Office of Advocacy and Enterprise, has determined that this regulation is not a major role as defined by Executive Order 12291, since it is not likely to result in an annual effect on the economy of $100 million or more; a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprise to compete with foreign-based enterprises in domestic or export markets. As a result, it is not necessary to prepare a Regulatory Impact Analysis. Furthermore, the Director has determined that this action will not have a significant economic impact on a substantial number of small entities. Therefore, no Regulatory Flexibility Analysis is required.

List of Subjects in 7 CFR Part 15

Civil rights, Nondiscrimination.

Accordingly, 7 CFR Part 15, Subpart A and Subpart B are amended as follows:

PART 15—[AMENDED]

1. The authority for Part 15 continues to read as follows:

Authority: 78 Stat. 252; 80 Stat. 379; 87 Stat. 394, as amended by 92 Stat. 2955; 42 U.S.C. 2000d–1; 5 U.S.C. 301; 29 U.S.C. 794, unless otherwise noted.

2. Accordingly, the changes and additions have been made as described and the appendices to Subparts A and B are revised to read as follows:

Subpart A—Nondiscrimination in Federally Assisted Programs of the Department of Agriculture—Effectuation of Title VI of the Civil Rights Act of 1964

Appendix to Subpart A—List of USDA-Assisted Programs

Programs administered by the U.S. Department of Agriculture in which Federal financial assistance is rendered, include but are not limited to the following:

Program	Authority
Administered by the Agricultural Cooperative Service	
1. Cooperative Development	Cooperative Marketing Act of 1926, 7 U.S.C. 451 et seq. Agricultural Marketing Act of 1946, as amended, 7 U.S.C. 1621 et seq.
Administered by the Agricultural Marketing Service	
2. Federal-State marketing improvement program	Agricultural Marketing Act of 1946, Section 204b, 7 U.S.C. 1623(b).
Administered by the Agricultural Research Service	
3. Soil and Water Conservation	7 CFR 3015.205(b); Department of Agriculture Organic Act of 1862 (7 U.S.C. 2201); the Agricultural Marketing Act of 1946, as amended, (7 U.S.C. 427, 1621) and the Food Security Act of 1985 (7 U.S.C. 1281 et seq).
4. Animal Productivity	7 CFR 3015.205(b); Department of Agriculture Organic Act of 1862; (7 U.S.C. 2201); the Agricultural Marketing Act of 1946, as amended, (7 U.S.C. 427, 1621) and the Food Security Act of 1985 (7 U.S.C. 1281 et seq).
5. Plant Productivity	7 CFR 3015.205(b); Department of Agriculture Organic Act of 1862, (7 U.S.C. 2201); the Agricultural Marketing Act of 1946, as amended, (7 U.S.C. 427, 1621) and the Food Security Act of 1985 (7 U.S.C. 1281 et seq).
6. Commodity Conversion and Delivery	7 CFR 3015.205(b); Department of Agriculture Organic Act of 1862 (7 U.S.C. 2201); the Agricultural Marketing Act of 1946, as amended, (7 U.S.C. 427, 1621) and the Food Security Act of 1985 (7 U.S.C. 1281 et seq).
7. Human Nutrition	7 CFR 3015.205(b); Department of Agriculture Organic Act of 1862 (7 U.S.C. 2201); the Agricultural Marketing Act of 1946, as amended, (7 U.S.C. 427, 1621) and the Food Security Act of 1985 (7 U.S.C. 1281 et seq).
8. Integration of Agricultural Systems	7 CFR 3015.205(b); Department of Agriculture Organic Act of 1862 (7 U.S.C. 2201); the Agricultural Marketing Act of 1946, as amended, (7 U.S.C. 427, 1621) and the Food Security Act of 1985 (7 U.S.C. 1281 et seq).
Administered by the Agricultural Stabilization and Conservation Service	
9. Price support programs operating through producer associations, cooperatives and other recipients in which the recipient is required to furnish specified benefits to producers (e.g. tobacco, peanuts, cotton, rice, honey, dry edible beans, tung oil, naval stores and soybeans price support programs).	Agricultural Adjustment Act of 1938, 7 U.S.C. 1301-1393; Pub. L. 73-430; Commodity Credit Corporation Charter Act, 15 U.S.C. 714 et. seq.; Agricultural Act of 1949, as amended; 7 U.S.C. 1421, et seq.; Pub. L. 81-439, as amended; Agriculture and Food Act of 1961; Pub. L. 97-98; Dairy and Tobacco Adjustment Act of 1983; Pub. L. 98-180; Agricultural Programs Adjustment Act of 1984; Pub. L. 98-258; Food Security Act of 1985; Pub. L. 99-198.
Administered by Cooperative State Research Service	
10. 1890 Research Facilities	Sec. 1433 of the National Agricultural Research, Extension and Teaching Policy Act of 1977, Pub. L. 95-113, as amended; 7 U.S.C. 3195.
11. Payments to 1890 Land-Grant Colleges and Tuskegee Institute.	Sec. 1445 of the National Agricultural Research, Extension and Teaching Policy Act of 1977; Pub. L. 85-113, as amended; 7 U.S.C. 3222.
12. Cooperative Forestry Research (McIntire-Stennis Act).	Cooperative Forestry Research Act of October 10, 1962; Pub. L. 87-788; 16 U.S.C. 582a-582q-7.
13. Payments to Agricultural Experiment Stations under Hatch Act.	Hatch Act of 1887, as amended; 7 U.S.C. 361a-361l.
14. Grants for Agricultural Research Competitive Research Grants.	Sec. 2(b) of Pub. L. 89-106; 7 U.S.C. 450i(b), as amended.
15. Grants for Agricultural Research, Special Research Grants.	Sec. 2(c) of Pub. L. 89-106; 7 U.S.C. 450i(c), as amended.
16. Animal Health and Disease Research	National Agricultural Research, Extension and Teaching Policy Act of 1977, Sec. 1433, Pub. L. 95-113, as amended; 7 U.S.C. 3195.
Administered by Extension Service	
17. Home Economics	Smith-Lever Act, as amended; 7 U.S.C. 341-349; District of Columbia Post-secondary Education Reorganization Act, D.C. Code, Sec. 31-1518; Title V, Rural Development Act of 1972, as amended; 7 U.S.C. 2661, et. seq. Sec. 14, Title 14, National Agricultural Research, Extension and Teaching Policy Act of 1977; Pub. L. 95-113, as amended.
18. 4-H Youth Development	Smith-Lever Act, as amended; 7 U.S.C. 341-349; District of Columbia Public Postsecondary Education Reorganization Act, D.C. Code, Sec. 31-1518; Title VI, Rural Development Act of 1972, as amended; 7 U.S.C. 2661, et seq.; Sections 1425 and 1444, National Agricultural Research, Extension and Teaching Policy Act of 1977; Pub. L. 95-113, as amended; 7 U.S.C. 3221, 3175; Pub. L. 96-374, Sec. 1361(c); 7 U.S.C. 301 note; Pub. L. 97-98, Agriculture and Food Act of 1981, sec. 1401.
19. Agricultural and Natural Resources	Smith-Lever Act, as amended; 7 U.S.C. 341-349; District of Columbia Public Postsecondary Education Reorganization Act, D.C. Code, Sec. 31-1518; Title V, Rural Development Act of 1972, as amended; 7 U.S.C. 2661, et seq.; Sec. 14, National Agricultural Research, Extension and Teaching Policy Act of 1977; Pub. L. 95-113, as amended; 7 U.S.C. 3101, et seq.
20. Community Resource Development	Smith-Lever Act, as amended; 7 U.S.C. 341-349; District of Columbia Public Postsecondary Education Reorganization Act, D.C. Code 31-1518; Title V, Rural Development Act of 1972, as amended; 7 U.S.C. 2661, et. seq.; National Agricultural Research, Extension and Teaching Policy Act of 1977; Pub. L. 95-113, as amended; 7 U.S.C. 3101, et seq.; Renewable Resources Extension Act of 1978; 16 U.S.C. 1671-1676.
Administered by Federal Crop Insurance Corporation	
21. Crop Insurance	Federal Crop Insurance Act, as amended; 7 U.S.C. 1501-1520; Title V of the Agricultural Adjustment Act of 1938; 52 Stat. 31 and Federal Crop Insurance Act of 1980; Pub. L. 96-385 (Sept. 26, 1980); 94 Stat. 1312-1319.

Program	Authority
Administered by Farmers Home Administration	
22. Farm Ownership Loans to install or improve recreational facilities or other nonfarm enterprises.	Section 302 of the Consolidated Farm and Rural Development Act, as amended; 7 U.S.C. 1923.
23. Farm Operating Loans to install or improve recreational facilities or other nonfarm enterprises.	Sec. 312 of the Consolidated Farm and Rural Development Act, as amended; 7 U.S.C. 1942.
24. Community Facility Loans	Sec. 306 of the Consolidated Farm and Rural Development Act, as amended; 7 U.S.C. 1926.
25. Rural Rental Housing and related facilities for elderly persons and families of low income.	Sec. 515, Title V, Housing Act of 1949, as amended; 42 U.S.C. 1485.
26. Rural Cooperative Housing	Sec. 515, Title V, Housing Act of 1949, as amended; 42 U.S.C. 1485.
27. Rural Housing Site Loans	Sec. 524, Title V, Housing Act of 1949, as amended; 42 U.S.C. 1490d.
28. Farm and Labor Housing Loans	Sec. 514, Title V, Housing Act of 1949, as amended; 42 U.S.C. 1484.
29. Farm Labor Housing Grants	Sec. 516, Title V, Housing Act of 1949, as amended; 42 U.S.C. 1486.
30. Mutual self-help housing grants. (Technical assistance grants).	Sec. 523, Title V, Housing Act of 1949, as amended; 42 U.S.C. 1490c.
31. Technical and supervisory assistance grants	Sec. 525, Title V, Housing Act of 1949, as amended; 42 U.S.C. 1490e.
32. Individual Recreation Loans	Sec. 304 of the Consolidated Farm and Rural Development Act, as amended; 7 U.S.C. 1924.
33. Recreation Association Loans	Sec. 306 of the Consolidated Farm and Rural Development Act, as amended; 7 U.S.C. 1926.
34. Private enterprise grants	Sec. 310(B)(c) of the Consolidated Farm and Rural Development Act, as amended; 7 U.S.C. 1932(c).
35. Indian Tribal Land Acquisition Loans	Pub. L. 91-229, approved April 11, 1970; 25 U.S.C. 488.
36. Grazing Association Loans	Sec. 306 of the Consolidated Farm and Rural Development Act, as amended; 7 U.S.C. 1926.
37. Irrigation and Drainage Associations	Sec. 306 of the Consolidated Farm and Rural Development Act, as amended; 7 U.S.C. 1926.
38. Area development assistance planning grant program.	Sec. 306(a)(11) of the Consolidated Farm and Rural Development Act, as amended; 7 U.S.C. 1926(a)(11)
39. Resource conservation and development loans	Sec. 32(e) of Title III, the Bankhead-Jones Farm Tenant Act; 7 U.S.C. 1011(e).
40. Rural Industrial Loan Program	Sec. 310B of the Consolidated Farm and Rural Development Act, as amended; 7 U.S.C. 1932.
41. Rural renewal and resource conservation development, land conservation and land utilization.	Sec. 31-35, Title III, Bankhead-Jones Farm Tenant Act; 7 U.S.C. 1010-1013a.
42. Soil and water conservation, recreational facilities, uses; pollution abatement facilities loans.	Sec. 304 of the Consolidated Farm and Rural Development Act, as amended; 7 U.S.C. 1924.
43. Watershed protection and flood prevention program.	Sec. 1-12 of the Watershed Protection and Flood Prevention Act, as amended; 16 U.S.C. 1001-1008.
44. Water and Waste Facility Loans and Grants	Sec. 306 of the Consolidated Farm and Rural Development Act, as amended; 7 U.S.C. 1926.
Administered by Food and Nutrition Service	
45. Food Stamp Program	The Food Stamp Act of 1977, as amended; 7 U.S.C. 2011-2029.
46. Nutrition Assistance Program for Puerto Rico. This is the Block Grant signoff of the Food Stamp Program for Puerto Rico.	The Food Stamp Act of 1977, as amended; Sec. 19, 7 U.S.C. 2028.
47. Food Distribution (Food Donation Program). (Direct Distribution Program).	Sec. 32, Pub. L. 74-320, 49 Stat. 744 (7 U.S.C. 612c); Pub. L. 75-165. 50 Stat. 323 (15 U.S.C. 713c); secs. 6, 9, 60 Stat. 231, 233, Pub. L. 79-396 (42 U.S.C. 1755, 1758); sec. 416, Pub. L. 81-439, 63 Stat. 1058 (7 U.S.C. 1431); sec. 402, Pub. L. 91-665, 68 Stat. 843 (22 U.S.C. 1922); sec. 210, Pub. L. 84-540, 70 Stat. 202 (7 U.S.C. 1859); sec. 9, Pub. L. 85-931, 72 Stat. 1792 (7 U.S.C. 1431b); Pub. L. 86-756, 74 Stat. 899 (7 U.S.C. 1431 note); sec. 709, Pub. L. 89-321, 79 Stat. 1212 (7 U.S.C. 1446a-1); sec. 3, Pub. L. 90-302, 82 Stat. 117 (42 U.S.C. 1761); secs. 409, 410, Pub. L. 93-288, 88 Stat. 157 (42 U.S.C. 5179, 5189); sec. 2, Pub. L. 93-326, 88 Stat. 286 (42 U.S.C. 1762a); sec. 16, Pub. L. 94-105, 89 Stat. 522 (42 U.S.C. 1766); sec. 1304(a), Pub. L. 95-113, 91 Stat. 980 (7 U.S.C. 612 note); sec. 311, Pub. L. 95-478, 92 Stat. 1533 (42 U.S.C. 3030a); sec. 10, Pub. L. 95-627, 92 Stat. 3623 (42 U.S.C. 1760); Pub. L. 98-8, 97 Stat. 35 (7 U.S.C. 612c note); (5 U.S.C. 301).
48. Food Distribution Program Commodities on Indian Reservations.	The Food Stamp Act of 1977, as amended, Section 4(b), 7 U.S.C. 2013(b).
49. National School Lunch Program	National School Lunch Act, as amended; 42 U.S.C. 1751-1760.
50. Special Milk Program for Children (School Milk Program).	Child Nutrition Act of 1966, Sec. 3, as amended, 42 U.S.C. 1772.
51. School Breakfast Program	Child Nutrition Act of 1966, Sec. 4, as amended; 42 U.S.C. 1773.
52. Summer Food Service Program for Children	National School Lunch Act, Sec. 13, as amended; 42 U.S.C. 1761.
53. Child Care Food Program	National School Lunch Act, Sec. 17, as amended; 42 U.S.C. 1766.
54. Nutrition Education and Training Program	Child Nutrition Act of 1966, Sec. 19, 42 U.S.C. 1788.
55. Special Supplemental Food Program for Women, Infants and Children.	Child Nutrition Act of 1966, Sec. 17, 42 U.S.C. 1786.
56. Commodity Supplemental Food Program.	Agriculture and Consumer Protection Act of 1973, as amended; 7 U.S.C. 612c note.
57. Temporary Emergency Food Assistance Program.	Temporary Emergency Food Assistance Act of 1983, as amended; 7 U.S.C. 612c note.
58. State Administrative Expenses for Child Nutrition	Child Nutrition Act of 1966, Sec. 7, as amended; 42 U.S.C. 1776.
59. Nutrition Assistance Program for the Commonwealth of the North Mariana Islands. (This is the Block Grant spin-off of the Food Stamp Program for CNMI).	Trust Territory of the Pacific Island, 48 U.S.C. 1681 note.
Administered by Forest Service	
60. Permits for use of National Forests and National Grasslands by other than individuals at a nominal or no charge.	Act of June 4, 1897, as amended, 16 U.S.C. 551; Sec. 501 of the Federal Land Policy Management Act of 1976, 43 U.S.C. 1761; Term Permit Act of March 4, 1915, as amended, 16 U.S.C. 4971, Secs. 3 and 4 of the American Antiquities Act of June 8, 1906, 16 U.S.C. 432; Sec. 32 of the Bankhead-Jones Farm Tenant Act, as amended, 7 U.S.C. 1011.
61. Youth Conservation Corps	Act of August 13, 1970, as amended, 16 U.S.C. 1701-1706. Note: This is a Federally financed and conducted program on National Forest land providing summer employment to teen-age youth doing conservation work while learning about their natural environment and heritage. Recruitment of recipient youth is without regard to economic, social or racial classification. Policy requires that random selection from the qualified applicant pool be made in a public forum.

VOL 53 ISS 231 DE 1 1988 UMI

Program	Authority
62. Job Corps	29 U.S.C. 1691–1701. Note: This is a Federally financed and conducted program providing education and skills training to young men and women. The U.S. Department of Labor is entirely responsible for recruiting of recipient youth.
63. Permits for disposal of common varieties of mineral material from lands under the Forest Service jurisdiction for use by other individuals at a nominal or no charge.	Secs. 1–4 of the Act of July 31, 1947, as amended, 30 U.S.C. 601–603, 611.
64. Use of Federal land for airports	Airport and Airway Improvement Act of 1982, as amended, 49 U.S.C. 2202, 2215. National Forest lands are exempt, Sec. 2215(c).
65. Conveyance of land to States or political subdivisions for widening highways, streets and alleys.	Act of October 13, 1964, 78 Stat. 1089. Forest Road and Trail Act, codified at 16 U.S.C. 532–538.
66. Payment of 25 percent of National Forest receipts to States for schools and roads.	Act of May 23, 1908, as amended, 16 U.S.C. 500.
67. Payment to Minnesota from National Forest receipts of a sum based on a formula.	Sec. 5 of the Act of June 22, 1948, as amended, 16 U.S.C. 577 g–l.
68. Payment of 25 percent of net revenues from Title III, Bankhead-Jones Farm Tenant Act lands to Counties for school and road purposes.	Sec. 33 of the Bankhead-Jones Farm Tenant Act, as amended, 7 U.S.C. 1012.
69. Cooperative action to protect, develop, manage and utilize forest resources on State and private lands.	Cooperative Forestry Assistance Act of 1976, 16 U.S.C. 2101–2111.
70. Advance of funds for cooperative research	Sec. 20 of the Granger-Thye Act of April 24, 1950, 16 U.S.C. 581–1.
71. Grants for support of scientific research	Forest and Rangeland Renewable Resources Planning Act of 1974, as amended, 16 U.S.C. 1600 et seq.
72. Research Cooperation	Forest and Rangeland Renewable Resources Research Planning Act of 1974, as amended, 16 U.S.C.
73. Grants to Maine, Vermont and New Hampshire for the purpose of assisting economically disadvantaged citizens over 55 years of age.	Older American Act of 1965, as amended, 42 U.S.C. 3056.
74. Senior Community Service Employment, develop, manage and utilize forest resources on State and private lands.	Older American Act of 1965, as amended, 42 U.S.C. 3056.
75. Cooperative Law Enforcement	16 U.S.C. 551a and 553.
76. Forest Utilization and Marketing	Cooperative Forestry Assistance Act of 1978, Pub. L. 95–313, 16 U.S.C. 1606, 2101–2111.
77. Fire prevention and suppression	Cooperative Forestry Assistance Act of 1978, Pub. L. 95–313, Sec. 7, 16 U.S.C. Sec. 2106.
78. Assistance to States for tree planting	Cooperative Forestry Assistance Act of 1978, Pub. L. 95–313, Secs. 3, 6, 16 U.S.C. 2102, 2105.
79. Technical assistance forest management	Cooperative Forestry Assistance Act of 1978, Pub. L. 95–313, Sec. 8, 16 U.S.C. 2107.
80. Extramural Research (Cooperative Agreements and Grants).	Range Renewable Resources Act of 1978; Rangeland and Latest Renewable Resources Research Act; 16 U.S.C. 1641–1647.
Administered by Food Safety and Inspection Service	
81. Federal-State Cooperative Agreements and Talmadge-Aiken Agreements.	Federal Meat Inspection Act; 21 U.S.C. 601 et seq. Talmadge-Aiken Act; 7 U.S.C. 450. Poultry Products Inspection Act; 21 U.S.C. 451 et seq.
Administered by Office of International Cooperation and Development	
82. Technical Assistance	7 U.S.C. 3291; 22 U.S.C. 2357; 22 U.S.C. 2392.
83. International Training	7 U.S.C. 3291; 22 U.S.C. 2357; 22 U.S.C. 2392.
84. Scientific and Technical Exchanges	7 U.S.C. 3291.
85. International Research	7 U.S.C. 3291.
Administered by Soil Conservation Service	
86. Conservation Technical Assistance to Landusers	Sec. 1–6 and 17 of the Soil Conservation and Domestic Allotment Act, 16 U.S.C. 590a–590f, 590g.
87. Plant Materials Conservation	Soil Conservation Act of 1935, Pub. L. 74–46; 49 Stat. 163, 16 U.S.C. 590(a–f).
88. Technical and financial assistance in Watershed Protection and flood prevention.	Watershed Protection and Flood Protection Act, as amended, 16 U.S.C. 1001–1005, 1007–1008; Flood Control Act, as amended and supplemented; 33 U.S.C. 701; 16 U.S.C. 1606(a) and Sec. 403–405 of the Agriculture Credit Act of 1978; 16 U.S.C. 2203–2205. Flood Prevention: Pub. L. 78–534; 58 Stat. 905; 33 U.S.C. 701(b)(1); Pub. L. 81–516.
89. Technical and financial assistance in Watershed Protection and flood prevention.	Emergency Operation (216); 68 Stat. 184; 33 U.S.C. 701(b)(1). Watershed Operation: Pub. L. 83–566; 68 Stat. 666:16 U.S.C. 1001 et. seq.
90. Soil Survey	Sec. 1–6 and 17 of the Soil Conservation and Domestic Allotment Act, as amended, 16 U.S.C. 590a–590f, 590g.
91. Rural Abandoned Mine Program	Surface Mining Control and Reclamation Act of 1977, Sec. 406; Pub. L. 95–87, 30 U.S.C. 1236, 91 Stat. 460.
92. Resource Conservation and Development	Soil Conservation Act of 1935; Pub. L. 74–46; Bankhead-Jones Farm Tenant Act; Pub. L. 75–210, as amended, Pub. L. 89–796; Pub. L. 87–703; Pub. L. 91–343; Pub. L. 92–419; Pub. L. 97–98; 95 Stat. 1213; 16 U.S.C. 590a–590f, 590g.
93. Great Plains Conservation	Soil Conservation and Domestic Allotment Act, Pub. L. 74–46, as amended by the Great Plains Act of August 7, 1956; Pub. L. 84–1021, Pub. L. 86–793 approved September 14, 1980. Pub. L. 91–118 approved November 1, 1969; Pub. L. 96–263 approved June 6, 1980; 16 U.S.C. 590a–590f, 590g.

Subpart B—Nondiscrimination, Direct USDA Programs and Activities

Appendix to Subpart B—USDA Direct Programs and Activities

Programs conducted by the U.S. Department of Agriculture which include but are not limited to the following:

Program	Authority
Administered by the Agricultural Marketing Service	
1. Agricultural Fair.. Practice Act	7 U.S.C. 2301–2306.
2. Commodity Credit Corporation's Dairy Collection Program.	Omnibus Budget Reconciliation Act of 1982; Dairy and Tobacco Adjustment Act of 1983 (7 U.S.C. 4501–4513); Food Security Improvements Act of 1986.
3. Commodity Purchases	Section 32 (7 U.S.C. 612c); Sec. 6a, 6c and 14 of the National School Lunch Act; Sec. 4(a) of the Agriculture and Consumer Protection Act of 1973; 7 U.S.C. 612(c); Older Americans Act (42 U.S.C. 1751, 1755, 1758 and 1761.
4. Commodity Research and Promotion	Agricultural Marketing Act of 1946 (7 U.S.C. 1621 Act); (7 U.S.C. 2101–2119); Egg Research and Consumer Information Act (7 U.S.C. 2701–2718); Export Apple and Pear Act (7 U.S.C. 581–590); Export Grape and Plum Act (7 U.S.C. 591–599); Federal Seed Act (7 U.S.C. 1551–1611); National Wool Act of 1954, as amended; (7 U.S.C. 1781–1787); Plant Variety Protection Act (7 U.S.C. 2321–2331, 2351–2357, 2371–2372, 2401–2404, 2421–2417, 2441–2442, 2461–2463, 2481–2486, 2501–2504, 2531–2532, 2541–2545, 2561–2569, 2581–2583); Floral Research, Education and Consumer Information Act of 1981 (7 U.S.C. 4301–4319); Wheat and Wheat Foods Research and Nutrition Education Act of 1977 (7 U.S.C. 3401–3417); Cotton Research and Promotion Act of 1966, as amended, (7 U.S.C. 2101–2119); Dairy and Tobacco Adjustment Act of 1983 (7 U.S.C. 4501–4513); Agricultural Marketing Act of 1946 (7 U.S.C. 1621–1627); Agricultural Fair Practices Act (7 U.S.C. 2301–2306); Capper Volstead Act (7 U.S.C. 291–292); Potato Research and Promotion Act of 1971 (7 U.S.C. 2611–2627); Beef Promotion and Research Act of 1985; the Pork Promotion Research and Consumer Information Act of 1985.
5. Federal Seed Act Administration	Federal Seed Act (7 U.S.C. 1551–1575 and 1591–1611); Agricultural Marketing Act of 1946 (7 U.S.C. 1621–1627).
6. Governmentwide Food Quality Assurance	Federal Property and Administrative Services Act of 1949 (63 Stat. 377).
7. Inspection Grading and Standardization	Agricultural Marketing Act of 1946 (7 U.S.C. 1621–1627); Cotton Statistics and Estimates Act (7 U.S.C. 471–476); U.S. Cotton Futures Act (7 U.S.C. 15b); U.S. Cotton Standards Act (7 U.S.C. 51–65); Naval Stores Act (7 U.S.C. 91–99); Tobacco Inspection Act (7 U.S.C. 511–511q); Wool Standards Act (7 U.S.C. 415b–d); Egg Products Inspection Act 1970, Pub. L. 91–597; 21 U.S.C. 1031–1056; Omnibus Budget Reconciliation Act of 1981, Pub. L. 97–35; Dairy and Tobacco Adjustment Act of 1983 (7 U.S.C. 4501–4513); Tobacco Statistics of 1929 (7 U.S.C. 501–508); Tobacco Inspection Act of 1983 (7 U.S.C. 511r).

Kiwifruit Grown in California; Final Rule to Relax the Standard Pack Requirement and Define Size Designations for Kiwifruit Packed in Certain Containers

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This rule relaxes the standard pack requirement for Size 39 and smaller kiwifruit packed in certain containers, adds a size designation definition in conformity with that change, and adds numerical count size definitions and requirements for bags, volume fill, and bulk containers. Relaxing the standard pack requirement to allow a greater size variance for smaller fruit packed in bags, volume fill and bulk containers will reduce handling costs for these packs, which are generally sold at discounted prices. Adding numerical count size designations used in packing and marketing these containers will promote uniformity in sizing kiwifruit. A number of editorial changes are made to clarify the current kiwifruit handling requirements.

EFFECTIVE DATE: December 1, 1988.

FOR FURTHER INFORMATION CONTACT: Todd A. Delello, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2525–S, Washington, DC 20090–6456, telephone (202) 475–5610.

SUPPLEMENTARY INFORMATION: This rule is issued under Marketing Agreement and Marketing Order No. 920 (7 CFR Part 920) regulating the handling of kiwifruit grown in California. The marketing agreement and order are authorized by the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the Act.

This rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512–1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 145 handlers of California kiwifruit subject to regulation under the marketing order, and approximately 1,225 producers in the production area. The Small Business Administration (13 CFR 121.2) has defined small agricultural producers as those having annual gross revenue for the last three years of less than $500,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. The majority of handlers and producers of California kiwifruit may be classified as small entities.

The 1987 California kiwifruit harvest totalled 7.8 million trays and tray equivalents, 21 percent larger than the 1986 harvest. For the past ten years, kiwifruit production has increased in California and is expected to increase again in 1988 to a total of 8.7 million trays. Most of the crop is shipped to fresh markets, with only a small volume of fruit utilized by processors. Exports increased 31 percent over last year and are estimated to have accounted for 55 percent of the 1987 production. Domestic shipments are also increasing, with a gain of about 20 percent for the 1987 crop.

The 1987 harvest container breakdown reveals that about 82

percent of the crop was packed in trays with the remainder distributed between bags (9.2 percent), volume fill containers (8.3 percent), and bulk (0.5 percent). The use of bags, volume fill and bulk containers rose in 1987 to 18.0 percent of shipments compared to 10.7 percent in 1986.

The handling requirements for fresh California kiwifruit are specified in 7 CFR 920.302 (53 FR 34035, September 2, 1988). The current requirements specify that kiwifruit shall grade at least 85 percent U.S. No. 2 with not more than 8 percent allowed for defects other than shape causing damage, not more than 4 percent allowed for defects other than shape causing serious damage, and not more than 1 percent allowed for fruit affected by internal breakdown or decay. Kiwifruit also must meet a minimum size of 49 and contain at least 6.5 percent soluble solids at the time of inspection. Containers (except for those directly loaded into a vehicle for export) must be marked with a lot stamp number corresponding to the lot inspection.

Pack requirements are also specified in paragraph (a)(4) of § 920.302. Some of these requirements apply to all containers of kiwifruit while others apply only to kiwifruit packed in trays. This rule segregates the current pack requirements by the types of containers to which they apply, and makes a number of editorial changes for clarity.

This rule also revises the pack requirements by increasing the allowable size variance for Size 39 and smaller kiwifruit packed in bags, volume fill and bulk containers from ¼-inch to ⅜-inch in diameter. A definition of Size 30 has also been inserted into the handling regulation. These two changes were unanimously recommended by the Kiwifruit Administrative Committee on July 12, 1988.

Finally, this rule adds numerical count size definitions that are used by the industry in packing and marketing kiwifruit in containers other than trays. The maximum number of fruit per eight-pound sample is specified in the rule.

The current regulation requires all kiwifruit to be "fairly uniform in size", as defined in the U.S. Standards for Grades of Kiwifruit. Such uniformity is in terms of an allowable variance in diameter among the individual pieces of fruit in a given container. Larger size fruit (Size 30 and larger) may not vary by more than ½-inch in diameter; intermediate size fruit (Sizes 31 to 38) may not vary by more than ⅜-inch in diameter; and smaller size fruit (Size 39 and smaller) may not vary by more than ¼-inch in diameter.

Kiwifruit packed in trays will continue to be required to be "fairly uniform in size". In the interest of clarity, however, the definition of this term has been moved from paragraph (a)(4) to paragraph (b) of the handling regulation (§ 920.302).

For kiwifruit packed in containers other than trays, a modification of the "fairly uniform in size" requirement has been made. These other containers include bags, volume fill and bulk containers, which are used primarily for lower quality and smaller sized fruit. Therefore, such packs generally sell at discounted prices. The committee believes that the cost of precise sorting required by the current ¼-inch variance for the smallest sizes of kiwifruit is too high in relation to the returns received. Therefore, the allowable variance for these sizes is increased to ⅜-inch in diameter to reduce packing costs and increase the number of packs available to consumers. This action should facilitate the handling of small kiwifruit, and the additional ⅛-inch in size variation permitted is not expected to adversely affect consumer demand.

Since this requirement differs from the "fairly uniform in size" requirement, that term will not be used to specify the allowable size variance for kiwifruit packed in containers other than trays. Instead, the modified specification is fully set forth in § 920.302.

The pack requirements specify that all kiwifruit must be (1) packed in boxes, flats, lugs, cartons or any other containers, and (2) arranged according to approved and recognized methods. This rule deletes these two requirements from the handling regulation. The first is unnecessary because it only states that kiwifruit may be packed in any type of container and does not place any restrictions on the types of containers that may be used in handling kiwifruit. The second is likewise unnecessary because no methods of arranging kiwifruit have been "approved and recognized." Accordingly, this requirement is deleted.

As previously indicated, the majority of California kiwifruit is packed in trays which have cell compartments to hold individual pieces of fruit. The size of the fruit packed in these containers is denoted by count, i.e., the number of pieces of fruit packed in the tray. There are currently 19 sizes packed in trays, ranging from Size 49 (the smallest size permitted to be shipped) to Size 20. The five most prevalent sizes are 30, 33, 36, 39 and 42 which is 1987–88 accounted for almost 88 percent of the trays packed. These types of containers are required to be marked with a numerical count to designate size, and the number of fruit in the tray must conform to the marked count.

Kiwifruit is also packed in bags, volume fill and bulk containers, which do not have cell compartments. These containers are currently exempt from the requirement that containers be marked with a numerical count to designate size. While not required, the majority of these containers are marked with a size designation, since size is an important factor in marketing kiwifruit.

The numerical size designations used for trays are not directly applicable to bags and other volume fill containers, however. To provide a uniform basis for sizing fruit packed in these containers, the numerical counts used in tray packs have been translated by the committee into equivalent weight counts that can be applied to fruit in other containers. For example, fruit from 30-count trays were assembled into 8-pound samples. The average number of fruit it took to form an 8-pound sample (e.g., 35 pieces of fruit for 30-count trays) then became the criteria to determine the size of the fruit in containers other than trays.

It has been the practice of the committee to annually prepare a Size Designation Chart defining the most commonly packed sizes of kiwifruit in terms of the maximum number of fruit per 8-pound sample. If bags, volume fill or bulk containers are marked to denote size, the Size Designation Chart is used by the Federal-State Inspection Service to verify that the contents of the containers conform to the marked size designation. Since this chart is used in such a way, it is appropriate that it be set forth in § 920.302. Therefore, this rule inserts the Size Designation Chart utilized during the 1986–87 and 1987–88 seasons into the handling regulation. While bags, volume fill, or bulk containers continue to be exempt from the requirement that they be marked with a numerical count, if they are so marked their contents have to conform to these defined size designations. This action should promote consistency in the sizing of kiwifruit packed in all containers.

The only size designation that was defined in the handling regulation for other than tray-packed fruit was Size 49, since it is the minimum size permitted to be shipped. This rule moves the definition of Size 49 from paragraph (a)(2) to paragraph (b) of § 920.302 for consistency.

Since this rule sets an allowable size variance for kiwifruit packed in bags, volume fill and bulk containers of ½-inch in diameter for Size 30 and larger and ⅜-inch in diameter for all other sizes, a definition of Size 30 is also

incorporated in paragraph (b) of the regulation, again in the interest of consistency. Size 30 is defined to mean that an 8-pound sample representative of the size in a container contains not more than 35 pieces of kiwifruit.

Finally, the definition of "diameter" that appeared in paragraph (a)(4) has been moved to paragraph (b) of § 920.302. This change also promotes consistency in the regulation.

Based on the above, the Administrator of AMS has determined that this action will not have a significant economic impact on a substantial number of small entities.

Notice of this action was published in the **Federal Register** on September 29, 1988 (53 FR 38009) allowing interested persons until October 14, 1988 to file written comments. No comments were received.

After consideration of the information and recommendation submitted by the committee, and other available information, it is hereby found that the rule as hereinafter set forth will tend to effectuate the declared policy of the Act.

It is hereby further found that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** (5 U.S.C. 533) in that the shipping season for California kiwifruit has already begun, and it is important that the change resulting from this rulemaking be in effect as soon as possible to be of maximum benefit to producers and handlers. Furthermore, producers and handlers of kiwifruit in the production area are already aware of the changes, which relax current handling requirements, and no comments were received when notice of this action was given.

List of Subjects in 7 CFR Part 920

Marketing agreements and orders, Kiwifruit, California.

For the reasons set forth in the preamble, 7 CFR Part 920 is amended as follows:

PART 920—KIWIFRUIT GROWN IN CALIFORNIA

1. The authority citation for 7 CFR Part 920 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Section 920.302 is amended by revising paragraphs (a)(2), (a)(4) and (b) to read as follows:

Note: This regulation will appear in the Code of Federal Regulations.

§ 920.302 Grade, size, pack and container regulations.

* * * * *

(a) * * *

(2) *Size Requirements.* Such kiwifruit shall be at least a minimum Size 49.

* * * * *

(4) *Pack Requirements.* (i) All containers of Kiwifruit shall be well filled. Contents shall be tightly packed but not excessively or unnecessarily bruised by overfilling or oversizing. Fruit in the shown face of the container shall be reasonably representative in size and quality of the contents.

(ii) Kiwifruit packed in containers with cell compartments, cardboard fillers or molded trays shall be of proper size for the cells, fillers or molds in which they are packed. Such fruit shall be fairly uniform in size. When packed in closed containers the size shall be indicated by marking the container with the numerical count, and the contents shall conform to the marked count.

(iii) Kiwifruit packed in bags, volume fill or bulk containers may not vary more than ½-inch (12.7 mm) in diameter if Size 30 or larger and not more than ⅜-inch (9.5 mm) in diameter if smaller than Size 30. When such containers are marked with a numerical count size designation, the numerical count size designation shall be one of those shown in Column 1 of the following table and the number of fruit per 8-pound sample shall not exceed the corresponding number shown in Column 2 of the table:

Column 1, numerical count size designation	Column 2, maximum number of fruit per 8-pound sample
25	30
27/28	31
30	35
33	37
36	43
39	50
42	55
45/46	62
49	64

(iv) Not more than 10 percent, by count, of the containers in any lot and not more than 5 percent, by count, of kiwifruit in any container may fail to meet the requirements of this paragraph.

* * * * *

(b) *Definitions.* (1) The terms "U.S. No. 2", "fairly uniform in size" and "diameter" mean the same as defined in the United States Standards for Grades of Kiwifruit (7 CFR 51.2335 through 51.2340).

(2) "Size 49" means that an 8-pound sample representative of the size in a package or container contains not more than 64 pieces of kiwifruit.

(3) "Size 30" means that an 8-pound sample representative of the size in a package or container contains not more than 35 pieces of kiwifruit.

[Docket No. FV–88–119]

Olives Grown in California and Imported Olives; Establishment of Grade and Size Requirements for Limited Use Styles of California Processed Olives for the 1988–89 Season, and Conforming Changes in the Olive Import Regulation

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: The Department is adopting as a final rule the provisions of an interim final rule which established grade and size requirements for California processed olives used in the production of limited use styles of olives such as wedges, halves, slices, or segments and established similar requirements in the olive import regulation to bring that regulation into conformity with the domestic requirements. The grade and size requirements are the same as implemented last season. Olives used in limited use styles are too small to be desirable for use as whole or pitted canned olives because their flesh-to-pit ratio is too low. However, they are satisfactory for use in the production of products where the form of the olive is changed. Their use in such products over the years has helped the California olive industry meet the increasing market needs of the food service industry. The requirements for domestic olives were recommended by the California Olive Committee, which works with the Department in administering the marketing order program for olives grown in California. The establishment of such requirements for imported olives is required pursuant to section 8e of the Agricultural Marketing Agreement Act of 1937.

EFFECTIVE DATE: December 1, 1988.

FOR FURTHER INFORMATION CONTACT: George J. Kelhart, Marketing Order

VOL 53 ISS 231 DE 1 1988 UMI

Administration Branch, F&V Division, AMS, USDA, P.O. Box 96458, Room 2525–S, Washington, DC 20090–6456; telephone 202–475–3919.

SUPPLEMENTARY INFORMATION: This final rule is issued under Marketing Order No. 932 (7 CFR Part 932), as amended (the order), regulating the handling of olives grown in California. The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the Act.

This rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512–1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service has considered the economic impact of this action on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are seven handlers of California olives subject to regulation under the order and approximately 1,400 producers in California. Approximately 25 importers of olives are subject to the olive import regulation. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having annual gross revenues for the last three years of less than $500,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. Most but not all of the olive producers and importers may be classified as small entities. None of the olive handlers may be classified as small entities.

Nearly all of the olives grown in the United States are produced in California. The growing areas are scattered throughout California with most of the commercial production coming from inland valleys. About 75 percent of the production comes from the San Joaquin Valley and 25 percent from the Sacramento Valley.

Olive production has fluctuated from a low of 24,200 tons in the 1972–73 crop year to a high of 146,500 tons in the 1982–83 crop year. Last year's production totalled about 64,000 tons. The various varieties of olives produced in California have alternate bearing tendencies with high production one year and low the next. The industry expects the 1988–89 crop to be about 85,000 tons.

The primary use of California olives is for canned ripe olives which are eaten out of hand as hors d'oeuvres or used as an ingredient in cooking. The canned ripe olive market is essentially a domestic market. Very few California olives are exported.

This action allows handlers to market more olives than would be permitted in the absence of this relaxation in size requirements. This additional opportunity is provided to maximize the use of the California olive supply, facilitate market expansion, and benefit both growers and handlers.

The interim rule was issued August 3, 1988, and published in the **Federal Register** on August 30, 1988 (53 FR 33100). That rule invited interested persons to submit written comments through September 29, 1988. One comment was received strongly favoring the grade and size requirements established by the interim final rule.

The interim rule modified § 932.153 of Subpart-Rules and Regulations (7 CFR 932.108–932.161). The modification established grade and size regulations for 1988–89 crop limited use size olives. The modification was issued pursuant to paragraph (a)(3) of § 932.52 of the order. That rule also made necessary conforming changes in the olive import regulation (Olive Regulation 1; 7 CFR 944.401). The import regulation is issued pursuant to section 8e of the Act. Section 8e provides that whenever grade, size, quality, or maturity provisions are in effect for specified commodities, including olives, under a marketing order, the same or comparable requirements must be imposed on the imports.

Paragraph (a)(3) of § 932.52 of the marketing order provides that processed olives smaller than the sizes prescribed for whole and pitted styles may be used for limited uses if recommended by the committee and approved by the Secretary. The sizes are specified in terms of minimum weights for individual olives in various size categories. The section further provides for the establishment of size tolerances.

To allow handlers to take advantage of the strong market for halved, segmented, sliced, and chopped canned ripe olives, the committee recommended that grade and size requirements again be established for limited use olives for the 1988–89 crop year (August 1–July 31). The grade requirements are the same as those applied during the 1987–88 crop year, as are the sizes and the size tolerances. Permitting handlers to use small olives in limited use style canned olives will have a positive impact on industry returns. In the absence of this action, the undersized fruit would have to be used for non-canning uses, like oil, for which returns are lower. The requirements hereinafter set forth in § 932.153 are the same as those contained in the interim rule.

Paragraph (b)(12) of § 944.401 of the olive import regulation allows imported bulk olives which do not meet the minimum size requirements for canned whole and pitted ripe olives to be used for limited use styles if they meet specified size requirements. Continuation of the limited use authorization for California olives by this final rule requires that similar changes be made in paragraph (b)(12) of § 944.401 to keep the import regulation in conformity with the applicable domestic requirements. These conforming changes will benefit importers because they will be able to import small-sized olives for limited use during the 1988–89 season ending July 31, 1989.

Based on the above, the Administrator of AMS has determined that this action will not have a significant economic impact on a substantial number of small entities.

After consideration of all relevant matter presented, the information and recommendations submitted by the committee, and other available information, it is determined that the provisions as hereinafter set forth will tend to effectuate the declared policy of the Act.

Pursuant to 5 U.S.C. 553, it is found and determined that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** because: (1) This action leaves in effect requirements currently being applied to California and imported olives under an interim rule; (2) the olive import requirements are mandatory under section 8e of the Act; (3) this action relieves restrictions on handlers and importers; (4) the interim final rule provided a 30 day period for comments, one comment was received strongly favoring this action; and (5) no useful purpose would be served by delaying the effective date of this action until 30 days after publication.

List of Subjects

7 CFR Part 932

Marketing agreements and orders, Olives, California.

7 CFR Part 944

Food grades and standards, Fruits, Import regulations.

For the reasons set forth in the preamble, 7 CFR Parts 932 and 944 are amended as follows.

PART 932—OLIVES GROWN IN CALIFORNIA

PART 944—FRUITS; IMPORT REGULATIONS

1. The authority citations for 7 CFR Parts 932 and 944 continue to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Accordingly, the interim rule revising § 932.153, and amending § 944.401(b), which was published at 53 FR 33100 on September 29, 1988, is adopted as a final rule with no changes.

Note: These sections will appear in the Code of Federal Regulations.

Dated: November 25, 1988.

Robert C. Keeney,

Deputy Director, Fruit and Vegetable Division.

7 CFR Part 1002

[Docket No. A0–71–A76; DA–88–107]

Milk in the New York-New Jersey Marketing Area; Order Amending Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This action increases the maximum allowable rate of payment for expense of administration from four cents to five cents per hundredweight of milk handled under the New York-New Jersey Federal milk order. The higher maximum allowable rate of payment is necessary to offset the increased costs of administering the order that have occurred since the rate was last adjusted in September 1969.

The action is based on a public hearing held in Syracuse, New York, on June 6, 1988, to consider an industry proposal to amend the order. The hearing was requested by three dairy farmer cooperatives.

More than the required percentage of producers in the market approved the issuance of the amended order.

EFFECTIVE DATE: December 1, 1988.

FOR FURTHER INFORMATION CONTACT: Maurice M. Martin, Marketing Specialist, USDA/AMS/Dairy Division, Order Formulation Branch, Room 2968, South Building, P.O. Box 96456, Washington, DC 20090–6456, (202) 447–7311.

SUPPLEMENTARY INFORMATION: Prior documents in this proceeding:

Notice of Hearing: Issued May 19, 1988; published May 25, 1988 (53 FR 18844).

Recommended Decision: Issued August 23, 1988; published August 29, 1988 (53 FR 32911).

Final Decision: Issued September 27, 1988; published October 3, 1988 (53 FR 38727).

Findings and Determinations

The findings and determinations hereinafter set forth supplement those that were made when the New York-New Jersey order was first issued and when it was amended. The previous findings and determinations are hereby ratified and confirmed, except where they may conflict with those set forth herein.

(a) Findings upon the basis of the hearing record. Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the New York-New Jersey marketing area.

Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area; and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest;

(3) The said order as hereby amended regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held; and

(4) It is hereby found that the necessary expense of the market administrator for the maintenance and functioning of such agency will require the payment by each handler, as his pro rata share of such expense, five cents per hundredweight or such lesser amount as the Secretary may prescribe, with respect to milk specified in § 1002.90.

(b) Additional findings. It is necessary in the public interest to make this order amending the order effective not later than December 1, 1988. Any delay beyond that date would tend to disrupt the orderly marketing of milk in the marketing area.

The provisions of this order are known to handlers. The recommended decision of the Deputy Administrator, Marketing Programs, was issued August 23, 1988 (53 FR 32911), and the decision of the Assistant Secretary containing the amendment provision of this order was issued September 27, 1988 (53 FR 38727). The change effected by this order will not require extensive preparation or substantial alteration in method of operation for handlers. In view of the foregoing, it is hereby found and determined that good cause exists for making this order amending the order effective December 1, 1988, and that it would be contrary to the public interest to delay the effective date of this order for 30 days after its publication in the **Federal Register**. (Sec. 553(d), Administrative Procedure Act, 5 U.S.C. 551–559.)

(c) Determinations. It is hereby determined that:

(1) The refusal or failure of handlers (excluding cooperative associations specified in section 8c(9) of the Act) of more than 50 percent of the milk, which is marketed within the marketing area, to sign a proposed marketing agreement, tends to prevent the effectuation of the declared policy of the Act;

(2) The issuance of this order amending the order is the only practical means pursuant to the declared policy of the Act of advancing the interests of producers as defined in the order; and

(3) The issuance of the order amending the order is approved or favored by at least two-thirds of the producers who participated in a referendum and who during the determined representative period were engaged in the production of milk for sale in the marketing area.

List of Subjects in 7 CFR Part 1002

Milk marketing orders, Milk, Dairy products.

Order Relative to Handling

It is therefore ordered, That on and after the effective date hereof, the handling of milk in the New York-New Jersey marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as amended, and as hereby further amended, as follows:

PART 1002—MILK IN THE NEW YORK-NEW JERSEY MARKETING AREA

1. The authority citation for 7 CFR Part 1002 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Section 1002.90, is amended by revising the first sentence to read as follows:

§ 1002.90 Payment by handlers.

To share on a pro rata basis the expense of administration of this part, each handler shall, on or before the date specified for making payment to the producer-settlement fund pursuant to § 1002.85, pay to the market administrator a sum not exceeding five cents per hundredweight on the total quantity of pool milk received from dairy farmers at plants or from farms in a unit operated by such handler, directly or at the instance of a cooperative association of producers and on the quantity for which payment is made pursuant to § 1002.70(d)(2), and exact amount to be determined by the market administrator subject to review by the Secretary. * * *

Signed at Washington, DC, on November 25, 1988.

Kenneth A. Gilles,

Acting Secretary.

[Docket Nos. AO-184-A52 and AO-366-A29; DA-88-104]

Milk in the Nashville and Georgia Marketing Areas; Order Amending Orders

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This action amends the pooling provisions of the Nashville, Tennessee, and Georgia milk orders. A pool distributing plant physically located in the Nashville, Tennessee, marketing area would be regulated under that order irrespective of the market in which the plant has most of its fluid milk product distribution. Another change in the Nashville order establishes a plus location adjustment of 8.5 cents per hundredweight for milk received at plants located in 18 Tennessee counties south of Nashville. The Georgia order is amended to accommodate the pooling changes in the Nashville order. The amendments are based on the record of a public hearing held November 3, 1987, at Nashville, Tennessee. More than two-thirds of the producers participating in a referendum have approved the amended Nashville order. Likewise, more than two-thirds of the producers pooled under the Georgia order have approved the amended Georgia order.

EFFECTIVE DATE: December 1, 1988.

FOR FURTHER INFORMATION CONTACT: Robert F. Groene, Marketing Specialist, USDA/AMS/Dairy Division, Order Formulation Branch, Room 2968, South Building, P.O. Box 96456, Washington, DC 20090–6456, (202) 447–2089.

SUPPLEMENTARY INFORMATION: Prior documents in this proceeding:

Notice of Hearing: Issued October 16, 1987; published October 21, 1987 (52 FR 39232).

Recommended Decision: Issued July 21, 1988; published July 26, 1988 (53 FR 27993).

Final Decision: Issued September 27, 1988; published October 3, 1988 (53 FR 38730).

Findings and Determinations

The findings and determinations hereinafter set forth supplement those that were made when the Nashville, Tennessee, and Georgia orders were first issued and when they were amended. The previous findings and determinations are hereby ratified and confirmed, except where they may conflict with those set forth herein.

(a) Findings upon the basis of the hearing record. Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreements and to the orders regulating the handling of milk in the Nashville, Tennessee, and Georgia marketing areas.

Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said orders as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing areas; and the minimum prices specified in the orders as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said orders as hereby amended regulate the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, marketing agreements upon which a hearing has been held.

(b) Additional findings. It is necessary in the public interest to make this order amending the orders effective not later than December 1, 1988. Any delay beyond that date would tend to disrupt the orderly marketing of milk in the marketing areas.

The provisions of this order are known to handlers. The recommended decision of the Administrator was issued July 21, 1988 (53 FR 27993), and the decision of the Assistant Secretary containing all amendment provisions of this order was issued September 27, 1988 (53 FR 38730). The changes effected by this order will not require extensive preparation or substantial alteration in method of operation for handlers. In view of the foregoing, it is hereby found and determined that good cause exists for making this order amending the orders effective December 1, 1988, and that it would be contrary to the public interest to delay the effective date of this order for 30 days after its publication in the **Federal Register**. (Sec. 553(d), Administrative Procedure Act, 5 U.S.C. 551–559).

(c) Determinations. It is hereby determined that:

(1) The refusal or failure of handlers (excluding cooperative associations specified in section 8c(9) of the Act) of more than 50 percent of the milk, which is marketed within the marketing areas, to sign proposed marketing agreements, tends to prevent the effectuation of the declared policy of the Act;

(2) The issuance of this order amending the orders is the only practical means pursuant to the declared policy of the Act of advancing the interests of producers as defined in the orders;

(3) The issuance of the order amending the Nashville, Tennessee, order is approved or favored by at least two-thirds of the producers who

participated in a referendum and who during the determined representative period were engaged in the production of milk for sale in the marketing area; and

(4) The issuance of the order amending the Georgia order is approved or favored by at least two-thirds of the producers who during the determined representative period were engaged in the production of milk for sale in the marketing area.

List of Subjects in 7 CFR Parts 1098 and 1007

Milk marketing orders, Milk, Dairy products.

Order Relative to Handling

It is therefore ordered, That on and after the effective date hereof, the handling of milk in the Nashville, Tennessee, and Georgia marketing areas shall be in conformity to and in compliance with the terms and conditions of the aforesaid orders, as amended, and as hereby further amended, as follows:

1. The authority citation for 7 CFR Parts 1098 and 1007 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

PART 1098—MILK IN THE NASHVILLE, TENNESSEE, MARKETING AREA

2. In § 1098.7, paragraph (d)(2) is revised to read as follows:

§ 1098.7 Pool plant.

* * * * *

(d) * * *

(2) A distributing plant qualified pursuant to paragraph (a) of this section which meets the requirements of a fully regulated plant pursuant to the provisions of another order issued pursuant to the Act and from which a greater quantity of fluid milk products, except filled milk, is disposed of during the month from such plant as route disposition in the marketing area regulated by the other order than as route disposition in the Nashville, Tennessee, marketing area, except:

(i) That such distributing plant which was a pool plant under this order in the immediately preceding month shall continue to be subject to all of the provisions of this part until the third consecutive month in which a greater proportion of its route disposition is made in such other marketing area, unless the other order requires regulation of the plant without regard to its qualifying as a pool plant under this order;

(ii) On the basis of a written application made either by the plant operator or by the cooperative association supplying milk to such operator's plant, at least 15 days prior to the date for which a determination of the Secretary is to be effective, the Secretary may determine that the route disposition in the respective marketing areas to be used for purposes of this paragraph shall exclude (for a specified period of time) route disposition made under limited term contracts to governmental bases and institutions; and

(iii) A plant located in the marketing area that qualifies pursuant to paragraph (a) of this section which also meets the pooling requirements of another Federal order on the basis of route disposition shall be subject to all the provisions of this part so long as this order's Class I price applicable at such plant location is not less than the other order's Class I price applicable at this same location even though the plant may have greater route disposition in the other marketing area than in the Nashville marketing area.

3. In § 1098.52, paragraph (a)(4) is revised, paragraphs (b) and (c) are redesignated as paragraphs (c) and (d), and a new paragraph (b) is added to read as follows:

§ 1098.52 Plant location adjustment for handlers.

(a) * * *

(4) For such milk that is physically received at plants located east of the Mississippi River and south of the northern boundary of Tennessee, except for the Tennessee counties specified in paragraph (b) of this section or the northern boundary of North Carolina, no adjustment shall be made under this paragraph.

(b) For such milk that is physically received from producers or from a handler described in § 1098.9(c) at plants located in the Tennessee counties of Bedford, Cannon, Coffee, DeKalb, Franklin, Giles, Grundy, Lawrence, Lewis, Lincoln, Marshall, Maury, Moore, Rutherford, Van Buren, Warren, Wayne, and White, the price shall be adjusted by plus 8.5 cents per hundredweight.

* * * * *

§ 1098.60 [Amended]

4. In § 1098.60, paragraph (g) is removed.

5. In § 1098.61, paragraph (a)(2) is revised to read as follows:

§ 1098.61 Computation of uniform price (including weighted average price and uniform prices for base and excess milk).

(a) * * *

(2) Add an amount equal to the total value of the minus adjustments and subtract an amount equal to the total value of the plus adjustments computed pursuant to § 1098.75;

* * * * *

6. Section 1098.75 is revised to read as follows:

§ 1098.75 Plant location adjustments for producers and on nonpool milk.

(a) In making payments to producers pursuant to § 1098.73(b), the uniform price and the uniform price for base milk pursuant to § 1098.61 for producer milk received at a plant shall be adjusted at the rates set forth in § 1098.52 (a) and (b) according to the location of the plant; and

(b) The weighted average price applicable to other source milk shall be adjusted at the rates set forth in § 1098.52 (a) and (b) applicable at the location of the nonpool plant from which the milk was received, except that the weighted average price shall not be less than the Class III price.

§ 1098.90 [Amended]

7. Amend § 1098.90 by removing the last sentence which reads "For the months of March 1985 through July 1985, base milk shall be determined by the producer's base multiplied by the number of days in the month times the percentage of the producer's production pooled pursuant to § 1098.13."

§ 1098.92 [Amended]

8. Amend § 1098.92 by removing the last sentence which reads "For producer bases to be calculated on or before February 25, 1985, and subject to § 1098.93, the base to be calculated for each producer shall be an amount obtained by dividing the total pounds of his producer milk (as defined under the respective orders) received from the producer by all handlers fully regulated under the terms of the respective orders regulating the handling of milk in the Georgia; Tennessee Valley; Louisville-Lexington-Evansville; Alabama-West Florida; Memphis, Tennessee; Nashville, Tennessee; Fort Smith, Arkansas; and Central Arkansas marketing areas (Parts 1007, 1011, 1046, 1093, 1097, 1098, 1102, and 1108, respectively, of this chapter) during the immediately preceding months of September 1984 through January 1985 by the number of days' production represented by such producer milk or by 153, whichever is more; or by 138 pursuant to the above provisions."

PART 1007—MILK IN THE GEORGIA MARKETING AREA

9. In § 1007.7, paragraph (e)(3) is revised and a new paragraph (e)(4) is added to read as follows:

§ 1007.7 Pool plant.

* * * * *

(e) * * *

(3) A plant (except a plant that is a pool plant pursuant to paragraph (d) of this section) that is fully subject to the pricing and pooling provisions of another order issued pursuant to the Act, unless such plant is qualified as a pool plant pursuant to paragraphs (a) or (b) of this section and, except as provided in paragraph (e)(4) of this section, a greater volume of fluid milk products, except filled milk, is disposed of from such plant in this marketing area as route disposition and to pool plants pursuant to paragraphs (a) or (d) of this section than is disposed of from such plant in the marketing area regulated pursuant to the other order as route disposition and to plants qualified as fully regulated plants under such other order on the basis of route disposition in its marketing area.

(4) A distributing plant qualified pursuant to paragraph (a) of this section which meets the requirements of a fully regulated plant pursuant to the provisions of another Federal order and from which a greater quantity of Class I milk, except filled milk, is disposed of during the month in the Georgia marketing area as route disposition than as route disposition in the other marketing area, and such other order which fully regulates the plant does not contain provision to exempt the plant from regulation, even though such plant has greater route disposition in the marketing area of the Georgia order.

Signed at Washington, DC, on November 25, 1988.

Kenneth A. Gilles,

Acting Secretary.

[DA-89-001]

Milk in the Southwest Plains Marketing Area; Order Suspending Certain Provisions

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Suspension of rules.

SUMMARY: This action, for the months of November 1988 through August 1989, suspends certain shipping standards for supply plants under the Southwest Plains order. The action was requested by Kraft, Inc., Associated Milk Producers, Inc., and Mid-America Dairymen, Inc. The action is necessary to eliminate costly and inefficient movements of milk from supply plants that would have to be made to assure the continued pricing and pooling of milk of producers who have historically supplied the market's fluid milk needs.

EFFECTIVE DATE: December 1, 1988.

FOR FURTHER INFORMATION CONTACT: John F. Borovies, Marketing Specialist, USDA/AMS/Dairy Division, Order Formulation Branch, Room 2968, South Building, P.O. Box 96456, Washington, DC 20090-6456, (202) 447-2089.

SUPPLEMENTARY INFORMATION: Prior document in this proceeding:

Notice of Proposed Suspension: Issued October 31, 1988; published November 4, 1988 (53 FR 44593).

The Regulatory Flexibility Act (5 U.S.C. 601-612) requires the Agency to examine the impact of a proposed rule on small entities. Pursuant to 5 U.S.C. 605(b), the Administrator of the Agricultural Marketing Service has certified that this action will not have a significant economic impact on a substantial number of small entities. Such action will lessen the regulatory impact of the order on certain milk handlers and will tend to ensure that dairy farmers will continue to have their milk priced under the order and thereby receive the benefits that accrue from such pricing.

This final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512-1 and has been determined to be a "nonmajor" rule under the criteria contained therein.

This order of suspension is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and of the order regulating the handling of milk in the Southwest Plains marketing area.

Notice of proposed rulemaking was published in the **Federal Register** on November 4, 1988 (53 FR 44593) concerning a proposed suspension of certain provisions of the order. Interested persons were afforded opportunity to file written data, views, and arguments thereon. No views in opposition were received.

After consideration of all relevant material, including the proposal in the notice, the comments received, and other available information, it is hereby found and determined that for the months of November 1988 through August 1989 the following provisions of the order do not tend to effectuate the declared policy of the Act:

1. In § 1106.6, the words "during the month".

2. In § 1106.7(b)(1), the words "of February" and the words "until any month of such period in which less than 20 percent of the milk received or diverted as previously specified, is shipped to plants described in paragraph (a) or (e) of this section. A plant not meeting such 20 percent requirement in any month of such February-August period shall be qualified in any remaining month of such period only if transfers and diversions pursuant to paragraph (b)(2) of this section to plants described in paragraph (a) or (e) of this section are not less than 50 percent of receipts or diversions, as previously specified".

Statement of Consideration

This action, for November 1988 through August 1989, suspends the shipping standards for supply plants that were previously associated with the market. The order defines a supply plant as a plant from which fluid milk products are transferred or diverted to distributing plants during the month. It further provides that in order to be pooled under the order during the months of September through January, 50 percent of a supply plant's receipts must be shipped to distributing plants each month. Also, a supply plant that was pooled during each of the immediately preceding months of September through January shall continue to be pooled during the following months of February through August if 20 percent of its receipts are shipped to distributing plants. This action will remove all shipping standards for supply plants during the months of November 1988 through August 1989 that were pooled under the order during the immediately preceding September through January period.

The suspension was requested by Kraft, Inc., a handler who operates a supply plant that is pooled under the order. The action is supported by Associated Milk Producers, Inc., and Mid-America Dairymen, Inc., cooperative associations that represent a substantial number of producers who supply the market. These organizations indicate that there are ample supplies of direct-ship milk located near to distributing plants that are available to supply the fluid milk needs of such plants. As a result of production increases, it is unlikely that supplemental shipments of milk from supply plants will be necessary to meet the fluid milk needs of distributing

plants during the months of November 1988 through August 1989. As a result, this suspension action will allow handlers to avoid making costly and inefficient shipments of milk from supply plants that would otherwise have to be made to assure the continued pooling of milk of dairy farmers who have historically supplied the market's fluid milk needs.

It is hereby found and determined that thirty days' notice of the effective date hereof is impractical, unnecessary and contrary to the public interest in that:

(a) The suspension is necessary to reflect current marketing conditions and to assure orderly marketing conditions in the marketing area in that the action will permit milk that has been historically associated with the market to continue to be priced under the order without costly and inefficient shipments of milk from supply plants;

(b) This suspension does not require of persons affected substantial or extensive preparation prior to the effective date; and

(c) Notice of proposed rulemaking was given interested parties and they were afforded opportunity to file written data, views or arguments concerning this suspension. No comments in opposition were received.

Therefore, good cause exists for making this order effective upon publication in the **Federal Register**.

List of Subjects in 7 CFR Part 1106

Milk marketing orders, Milk, Dairy products.

It is therefore ordered, that the following provisions in §§ 1106.6 and 1106.7 of the Southwest Plains order are hereby suspended for the months of November 1988 through August 1989.

PART 1106—MILK IN THE SOUTHWEST PLAINS MARKETING AREA

1. The authority citation for 7 CFR Part 1106 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

§ 1106.6 [Suspended in part]

2. In § 1106.6, the words "during the month" are suspended.

§ 1106.7 [Suspended in part]

3. In § 1106.7(b)(1), the words "of February" and the words "until any month of such period in which less than 20 percent of the milk received or diverted as previously specified, is shipped to plants described in paragraph (a) or (e) of this section. A plant not meeting such 20-percent requirement in any month of such February–August period shall be qualified in any remaining month of such period only if transfers and diversions pursuant to paragraph (b)(2) of this section to plants described in paragraph (a) or (e) of this section are not less than 50 percent of receipts or diversions, as previously specified" are suspended.

Signed at Washington, DC, on November 25, 1988.

Kenneth A. Gilles

Assistant Secretary for Marketing and Inspection Services.

[FR Doc. 88–27635 Filed 11–30–88; 8:45 am]

BILLING CODE 3410–02–M

Animal and Plant Health Inspection Service

9 CFR Part 94

[Docket No. 88–108]

Importation of Meat and Animal Products

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: We are amending the regulations in 9 CFR Part 94 by removing all references to "Deputy Administrator" and replacing them with references to "Administrator." We are also removing all references to "Veterinary Services" and replacing them with references to "Animal and Plant Health Inspection Service." These changes are necessary to clarify that authority under these regulations is held by the Administrator, Animal and Plant Health Inspection Service, and not by the Deputy Administrator, Veterinary Services, Animal and Plant Health Inspection Service.

EFFECTIVE DATE: December 1, 1988.

FOR FURTHER INFORMATION CONTACT: Steven B. Farbman, Assistant Director, Regulatory Coordination, PPD, APHIS, USDA, Room 728, Federal Building, Hyattsville, MD 20782; 301–436–5533.

SUPPLEMENTARY INFORMATION: The regulations in 9 CFR Part 94 concern the importation into the United States of certain meat and animal products. Prior to the effective date of this document, these regulations stated that the Deputy Administrator, Veterinary Services, of the Animal and Plant Health Inspection Service, is responsible for various decisions made pursuant to the regulations. However, this is not correct. Authority and responsibility belongs to the Administrator, Animal and Plant Health Inspection Service.

Therefore, to clarify the regulations with respect to the Administrator's authority and responsibility, we are making nonsubstantive changes in the regulations. Among other changes, we are removing all references to "Deputy Administrator" and replacing them with references to "Administrator," and removing references to "Veterinary Services" and replacing them with references to "Animal and Plant Health Inspection Service." We are also adding definitions of "Administrator," "Animal and Plant Health Inspection Service," and "Department." These terms are now used in the regulations. However, none of them are defined. The definitions we are adding are the same definitions we use in other Parts of Title 9, Code of Federal Regulations.

Executive Order 12291 and Regulatory Flexibility Act

We are issuing this rule in conformance with Executive Order 12291, and we have determined that it is not a "major rule." Based on information compiled by the Department, we have determined that this rule will have an effect on the economy of less than $100 million; will not cause a major increase in costs or prices for consumers, individual industries, federal, state, or local government agencies, or geographic regions; and will not cause a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

For this action, the Office of Management and Budget has waived its review process required by Executive Order 12291.

Making the nonsubstantive wording changes described in this document will have no effect on importers, quarantine facility operators, or any other persons outside of the Animal and Plant Health Inspection Service.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

Effective Date

Determining the official responsible for decisions made under these animal importation regulations is a matter of internal Agency management. Therefore, neither a general notice of proposed rulemaking nor a 30-day delay in effective date is required under 5 U.S.C.

553. Accordingly, this regulation is effective upon publication.

Paperwork Reduction Act

This rule contains no information collection or recordkeeping requirements under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*).

Executive Order 12372

These programs/activities under 9 CFR Part 94 are listed in the Catalog of Federal Domestic Assistance under No. 10.025 and are subject to the provisions of Executive Order 12372, which required intergovernmental consultation with state and local officials. (See 7 CFR Part 3015, Subpart V.)

Lists of Subjects in 9 CFR Part 94

Animal diseases, Imports, Livestock and livestock products, Meat and meat products, Milk, Poultry and poultry products, African swine fever, Exotic Newcastle disease, Foot-and-mouth disease, Fowl pests, Garbage, Hog cholera, Rinderpest, Swine vesicular disease.

Accordingly, we are amending 9 CFR Part 94 as follows:

PART 94—RINDERPEST, FOOT-AND-MOUTH DISEASE, FOWL PEST (FOWL PLAGUE), NEWCASTLE DISEASE (AVIAN PNEUMOENCEPHALITIS), AFRICAN SWINE FEVER, AND HOG CHOLERA: PROHIBITED AND RESTRICTED IMPORTATIONS

1. The authority citation for Part 94 continues to read as follows:

Authority: 7 U.S.C. 147a, 150ee, 161, 162, 450; 19 U.S.C. 1306; 21 U.S.C. 111, 114a, 134a, 134b, 134c, and 134f; 42 U.S.C. 4331, 4332; 7 CFR 2.17, 2.51, and 371.2(d).

2. In § 94.0 the definition of "Deputy Administrator" is removed and definitions of "Administrator", "Animal and Plant Health Inspection Service", and "Department" are added, in alphabetical order, to read as follows:

§ 94.0 Definitions.

Administrator. The Administrator, Animal and Plant Health Inspection Service, or any person authorized to act for the Administrator.

Animal and Plant Health Inspection Service. The Animal and Plant Health Inspection Service, of the United States Department of Agriculture (APHIS.)

Department. The United States Department of Agriculture (USDA, Department).

* * * * *

§ 94.1 [Amended]

3. In § 94.1, paragraph (c)(2), remove the words "the Veterinary Services unit of".

§ 94.5 [Amended]

4. In § 94.5(c), remove the words "The Plant Protection and Quarantine Programs and Veterinary Services, Animal and Plant Health Inspection Service," and add the words "APHIS" in their place.

§ 94.8 [Amended]

5. In § 94.8, introductory paragraph, the word "administrator" is amended to read "Administrator".

§§ 94.3, 94.4, 94.6, 94.7, 94.8, 94.9, 94.11, 94.12, 94.14, 94.16 and 94.17 [Amended]

6. In addition to the amendments set forth above, in 9 CFR Part 94 remove the words "Deputy Administrator, Veterinary Services" and add, in their place, the word "Administrator" in the following places:

(a) Section 94.3;

(b) Section 94.4; including § 94.4(b)(3), footnote 2;

(c) Section 94.6; including § 94.6(d)(2), footnote 1; (g)(2)(i), footnote 3; (g)(2)(ii), footnotes 4 and 5;

(d) Section 94.7;

(e) Section 94.8;

(f) Section 94.9;

(g) Section 94.11;

(h) Section 94.12; including § 94.12(b)(1)(iii)(B), footnote 1;

(i) Section 94.14;

(j) Section 94.16; including § 94.16(b)(2), footnote 1;

(k) Section 94.17.

§§ 94.1, 94.4, 94.8, and 94.17 [Amended]

7. In addition to the amendments set forth above, in 9 CFR Part 94 remove the words "Veterinary Services" and add, in their place, the word "APHIS" in the following places:

(a) Section 94.1(c)(4);

(b) Section 94.4(b)(4);

(c) Section 94.8;

(d) Section 94.17.

§§ 94.4, 94.6, 94.8, 94.9, 94.10, 94.12, 94.16 [Amended]

8. In §§ 94.4, 94.6, 94.8, 94.9, 94.10, 94.12 and 94.16, remove the word "Deputy".

Done at Washington, DC, this 16th day of November 1988.

James W. Glosser,

Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 88-27138 Filed 11-30-88; 8:45 am]

BILLING CODE 3410-34-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 21

[Docket No. 25745; Amdt. No. 21-64]

Responsibilities of Manufacturers of Parts and Products Produced Under a Production Certificate

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: This amendment clarifies the responsibility of a production certificate holder with respect to the manufacture of a replacement or modification part for installation on a type certificated product. The amendment is intended to ensure that such manufacturers are aware of their responsibility to determine that each part produced conforms to its approved design and is in a condition for safe operation.

DATES: Effective date of this amendment is January 3, 1989. Comments must be received on or before January 3, 1989.

FOR FURTHER INFORMATION CONTACT: Melanie R. Miller, Aircraft Manufacturing Division (AIR-200), Aircraft Certification Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591, telephone (202) 267-8361.

ADDRESSES: Comments may be mailed or delivered in duplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attention: Rules Docket (AGC-10), Docket No. 25745, 800 Independence Avenue, SW., Washington, DC 20591. Comments may be examined in the Rules Docket weekdays, except Federal holidays, between 8:30 a.m. and 5 p.m.

SUPPLEMENTARY INFORMATION:

Comments Invited

Even though this action is in the form of a final rule which involves clarification of an existing rule and was not preceded by notice and public comment procedure, comments are invited on the rule change. Interested persons are invited to comment on any portion of this rule by submitting written data, views, or arguments as they may desire. When the comment period ends, the FAA will use the comments submitted, together with other available information, to review the regulations. After the review, if the FAA finds that changes are appropriate, it will initiate rulemaking proceedings to amend the

regulations. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in evaluating the effects of the rule. Anyone wishing the FAA to acknowledge receipt of their comments submitted in response to this final rule must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 25745." The postcard will be date/time stamped and returned to the commenter. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Background

Section 21.303 of the Federal Aviation Regulations (FAR) specifies that no person may manufacture a replacement or modification part for sale for installation on a type certificated product unless it was produced by an owner or operator for use on his own product, or was produced under a Parts Manufacturer Approval (PMA), a type certificate or production certificate, or a Technical Standard Order (TSO). The requirement that these parts be produced under an FAA-approved quality control system helps ensure that installation of replacement or modification parts on type certificated products does not adversely affect the airworthiness of the product. In addition, with respect to parts produced under a PMA, § 21.303(k) specifically requires that the manufacturer determine that each completed part conforms to the design data and is in a condition for safe operation. With respect to parts produced under a production certificate, however, § 21.165(b) provides that the manufacturer must determine that each completed product conforms to the type design and is in a condition for safe operation.

Discussion

The FAA has historically regarded the requirement of a determination of conformity and condition for safe operation as applicable to all parts produced for installation on a type certificated product, including those manufactured under a production certificate, even though the word "parts" does not appear in § 21.165(b). However, it has come to the attention of the FAA that recently there has been some confusion as to the applicability of the requirement to parts produced under a production certificate. Compliance with this requirement by all parts manufacturers is essential to aviation safety and, therefore, the FAA is amending the rule to clearly establish that a manufacturer under a production certificate is also required to ensure conformity and condition for safe operation of each part.

Good Cause Justification for Making This Amendment Effective Without Prior Public Comment

Since this amendment merely clarifies an existing standard and imposes no additional burden on any person, I find that notice and public procedures are unnecessary and would not reasonably be expected to result in the receipt of beneficial information. However, interested persons are invited to submit such comments as they may desire regarding this amendment.

Conclusion

The adoption of this amendment serves to clarify currently existing responsibilities of manufacturers of parts and products under production certificates. The amendment imposes no additional burden on any party. Therefore, the FAA has determined that this amendment is not a major rule under Executive Order 12291 or a significant rule under the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). In addition, it is certified that under the criteria of the Regulatory Flexibility Act, this rule will not have a significant impact, positive or negative, on a substantial number of small entities, and the rule does not warrant preparation of a regulatory evaluation as the overall impact on manufacturers will be minimal.

Federalism Determination

The amendment set forth herein would not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. The amendment set forth would be promulgated pursuant to the authority in the Federal Aviation Act of 1958, as amended (49 U.S.C. 1301, *et seq.*), which has been construed to preempt state law regulating the same subject. Therefore, in accordance with Executive Order 12612, it is determined that such a regulation does not have federalism implications warranting the preparation of a Federalism Assessment.

List of Subjects in 14 CFR Part 21

Air transportation, Aircraft, Aviation safety, Safety.

The Amendment

In consideration of the foregoing, the Federal Aviation Administration amends Part 21 of the Federal Aviation Regulations (14 CFR Part 21) as follows:

PART 21—CERTIFICATION PROCEDURES FOR PRODUCTS AND PARTS

1. The authority citation for Part 21 continues to read as follows:

Authority: 49 U.S.C. 1344, 1348(c), 1352, 1354(a), 1355, 1421 through 1431, 1502, 1651(b)(2); 42 U.S.C. 1857f-10, 4321 *et seq.*, E.O. 11514; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983).

2. Section 21.165(b) is revised to read as follows:

§ 21.165 Responsibility of holder.

* * * * *

(b) Determine that each part and each completed product submitted for airworthiness certification or approval conforms to the approved design and is in a condition for safe operation.

Issued in Washington, DC, on November 28, 1988.

T. Allan McArtor,

Administrator.

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 88-CE-28-AD; Amdt. 39-6087]

Airworthiness Directives; Piper Model PA-46-310P Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new Airworthiness Directive (AD), applicable to Piper Model PA-46-310P airplanes, which modifies the engine cooling system. Incidents have occurred that indicate excessive operating temperatures have resulted in engine damage. The actions of this AD will prevent catastrophic engine failure due to insufficient cooling air.

DATES: *Effective Date:* January 3, 1989.

Compliance: Required within the next 50 hours time-in-service after the effective date of this AD unless already accomplished.

ADDRESSES: Piper Aircraft Corporation Service Bulletin (SB) No. 892, dated August 24, 1988, applicable to this AD-

VOL 53 ISS 231 DE 1 1988 UMI

may be obtained from the Piper Aircraft Corporation, 2926 Piper Drive, Vero Beach, Florida 32960; Telephone (407) 567–4366. This information also may be examined in the Rules Docket, Federal Aviation Administration, Office of the Assistant Chief Counsel, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: Mr. Jerry Robinette, Aerospace Engineer, Propulsion Branch, ACE–140A, Atlanta Aircraft Certification Office, FAA, 1669 Phoenix Parkway, Suite 210C, Atlanta, Georgia 30349; Telephone (404) 991–3810.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an AD requiring modification of the engine cooling system on all Piper Model PA–46–310P airplanes was published in the **Federal Register** on September 29, 1988 (53 FR 38023). The proposal resulted from recent tests conducted by Piper on a Model PA–46–310P airplane which confirmed that both oil and cylinder head normal operating temperatures were exceeded due to insufficient air flow through the engine compartment. This condition, if not corrected, can result in catastrophic failure of the engine due to excessive heat. As a result, Piper issued SB No. 892, dated August 24, 1988, specifying a powerplant cooling improvement kit which adds another louver to each nose gear door, modifies the baffle in front of the number six cylinder and moves the cylinder head temperature thermocouple to the number six cylinder. This kit allows for increased cooling air flow thereby reducing engine temperatures so that the limits are not exceeded within normal operation.

Since the condition described herein is likely to exist or develop in other Piper Model PA–46–310P airplanes of the same design, an AD was proposed which would require compliance with Piper SB No. 892 for these airplanes.

Interested persons have been afforded an opportunity to comment on the proposal. Only one commenter responded and his concern was limited to the FAA determination of the related cost to the public. The NPRM stated that the cost of kit, plus $25 allowance for paint and 6 hours labor allowance will be absorbed by Piper. The commenter stated that this offer is effective for 180 days from August 24, 1988. This comment is correct and this amount will be included in the cost determination. However, it does not result in a change to the overall cost determination. Accordingly, the proposal is adopted without change.

The FAA has determined that this regulation involves 403 airplanes at an approximate one-time cost of $338 (for the kit $25 allowance for paint and 6 hours labor allowance to be absorbed by Piper effective for 180 days from August 24, 1988) for each airplane, or a total one-time fleet cost of $136,214. The cost of complying with this AD will not have significant impact on any small entities owning affected airplanes.

The regulations adopted herein will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Therefore, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the final evaluation prepared for this action is contained in the regulatory docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "**ADDRESSES**".

Air transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the FAR as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new AD:

Piper: Applies to Model PA–46–310P (all serial numbers) airplanes certificated in any category.

Compliance: Required within the next 50 hours time-in-service after the effective date of this AD, unless already accomplished.

To prevent possible catastrophic engine failure accomplish the following:

(a) Modify the engine cooling system in accordance with Piper Service Bulletin 892, dated August 24, 1988.

(b) Airplanes may be flown in accordance with FAR 21.197 to a location where this AD may be accomplished.

(c) An equivalent means of compliance with this AD, if used, must be approved by the Manager, Atlanta Aircraft Certification Office, ACE–115A, Federal Aviation Administration, 1669 Phoenix Parkway, Suite 210C, Atlanta, Georgia 30349.

All persons affected by this directive may obtain copies of the document referred to herein upon request to the Piper Aircraft Corporation, 2926 Piper Drive, Vero Beach, Florida 32960, or may examine this document at the FAA, Office of the Assistant Chief Counsel, 601 East 12th Street, Kansas City, Missouri 64106.

This amendment becomes effective on January 3, 1989.

Issued in Kansas City, Missouri, on November 22, 1988.

Barry D. Clements,

Manager, Small Airplane Directorate, Aircraft Certification Service.

14 CFR Part 97

[Docket No. 25741; Amdt. No. 1388]

Standard Instrument Approach Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: *Effective:* An effective date for each SIAP is specified in the amendatory provisions.

Incorporation by reference—approved by the Director of the Federal Register on December 31, 1980, and reapproved as of January 1, 1982.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

For Examination—

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591;
2. The FAA Regional Office of the region in which the affected airport is located; or
3. The Flight Inspection Field Office which originated the SIAP.

For Purchase—

Individual SIAP copies may be obtained from:

1. FAA Public Inquiry Center (APA–200), FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591; or
2. The FAA Regional Office of the region in which the affected airport is located.

By Subscription—

Copies of all SIAPs, mailed once every 2 weeks, are for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

FOR FURTHER INFORMATION CONTACT: Donald K. Funai, Flight Procedures Standards Branch (AFS–230), Air Transportation Division, Office of Flight Standards, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267–8277.

SUPPLEMENTARY INFORMATION: This amendment to Part 97 of the Federal Aviation Regulations (14 CFR Part 97) prescribes new, amended, suspended, or revoked Standard Instrument Approach Procedures (SIAPs). The complete regulatory description of each SIAP is contained in official FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR Part 51, and § 97.20 of the Federal Aviation Regulations (FARs). The applicable FAA Forms are identified as FAA Forms 8260–3, 8260–4, and 8260–5. Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the **Federal Register** expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form document is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

This amendment to Part 97 is effective on the date of publication and contains separate SIAPs which have compliance dates stated as effective dates based on related changes in the National Airspace System or the application of new or revised criteria. Some SIAP amendments may have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for some SIAP amendments may require making them effective in less than 30 days. For the remaining SIAPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedures (TERPs). In developing these SIAPs, the TERPS criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs is unnecessary, impracticable, and contrary to the public interest and, where applicable, that good cause exists for making some SIAPs effective in less than 30 days.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

RIN 2137-AA98

Aviation Economic Regulations; Exemptions for Air Taxi Operations

AGENCY: Research and Special Programs Administration, Office of the Secretary, DOT.

ACTION: Final rule.

SUMMARY: This final rule amends Part 298 by requiring commuter air carriers providing scheduled passenger service to file Schedule F-1 "Report of Financial Data" of RSPA Form 298-C. This schedule is needed to obtain quarterly financial data (Total Operating Revenues, Total Operating Expenses, Net Profit or (Loss) and Passenger Revenues—Scheduled Service). This information will be used primarily by the Department of Transportation to monitor the continuing fitness of commuter air carriers as required by section 401(r) of the Federal Aviation Act of 1958, as amended. The financial information will also benefit the Department's work in other program areas such as in the administration of the Aviation Trust Fund and Loan Guarantee Programs, in econometric modeling and regulatory cost-benefit analyses which support aviation policy and regulatory decisions, and in the Federal Aviation Administration's planning for its allocation of inspection resources.

EFFECTIVE DATE: January 1, 1989.

FOR FURTHER INFORMATION CONTACT: Jack M. Calloway or Richard G. Minick, Office of Aviation Information Management, Regulations Division, DAI-10, Research and Special Programs Administration, Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590, (202) 366-4383 or (202) 366-4389, respectively.

SUPPLEMENTARY INFORMATION:

Background

In a notice of proposed rulemaking (NPRM) published April 19, 1988 (53 FR 12774) the Department of Transportation (hereafter referred to as either DOT or Department) proposed to require commuter air carriers providing scheduled passenger service (commuters) to file four financial data elements. The data elements proposed for collection were (1) Total Operating Revenues, (2) Total Operating Expenses, (3) Net Profit or (Loss) and (4) Passenger Revenues—Scheduled Service. This information would be reported on the quarterly Schedule F-1 "Report of Financial Data" of Form 298-C *Report of Financial and Operating Statistics for Small Aircraft Operators*. Schedule F-1 is currently being filed by carriers certificated under section 401 of the Federal Aviation Act of 1958, as amended (FAAct), whose operations are limited to the United States and performed with only small aircraft (aircraft with 60 seats or less or 18,000 pounds maximum payload capacity or less). This group of carriers is commonly referred to as small certificated air carriers. The proposal would add the new reporting by amending Part 298 (14 CFR Part 298) of the Department's regulations.

The NPRM stated that the four financial data elements were needed by the Department to monitor continuing fitness, to provide input for econometric models, to assist with the administration of aviation trust fund revenue calculations, to perform regulatory analysis and evaluations, to monitor the aircraft guaranteed loan program, and to aid the Federal Aviation Administration (FAA) in the allocation of its inspection resources.

Comments

Comments were received from two commuters: Metro Airlines, Inc. (Metro) and Wings Airways (Wings); two trade associations: Regional Airline Association (RAA) and the Airline Pilots Association; and one certificated air carrier, Midway Airlines, Inc. (Midway), who filed late. The Airline Pilots Association filed two separate comments—one by the Economics and Financial Office (ALPA—Economics) and one by the Engineering and Safety Department (ALPA—Safety). Two commenters supported the proposed rule with modifications, while the remainder objected to adoption of the proposal. The issues raised by the commenters are discussed below.

SEC Report in Lieu of 298-C, Schedule F-1

Metro stated that it is a public holding company for five wholly owned commuter subsidiaries. These subsidiaries are Metroflight, Inc.; Metro Express, Inc.; Aviation Associates, Inc.; Metro Express II, Inc.; and Chaparral Airlines, Inc. As a public holding company, Metro stated that it is already subject to the more stringent reporting requirements of the Securities and Exchange Commission (SEC). It objected to filing a set of quarterly financial reports in addition to the reports it files with the SEC. Because its fiscal year ends April 30 rather than December 31,

its accounting quarters do not coincide with the calendar quarters as proposed in the NPRM; therefore, it must file eight quarterly reports a year—four with DOT and four with SEC. To alleviate this additional reporting burden, Metro suggested that DOT exempt publicly held carriers or carriers that are subsidiaries of publicly held carriers from the reporting requirements and accept for DOT purposes the same reports that are filed with SEC. Metro felt that the incongruence in quarters would not have a significant impact on the comparability of data and suggested that DOT accept reporting by fiscal quarters by all publicly held corporations.

The Department cannot accept SEC filings in lieu of Schedule F-1 from either a publicly held holding company or a publicly held company for several reasons. First, the results reported to SEC are the consolidated results of the holding company and individual company results are obscured. In the case of Metro, nothing can be derived from the consolidated results concerning the individual commuters. If DOT were doing a fitness review on one of Metro's commuter subsidiaries, we would not know, for example, whether the subsidiary made a profit or loss, or how much passenger service revenue was generated. Second, in many holding companies, the individual subsidiary's business activities are not related. For instance, one subsidiary could be a commuter, one could be a hotel, and one could be a car rental agency. The consolidated report to SEC would be meaningless concerning the commuter. Third, for SEC reporting, revenue and expense data may be reported in broad categories. For example, all passenger revenue may be reported as passenger revenue without disclosing the source—scheduled or charter service. Looking at a publicly held company, we would not know whether its main source of revenue was scheduled or charter operations. Finally, the reporting periods for SEC are not standard. They are the fiscal reporting periods selected by the respondent. Contrary to Metro's contention, erroneous conclusions can be made from data that are not uniformly reported. For instance, suppose several commuters had a fiscal year that ended October 31 and other commuters' fiscal year ended December 31. The last quarter of the October 31 fiscal year does not include two major traffic producing holidays of Thanksgiving and Christmas, while the last quarter of the calendar year does. An analyst using the last quarter's data could very well conclude that the last quarter's traffic had declined.

Data Submitted by Wholly-Owned Commuter Subsidiaries

It was Midway's position that affiliated commuters of certificated air carriers should be excluded from reporting the financial data required by this rule. Midway's wholly-owned subsidiary, Fischer Bros. Aviation d/b/a Midway Commuter (MC), operates as a commuter carrier. Midway contended that because MC's financial data are consolidated with those of Midway and since only allocations are available for MC for some revenue and costs, the data would not be of any use to DOT. In fact, use of the data for financial fitness or other purposes would produce seriously misleading information according to Midway. Midway stated that some revenue and cost allocations made by it are done for internal purposes only, and do not reflect operations of MC as a stand-alone company as they are not arms-length transactions. It further stated that the Department could use the reports filed by it to target carriers for safety inspections. Since Midway did not name the reports, we assume they meant the Form 41 report filed under Part 241 of the Department's regulations (14 CFR Part 241). Further, Midway stated that if affiliated subsidiaries of certificated air carriers are not excluded, then the Department should at least indicate in the final rule its willingness to grant waivers from the reporting requirement.

The Department is not persuaded by Midway's arguments. The Department agrees that a commuter's data when dealing with its parent may not be an arms-length transaction. The nature of the relationship presumes control of the commuter by the certificated carrier, otherwise there would be no affiliation. The parent normally dictates to the subsidiary the policy in such areas as revenue allocations where both are involved, depreciation, tax accounting, and overhead pools. However, if the Department does not feel that the information provided by the commuter is sufficient, it can supplement this information by information requests under Part 204 (14 CFR Part 204) for continuing fitness or under the delegated authority of Part 385 (14 CFR Part 385) for other needs. Finally, the use of Midway's reports to monitor MC is not a viable alternative. The same reason that the holding company's report cannot be used applies here—the information related to the commuter is obscured.

Concerning Midway's waiver comment, there may be instances when a wholly owned subsidiary may want to request a waiver and a waiver may be warranted. The Department would consider such a request on a case-by-case basis. Part 298 has a waiver paragraph which states that reporting requirements of that part can be waived in the public interest if (1) unusual circumstances warrant such a departure, (2) a specifically defined alternate procedure will result in a substantially equivalent or more accurate data, and (3) the alternative approach will maintain or improve reporting between air carriers (14 CFR 298.65)

Fitness Factors

Wings commented that the financial data sought by the rule will not enable DOT to determine a carrier's fitness, since fitness to operate is not determined by a carrier's bottom line or profit and loss. Such items as maintenance and insurance expenses would be much more indicative of a carrier's fitness according to Wings. Wings stated that it uses a significant portion of its revenues to maintain its aircraft above the FAA prescribed minimums, and spends more for liability insurance than the required minimum. Because its net income would be less than a competitor that only meets the minimum requirements, Wings stated it should not be considered less safe than its competitor. Wings cited the large fines and penalties recently imposed on some profitable carriers for safety violations, to demonstrate that net income does not necessarily indicate a carrier's fitness to operate.

The Department agrees that the bottom line is not necessarily indicative of a fit or unfit carrier. Because of this, other aspects of a carrier's operations are considered in a continuing fitness investigation. As explained in the notice of proposed rulemaking, a continuing fitness investigation involves three parts of a carrier's operations—managerial qualifications, compliance with laws and regulations, and financial posture. The profit and loss statement is clearly a part of the financial picture.

Both Wings and RAA stated that fitness from the perspective of safety is a function of the FAA's air carrier inspections and not something that can be ascertained from a carrier's bottom line of its profit and loss statement. RAA further stated that the National Transportation Safety Board conducted extensive hearings in 1980 and found that there is no direct correlation between safety and financial fitness. ALPA-Safety supported the data collection contending that financial stability of a carrier does have a direct

VOL
53
ISS
231
DE
1
1988
UMI

impact on safety. It alleges that, in a deregulated environment, some carriers allow their maintenance, operations, and pilot training to be influenced by the bottom line which at times may not be in the best interests of safety.

The Department agrees that safety issues are considered primarily in the FAA's inspection program rather than the fitness investigation which this rulemaking supports. The fitness criteria were explored very thoroughly when the Civil Aeronautics Board (CAB) amended its regulations by enacting 14 CFR Part 204 "Data to Support Fitness Determinations." (EDR-385, 44 FR 44106, July 26, 1979/ER-1180 45 FR 42599, June 25, 1980). The Department has a continuing fitness responsibility as defined by section 401(r) of the FAAct. As stated in the NPRM, "In light of the increasingly important role played by commuters in the air transportation system it has become essential for the Department to have the ability to monitor the financial condition of commuter carriers as part of the Department's continuing fitness oversight responsibilities."

Planning and Regulatory Evaluation

Wings and RAA stated that the number of enplaned passengers, which the Department already collects, is the critical item for planning airports, transportation facilities, air traffic control expansion, etc. Both contended that whether a carrier is making money is irrelevant to the planning function. Also, RAA stated that the enplanement data provided by certificated air carriers and commuters are also sufficient for evaluating costs and benefits of new regulations.

While the Department agrees that data on enplaned passengers are an important analytical tool, financial data are also important. As stated in the NPRM, a valid financial base is necessary to project commuter costs and yields for econometric models that are used for planning purposes. These models relate economic activity and cost variables to commuter traffic and airport activity. An example of a cost variable used in a commuter model is "real" yield. This variable represents the real price increase in airline fares, discounting inflation, and is used in the model to forecast revenue passenger-miles. First the current dollar yield is derived by dividing passenger revenue by revenue passenger-miles. Real yield is then derived by dividing the current yield by the Consumer Price Index. The real yield is then combined with one or more demand variables to generate traffic forecasts for assessing future aeronautic needs (48 FR 36601, August 12, 1983). Currently, FAA is using passenger revenue reported by approximately 50 small certificated air carriers to forecast the aeronautic needs of the commuter industry (approximately 125 commuters). The same small certificated air carrier group's data are used to perform regulatory evaluations of new regulations. Clearly, it is in the interest of the public and the commuter industry to have the best information available when planning for future aeronautic needs. Overstating activity levels could cause FAA to overbuild and spend public funds unnecessarily. On the other hand, understating activity could lead to major disruptions in the national air transportation system.

Trust Fund Revenue and Aircraft Loan Guarantee

RAA stated that it finds it ironic that DOT wants to require commuters to provide financial data to estimate trust fund revenues, when the government refuses to spend the money already in the fund. In the same vein, RAA stated that the information is not needed for monitoring the Aircraft Loan Guarantee Program which expired in 1983. According to RAA, there are only six regional air carriers having an outstanding loan balance of over $11 million at May 31, 1988, which hardly justifies the imposition of a reporting burden on the entire industry. Midway stated that the loan program did not apply to MC.

The question of spending trust fund revenue raises policy issues that are irrelevant to, and outside the scope of this proceeding. As far as the loan program, the Department would not require reporting by the entire commuter industry solely to monitor six carrier loans which will all be due by the mid-1990's. The loan program is only one of several programs for which the Department would use the information. Since FAA has to waive any loan conditions that are not met, the Department agrees with RAA that it will ultimately know when a carrier is in difficulty. However, the availability of recurrent financial information will provide an early warning before a carrier actually defaults. The commuter industry is very volatile and a carrier's financial picture can change rapidly.

Balance Sheet Data

ALPA-Economics agreed with the proposed data collection, but felt the Department did not go far enough. It felt that since Part 204 requires balance sheet information for fitness reviews, the rule should also require balance sheet data.

Balance sheet data are not an issue in this rulemaking since they were not proposed. However, the needs of the Department were very carefully reviewed before the NPRM was issued. It should be noted that no program manager expressed a need for recurrent collection of balance sheet data.

Due Dates

The NPRM proposed a due date of 40 days after the end of the reporting period for submitting the data. Metro stated that the interval should be 45 days to conform with SEC requirements.

All schedules in the Form 289-C report are based on a 40-day interval and commuters are already filing two traffic schedules based on this interval. The Department is not persuaded to change the 40-day interval which has been a standard for about 20 years.

Confidentiality

Wings and RAA expressed concerns about confidentiality. Both stated that many commuters are privately held companies and damage could result from disclosing the information to third parties under the Freedom of Information Act (FOIA) or to other Federal agencies. Both expressed concern about the competitive harm that could result from disclosure. They stated that total operating revenues and expenses are critical information to commuters. Disclosure could facilitate intrusions into a carrier's markets which might be unable to support additional service, resulting in the possible failure of one or both carriers and loss of service to the community.

The Department believes these concerns to be unfounded. Identical information has been collected from small certificated air carriers since the beginning of 1985. It too was granted a three year confidential period. In over three years experience in dealing with this collection, the carrier's individual data has not been divulged to the public and not even one FOIA request has been received. Should an FOIA request be received, Departmental policy on "confidential commercial information" provides business submitters of data both notification and an opportunity to object before a disclosure determination is made. The Department will take into account the views of the commuters providing the data should a request for release be received. Finally, the confidential period of three years is long enough to greatly diminish the alleged value of the data.

ALPA-Economics stated that because the commuters play a significant part in the air transportation system, the

information is in the public interest and the Department can no longer justify granting confidential treatment to it. It believes that if the Department is going to monitor the financial condition of each commuter in order to protect the public interest, it is only reasonable to conclude that the prompt release of the information will result in even closer scrutiny and a concomitant increase in the protection accorded the public. Moreover, the need for protection is heightened by the marketing alliances which have developed between the many certificated air carriers and commuters.

As stated in the NPRM, the CAB tried to collect this information on a voluntary basis from commuters in the early 1980's with the firm of Dun and Bradstreet acting as a collection agent. The voluntary approach was not successful. There was a reluctance on the part of commuters, who were privately owned, to submit data that would be publicly disclosed. Because many commuters are still privately owned, the Department feels there would still be this reluctance to submit sensitive information, if the data were immediately available to the public. To allay any fears and to assure ready compliance with this rule, the Department will maintain the financial information confidential for three years as proposed.

Administrative Notices

Executive Orders 12291, 12612, and 12630; Departmental Policy and Procedures; Regulatory Flexibility Act; and Paperwork Reduction Act of 1980, as amended.

The final rule has been reviewed under Executive Order 12291, and it has been determined that it is not a major rule. It will not result in an annual effect on the economy of $100 million or more. There will be no increase in production costs or prices for consumers, individual industries, Federal, State or local governments, agencies or geographical regions. Furthermore this rule would not adversely affect competition, employment, investment, productivity, innovation, or the ability of United States based enterprises to compete in domestic or export markets. This regulation will result in a very slight increase in reporting burden for commuter air carriers (see Regulatory Flexibility Act analysis section).

This action has been analyzed in accordance with the principles and criteria in Executive Order 12612, and it has been determined that the final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

This rule has been analyzed in accordance with the principles and criteria contained in Executive Order 12630, and it has been determined that it does not pose the risking of a taking of constitutionally protected private property.

This regulation is not significant under the Department's Regulatory Policies and Procedures, dated February 26, 1979, as it does not involve important Departmental policies. Its economic impact is minimal and full regulatory evaluation is not required. The rule only affects the scheduled passenger commuter air carrier industry.

Regulatory Flexibility Act

The Regulatory Flexibility Act (Pub. L. 96–354) requires regulatory flexibility analyses for rules that, if adopted, will have a "significant economic impact on a substantial number of small entities." Under the Act, both an increase or decrease in economic impact must be considered by the agency.

Under DOT's definition, a direct air carrier is considered to be a "small entity" if it provides air transportation only with small aircraft as defined in 14 CFR 399.73 (up to 60 seats and/or up to 18,000 pounds payload capacity). The rule will affect commuter air carriers providing scheduled passenger service. This group fits the definition of small entity within the meaning of the Act and DOT regulation.

This final rule will add four financial data elements that will be filed on a quarterly basis. These elements are (1) Total Operating Revenues, (2) Total Operating Expenses, (3) Net Income or (Loss), and (4) Passenger Revenues—Scheduled Service. It is estimated that this reporting requirement will result in a slight increase in costs for commuters. However, no comments were received concerning costs. The CAB staff conducted a survey of commuters in 1980 to determine, among other things, the marginal costs attributable to filing a balance sheet, income statement and appropriate notes on a quarterly basis. The balance sheet contained 26 elements while the income statement contained 19 elements. Based on this survey, it was estimated that average first year costs, including start-up costs, would be $1900 per carrier. The annual recurring costs after the first year were estimated at $1200 per carrier. Adjusting for inflation, these costs at 1987 would be estimated at $2600 and $1650, respectively.

The four income and expense data elements in this rule represent a great deal less data than the CAB survey considered. The financial data are a type generally maintained by all companies for Federal and state tax purposes, as well as their own management purposes. Except for Metro's and Midway's comments because of their organizational structures, no one commented that the data were not readily available. With respect to passenger revenues, carriers are required to file with the Internal Revenue Service a quarterly excise tax return on the transportation of passengers, but such returns are held confidential (26 CFR 49.6011(a)–1). Consequently, it is estimated that the start-up and recordkeeping costs would be nominal with minimal small recurring costs. Based on a per element cost using 1987 figures, the first year costs for a carrier would be approximately $235 with recurring costs of approximately $155 thereafter. On an industry basis, first year costs would approximate $29,200 with $19,400 in recurring costs.

Based on the above analysis, I certify that this rule will not have a significant impact on the scheduled passenger commuter air carrier industry.

Paperwork Reduction Act of 1980

Carrier reporting burden for this collection of information is estimated to vary from 1 to 5 hours per quarterly response depending on the sophistication of the carrier's accounting system, with an average of 2 hours per quarterly response, including time for reviewing instructions, gathering and maintaining the data needed, and completing and reviewing the reporting form. Send any comments regarding this burden estimate or any aspect of this collection of information, including suggestions for reducing the reporting burden, to:

Director, Office of Aviation Information Management, DAI–1, Research and Special Programs Administration, DOT, 400 Seventh Street SW., Washington, DC 20590, and Office of Information and Regulatory Affairs, DOT/RSPA Desk Officer, Office of Management and Budget, Washington, DC 20503.

Air carriers, Registration, Insurance, Reporting.

Final Rule

Accordingly, the Department of Transportation amends 14 CFR Part 298, *Exemptions for Air Taxi Operators* as follows:

PART 298—[AMENDED]

1. The authority for Part 298 continues to read:

VOL
53
ISS
231
DE
1
1988
UMI

Authority: Secs. 204, 401, 407, 416, 418, 419, Pub. L. 85–726, as amended, 72 STAT. 743, 754, 766, 711; 91 STAT. 1284; 49 U.S.C. 1324, 1371, 1377, 1386, 1388.

2. Section 298.62 *Reporting of financial data* is amended by revising paragraph (a) and republishing paragraph (c) to read as follows:

§ 298.62 Reporting of financial data.

(a) Each commuter air carrier and each small certificated air carrier shall file RSPA Form 298–C, Schedule F–1 "Report of Financial Data." This report shall be filed quarterly as set forth in § 298.60 of this part.

* * * * *

(c) This schedule shall be used to report financial data for the overall or system operations of the carrier. At the option of the carrier, the data may be reported in whole dollars by dropping the cents. Financial data shall be reported in the following categories:

(1) Line 1 "Total Operating Revenues" shall include gross revenues accruing from services ordinarily associated with air transportation and air transportation-related services. This category shall include revenue derived from scheduled service operations, revenue derived from nonscheduled service operations, amounts of compensation paid to the carrier under section 419 of the Federal Aviation Act and other transport-related revenue such as in-flight sales, restaurant and food service (ground), rental of property or equipment, limousine service, cargo pick-up and delivery charges, and fixed-base operations involving the selling or servicing of aircraft, flying instructions, charter flights, etc.

(2) Line 2 "Total Operating Expenses" shall include expenses of a character usually and ordinarily incurred in the performance of air transporation and air transportation services. This category shall include expenses incurred: directly in the in-flight operation of aircraft; in the holding of aircraft and aircraft personnel in readiness for assignment to an in-flight status; on the ground in controlling and protecting the in-flight movement of aircraft; landing, handling or servicing aircraft on the ground; selling transportation; servicing and handling traffic; promoting the development of traffic; and administering operations generally. This category shall also include expenses which are specifically identifiable with the repair and upkeep of property and equipment used in the performance of air transportation, all depreciation and amortization expenses applicable to property and equipment used in providing air transportation services, all expenses associated with the transport-related revenues included on line 1 of this schedule, and all other expenses not specifically mentioned which are related to transport operations. Interest expense and other nonoperating expenses attributable to financing or other activities which are extraneous to and not an integral part of air transportation or its incidental services shall not be included in this category.

(3) Line 3 "Net Income or (Loss) shall reflect all operating and nonoperating items of profit and loss recognized during the period except for prior period adjustments.

(4) Line 4 "Passenger Revenues-Scheduled Service" shall include revenue generated from the transportation of passengers between pairs of points which are served on a regularly scheduled basis.

* * * * *

3. A copy of RSPA Form 298–C, Schedule F–1 is attached as Exhibit A.

Note: Exhibit A will not appear in the Code of Federal Regulations.

Issued in Washington, DC, on November 23, 1988.

DEPARTMENT OF COMMERCE

Bureau of Export Administration

15 CFR Part 799

[Docket No. 80878-8178]

Machine Tools and Dimensional Inspection Machines; Clarification

AGENCY: Bureau of Export Administration, Commerce.

ACTION: Final rule.

SUMMARY: The Bureau of Export Administration maintains the Commodity Control List (CCL) (Supplement No. 1 to 15 CFR 799.1), which specifies those items subject to Department of Commerce export controls. Numerically controlled machine tools and dimensional inspection machines are controlled under Export Control Commodity Number (ECCN) 1091A on the CCL. This document correctly amends paragraph (b) of ECCN 1091A to clarify codification problems arising from publication of "Removal of Validated License Controls on Jig Grinders Exported to Country Groups QWY" (53 FR 7733, Mar. 10, 1988) and "Amendments to the Commodity Control List Based on Coordinating Committee Review" (53 FR 18271, May 23, 1988). The March 1988 regulations redesignated paragraph (b)(ii) as paragraph (b)(iii), added a new paragraph (b)(ii), and revised the newly redesignated paragraph (b)(iii introductory text. The May 1988 regulations incorrectly revised paragraph (b)(ii), which had been redesignated as (b)(iii), and incorrectly added a paragraph (b)(iii), which already existed. The May 1988 regulations should have revised paragraph (b)(iii) and added a new paragraph (b)(iv). This document, rather than correcting the amendatory language and codification of the May 1988 regulations, correctly revises paragraphs (b) (ii) and (iii) and adds paragraph (b)(iv) for the convenience of the reader.

EFFECTIVE DATE: December 1, 1988.

FOR FURTHER INFORMATION CONTACT: Larry Hall, Office of Technology and Policy Analysis, Department of Commerce, Washington, DC 20230, Telephone: (202) 377-8550.

SUPPLEMENTARY INFORMATION:

Rulemaking Requirements

1. Because this rule concerns a foreign and military affairs function of the United States, it is not a rule or regulation within the meaning of section 1(a) of Executive Order 12291, and it is not subject to the requirements of that Order. Accordingly, no preliminary or final Regulatory Impact Analysis has to be or will be prepared.

2. This rule does not contain a collection of information subject to the requirements of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*).

3. This rule does not contain policies with Federalism implications sufficient

VOL 53 ISS 231 DE 1 1988 UMI

to warrant preparation of a Federalism assessment under Executive Order 12612.

4. Because a notice of proposed rulemaking and an opportunity for public comment are not required to be given for this rule by section 553 of the Administrative Procedure Act (5 U.S.C. 553), or by any other law, under sections 603(a) and 604(a) of the Regulatory Flexibility Act (5 U.S.C. 603(a)) no initial or final Regulatory Flexibility has to be or will be prepared.

5. Section 13(a) of the Export Administration Act of 1979 (EAA), as amended (50 U.S.C. app. 2412(a)), exempts this rule from all requirements of section 553 of the Administrative Procedure Act (APA) (5 U.S.C. 553), including those requiring publication of a notice of proposed rulemaking, an opportunity for public comment, and a delay in effective date. This rule is also exempt from these APA requirements because it involves a foreign and military affairs function of the United States. Section 13(b) of the EAA does not require that this rule be published in proposed form because this rule does not impose a new control. Further, no other law requires that a notice of proposed rulemaking and an opportunity for public comment be given for this rule.

Accordingly, this rule is being issued in final form. However, as with other Department of Commerce rules, comments from the public are always welcome. Comments should be submitted to: Joan Maguire, Office of Technology and Policy Analysis, Bureau of Export Administration, Department of Commerce, P.O. Box 273, Washington, DC 20044.

List of Subjects in 15 CFR Part 799

Exports, Reporting and recordkeeping requirements.

Accordingly, Part 799 of the Export Administration Regulations (15 CFR Parts 768–799) is amended as follows:

PART 799—[AMENDED]

1. The authority citation for Part 799 continues to read as follows:

Authority: Pub. L. 96–72, 93 Stat. 503 (50 U.S.C. app. 2401 *et seq.*), as amended by Pub. L. 97–145 of December 29, 1981 by Pub. L. 100–418 of August 23, 1988, and by Pub. L. 99–64 of July 12, 1985; E.O. 12525 of July 12, 1985 (50 FR 28757, July 16, 1985); Pub. L. 95–223 of December 28, 1977 (50 U.S.C. 1701 *et seq.*); E.O. 12532 of September 9, 1985 (50 FR 36861, September 10, 1985) as affected by notice of September 4, 1986 (51 FR 31925, September 8, 1986); Pub. L. 99–440 of October 2, 1986 (22 U.S.C. 5001 *et seq.*); and E.O. 12571 of October 27, 1986 (51 FR 39505, October 29, 1986).

Supplement No. 1 to § 799.1 [Amended]

2. In Supplement No. 1 to § 799.1 (the Commodity Control List), Commodity Group 0 (Metal-Working Machinery), ECCN 1091A is amended by revising paragraphs (b) (ii) and (iii) and by adding paragraph (b)(iv) to read as follows:

1091A Numerical control units, numerically controlled machine tools, dimensional inspection machines, direct numerical control systems, specially designed sub-assemblies, and "specially designed software". * * *

* * * * *

(b) * * *

(ii) Jig grinders having all of the following characteristics:

(1) Overall positioning accuracy in any axis equal to or greater (coarser) than:

(A) ±0.005 mm (0.0002 in.) for machines with a total length of axis travel equal to or less than 300 mm (12 in.);

or

(B) ± (0.005 + ((0.002/300) × (L–300)) mm (with L expressed in mm) [or 0.0002 + ([0.000080/12) × (L–12)) in. (with L expressed in inches)] for machines with a total length of axis travel, L, greater than 300 mm (12 in.); and

(2) Not more than 2 axes capable of simultaneously coordinated contouring motion.

(iii) Machine tools (other than boring mills, milling machines, and machining centers, described in paragraph (b)(i) having all of the following characteristics:

(1) Radial axis motion measured at the spindle axis equal to or greater than 0.0008 mm TIR (peak-to-peak) in one revolution of the spindle (for lathes, turning machines, contour grinding machines, *etc.*);

(2) Meeting the requirements of paragraphs (b) (i)(1)(A), (i)(6) and (i)(7);

(iv) Dimensional inspection machines, having all of the following characteristics:

(1) A linear positioning accuracy equal to or worse than:

(A) ± [3 + L/300) micrometer for L shorter than or equal to 3,300 mm;

(B) ±14 micrometer for L longer than 3,300 mm;

(2) A rotary accuracy of equal to or worse than 5 seconds for every 90 degrees; *and*

(3) Meeting the requirements of (b)(i)(1):

(For high precision turning machinery, see also ECCN 1370A.)

* * * * *

Dated: November 23, 1988.

Michael E. Zacharia,

Assistant Secretary for Export Administration.

BILLING CODE 3510–DT–M

FEDERAL TRADE COMMISSION

16 CFR Part 13

[Dkt. C–3235]

Nasser Chahmirzadi, M.D.; Prohibited Trade Practices, and Affirmative Corrective Actions

AGENCY: Federal Trade Commission.

ACTION: Consent order.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent order prohibits, among other things, Nasser Chahmirzadi, M.D., a Rhode Island obstetrician, from dealing with any government health care program on collectively determined terms or from collectively refusing to deal with any government health care program.

DATE: Complaint and Order issued August 26, 1988.[1]

FOR FURTHER INFORMATION CONTACT: Jane R. Seymour, FTC/S–2115, Washington, DC 20580. (202) 326–2687.

SUPPLEMENTARY INFORMATION: On Wednesday, June 1, 1988, there was published in the **Federal Register**, 53 FR 19930, a proposed consent agreement with analysis In the Matter of Nasser Chahmirzadi, M.D., for the purpose of soliciting public comment. Interested parties were given sixty (60) days in which to submit comments, suggestions or objections regarding the proposed form of order.

A comment was filed and considered by the Commission. The Commission has ordered the issuance of the complaint in the form contemplated by the agreement, made its jurisdictional findings and entered its order to cease and desist in disposition of this proceeding.

The prohibited trade practices and/or corrective actions, as codified under 16 CFR Part 13, are as follows: Subpart—Combining Or Conspiring: Section 13.384 Combining or conspiring; § 13.385 To boycott seller-suppliers; § 13.430 To enhance, maintain or unify prices; § 13.433 To fix prices; § 13.470 To

[1] Copies of the Complaint and the Decision and Order are available from the Commission's Public Reference Branch, H–130, 6th Street & Pennsylvania Avenue, NW., Washington, DC 20580.

restrain and monopolize trade; § 13.497 To terminate or threaten to terminate contracts, dealings, franchises, etc. Subpart—Corrective Actions And/Or Requirements: Section 13.533 Corrective actions and/or requirements; § 13.533–20 Disclosures; § 13.533–45 Maintain records; § 13.533–45(k) Records, in general; § 13.533–50 Maintain means of communication. Subpart—Cutting Off Supplies Or Service: Section 13.610 Cutting off supplies or service; § 13.660 Threatening withdrawal of patronage.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 520

Oral Dosage Form New Animal Drugs Not Subject to Certification; Febantel-Praziquantel Paste

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of a supplemental new animal drug application (NADA) filed by Mobay Corp., Animal Health Division, providing for the safe and effective use of febantel-praziquantel oral paste for the removal of hookworms (*Uncinaria stenocephala*) and ascarids (*Toxascaris leonina*) in dogs and puppies in addition to other approved uses as a dog and cat anthelmintic.

EFFECTIVE DATE: December 1, 1988.

FOR FURTHER INFORMATION CONTACT: Marcia K. Larkins, Center for Veterinary Medicine (HFV–112), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–3430.

SUPPLEMENTARY INFORMATION: Mobay Corp., Animal Health Division, P.O. Box 390, Shawnee Mission, KS 66201, filed supplemental NADA 133–953, which provides for the use of VERCOM Paste (febantel-praziquantel oral paste) in dogs and puppies for the removal of hookworms (*U. stenocephala*) and ascarids (*T. leonina*), in addition to previous approval for treating dogs, puppies, cats, and kittens for certain hookworm, whipworm, ascarid, and tapeworm infections. The supplement is approved and the regulations are amended in 21 CFR 520.903d(c)(2) to reflect the approval. The basis for approval of this NADA is discussed in the freedom of information summary.

In accordance with the freedom of information provisions of Part 20 (21

CFR Part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (HFA–305), Food and Drug Administration, Room 4–62, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

The agency has determined under 21 CFR 25.24(d)(l)(i) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

List of Subjects in 21 CFR Part 520

Animal drugs.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Center for Veterinary Medicine, Part 520 is amended as follows:

PART 520—ORAL DOSAGE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

1. The authority citation for 21 CFR Part 520 continues to read as follows:

Authority: Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)); 21 CFR 5.10 and 5.83.

2. Section 520.903d is amended by revising paragraph (c)(2)(i) to read as follows:

§ 520.903d Febantel-praziquantel paste.

* * * * *

(c) * * *

(2) *Indications for use.* (i) Dogs and puppies: For removal of hookworms (*Ancylostoma caninum* and *Uncinaria stenocephala*), whipworms (*Trichuris vulpis*), ascarids (*Toxocara canis* and *Toxascaris leonina*), and tapeworms (*Dipylidium caninum* and *Taenia pisiformis*).

* * * * *

Dated: November 22, 1988.

Gerald B. Guest,

Director, Center for Veterinary Medicine.

21 CFR Part 558

New Animal Drugs for Use in Animal Feeds; Fenbendazole

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of a supplemental new animal drug application (NADA) filed by Hoechst-Roussel Agri-Vet Co. The supplement provides for extended treatment times and added claims for use of fenbendazole Type A medicated articles for making Type C medicated swine feeds for use as an anthelmintic.

EFFECTIVE DATE: December 1, 1988.

FOR FURTHER INFORMATION CONTACT: John L. Olsen, Center for Veterinary Medicine (HFV–135), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–4913.

SUPPLEMENTARY INFORMATION: Hoechst-Roussel Agri-Vet Co., Route 202–206 North, Somerville, NJ 08876, filed a supplement to NADA 131–675 which provides for use of Safe-Guard® Type A medicated articles (fenbendazole) for making Type C medicated swine feed. In addition to the previously approved uses the supplement provides for extending treatment time from 3 to 12 days. It also provides for efficacy of all treatment regimens against adult stages of *Metastrongylus pudendotectus* and for use for 3 days for removal and control of larvae (L3,4 stages—liver, lung, intestinal forms) of the large roundworm (*Ascaris suum*), and larvae (L2,3,4 stages—intestinal mucosal forms) of the whipworm (*Trichuris suis*).

The supplement is approved and the regulations are amended in 21 CFR 558.258 by revising paragraph (c)(1). The basis for approval is discussed in the freedom of information summary.

In accordance with the freedom of information provisions of Part 20 (21 CFR Part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

The agency has determined under 21 CFR 25.24(d)(1)(i) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

List of Subjects in 21 CFR Part 558

Animal drugs, Animal feeds.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Center for Veterinary Medicine, Part 558 is amended as follows:

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

1. The authority citation for 21 CFR Part 558 continues to read as follows:

Authority: Sec. 512, 82 Stat. 343–351 (21 U.S.C. 360b); 21 CFR 5.10 and 5.83.

2. Section 558.258 is amended by revising paragraph (c)(1) to read as follows:

§ 558.258 Fenbendazole.

* * * * *

(c) *Conditions of use.* (1) It is used in swine feed as follows:

(i) A total of 9 milligrams per kilogram of body weight given over a 3- to 12-day period for the removal of the adult stage of the large roundworm (*Ascaris suum*), whipworm (*Trichuris suis*), nodular worm (*Oesophagostomum dentatum, O. quadrispinulatum*), small stomach worm (*Hyostrongylus rubidus*), lungworm (*Metastrongylus apri* and *M. pudendotectus*), and the adult and larval stages of the kidneyworm (*Stephanurus dentatus*).

(ii) A total of 9 milligrams per kilogram of body weight given over a 3-day period for removal and control of larvae (L3,4 stages—liver, lung, intestinal forms) of the large roundworm (*A. suum*), and larvae (L2,3,4 stages—intestinal mucosal forms) of the whipworm (*T. suis*).

(iii) Feed as sole ration.

* * * * *

Dated: November 22, 1988.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Parts 1 and 602

[T.D. 8219]

Income Tax; Taxable Years Beginning After December 31, 1953; OMB Control Number Under the Paperwork Reduction Act; Survivor Benefits, Distribution Restriction and Various Other Issues Under the Retirement Equity Act of 1984

AGENCY: Internal Revenue Service, Treasury.

ACTION: Correction of final regulations.

SUMMARY: This document contains corrections to the **Federal Register** publication on Monday, August 22, 1988, beginning at 53 FR 31837 of the final regulations. The final regulations relate

to qualified joint and survivor annuities required to be provided under certain retirement plans under section 401(a)(11) prior to its amendment by the Retirement Equity Act of 1984 (REA 1984). The pre-REA 1984 regulations were changed to conform them to *BBS Associates, Inc. v. Commissioner of Internal Revenue.*

FOR FURTHER INFORMATION CONTACT: William D. Gibbs, Office of the Assistant Chief Counsel, Employee Benefits and Exempt Organizations, 202–377–9372 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

On August 22, 1988, final regulations relating to qualified joint and survivor annuities required to be provided under certain retirement plans under section 401(a)(11) were published in the **Federal Register** (53 FR 31837).

Need for Correction

As published, the final regulations contain typographical and other errors which may prove to be misleading and are in need of correction.

Correction of Publication

Accordingly, the publication of the final regulations (T.D. 8219) which was the subject of FR Doc. 88–18886 (53 FR 31837), is corrected as follows:

§ 1.401(a)–11 [Corrected]

1. On page 31842, second column, in § 1.401(a)–11(g)(2)(ii), in the 13th line, "year" should read "years".

2. On page 31842, second column, in § 1.401(a)–11(g)(2)(iii), in the last line, after "REA" add "1984".

§ 1.401(a)–20 [Corrected]

3. On page 31843, second column, in § 1.401(a)–20, in the second line of A–5 (a)(2), after "412" add ", or" and remove "or" in the next printed line.

4. On page 31843, second column, in § 1.401(a)–20, the 21st line of A–5 (a)(3) should read "transactions that subject the".

5. On page 31843, third column, in § 1.401(a)–20, the third and fourth line of Q–7 should read "plan, are benefits payable in the form of a QPSA or QJSA?"

6. On page 31845, first column, in § 1.401(a)–20, in the sixth line of A–11 after "or" add "a".

7. On page 31845, third column, in § 1.401(a)–20, in the fifth line of A–16 after "of" add "a".

8. On page 31846, second column, in § 1.401(a)–20, in the 21st line of A–17(b)(4) "would" was misspelled.

9. On page 31846, second column, in § 1.401(a)–20, in the next to the last line of A–18 "QJSA" was misprinted.

10. On page 31847, second column, in § 1.401(a)–20, the first line of A–24(c) should read "(c) *Renegotiation.* For purposes of".

11. On page 31848, third column, in § 1.401(a)–20, in the seventh line of A–31 (c) after "waive" add "a".

12. On page 31849, first column, in § 1.401(a)–20, in the 12th line of A–33 (a) "participant" should read "participant's".

13. On page 31849, second column, in § 1.401(a)–20, in the eighth line of A–35 (a)(4) "a" should read "an".

§ 1.401(a)–13 [Corrected]

14. On page 31851, second column, in § 1.401(a)–13(g)(4)(iii)(B), in the first line "alternative" should read "alternate".

§ 1.410(a)–8 [Corrected]

15. On page 31851, third column, in § 1.410(a)–8, in the eighth line from the bottom of the column "employeer" should read "employee".

§ 1.410(a)–9 [Corrected]

16. On page 31852, first column, in § 1.410(a)–9(a)(1), line 13 should read "410(a)(5)(E)(i) or 411(a)(6)(E)(i) is the".

17. On page 31852, first column, in § 1.410(a)–9(b), the next to the last line should read "the period of consecutive breaks-in-".

§ 1.411(a)–7 [Corrected]

18. On page 31852, second column, in § 1.411(a)–7(d)(2)(ii)(D)(*2*), in the last two lines of that paragraph "break in service" should read "break-in-service".

19. On page 31852, second column, in § 1.411(a)–7(d)(2)(ii)(E), in the second line "break in service" should read "break-in-service".

20. On page 31852, second column, in § 1.411(a)–7(d)(2)(ii)(E), in the fourth line "break in" should read "break-in-".

§ 1.411(a)–11 [Corrected]

21. On page 31853, third column, in § 1.411(a)–11(e)(1), in the 11th and 13th lines after "employer" add a ",".

§ 1.411(d)–3 [Corrected]

22. On page 31854, first column, under "§ 1.411(d)–3 [Amended]", line four of the amendatory instructions of Par. 10. should read "§1.411(d)–5 for rules that apply to".

§ 1.411(d)–3T [Corrected]

23. On page 31854, first column, under "§ 1.411(d)–3T [Removed]", lines two and three of the amendatory instructions of Par. 11. should read "removed. New § 1.411(d)–5 is added in its place immediately after § 1.411(d)–4".

§ 1.411(d)–4 [Corrected]

24. On page 31854, first column, section heading "§ 1.411(d)–4" should read "§ 1.411(d)–5".

25. On page 31854, second column, in correctly designated § 1.411(d)–5(b)(1), fourth line from the top of the column should read "maintained pursuant to collective".

26. On page 31854, second column, in correctly designated § 1.411(d)–5(b)(2)(i), in the seventeenth line "break in service" should read "break-in-service".

§ 1.417(e)–1 [Corrected]

27. On page 31854, second column, in § 1.417(e)–1(a)(1), in the eighth line "§1.401(a)–11A" should read "§1.401(a)–20".

28. On page 31854, second column, in § 1.417(e)–1(a)(2), in the second line "§ 1.411(a)(11)–1(c)(6)" should read "§ 1.411(a)–11".

29. On page 31854, second column, in § 1.417(e)–1(a)(3), in the second line "§ 1.411(a)(11)–1" should read "§ 1.411(a)–11".

30. On page 31855, first column, in § 1.417(e)–1(c), the sixth line should read "immediately distributable, (see".

31. On page 31855, first column, in § 1.417(e)–1(c), the thirteenth line should read "and consent requirements of section 417".

32. On page 31855, first column, in § 1.417(e)–1(d), the second line, "purpose" should read "purposes".

§ 602.101 [Corrected]

33. On page 31856, first column, under "§ 602.101 [Amended]", lines three and four of the amendatory instructions for Par. 14. should read "the table "§ 1.401(a)–20 . . . 1545–0928" and "§ 1.402(f)–1 . . . 1545–0928"."

Dale D. Goode,

Chief, Regulations Unit, Assistant Chief Counsel (Corporate).

BILLING CODE 4830–01–M

COPYRIGHT ROYALTY TRIBUNAL

37 CFR Part 304

Cost of Living Adjustment for Performance of Musical Compositions by Public Broadcasting Entities Licensed to Colleges and Universities

AGENCY: Copyright Royalty Tribunal.

ACTION: Final rule.

SUMMARY: The Copyright Royalty Tribunal announces a cost of living adjustment of 4.25% in the royalty rates to be paid by public broadcasting

entities licensed to colleges, universities or other nonprofit educational institutions which are not affiliated with National Public Radio for the use of copyrighted published nondramatic musical compositions. The cost of living adjustment is an annual adjustment required by 37 CFR 304.10(b) of the Tribunal's rules.

EFFECTIVE DATE: January 2, 1989.

FOR FURTHER INFORMATION CONTACT: Robert Cassler, General Counsel, Copyright Royalty Tribunal, 1111 20th Street NW., Suite 450, Washington, DC 20036, (202) 653–5175.

SUPPLEMENTARY INFORMATION: On December 29, 1987, the Copyright Royalty Tribunal published in the **Federal Register** the rates and terms for the copyright compulsory license applicable to the use by public broadcasting entities of published nondramatic musical works and published pictorial, graphic and sculptural works. 52 FR 49010. It was determined in that proceeding that the royalty rate to be paid by public broadcasting entities licensed to colleges, universities or other nonprofit educational institutions which are not affiliated with National Public Radio for the use of copyrighted published nondramatic musical compositions would be adjusted each year according to changes in the Consumer Price Index. 37 CFR 304.10.

The change in the cost of living as determined by the Consumer Price Index from the last Index published prior to December 1, 1987 to the last Index published prior to December 1, 1988 was 4.25% (1988's figure was 120.2; 1987's figure was 115.3, based on 1982–1984 equalling 100). Rounding off to the nearest dollar, the Tribunal announces an adjustment in the royalty rate to apply to use of musical compositions in the repertory of ASCAP and BMI of $166, each, $39 for the use of musical compositions in the repertory of SESAC.

List of Subjects in 37 CFR Part 304

Copyrights, Music, Radio, Television.

PART 304—[AMENDED]

1. The authority citation for Part 304 continues to read as follows:

Authority: 17 U.S.C. 118 and 801 (1976).

§ 304.5 [Amended]

2. 37 CFR 304.5 is amended by revising paragraphs (c) (1) through (4).

* * * * *

(c) * * *

(1) For all such compositions in the repertory of ASCAP annually: $166.

(2) For all such compositions in the repertory of BMI annually: $166.

(3) For all such compositions in the repertory of SESAC annually: $39.

(4) For the performances of any other such composition: $1.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[FRL–3484–9]

Approval and Promulgation of Implementation Plans; State of California, Sacramento Ozone Plan

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This notice announces EPA's final disapproval of the California State Implementation Plan (SIP) for ozone in the Sacramento Air Quality Maintenance Area (AQMA). This final action is being taken because the SIP for the Sacramento AQMA does not provide for attainment of the ozone national ambient air quality standard (NAAQS) by the statutory deadline of December 31, 1987, or by any other fixed date, as required by section 172(a) of the Clean Air Act ("the Act") (42 U.S.C. 7502(a)). Pursuant to section 110(a)(2)(I) of the Act and EPA's implementing regulations, this disapproval results in the imposition of a moratorium on the construction and modification of major stationary sources of volatile organic compounds (VOC) in the Sacramento AQMA. *See* 40 CFR 52.24 and 42 U.S.C. 7410(a)(2)(I).

EFFECTIVE DATES: EPA's disapproval of the Sacramento ozone SIP is effective

VOL
53
ISS
231

1988
UMI

January 3, 1989. The ban on construction or modification of major sources is effective January 3, 1989.

FOR FURTHER INFORMATION CONTACT: Wallace D. Woo, Chief, State Liaison Section, Air Management Division, Environmental Protection Agency, Region 9, 215 Fremont Street, San Francisco, California 94105, Telephone: (415) 974–7634, (FTS) 454–7634.

SUPPLEMENTARY INFORMATION:

A. Background

A brief background of the Act and the history of the Sacramento SIP is provided here. For a more comprehensive description of the relevant requirements of the Act and EPA's regulatory actions on the Sacramento SIP, see the proposed disapproval of the SIP for Sacramento and four other areas in California (52 FR 26431, July 14, 1987) and the General Preamble accompanying that notice (52 FR 26404).

The Clean Air Act mandates a system of state implementation plans as the chief mechanism for meeting the NAAQS. Section 110(a)(1) directs the state to submit, within nine months from the promulgation of primary NAAQS, a plan for implementing those NAAQSs. Section 110 lays out the requirements that the plan must meet and provides a mechanism for revision of the plan where the Administrator finds that the plan is substantially inadequate to achieve the NAAQS by the relevant deadline.

Recognizing that numerous areas had not been able to attain the NAAQS within the initial timeframe, Congress added Part D to the Act in 1977. Part D allowed certain "nonattainment" areas to extend the time for attainment to December 31, 1982, with the exception that certain areas, in which it was "not possible" to meet that deadline for ozone and carbon monoxide (CO) despite the application of all reasonably available control measures, could apply for a further extension to December 31, 1987.

California requested, and EPA approved, an extension of the statutory attainment date for ozone in the Sacramento AQMA to December 31, 1987. The State then submitted 1982 plan updates for the California ozone SIP for Sacramento and several other areas. In 1983, EPA proposed to disapprove these revisions and impose a construction ban on the ground that the plan did not provide for attainment of the ozone standard by the end of 1987, or reasonable further progress in the interim. 48 FR 5074 (February 3, 1983). On July 30, 1984, EPA took final action to approve the control measures submitted by the State, but held open the question of whether to approve the attainment demonstration in the SIP submittal for Sacramento and for three other areas of California (South Coast, Fresno, and Ventura) similarly lacking approvable SIP attainment demonstrations for ozone or carbon monoxide. 49 FR 30300, 30305 (July 30, 1984).

In July 1987, EPA reproposed to disapprove the ozone SIP for Sacramento, South Coast, Fresno, Ventura and several other areas. 52 FR 26408–26409, 26431–26435 (July 14, 1987). In that notice, EPA stated that it lacked authority to continue to defer action on the plans for those areas that had not yet submitted a plan demonstrating attainment by the deadline, and that it had no choice but to disapprove the plans for those areas and impose a construction ban under section 110(a)(2)(I).

In November 1987, the Ninth Circuit Court of Appeals issued its opinion in *Abramowitz v. United States Environmental Protection Agency*, 832 F.2d 1071 (9th Cir. 1987). The court held that EPA lacked authority to defer action on whether the South Coast ozone and carbon monoxide plan meets all of the Part D requirements of the Act when the Agency approved the individual control measures. The court ordered EPA to "disapprove the relevant SIP provisions." 832 F.2d at 1079. Pursuant to the Ninth Circuit Court's instructions, EPA took final action in January 1988 to disapprove the South Coast SIP. 53 FR 1780 (January 22, 1988). EPA also took final action in September 1988 to disapprove Ventura County's ozone SIP. 53 FR 39087 (September 28, 1988).

B. Discussion

EPA concludes that the attainment demonstration deficiency in the Sacramento ozone SIP is substantially identical to the deficiencies in the South Coast CO and ozone SIP and the Ventura ozone SIP, and EPA is therefore now taking final action to disapprove the Sacramento ozone SIP. The ground for EPA's final disapproval of the Sacramento SIP is that it does not demonstrate attainment of the ozone NAAQS by December 31, 1987, or by any other fixed date (near-term or otherwise) thereafter. Under the terms of the Act and EPA's regulations, such final plan disapproval results in the imposition of a construction ban in the Sacramento AQMA for major new sources and major modifications of existing sources of VOC.[1] Section 110(a)(2)(I); 49 CFR 52.24(a). Under 40 CFR 52.24 (f)(4)(ii) and (f)(5)(i), a major stationary source or major modification that is major for VOC is also major for ozone.

Today's action is also driven by the reasoning of the decision in *Abramowitz*. That decision establishes that EPA has no discretion under the law to postpone the final disapproval when the Agency has effectively determined that the plan does not provide for timely attainment. Thus, EPA is not responding directly to public comments on EPA's July 14, 1987 proposal. EPA may respond to some of the comments in the future, perhaps in connection with EPA's final policy on how areas like Sacramento should correct their SIPs after December 31, 1987.

C. Final Action

EPA is today taking final action to disapprove the 1982 Sacramento AQMA SIP revision for attainment of the primary NAAQS for zone. Pursuant to the Administrative Procedure Act, 5 U.S.C. 553(d), this disapproval is effective January 3, 1989. The effective date for the construction ban is January 3, 1989.

Under Executive Order 12291, this action is not "Major." It has been submitted to the Office of Management and Budget for review.

Under the Regulatory Flexibility Act, 5 U.S.C. 605(b), EPA must assess the impact of proposed or final rules on small entities. EPA does not have sufficient information to determine the impacts that the construction moratorium announced in today's notice may have on small entities, because it is difficult to obtain reliable information on future plans for business growth. Even if this action were to have a significant impact, however, the Agency could not modify its action. Under the Act, the imposition of a construction moratorium is mandatory whenever the Agency determines that an implementation plan for a nonattainment area fails to meet the requirements of Part D of the Act, and that determination, in turn, is effectively required by the Ninth Circuit's decision in *Abramowitz*.

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by January 30, 1989. This action may not be challenged later in proceedings to enforce its requirements. *See* section 307(b)(2).

List of Subjects in 40 CFR Part 52

Air pollution control, Ozone, Intergovernmental relations.

Dated: November 28, 1988.

Lee M. Thomas,

Administrator.

40 CFR Part 52, Subpart F, is amended as follows:

PART 52—[AMENDED]

Subpart F—California

1. The authority citation for Part 52 continues to read as follows:

Authority: 42 U.S.C. 7401–7642.

2. Section 52.237 is amended by adding new paragraph (a)(3) to read as follows:

§ 52.237 Part D disapproval.

(a) * * *

(3) The ozone attainment demonstration for the Sacramento AQMA. No major stationary source, or major modification of a stationary source, of volatile organic compounds may be constructed in the Sacramento nonattainment area unless the construction permit application is complete on or before January 3, 1989.

* * * * * *

[FR Doc. 27760 Filed 11–30–88; 8:45 am]

BILLING CODE 6560–50–M

[1] The Sacramento Air Quality Maintenance Area includes all of Sacramento and Yolo Counties and portions of Placer and Solano Counties. Within this area, any major new source or major modification for which the construction permit application is incomplete on or after January 3, 1989 will be prohibited from construction. EPA's criteria for determining an application to be complete are explained in 52 FR 26404 and 26409 n.18 (July 14, 1987).

40 CFR Part 52

[FRL-3478-2]

Approval and Promulgation of State Implementation Plans; Revision to Regulation No. 3, Visibility Protection; Colorado

AGENCY: Environmental Protection Agency.

ACTION: Final rulemaking.

SUMMARY: In this action, EPA is approving revisions to the Colorado Air Quality Control Commission (AQCC) Regulation No. 3 (Sections IV and XIV) of the Colorado State Implementation Plan (SIP) pertaining to New Source Review (NSR) visibility protection in mandatory Class I Federal areas. This action results from a rulemaking on July 12, 1985 (50 FR 28544), in which EPA promulgated Federal regulations for visibility NSR (40 CFR 51.307) in states which failed to comply with the provisions of 40 CFR 51.307.

On May 8, 1986, the Governor of Colorado submitted a revision to AQCC Regulation No. 3 (Section IV) of the SIP to include visibility NSR protection in mandatory Class I Federal areas from sources locating in nonattainment areas. Also included in the submittal is a revision to AQCC Regulation No. 3 (Section XIV) which provides for visibility protection in mandatory Class I Federal areas from sources locating in attainment areas. AQCC Regulation No. 3, Section XIV was originally submitted on April 18, 1983, as part of Colorado's Prevention of Significant Deterioration (PSD) regulations.

EPA's approval of the attainment and nonattainment NSR procedures for visibility protection apply only to those source categories regulated by previously approved NSR and PSD regulations. Colorado's Visibility NSR regulations meet the criteria of 40 CFR 51.307, and these regulations will replace, where appropriate, the Federal Visibility NSR regulations now in effect for Colorado.

EFFECTIVE DATE: December 1, 1988.

ADDRESSES: Copies of the submittal are available for public inspection between 8:00 a.m. and 4:00 p.m., Monday through Friday, at the following offices:

Air Programs Branch, Environmental Protection Agency, Region VIII, 999 18th Street, Suite 500, Denver, Colorado 80202–2405

Environmental Protection Agency, Public Information Reference Unit, Waterside Mall, 401 M Street, SW., Washington, DC 20460.

SUPPLEMENTARY INFORMATION:

Background

Section 169A of the Clean Air Act (Act), 42 U.S.C. 7491, requires visibility protection for mandatory Class I Federal areas where EPA has determined that visibility is an important value. ("Mandatory Class I Federal areas" (hereinafter Class I areas) are certain national parks, wilderness areas, and international parks, as described in section 162(a) of the Act, 42 U.S.C. 7472(a), 40 CFR 81.400-81.437.) Section 169A specifically requires EPA to promulgate regulations requiring certain states to amend their SIPs to provide for visibility protection.

On December 2, 1980, EPA promulgated the required visibility regulations in 45 CFR 80084, codified at 40 CFR 51.300 *et seq.* It required the states to submit their revised SIPs to satisfy those provisions by September 2, 1981 (see 45 FR 80091, codified at 40 CFR 51.302(a)(1)). That rulemaking resulted in numerous parties seeking judicial review of the visibility regulations. In March 1981, the court stayed the litigation, pending EPA action on related administrative petitions for reconsideration of the visibility regulations filed with the Agency.

In December 1982, the Environmental Defense Fund (EDF) filed suit in the U.S. District Court for the Northern District of California alleging that EPA failed to perform a nondiscretionary duty under section 110(c) of the Act to promulgate Visibility SIPs (hereinafter Federal Implementation Plans (FIPs)). A negotiated Settlement Agreement between EPA and EDF required EPA to promulgate Visibility FIPs on a specific schedule. It required EPA to propose to incorporate Federal regulations in states where SIPs were deficient with respect to the 1980 Visibility NSR regulations (40 CFR 51.307). However, the Settlement Agreement allowed each State an opportunity to avoid Federal promulgation if it submitted an SIP by May 6, 1985. Colorado was one of the states that did not meet this deadline. Final promulgation of Federal Visibility NSR regulations for all states (including Colorado) having deficient SIPs was published on July 12, 1985 (49 FR 28544), and became effective August 12, 1985.

On April 18, 1983, the Governor of Colorado submitted to EPA Colorado's PSD Regulation (Regulation No. 3) which included Section XIV, providing for visibility protection in Class I areas from sources locating in attainment areas. This revision to the Colorado SIP was adopted by the Colorado Air Quality Control Commission (AQCC) March 10, 1983. EPA approved this PSD revision to the Colorado SIP with some source category exemptions on September 2, 1986 (51 FR 31125). No action was taken with respect to the Colorado regulation for visibility protection in Class I areas at that time. Therefore, the EPA promulgated visibility regulations remained in effect.

On May 8, 1986, the Governor of Colorado submitted to EPA a revision to AQCC Regulation No. 3 which was adopted on March 20, 1986. This revision adds Section IV.D.2.a.(vi) to AQCC Regulation No. 3, providing for NSR visibility protection in Class I areas from sources locating in nonattainment areas. This addition requires an applicant to demonstrate that emissions from a new or modified source locating in a nonatttainment area will not adversely impact visibility in a Class I area. Visibility analyses and/or comments from the Federal Land Manager (FLM) must be considered in the decision to grant or deny the permit. In addition to adding Section IV.D.2.a.(vi) to AQCC Regulation No. 3, the May 8, 1986, submittal again included Section XIV in response to EPA's promulgated Visibility NSR regulations.

On March 31, 1987 (52 FR 10239), EPA proposed to approve both the attainment and nonattainment NSR procedures for visibility protection for source categories regulated by the NSR and PSD regulations which have previously been approved by EPA. However, Colorado's NSR and PSD regulations have been disapproved for certain sources as described in 46 FR 21180 (April 30, 1981) and 51 FR 31125 (September 2, 1986), respectively. The EPA promulgated Visibility NSR regulations will remain in effect for these sources.

Affected Areas

The following areas in Colorado are Class I areas where visibility is an important value:

Black Canyon of the Gunnison Wilderness
Eagles Nest Wilderness
Flat Tops Wilderness
Great Sand Dunes Wilderness
La Garita Wilderness
Maroon Bells-Snowmass Wilderness
Mesa Verde National Park
Mount Zirkel Wilderness
Rawah Wilderness
Rocky Mountain National Park
Weminuche Wilderness
West Elk Wilderness

New Source Review

States are required by 40 CFR 51.307 to review new major stationary sources and major modifications prior to construction to assess potential impacts on visibility in any visibility protection area, regardless of the air quality status of the area in which the source is located. That is, sources locating in attainment areas and nonattainment areas must undergo Visibility NSR (see 40 CFR 51.307 (a) and (b)(2), respectively). These requirements ensure: (1) That the visibility impact review is conducted in a timely and consistent manner; (2) that the reviewing authority considers any timely FLM analysis demonstrating that a proposed source would have an adverse impact on visibility; and (3) the public availability of the permitting authority's conclusion.

There are two parts to Visibility NSR: PSD major stationary sources and major sources in nonattainment areas.

For all major PSD stationary sources:

(1) The State must notify the FLM in writing not more than 30 days after receiving a permit application or advance notification of application from a proposed source that may impact a visibility protection area.

(2) This notification must take place at least 60 days prior to the public hearing on the application and must contain any analysis of the potential impact of the proposed source on visibility.

(3) The State must consider any analysis concerning visibility impairment performed by the FLM and received not more than 30 days after the notification.

(4) If the State does not concur with the FLM's analysis that adverse visibility impairment will result from the proposed source, the State must provide in its notice of public hearing on the application an explanation of its decision or give notice as to where the explanation can be obtained.

(5) The State must have the ability to require a permit applicant to monitor visibility in or around the visibility protection areas.

For major sources in nonattainment areas:

(1) A major source or modification that may impact a visibility protection area must provide a visibility impact analysis.

(2) The State must ensure that the sources' emissions are consistent with the national visibility goal. The State may consider the cost of compliance, the

time for compliance, the energy and non-air quality environmental impacts of compliance, and the useful life of the source.

(3) The State must follow the same procedures outlined in the PSD items 1 through 5 above in conducting nonattainment area visibility reviews.

Items 1 through 5 for major PSD stationary sources, and items 1 through 3 for major sources in nonattainment areas, are the procedural steps in visibility review as defined in 40 CFR 52.27(d) and 52.28 (c) and (d), respectively. (The provisions of 40 CFR 52.27 and 52.28 were proposed in 49 FR 42670 and finalized in 50 FR 28544.)

The Colorado Visibility SIP has incorporated into the NSR section its existing permit requirements for any source locating in an attainment or nonattainment area. The AQCC Regulation No. 3 specifies the standard requirements for any permit application and permit approval.

Section XIV of AQCC Regulation No. 3 requires any emission permit applicant to demonstrate that emissions from the proposed source will not adversely impact visibility in a Class I area. The demonstration must be reviewed by the FLM, and any determination by the FLM must be considered by the APCD in its decision to grant or deny the permit. The permit will be denied for sources proven to cause a potential impact.

The SIP commits to the notification time frame requirements to the FLM. Section XIV allows the APCD to determine independently if there is an adverse impact to visibility in Class I areas, if the FLM fails to make such determination or such determination is in error. The APCD commits to provide an explanation of its decision, should it disagree with the FLM's assessment on a proposed source's impact on visibility, and to give notice as to where that explanation can be obtained.

FLM Coordination

Under section 165(d) of the Clean Air Act, the FLM is given an affirmative responsibility to protect air quality related values which includes visibility in Class I areas. The visibility regulations allow the FLM the opportunity to identify visibility impairment and to identify elements for inclusion in monitoring strategies. The FLM must maintain these areas consistent with congressional land use goals.

The State of Colorado has accorded the FLM (through the National Park Service (NPS) and the United States Forest Service (USFS)) opportunities to participate and comment on its Visibility SIP and regulations. Comments by the NPS and the USFS were considered and incorporated where applicable. The State has committed in the SIP to consult continually with the FLM on the review and implementation of the visibility program. Further, the State recognizes the expertise of the FLM in monitoring and new source applicability analyses for visibility and has agreed to notify the FLM of any advance notification or early consultation with a major new or modifying source prior to the submission of the permit application.

EPA proposed to approve the Colorado Visibility NSR regulations on March 31, 1987 (52 FR 10239). No comments were received.

Summary of Action

EPA is approving the revisions to AQCC Regulation No. 3 of the Colorado SIP as they apply to NSR for visibility protection in Class I areas. These regulations will replace the Federal Visibility NSR regulations now in effect in Colorado, except as they apply to categories of sources for which the Colorado NSR and PSD regulations have been disapproved.

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by January 30, 1989. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

40 CFR Part 52

[FRL–3484–2]

Approval and Promulgation of Implementation Plans; Idaho

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: By this notice, EPA is approving (1) revised State of Idaho Department of Health and Welfare (IDHW) rules regulating the height of stacks and the use of dispersion techniques and (2) two administrative rule changes, submitted on March 27, 1987, as revisions to the Idaho state implementation plan (SIP). These revisions clarify and correct portions of the existing rules for stack heights and dispersion techniques and were submitted to satisfy the requirements of section 123 (Stack Heights) of the Clean Air Act (hereinafter the Act).

EFFECTIVE DATE: January 3, 1989.

ADDRESSES: Copies of the materials submitted to EPA may be examined during normal business hours at:

Air Programs Branch (10A-87-7), Environmental Protection Agency, 1200 Sixth Avenue AT-082, Seattle, Washington 90101.

Public Information Reference Unit, Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460.

State of Idaho Department of Health and Welfare (IDHW), 450 W. State Street, Statehouse, Boise, Idaho 83720.

FOR FURTHER INFORMATION CONTACT: David C. Bray, Air Programs Branch, Environmental Protection Agency, 1200 Sixth Avenue AT-082, Seattle, Washington 98101, Telephone: (206) 442-4253, FTS: 399-4253.

SUPPLEMENTARY INFORMATION:

I. Background

On March 27, 1987 the State of Idaho Department of Health and Welfare (IDHW) submitted revised rules regulating the use of stack heights and dispersion techniques and two other administrative rule changes as revisions to the Idaho State Implementation Plan (SIP). The revisions to section 16.01.1002.94 "Stack" (definition) and section 16.01.1014 "Stack Heights and Dispersion Techniques," of the Rules and Regulations for Control of Air Pollution in Idaho clarify and correct portions of the existing rules for stack heights and dispersion techniques to comply with revised EPA stack height regulations as promulgated in 40 CFR Part 51. These rules apply to all new sources and modifications in Idaho as required in 40 CFR 51.164, as well as to existing sources as required in 40 CFR 51.118 and apply to all sources that were or are constructed, reconstructed, or modified subsequent to December 31, 1970. EPA has reviewed the revisions to these rules and has determined that the revised rules are consistent with EPA's requirements for stack heights and dispersion techniques regulations as promulgated by EPA on July 8, 1985.

EPA's stack height regulations were challenged in *NRDC* v. *Thomas,* 838 F.2d 1224 (D.C. Cir. 1988). On January 22, 1988, the U.S. Court of Appeals for the D.C. Circuit issued its decision affirming the regulations in large part, but remanding three provisions to EPA for reconsideration. These are:

1. Grandfathering pre-October 11, 1983 within-formula stack height increases from demonstration requirements (40 CFR 51.100(kk)(2));

2. Dispersion credit for sources originally designed and constructed with merged or multiflue stacks (40 CFR 51.100(hh)(2)(ii)(A)); and

3. Grandfathering pre-1979 use of the refined H+1.5L formula (40 CFR 51.100(ii)(2)).

The revisions to section 16.01.1009 "Total Compliance," and section 16.01.1201.03 "Visible Emissions—Exception," clarify the applicability of these sections.

On July 1, 1988 (53 FR 24964), EPA proposed to approve the submitted revisions and provided a 30-day public comment period on this proposed approval. No comments were received.

II. Summary of Action

EPA is today approving of the revised stack heights and dispersion techniques rules as a revision to the Idaho SIP satisfying the requirements of section 123 of the Act, and is approving the administrative rule revisions for "Total Compliance," and "Visible Emissions."

Although EPA is approving IDHW's stack height rules on the grounds that they satisfy 40 CFR Part 51, EPA is also providing notice that this action may be subject to the decision in *NRDC* v. *Thomas,* 838 F.2d 1224 (D.C. Cir. 1988). If the EPA's response to the *NRDC* remand modifies the July 8, 1985 regulations, EPA will notify the State of Idaho that its rules must be changed to comport with EPA's modified requirements. This may result in revised emission limitations or may affect other actions taken by IDHW and source owners or operators.

III. Administrative Review

Under 5 U.S.C. § 605(b), I certify this revision will not have a significant economic impact on a substantial number of small entities (46 FR 8709).

Under section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by January 30, 1989. This action may not be challenged later in proceedings to enforce its requirements (See section 307(b)(2)).

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

List of Subjects in 40 CFR Part 52

Air pollution control, Carbon monoxide, Hydrocarbons, Incorporation by Reference, Intergovernmental relations, Lead, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides.

Date: November 17, 1988.

Lee M. Thomas,

Administrator.

Note: Incorporation by reference of the State Implementation Plan for the state of Idaho was approved by the Director of the Federal Register on July 1, 1982.

Title 40, Part 52 of the Code of Federal Regulations is amended as follows:

PART 52—[AMENDED]

Subpart N—Idaho

1. The authority citation for Part 52 continues to read as follows:

Authority: 42 U.S.C. 7401-7642

2. Section 52.670 is amended by adding paragraph (c)(25) to read as follows:

§ 52.670 Identification of plan.

* * * * *

(c) * * *

(25) On March 27, 1987, the State of Idaho Department of Health and Welfare submitted revised rules regulating the use of stack heights and dispersion techniques (section 16.01.1002.94 and section 16.01.1014) as revisions to the Idaho state implementation plan. Additional revisions included clarifications to section 16.01.1009 (Total Compliance), and section 16.01.1201.03 (Visible Emissions-Exception).

(i) Incorporation by Reference

(A) March 27, 1987 letter from the State of Idaho Department of Health and Welfare to EPA, Region 10.

(B) Section 16.01.1002.94 (Stack), section 16.01.1014 (Stack Heights and Dispersion Techniques), section 16.01.1009 (Total Compliance) and section 16.01.1201.03 (Visible Emissions-Exception) adopted by the State of Idaho Department of Health and Welfare on February 11, 1987.

3. Section 52.679 is revised to read as follows:

§ 52.679 Contents of Idaho State implementation plan.

Implementation Plan for the Control of Air Pollution in the State of Idaho

Oleylamine; Final Test Standards and Reporting Requirements

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is issuing a final Phase II test rule under section 4(a) of the Toxic Substances Control Act (TSCA) specifying the test standards and reporting requirements to be used by manufacturers and processors of oleylamine (9-octadecenylamine or ODA; CAS No. 112-90-3). This rule requires that certain TSCA health effects test guidelines be utilized as the test standards for the required studies, and that test data be submitted within specified times.

DATES: In accordance with 40 CFR 23.5, this rule shall be promulgated for purposes of judicial review at 1 p.m. eastern ["daylight" or "standard" as appropriate] time on December 15, 1988. This rule shall become effective on January 17, 1989.

FOR FURTHER INFORMATION CONTACT: Michael M. Stahl, Acting Director, TSCA Assistance Office (TS-799), Office of Toxic Substances, Rm. EB-44, 401 M St., SW., Washington, DC 20460, (202) 554-1404, TDD (202) 554-0551.

SUPPLEMENTARY INFORMATION: EPA is promulgating a final Phase II test rule specifying test standards and reporting requirements for ODA. The test standards and reporting requirements are added to 40 CFR 799.3175.

Public reporting burden for this collection of information is estimated to average 535 hours per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Chief, Information Policy Branch, PM-223, U.S. Environmental Protection Agency, 401 M St., SW., Washington, DC 20460; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

I. Background

EPA issued a final Phase I rule under section 4(a) of TSCA published in the **Federal Register** of August 24, 1987 (52 FR 31962), requiring manufacturers and processors to perform developmental toxicity and two-tiered mutagenicity testing of ODA. The need for third tier mutagenicity testing and oncogenicity testing was to be determined by EPA following public program review of all relevant data.

Under the two-phase test rule development process, manufacturers and processors of ODA would normally have been required to submit proposed study plans, including schedules for each of these required tests, in accordance with 40 CFR 790.50. EPA would review the submitted study plans and schedules and issue them, with any necessary modifications, for public comment in a Phase II test rule proposal. After evaluating and responding to public comment, EPA would adopt the study plans in a Phase II final rule as the required test standards and data submission deadlines in accordance with 40 CFR 790.52.

However, in the case of the ODA test rule, which was initiated under the two-phase process, EPA decided to propose the relevant TSCA test guidelines as the test standards for the rule (52 FR 31970; August 24, 1987). EPA also proposed that the data from the required studies be submitted within certain time periods, these time periods serving as the data submission deadlines required by TSCA section 4(b)(1). The reasons for this change in the test rule development process for ODA were discussed in the proposed Phase II rule.

II. Modifications to the Two-Phase Rulemaking Process

Because EPA proposed certain TSCA guidelines as the test standards and proposed data submission deadlines, persons subject to the Phase I final rule were not required to submit proposed study plans for the required testing or proposed dates for the initiation and completion of this testing. They were, however, required to submit notices of intent to test or exemption applications in accordance with 40 CFR 790.45.

EPA is now promulgating a final Phase II rule requiring manufacturers (including importers) and processors of ODA who have not been granted exemptions from the rule to conduct testing in accordance with specified test standards and reporting requirements. While EPA has not identified any byproduct manufacturers of ODA, such persons are subject to the requirements of this test rule. These standards and requirements reflect EPA's evaluation of comments received on the proposed rule. Moreover, once this Phase II final rule is promulgated, those persons who have notified EPA of their intent to test must submit study plans (which adhere to the promulgated test standards) no later than 45 days before the initiation of each of the required tests.

III. Proposed Phase II Test Rule

A. Proposed Test Standards

EPA proposed that testing of ODA be conducted using the following TSCA test guidelines as test standards:

1. For specific organ/tissue toxicity under 40 CFR 798.4900 *Developmental toxicity study.*

2. For genetic toxicity: Chromosomal effects—a. First tier under 40 CFR 798.5385 *In vivo mammalian bone marrow cytogenetics tests: Chromosomal analysis.*

b. Second tier under 40 CFR 798.5450 *Rodent dominant lethal assay.*

c. Third tier under 40 CFR 798.5460 *Rodent heritable translocation assay.*

3. For genetic toxicity: Gene mutations—a. First tier under 40 CFR 798.5300 *Detection of gene mutations in somatic cells in culture.*

b. Second tier under 40 CFR 798.5275 *Sex-linked recessive lethal test in Drosophila melanogaster.*

c. Third tier under 40 CFR 798.5200 *Mouse visible specific locus test* (see Unit V.A.3. of this preamble).

4. For chronic exposure under 40 CFR 798.3300 *Oncogenicity.*

EPA believes that the TSCA Health Effects Test Guidelines cited in Unit III.A., if properly followed, will produce adequate and reliable data.

B. Proposed Reporting Requirements

EPA proposed that all data developed under this rule be conducted and reported in accordance with its TSCA Good Laboratory Practice (GLP) standards which appear at 40 CFR Part 792, and that test sponsors submit individual study plans at least 45 days prior to the initiation of each study.

EPA is required by section 4(b)(1)(c) of TSCA to specify the time period during which persons subject to a test rule must submit test data. EPA proposed that interim progress reports be provided at 6-month intervals

beginning 6 months after the effective date of the final test rule or notification that testing should be initiated. EPA proposed specific reporting requirements for each of the proposed test standards as follows:

That the developmental toxicity study be conducted and the final results submitted to EPA within 12 months of the effective date of the final test rule.

That the mutagenicity studies be conducted, and the final results submitted to EPA as follows:

1. *In vivo* mammalian bone marrow cytogenetics test and detection of gene mutations in somatic cells in culture within 8 months of the effective date of the final rule.

2. Rodent dominant lethal assay and sex-linked recessive lethal test in *Drosophilia melanogaster* within 17 months of the effective date of the final rule.

3. Rodent heritable translocation assays within 24 months of EPA's notification of the test sponsor by certified letter or **Federal Register** notice that testing should be initiated.

4. Mouse visible specific locus test within 48 months of EPA's notification of the test sponsor by certified letter or **Federal Register** notice that testing should be initiated.

That oncogenicity testing be conducted and the final results submitted within 53 months of EPA's notification of the test sponsor by certified letter or **Federal Register** notice that testing should be initiated.

As required by TSCA section 4(d), EPA plans to publish in the **Federal Register** a notice of the receipt of any test data submitted under this test rule within 15 days of receipt of that data. Except as otherwise provided in TSCA section 14, such data will be made available for examination by any person.

IV. Response to Public Comment

EPA received written comments from the Oleylamine Program Panel of the Chemical Manufacturers Association (the Panel) in response to the proposed test standards and reporting requirements for oleylamine on October 8, 1987 (Ref. 1). The Panel was composed of four ODA manufacturers, Akzo Chemie America, Humko Chemicals, Jetco Chemical Company, and Sherex Chemical Company, and one processor, Ethyl Corporation. The Panel also requested a public meeting to give oral comments; the meeting was held on November 16, 1987 (Ref. 2). An additional submission to clarify issues discussed at the EPA public meeting was submitted to EPA by the Panel on January 6, 1988 (Ref. 3). A summary of the Panel's comments and EPA's responses follows.

A. Route of Administration for Developmental Toxicity Study

1. *Comment:* The Panel believes the dietary route should not be used because the Panel found through an animal feed stability study it conducted that only 50 percent of ODA is available in rat chow after 24 hours.

Response: EPA agrees with this comment; thus the route of administration shall now be oral by gavage for the developmental toxicity test, the *in vivo* mammalian bone marrow cytogenetic tests—chromosomal analysis, rodent dominant lethal assay, rodent heritable translocation assay, and the oncogenicity test.

2. *Comment:* The gavage route is inappropriate because the bolus effect is different from a mechanics' slow dermal exposure.

Response: EPA disagrees. Although gavage gives a bolus dose, it is an accepted method to measure the developmental toxicity of chemicals and will measure the intrinsic capacity of ODA to cause developmental toxicity. Dermal exposure is inappropriate because of the highly corrosive nature of ODA as discussed in the final Phase I rule (52 FR 31962; August 24, 1987).

3. *Comment:* An adequate data base is available to interpret developmental toxicity effects via the dermal route.

Response: EPA disagrees because there is a very limited data base on developmental toxicity studies conducted via the dermal route from which background information can be drawn for these studies. Also, those chemicals that have been tested by the dermal route were, for the most part, first tested by the oral route and then tested dermally. Consistent with these tests, EPA would agree to dermal developmental toxicity testing of ODA if an oral developmental toxicity test were done first.

The Panel provided a bibliography of articles to support its contention that there was an adequate data base available to interpret developmental toxicity effects via the dermal route. The Panel's submission included no analysis of this bibliography. In fact, about one-half of the articles were inappropriate to address this question (e.g., frog and chicken embryo studies). The Panel has not provided any analysis or rational argument to support its thesis. Thus, EPA requires that a developmental toxicity study be conducted with ODA via the oral gavage route of exposure.

4. *Comment:* Developmental toxicity effects are different with oral and dermal applications.

Response: A developmental toxicity study is designed to ensure that a chemical being tested is administered at a high enough dose to get to the target system. One then determines if the chemical, on the basis of conditions of exposure with consideration of maternal effects, has the potential to produce an adverse effect. Because of the high corrosive nature of ODA, a dermal study may not allow a sufficient dose to reach the target system. Therefore, EPA is requiring that the route of exposure for the developmental toxicity study be oral by gavage.

5. *Comment:* CMA refuted EPA's assertion that a dermal developmental toxicity study on ODA may result in positive effects due solely to stress from the dermal irritating properties of ODA by citing a study in which three dermal irritating chemicals did not cause developmental toxicity. CMA therefore felt that the dermal route of administration of ODA would be acceptable.

Response: Although there may be compounds that cause dermal irritation in adult animals but no developmental toxicity whatsoever, EPA believes that ODA's strong dermal irritation properties are likely to stress the test animals and that it is prudent to minimize this confounding factor in a developmental toxicity study. Therefore, EPA is requiring that the route of administration of ODA be oral by gavage in the developmental toxicity study.

6. *Comment:* The Panel believes that sufficient ODA will penetrate to the target organ via the dermal route.

Response: EPA disagrees. In the absence of hard data to prove the Panel's point, EPA continues to believe, on the basis of the available data, that because severe irritation will limit the amount of ODA that can be applied to the skin, sufficient ODA will not penetrate the skin to allow for the proper design of the developmental toxicity study, i.e. high dose causing maternal toxicity. In the absence of adequate dermal absorption data (kinetic data), EPA cannot predict what the target organ concentrations of ODA will be.

7. *Comment:* The Panel wants to first conduct the dermal developmental toxicity test with ODA at a level below skin breakdown or obstruction (sic) in rats, and in rabbits whose skin is more permeable than human skin. At this level the maximum tolerated dose (MTD) is expected to approximate maximum use levels in lubricants.

Response: EPA disagrees. Available data indicate that ODA is such a strong

dermal irritant that the animal dose will be below the anticipated human exposure level. This will not provide an adequate margin of exposure between animal and human exposure levels.

B. Oral/Dermal Pharmacokinetics

Comment: EPA stated that it planned to propose an oral/dermal pharmacokinetics study on ODA in its final Phase I rule (52 FR 31962; August 24, 1987). The Panel commented that it felt that such a study would not give reliable comparative results.

Response: EPA is reviewing the need for this study. If EPA determines that such a study is necessary, a separate notice of proposed rulemaking for the comparative oral/dermal pharmacokinetics of ODA will be published in the **Federal Register**.

C. Oncogenicity Testing

Comment: EPA should specify that oncogenicity testing will not be required until an updated economic impact analysis is completed and considered as part of the program review for such testing.

Response: EPA will consider the need for an updated economic impact analysis at the time of the public program review.

D. Reporting Requirements

Comment: The time for testing is inadequate, and moreover should begin on the effective date of the final Phase II rule, rather than the final Phase I rule published on August 24, 1987.

Response: EPA agrees that the time for testing shall be based on the effective date of the final Phase II rule. EPA also beleives that the proposed reporting deadlines finalized in this final Phase II rule provide adequate time for completing the testing and submitting final reports for the developmental toxicity and oncogenicity tests. EPA notes that it has extended the reporting deadlines originally proposed for the mutagenicity tests.

V. Final Phase II Test Rule

A. Test Standards

The first, second, and third tier mutagenicity, developmental toxicity, and oncogenicity test guidelines and chemical-specific modifications proposed for ODA (52 FR 31970; August 24, 1987) shall be the test standards for the testing of ODA under 40 CFR 799.3175 with the following exceptions:

1. *Developmental toxicity study.* EPA is requiring the oral route of administration by gavage for developmental toxicity testing of ODA.

2. *In vivo mammalian bone marrow cytogenetics test, rodent dominant lethal assay, and rodent heritable translocation assays.* The oral route by gavage shall be used to maintain consistency among the tests for ODA test rules and provides an opportunity for public comment. If EPA concludes that third tier mutagenicity testing is still appropriate for ODA, EPA would amend the final test rule for ODA to add this requirement with any appropriate modifications.

3. *Mouse visible specific locus test.* EPA proposed a tiered testing approach to evaluate whether ODA elicits heritable gene mutations. Positive results in certain lower-tier tests would trigger the requirement for conducting a mouse visible specific locus (MVSL) test. EPA believes that the MVSL is necessary, when certain lower-tier tests are positive, to establish definitively whether a substance is capable of eliciting heritable gene mutations. Under the proposed approach, EPA would consider any positive lower-tier test results in a public program review, together with other relevant information, during which interested persons would be able to give their views to EPA. If, after the review, EPA determined that the MVSL was still appropriate, EPA would notify the test sponsors by letter or **Federal Register** notice that they must conduct the test. If EPA determines that the test is no longer necessary, EPA would propose to amend the rule to delete the test requirement.

The final test rule for ODA includes requirements to conduct the lower-tier tests for gene mutations. However, EPA is not promulgating the Phase II requirement for the MVSL for ODA at this time. EPA had based its proposal to require the MVSL, in part, on certain information and assumptions about the cost of conducting the test and the availability of laboratories able to perform the test. The information and assumptions have since proven to be incorrect. Accordingly, EPA is reexamining this information as it applies to the MVSL requirement for this test rule as well as those for other chemical substances. In particular, EPA is reviewing whether any laboratories are available to perform the MVSL for industry in accordance with the TSCA GLP Standards at 40 CFR Part 792, and the cost of such testing. EPA is also reviewing possible alternative tests to the MVSL as well as modifications of the MVSL for which costs may be lower or laboratory availability may be more certain.

Once EPA completes its evalution of this additional information, EPA will publish a notice in the **Federal Register** concerning the MVSL for ODA and other substances subject to TSCA section 4 test rules. This notice would provide up-to-date information on the cost of MVSL testing, availability of laboratories to perform the MVSL, and possible alternative tests to the MVSL or modifications of the MVSL together with their costs and laboratory availability. The notice would also address EPA's intentions about how any changes to the MVSL requirements would apply to the various test rules and would provide an opportunity for public comment. If EPA concludes that the MVSL is still appropriate for ODA, EPA will amend the final test rule for ODA to add the MVSL requirements with any appropriate modifications.

4. *Oncogenicity bioassay.* The oral route of administration by gavage is required.

B. Reporting Requirements

All data developed under this rule shall be reported in accordance with the TSCA GLP Standards (40 CFR Part 792). In addition, test sponsors shall submit individual study plans at least 45 days prior to the initiation of each study in accordance with 40 CFR Part 790.

EPA is required by TSCA section 4(b)(1)(C) to specify the time period during which persons subject to a test rule must submit test data. On the basis of EPA's regulatory experience with the health effects tests required for ODA, as well as in response to public comments, EPA is adopting reporting requirements as follows. Results for the required tests shall be reported as specified in the proposed rule for the developmental toxicity and oncogenicity tests. EPA has extended the reporting deadline as originally proposed for the mutagenicity tests. (See Unit III.B. of this preamble). In addition, the rodent heritable translocation assay and oncogenicity test data shall be submitted within the time specified after notification. The following table shows the reporting requirements for ODA:

TABLE—REPORTING REQUIREMENTS FOR ODA

Test	Reporting deadline for final report (months after the effective date of final phase II rule, except as indicated)	Number of interim (6-month) reports required
Developmental toxicity	12	1
Gene mutation cells in culture assay	10	1

TABLE—REPORTING REQUIREMENTS FOR ODA—Continued

Test	Reporting deadline for final report (months after the effective date of final phase II rule, except as indicated)	Number of interim (6-month) reports required
Sex-linked recessive lethal test in *Drosophila melanogaster*	22	3
In vivo cytogenetics test	14	2
Rodent dominant lethal test	26	4
Rodent heritable translocation assay	[1] 25	4
Oncogenicity	[1] 53	8

[1] Figure indicates the reporting deadline, in months, calculated from the date of notification of the test sponsor by certified letter **Federal Register** notice that, following public program review of all of the then existing data for ODA, EPA has determined that the required testing must be performed.

TSCA section 14(b) governs EPA disclosure of all test data submitted pursuant to section 4 of TSCA. Upon receipt of data required by this rule, EPA will publish a notice of receipt in the **Federal Register** as required by TSCA section 4(d).

C. Conditional Exemptions Granted

The test rule development and exemption procedures (40 CFR 790.87) indicate that, when certain conditions are met, exemption applicants will be notified by certified mail or in the final Phase II test rule for a given substance that they have received conditional exemptions from test rule requirements. The exemptions granted are conditional because they are based on the assumption that the test sponsors will complete the required testing according to the test standards and reporting requirements established in the final Phase II test rule for the given substance. TSCA section 4(c)(4)(B) provides that if an exemption is granted prospectively (that is, on the basis that one or more persons are developing test data, rather than on the basis of prior test data submissions), EPA must terminate the exemption if any test sponsor has not complied with the test rule.

Since the Oleylamine Program Panel of the Chemical Manufacturers Association has indicated to EPA by letter of intent (Ref. 5) its agreement to sponsor all of the tests required for ODA in the final Phase I test rule for ODA (52 FR 31962; August 24, 1987) according to the test standards and reporting requirements established in this final Phase II test rule for ODA, EPA is hereby granting conditional exemptions to all exemption applicants for all of the testing required for ODA in 40 CFR 799.3175.

D. Judicial Review

The promulgation date for the ODA Phase I final rule was established as 1 p.m. eastern daylight time on September 7, 1987 (52 FR 31962; August 24, 1987). To EPA's knowledge, no petitions for judicial review were filed. Any petition for review of this final rule will be limited to a review of the test standards and reporting requirements for ODA established in this final Phase II rule.

E. Other Provisions

Section 4 findings, required testing, test substance specifications, persons required to test, enforcement provisions, and the economic analysis are presented in the final Phase I rule for ODA (52 FR 31962; August 24, 1987).

VI. Rulemaking Record

EPA has established a record for this rulemaking [docket number OPTS-42061E]. In addition to the documentation listed in the final Phase I rule, this record includes basic information considered by EPA in developing this final rule, including:

A. Supporting Documentation

(1) **Federal Register** notices pertaining to this final rule consisting of:

(a) Phase I final rule on ODA (52 FR 31962; August 24, 1987).

(b) Notice of Proposed Phase II rule on ODA (52 FR 31970; August 24, 1987).

(c) TSCA test guidelines final rule (40 CFR Parts 796, 797, and 798; September 27, 1985) and modifications (52 FR 19056; May 20, 1987).

(2) Support documents consisting of the economic impact analysis of the final test rule for ODA.

(3) Communications consisting of:

(a) Written public comments.

(b) Summaries of phone conversations.

B. References

(1) CMA. Comments in response to proposed test standards for oleylamine submitted to the Environmental Protection Agency, Washington, DC, by the Oleylamine Program Panel of the Chemical Manufacturers Association, Washington, DC (October 8, 1987).

(2) Transcript of proceedings before the Environmental Protection Agency in the matter of test rule development meeting on oleylamine. Heritage Reporting Corporation, Official Reporters, 1220 L Street NW., Washington, DC (November 16, 1987).

(3) Letter to Robert Sanford, Office of Pesticides and Toxic Substances, Environmental Protection Agency, Washington, DC, from Has Shah, Chemical Manufacturers Association, Washington, DC. Clarification of issues discussed at EPA public hearing on oleylamine test rule and proposed test standards on November 16, 1987 (January 6, 1988).

(4) CMA. Chemical Manufacturers Association, 2510 M Street NW., Washington, DC 20037. CHO/HGPRT Mutation Assay in the Presence and Absence of Exogenous Metabolic Activation (1985).

(5) Letter to document control officer, TSCA Public Information Office, Office of Pesticides and Toxic Substances, Environmental Protection Agency, Washington, DC, from Geraldine V. Cox, Chemical Manufacturers Association, Washington, DC. Letter of intent to conduct testing of oleylamine by the Oleylamine Program Panel of the Chemical Manufacturers Association (October 26, 1987).

Confidential Business Information (CBI), while part of the record, is not available for public review. A public version of the record, from which CBI has been deleted, is available for inspection from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays, in the TSCA Public Docket Office, Rm. NE-G004, 401 M Street SW., Washington, DC 20460.

VII. Other Regulatory Requirements

A. Executive Order 12291

Under Executive Order 12291, EPA must judge whether a rule is "major" and therefore subject to the requirements of a Regulatory Impact Analysis. This test rule is not major because it does not meet any of the criteria set forth in section 1(b) of the Order. The economic analysis of the testing of ODA is discussed in the Phase I test rule (52 FR 31962; August 24, 1987).

This final Phase II test rule was submitted to the Office of Management and Budget (OMB) for review as required by Executive Order 12291. Any written comments received from OMB, together with any EPA response to these comments, are included in the public record for this rulemaking.

B. Regulatory Flexibility Act

Under the Regulatory Flexibility Act (15 U.S.C. 601 *et seq.*, Pub. L. 96-354, September 19, 1980), EPA is certifying that this test rule will not have a significant impact on a substantial number of small businesses for the following reasons:

1. There are no small manufacturers of this chemical.

2. Small processors are not expected to perform testing themselves, or

participate in the organization of the testing effort.

3. Small processors will experience only very minor costs, if any, in securing exemption from testing requirements.

4. Small processors are unlikely to be affected by reimbursement requirements.

C. Paperwork Reduction Act

The information collection requirements contained in this rule have been approved by OMB under the provisions of the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.*, and have been assigned OMB control number 2070–0033.

Public reporting burden for this collection of information is estimated to average 535 hours per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Chief, Information Policy Branch, PM–223, U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, marked "Attention: Desk Officer for EPA."

List of Subjects in 40 CFR Part 799

Testing, Environmental protection, Hazardous substances, Chemicals, Reporting and recordkeeping requirements.

Dated: November 18, 1988.

Susan F. Vogt,

Acting Assistant Administrator for Pesticides and Toxic Substances.

Therefore, 40 CFR Part 799 is amended as follows:

PART 799—[AMENDED]

a. The authority citation for Part 799 continues to read as follows:

Authority: 15 U.S.C. 2603, 2611, 2625.

b. Section 799.3175 is amended by adding paragraphs (c)(1) (ii) and (iii); (2) (ii) and (iii); (3) (ii) and (iii); and (4) (ii) and (iii), and (d) to read as follows:

§ 799.3175 Oleylamine.

* * * * *

(c) * * *

(1) * * *

(ii) *Test standard.* (A) The developmental toxicity study shall be conducted with ODA in accordance with § 798.4900 of this chapter except the provisions of paragraphs (e) (1)(i) and (5) of § 798.4900.

(B) For purposes of this section, the following provisions also apply:

(*1*) *Species and strain.* The rat and rabbit shall be the test species. The strain shall not have low fecundity and shall preferably be characterized for its sensitivity to developmental toxins.

(*2*) *Administration of the test substance.* The route of administration shall be oral by gavage. The test substance shall be administered at approximately the same time each day.

(iii) *Reporting requirements.* (A) The developmental toxicity testing shall be completed and the final report submitted to EPA within 12 months of the date specified in paragraph (d)(1) of this section.

(B) An interim progress report shall be provided to EPA 6 months after the date specified in paragraph (d)(1) of this section.

(2) * * *

(ii) *Test standard.* (A)(*1*) The *in vivo* mammalian bone marrow cytogenetics test: Chromosomal analysis shall be conducted with ODA in accordance with § 798.5385 of this chapter except the provisions of paragraphs (d) (3)(i) and (5)(iii) of § 798.5385.

(*2*) For purposes of this section, the following provisions also apply.

(*i*) *Species and strain.* Mice shall be used.

(*ii*) *Route of administration.* The route of exposure shall be oral by gavage.

(B)(*1*) The rodent dominant lethal assay shall be conducted with ODA in accordance with § 798.5450 of this chapter except the provisions of paragraphs (d) (3)(i) and (5)(iii) of § 798.5450.

(*2*) For purposes of this section, the following provisions also apply:

(*i*) *Species.* Mice shall be used as the test species. Strains with low background dominant lethality, high pregnancy frequency, and high implant numbers are recommended.

(*ii*) *Route of administration.* The route of administration shall be oral by gavage.

(C)(*1*) The rodent heritable translocation assay shall be conducted with ODA is accordance with § 798.5460 of this chapter, except for the provisions of paragraphs (d) (3)(i) and (5)(iii) of § 798.5460.

(*2*) For purposes of this section, the following provisions also apply.

(*i*) *Species.* Mice shall be used as the test species.

(*ii*) *Route of administration.* The route of administration shall be oral by gavage.

(iii) *Reporting requirements.* (A) The chromosomal aberration tests shall be completed and the final reports submitted to EPA as follows:

(*1*) The *in vivo* mammalian bone marrow cytogenetics test shall be completed within 14 months of the date specified in paragraph (d)(1) of this section.

(*2*) The rodent dominant lethal assay (if required) shall be completed within 26 months of the date specified in paragraph (d)(1) of this section.

(*3*) The rodent heritable translocation assay shall be completed (if required) within 25 months of EPA's notification of the test sponsor by certified letter or **Federal Register** notice under paragraph (c)(2)(i)(C) of this section that testing should be initiated.

(B) Interim progress reports shall be provided to EPA at 6-month intervals for each test beginning 6 months after the date specified in paragraph (d)(1) of this section or notification that testing should be initiated under paragraph (c)(2)(i)(C) of this section, until submission of the final report.

(3) * * *

(ii) *Test standard.* (A) (*1*) The detection of gene mutations in somatic cells in culture shall be conducted with ODA in accordance with § 798.5300 of this chapter, except for the provisions of paragraphs (d)(3) (i), (ii) and (4) of § 798.5300.

(*2*) For purposes of this section, the following provisions also apply:

(*i*) *Types of cells used in the assay.* ODA shall be tested in L5178Y mouse lymphoma cells. Cells should be checked for *Mycoplasma* contamination and may be periodically checked for karyotype stability.

(*ii*) *Cell growth and maintenance.* Alternative dosing procedures consisting of suspension cultures or roller-bottle incubation shall be used. Appropriate incubation conditions (CO_2 concentrations, temperature, and humidity) shall be used.

(*iii*) *Metabolic activation.* The metabolic activation system shall be derived from the postmitochondrial fraction (S–9) of livers from rats pretreated with Aroclor 1254. Cells shall be exposed to test substance both in the presence and absence of an appropriate metabolic activation system.

(B) (*1*) The sex-linked recessive lethal test in *Drosophila melanogaster* shall be conducted with ODA in accordance with § 798.5275 of this chapter except for the provisions of paragraph (d)(5)(iii) of § 798.5275.

(*2*) For purposes of this section, the following provisions also apply:

(*i*) *Route of administration.* The route of administration shall be oral.

(*ii*) Reserved.

(iii) *Reporting requirements.* (A) Gene mutation tests shall be completed and the final reports submitted to EPA as follows:

(*1*) The detection of gene mutations in somatic cells in culture shall be completed within 10 months of the date specified in paragraph (d)(1) of this section.

(*2*) The sex-linked recessive lethal test in *Drosophila melanogaster* (if required) shall be completed within 22 months of the date specified in paragraph (d)(1) of this section.

(B) Interim progress reports shall be provided to EPA at 6-month intervals for each test beginning 6 months after the date specified in paragraph (d)(1) of this section until submission of the final report.

(4) * * *

(ii) *Test standard.* (A)(*1*) The oncogenicity bioassay shall be conducted with ODA in accordance with § 798.3300 of this chapter, except for the provisions of paragraphs (b)(1)(i) and (6) of § 798.3300.

(*2*) For purposes of this section, the following provisions also apply:

(*i*) *Species and strain.* ODA shall be tested in both rats and mice. Commonly used laboratory strains shall be employed.

(*ii*) *Administration of the test substance.* The route of administration shall be oral by gavage.

(iii) *Reporting requirements.* (A) The oncogenicity bioassay shall be completed and the final report submitted to EPA within 53 months of EPA's notification of the test sponsor by certified letter or **Federal Register** notice under paragraph (c)(4)(i) of this section that testing should be initiated.

(B) Interim progress reports shall be provided at 6-month intervals beginning 6 months after the notification under paragraph (c)(4)(i) of this section until submission of the final report.

(d) Effective dates. (1) Section 799.3175 is effective October 7, 1987 except for paragraphs (c)(1) (ii) and (iii); (2) (ii) and (iii); (3) (ii) and (iii); (4) (ii) and (iii), and (d) which are effective on January 17, 1989.

(2) The guidelines and other test methods cited in this section are referenced here as they exist on January 17, 1989.

BILLING CODE 6560-50-M

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

49 CFR Part 225

[Docket No. RAR-2, Notice No. 9]

Adjustment of Monetary Threshold for Reporting Accidents/Incidents

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This rule increases the reporting threshold from $5,200 to $5,700 for railroad accidents/incidents involving property damage that occur during the calendar years 1989 and 1990. This action is needed to ensure that the FRA reporting requirements reflect the impact of inflation since the reporting threshold was last computed in 1986.

EFFECTIVE DATE: This rule becomes effective on January 1, 1989.

FOR FURTHER INFORMATION CONTACT: (1) *Principal Program Person:* Gloria D. Swanson, Office of Safety, (RRS-21), FRA, Washington, DC 20590. Telephone (202) 366-0538.

(2) *Principal Attorney:* Billie Stultz, Office of Chief Counsel, (RCC-30), FRA, Washington, DC 20590. Telephone (202) 366-0635.

SUPPLEMENTARY INFORMATION:

Background

Section 225.19(c) of Title 49, Code of Federal Regulations, provides that the dollar figure that constitutes the reporting threshold for railroad accidents/incidents will be adjusted every two years, in accordance with the procedures outlined in Appendix A to Part 225, to reflect cost increases.

New Reporting Threshold

Two years have passed since the accident/incident reporting threshold was last revised. Consequently, FRA has recomputed the threshold, as required by § 225.19(c), based on increased costs for labor and material. FRA has determined that the current reporting threshold of $5,200 should be increased to $5,700, and §§ 225.5 and 225.19 are being amended accordingly. Appendix A has also been amended to reflect the most recent calculations and the procedures used to determine the new threshold.

Environmental Impact

FRA has evaluated this rule in accordance with its procedures for ensuring full consideration of the potential environmental impacts of FRA actions, as required by the National Environmental Policy Act and related directives. This notice meets the criteria that establish this as a non-major action for environmental purposes.

Executive Order 12291 and Department of Transportation Regulatory Policies and Procedures

This rule has been evaluated in accordance with existing regulatory policies and procedures. It does not constitute a major rule under Executive Order 12291 and does not constitute a significant rule under the Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979). This rule will not have any significant direct or indirect economic impact on any entity because it does not place any new requirements or burdens on the public. For these reasons, a draft regulatory evaluation has not been prepared.

Regulatory Flexibility Act

FRA certifies that this rule will not have a significant impact on a substantial number of small entities. There are no direct or indirect economic impacts for small units of government, businesses, or other organizations. State rail agencies remain free to participate in the administration of FRA's rules, but are not required to do so.

Federalism

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that the rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Paperwork Reduction Act

No additional public reporting burden is imposed by this rule; therefore, a Paperwork Reduction Act analysis is not necessary.

Notice and Public Procedure

Since the amendment merely adjusts the reporting threshold for accidents/incidents in accordance with procedures specified in long-standing regulation (49 CFR 225.19) and imposes no additional burden on any person, FRA concludes that notice and public procedure are not necessary.

List of Subjects in 49 CFR Part 225

Railroad safety, Railroad accident reporting rules.

For reasons set out in the preamble, Part 225 of Chapter II of Title 49 of the

Code of Federal Regulations is amended as follows:

PART 225—[AMENDED]

The authority citation for Part 225 continues to read as follows (see 53 FR 28594, 28601):

Authority: 45 U.S.C. 38, 42, and 43, as amended; 45 U.S.C. 431, 437, and 438, as amended; Pub. L. 100–342; and 49 CFR 1.49 (c) and (m).

1. By revising § 225.5(b)(2) and republishing the introductory text of the section and of paragraph (b) to read as follows:

§ 225.5 Definitions.

As used in this part—

* * * * *

(b) "Accident/Incident" means:

* * * * *

(2) Any collision, derailment, fire, explosion, act of God, or other event involving operation of railroad on-track equipment (standing or moving) that results in more than $5,700 in damages to railroad on-track equipment, signals, track, track structures, and roadbed;

* * * * *

2. By revising the second sentence in § 225.19(b) and by revising the first, third and fifth sentences of § 225.19(c) to read as follows:

(b) *Group I—Rail-Highway Grade Crossing.* * * * In addition, whenever a rail-highway grade crossing accident/incident results in more than $5,700 damages to railroad on-track equipment, signals, track, track structures, or roadbed, that accident/incident must be reported to the FRA on Form FRA F6180.54. * * *

(c) *Group II—Rail Equipment.* Rail equipment accidents/incidents are collisions, derailments, fires, explosions, acts of God, or other events involving the operation of railroad on-track equipment (standing or moving) that result in more than $5,700 in damages to railroad on-track equipment, signals, track, track structures, or roadbed, including labor costs and all other costs for repairs or replacement in kind. * * * If the property of more than one railroad is involved in an accident/incident, the $5,700 threshold is calculated by including the damages suffered by all of the railroads involved. * * * The $5,700 reporting threshold will be revised periodically and will be adjusted in increments of $100 every 2 years in accordance with the procedures outlined in Appendix A of this part.

* * * * *

3. By revising Appendix A to read as follows:

Appendix A—Procedure for Determining Reporting Threshold

1. Wage figures used for track direct labor rates will be based on the "Average straight time rate" shown in the "Recapitulation by Group of Employees," for Group 300 Maintenance of Way Structures Employees. This information appears in the most recent annual edition (Year 1987) of "Statement A300 of the Interstate Commerce Commission, Bureau of Accounts, Wage Statistics of Class I Railroads in the United States."

2. Wage figures used for mechanical direct labor rates will be based on the "Average straight time rate" shown in the "Recapitulation by Group of Employees," for Group 400 Maintenance of Way Structures Employees. This information appears in the most recent annual edition (Year 1987) of "Statement A300 of the Interstate Commerce Commission, Bureau of Accounts, Wage Statistics of Class I Railroads in the United States."

3. Fringe benefit surcharges will be added to the average straight time rates for mechanical and track employees based on the Railroad Cost Index data developed for the Interstate Commerce Commission under the provisions of 49 CFR Part 1102. This information was published in summarized form in the September 24, 1984 edition of the **Federal Register** (49 FR 37481).

4. To calculate the index number for mechanical labor, divide the present (1988) mechanical wage rate of $21.82 by the previous (1986) mechanical wage rate of $20.48. The result is a mechanical labor index number of 1.07 for 1988.

5. The track labor index number is calculated by dividing the present (1988) track wage rate of $21.12 by the previous (1986) track wage rate of $19.23. The result is a track labor index number of 1.1 for 1988.

6. Calculation of the labor index number is as follows: [(track labor index number) 1.1. x .20] + [(mechanical labor index number) 1.07 x .80] = labor index number of 1.08.

7. The mechanical material index number is calculated by first totaling the present (1988) cost of the following mechanical materials:

Quantity	Description	1986	1988
8	33" CS wheels	$1,940	$1,682
8	6 by 11" roller bearings.	1,235	1,204
4	Roller bearing axles.	1,946	2,030
4	6 by 11" roller bearing truck sides (750 lbs.).	3,397	3,027
2	6 by 11" truck bolsters (1,060 lbs.).	2,532	2,092
2	E couplers	534	589
4	Brake beams	339	321
1	AB cylinder	95	95
1	AB reservoir	299	342
1	ABD control valve.	1,250	1,252
500 lbs	Steel bar	500	610
1,000 lbs	Steel sheets	1,000	1,220
1,000 lbs	Steel plates	1,000	1,220
8	Brake shoes	58	46
8	Roller bearing adapters.	140	131
24	Outer coil springs.	174	192
800	Board feet hardwood lumber.	376	392
1	Traction motor	36,500	43,000
60 feet	1¼" brake pipe	66	72
1	Hand brake	245	256
	Total mechanical.	53,626	59,773

The mechanical material index number is determined by dividing the present (1988) total cost for these mechanical materials ($59,773) by the previous (1986) total cost for mechanical materials ($53,626). The result is 1.11.

8. The track material index number is calculated by first totaling the present (1988) cost of the following track materials:

Quantity	Description	1986	1988
4,500	Ties, wooden	$99,000	$112,500
250 tons	Rail	140,000	145,000
90 tons	Tie plates	50,400	52,200
27,000	Spikes (5.8 tons).	4,408	4,408
800	Joint bars (25.4 tons).	24,000	27,000
2,000	Track bolts	3,000	3,200
1	Frog	4,300	4,500
1	Switch	4,000	4,900
	Total track material	329,108	353,708

The track material index number is determined by dividing the present (1988) total cost for these track materials ($353,708) by the previous (1986) total cost for track materials ($329,108). The result is 1.07.

9. Calculation of the material index number is as follows: [(track material index number) 1.07 × .20] + [(mechanical material index number) 1.11 × .80] = material index number of 1.10.

10. Calculation of the threshold index number is as follows: [(labor index number) 1.08 × .40] + [(material index number) 1.10 × .60] = threshold index number of 1.09.

11. In order to calculate the new reporting threshold, multiply the existing reporting threshold $5,200 by the threshold index number of 1.09. The result is $5,668. This result, when rounded to the nearest $100.00 is the new accident/incident reporting threshold figure of $5,700.

Issued in Washington, DC on November 23, 1988.

John H. Riley,

Administrator.

[FR Doc. 88–27554 Filed 11–30–88; 8:45 am]

BILLING CODE 4910–06–M

VETERANS ADMINISTRATION

38 CFR Part 21

Veterans Education; Veterans' Benefits and Services Act of 1988 and the Vietnam Era GI Bill

AGENCY: Veterans Administration.

ACTION: Final regulations.

SUMMARY: The Veterans' Benefits and Services Act of 1988 contains a provision which changes the method of measuring laboratory sessions for the purpose of paying educational benefits. The definition of standard class session is also changed. This final rule brings the pertinent Veterans Administration (VA) regulations governing the Vietnam Era GI Bill into agreement with the law.

EFFECTIVE DATE: May 20, 1988.

FOR FURTHER INFORMATION CONTACT: June C. Schaeffer (225), Assistant Director for Education Policy and Program Administration, Vocational Rehabilitation and Education Service, Department of Veterans Benefits, Veterans Administration, 810 Vermont Avenue NW., Washington, DC 20420, (202) 233–2092.

SUPPLEMENTARY INFORMATION: Amendments are made to 38 CFR 21.4200 and 21.4270. These amendments are required by section 321 of the Veterans' Benefits and Services Act of 1988 (Pub. L. 100–322). That section provides a new definition of a standard class session. The regulations affected by the new provision of law are amended to agree with it.

This law contains numerous provisions which will require changes to VA regulations. These amended regulations are limited to those which are needed to implement the section of law which affects the Vietnam Era GI Bill.

The VA has determined that these amended regulations do not contain a major rule as that term is defined by E.O. 12291, entitled Federal Regulation. The regulations will not have a $100 million annual effect on the economy, and will not cause a major increase in costs or prices for anyone. They will have no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Administrator of Veterans Affairs has certified that these amended regulations will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601–612. Pursuant to 5 U.S.C. 605(b), the amended regulations, therefore, are exempt from the initial and final regulatory flexibility analyses requirements of sections 603 and 604.

This certification can be made because the regulations affect only individuals. They will have no significant economic impact on small entities, i.e., small businesses, small private and nonprofit organizations and small governmental jurisdictions.

The VA finds that good cause exists for making the amendments to these regulations, like the section of the law they implement, retroactively effective on May 20, 1988. To achieve the maximum benefit of this legislation for the affected individuals it is necessary to implement these provisions of law as soon as possible. A delayed effective date would be contrary to statutory design; would complicate administration of these provisions of law; and might result in denial of benefits to a veteran who is otherwise entitled to them.

The VA also finds that good cause exists for publishing these amended regulations without prior notice and opportunity for public comment. The amended regulations conform directly with the provisions of law which were amended by Pub. L. 100–322. The agency has no discretion in this matter. Consequently, public comment is unnecessary.

The Catalog of Federal Domestic Assistance number for the program affected by this regulation is 64.111.

List of Subjects in 38 CFR Part 21

Civil rights, Claims, Education, Grant programs—education, Loan programs—education, Reporting and recordkeeping requirements, Schools, Veterans, Vocational education, Vocational rehabilitation.

Approved: November 9, 1988.

Thomas K. Turnage,

Administrator.

38 CFR Part 21, Vocational Education and Rehabilitation, is amended as follows:

PART 21—[AMENDED]

1. In § 21.4200, paragraph (g) and its authority citation are revised to read as follows:

§ 21.4200 Definitions.

* * * * *

(g) *Standard class session.* The term means the time an educational institution schedules for class each week in a regular quarter or semester for one quarter or one semester hour of credit.

(1) For enrollments and reenrollments which begin before May 20, 1988, a standard class session is not less than 1 hour (or 50-minute period) of academic instruction, 2 hours of laboratory instruction, or 3 hours of workshop training.

(2) For enrollments and reenrollments which begin after May 19, 1988, a standard class session is not less than 1 hour (or 50-minute period) of academic instruction, 2 hours (or two 50-minute periods) of laboratory instruction, or 3 hours of workshop training.

(Authority: 38 U.S.C. 1788(c); Pub. L. 96–466, 100–322)

* * * * *

2. In § 21.4270, footnote 1 to the chart in paragraph (a) is revised to read as follows:

§ 21.4270 Measurement of courses.

(a) * * *

[1] An educational institution offering courses not leading to a standard college degree may measure such courses on a quarter- or semester-hour basis as indicated for collegiate undergraduate courses in paragraph (b) of this section for an enrollment or reenrollment which begins before May 20, 1988, provided: (1) The academic portions of such courses require outside preparation and are measured on a minimum of 50 minutes net of instruction per week for each quarter or semester hour of credit, (2) the laboratory portions of such courses are measured on a minimum of 2 hours of attendance per week for each quarter or semester hour of credit, and (3) the shop portions of such courses are measured on a minimum of 3 hours of attendance per week for each quarter or semester hour of credit. An educational institution offering courses not leading to a standard college degree may measure such courses on a quarter- or semester-hour basis as indicated for 1988, provided: (1) The academic portions of such courses require outside preparation and are measured on a minimum of 50 minutes net of instruction per week for each quarter or semester hour of credit, (2) the laboratory portions of such courses are measured on a minimum of 2 hours (or two 50-minute periods) of attendance per week for each quarter or semester hour of cerdit, and (3) the shop portions of such courses are measured on a minimum of 3 hours of attendance per week for each quarter or semester hour of credit. In no event shall such courses be considered a full-time course when less than 22 hours per week of attendance is required. Not more than 2 hours rest period shall be allowed per week for courses in which shop practice is an integral part of full time courses; 1½ hours for three-quarter-time courses of 16–21 clock hours; 1 hour for one-half-time courses of 11–15 clock hours; or ½ hour for less than half-time courses of 6–10 clock hours; no rest period shall be allowed for courses of less than 6 clock hours of attendance.

(Authority: 38 U.S.C. 1788; Pub. L. 100–322)

Proposed Rules

Federal Register
Vol. 53, No. 231
Thursday, December 1, 1988

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

SMALL BUSINESS ADMINISTRATION

13 CFR Part 124

Meetings on the Business Opportunity Development Reform Act of 1988

AGENCY: Small Business Administration.

ACTION: Notice of public meetings.

SUMMARY: The Business Opportunity Development Reform Act of 1988, Pub. L. 100–656, requires the Small Business Administration (SBA) to hold public meetings on the nature and extent of regulations implementing the Act. This notice advises the public that SBA will hold such meetings on December 9th and 19th, 1988, in San Francisco, California, and Washington, DC, respectively.

DATES: Friday, December 9, 1988; Monday, December 19, 1988.

ADDRESSES:

Federal Building, 450 Golden Gate Avenue, 19th Floor Ceremonial Courtroom, San Francisco, CA 94102, 9:00 a.m. to 4:00 p.m.

Departmental Auditorium, between 12th & 14th Streets, on Constitution Avenue, NW., Washington, DC 20407, 9:00 a.m. to 4:00 p.m.

FOR FURTHER INFORMATION CONTACT: Milton Wilson, Jr., U.S. Small Business Administration, 1441 L Street, NW., Room 602, Washington, DC 20416, telephone—(202) 653–6526.

SUPPLEMENTARY INFORMATION: The Business Opportunity Development Reform Act of 1988, Pub. L. 100–656, requires SBA to hold meetings to ascertain public comment on the nature and extent of regulations needed to implement the Act. SBA will hold two such meetings in compliance with the Act. The first meeting will be on Friday, December 9, 1988, in San Francisco, California (see **ADDRESS** line). The second meeting will be on Monday, December 19, 1988, in Washington, DC (see **ADDRESS** line). Both meetings will be chaired by Joseph O. Montes, Associate Administrator for Minority Small Business and Capital Ownership Development.

The purpose of this Act is to:

1. Affirm that the Capital Ownership Development Program and the section 8(a) authority shall be used exclusively for business development purposes to help small businesses owned and controlled by the socially and economically disadvantaged to compete on an equal basis in the mainstream of the American economy;

2. Affirm that the measure of success of the Capital Ownership Development Program, and the section 8(a) authority, shall be the number of competitive firms that exit the program without being unreasonably reliant on section 8(a) contracts and that are able to compete on an equal basis in the mainstream of the American economy;

3. Ensure that program benefits accrue to individuals who are both socially and economically disadvantaged;

4. Increase the number of small businesses owned and controlled by such individuals from which the United States may purchase equipment, products and services, including construction work; and

5. Ensure integrity, competence and efficiency in the administration of business development services and the Federal contracting opportunities made available to eligible small businesses.

Interested persons will be given a reasonable time for an oral presentation and may submit written statements of their presentations in advance, if they wish. If a large number of participants desire to make statements, a time limitation on each presentation may be imposed.

In order that appropriate arrangements can be made, those wishing to participate should notify Milton Wilson, Jr. (see **ADDRESS** line) in writing at least three days prior to the hearing. Cameras, food and beverages are prohibited in the San Francisco hearing, and all participants must pass through court security.

Persons not able to attend either meeting should submit their comments to Milton Wilson, Jr., (see **ADDRESS** line) by January 3, 1989.

Dated: November 23, 1988.

James Abdnor,

Administrator.

BILLING CODE 8025–01–M

FEDERAL TRADE COMMISSION

16 CFR Part 453

Mandatory Review of the Funeral Industry Practices Trade Regulation Rule

AGENCY: Federal Trade Commission.

ACTION: Additional public hearing scheduled for Washington, DC.

SUMMARY: On May 31, 1988, the Commission published in the **Federal Register** (53 FR 19864) its Notice of Proposed Rulemaking for its mandatory review of the Funeral Industry Practices trade regulation rule. The Notice announced that hearings on the rule would be held in Washington, DC, commencing on November 7, 1988, in Chicago, Illinois, commencing on December 5, 1988, and in San Francisco, California, commencing on January 9, 1989. The Presiding Officer has now scheduled an additional hearing to commence in Washington, DC, on January 17, 1989.

DATES: The public hearing will commence in Washington, DC, at 9:30 a.m. on January 17, 1989, in Room 332, Federal Trade Commission Building, at 6th Street and Pennsylvania Avenue, NW., Washington, DC. Prepared statements of witnesses and exhibits, if any, must be submitted on or before December 9, 1988.

ADDRESS: Prepared statements and exhibits should be sent to Henry B. Cabell, Presiding Officer, Room 319, Federal Trade Commission, 6th and Pennsylvania Avenue, NW., Washington, DC 20580.

FOR FURTHER INFORMATION CONTACT: Henry B. Cabell, Presiding Officer, Room 319, Federal Trade Commission, 6th and Pennsylvania Avenue, NW., Washington, DC 20580, telephone number: 202–326–3642.

SUPPLEMENTARY INFORMATION: On May 31, 1988, the Commission published its Notice of Proposed Rulemaking in the **Federal Register** (53 FR 19864) for its mandatory review of the Funeral Industry Practices trade regulation rule. The notice included a schedule of dates and places of public hearings to be held in the proceeding.

Representatives of the Commission staff have requested the Presiding Officer to schedule an additional

hearing commencing on January 17, 1989 in Washington, DC, for the purpose of receiving testimony from two expert witnesses who were unable to testify in the three previous hearings. Counsel for National Selected Morticians and counsel for the National Funeral Directors Association supported this request. In addition, counsel for the American Association of Retired Persons has asked that an expert witness be permitted to testify at this additional hearing on its behalf. The Presiding Officer has determined that the testimony of these witnesses, which is concerned with the substantial economic issues in the proceeding, to be of particular importance.

Accordingly, the request of the staff for an additional hearing has been granted and the Presiding Officer has scheduled an additional public hearing to commence at 9:30 a.m. on January 17, 1989 in Room 332, Federal Trade Commission Building. The only witnesses permitted to testify at this hearing will be: Dr. Burt F. Barnow, Dr. Timothy P. Daniel, and Dr. Fred S. McChesney. Their respective prepared statements and accompanying exhibits must be filed with the Presiding Officer on or before December 9, 1988.

DEPARTMENT OF THE TREASURY

31 CFR Part 103

Reopening of Comment Period on Bank Secrecy Act Regulations

AGENCY: Departmental Offices, Treasury.

ACTION: Proposed rule; reopening of comment period.

SUMMARY: A notice that Treasury was reopening the comment period on the Proposed Amendments to the Bank Secrecy Act Regarding Reporting and Recordkeeping Requirements by Casinos, published in the **Federal Register** on August 18, 1988 (53 FR 31370) (corrections published August 24, 1988 (53 FR 32323)), to November 14, 1988, was announced in the **Federal Register** on October 28, 1988 (53 FR 43736). In response to requests to extend further the time for public comment, notice is hereby given that Treasury is again reopening the comment period.

DATE: Comments will be accepted through December 14, 1988.

ADDRESS: Address written comments to: Amy G. Rudnick, Director, Office of Financial Enforcement, Office of the Assistant Secretary (Enforcement), Department of the Treasury, Room 4320, 1500 Pennsylvania Ave., NW., Washington, DC 20220.

FOR FURTHER INFORMATION CONTACT: John M. Zoscak, Jr., Attorney-Adviser, Office of the Assistant General Counsel (Enforcement), Room 2000, 1500 Pennsylvania Ave., NW., Washington, DC 20220, (202) 566-2914.

Date: November 18, 1988.

John P. Simpson,

Acting Assistant Secretary (Enforcement).

BILLING CODE 4810-25-M

VETERANS ADMINISTRATION

38 CFR Part 3

Claims Based on Exposure to Ionizing Radiation and Herbicides Containing Dioxin

AGENCY: Veterans Administration.

ACTION: Proposed regulations.

SUMMARY: The Veterans Administration (VA) is proposing to amend its adjudication regulations concerning diseases considered to be "radiogenic." These amendments are necessary to implement recommendations by the Veterans' Advisory Committee on Environmental Hazards. The intended effect of these amendments is to extend the possible entitlement to compensation for veterans with disabilities claimed to have been the result of exposure to ionizing radiation in service. We also propose to clarify the other provisions under which service connection may be established for injury or disease claimed to be the result of exposure to ionizing radiation or to herbicides containing dioxin during service in the Republic of Vietnam.

DATES: Comments must be received on or before January 3, 1989. Comments will be available for public inspection until January 10, 1989. These changes are proposed to be effective 30 days after the date of publication of the final rule.

ADDRESSES: Interested persons are invited to submit written comments, suggestions, or objections regarding these changes to the Administrator of Veterans Affairs (271A), Veterans Administration, 810 Vermont Avenue NW., Washington, DC 20420. All written comments received will be available for public inspection only in the Veterans Services Unit, room 132, at the above address and only between the hours of 8:00 a.m. and 4:30 p.m. Monday through Friday (except holidays) until January 10, 1989.

FOR FURTHER INFORMATION CONTACT: Robert M. White, Chief, Regulations Staff, Compensation and Pension Service, Department of Veterans Benefits, (202) 233-3005.

SUPPLEMENTARY INFORMATION: The Veterans' Dioxin and Radiation Exposure Compensation Standards Act, Pub. L. 98-542, required the VA to promulgate regulations for the adjudication of compensation claims in which disabilities or deaths of veterans are alleged to be the result of in-service exposure to ionizing radiation or herbicides containing dioxin. It also required that the regulations be based on sound scientific and medical evidence. To assist the VA in its effort, the law mandated the establishment of the Veterans' Advisory Committee on Environmental Hazards.

The Advisory Committee has recommended that a posterior subcapsular cataracts and non-malignant thyroid nodular disease be considered "radiogenic" and that the gender restriction regarding breast cancer be deleted. They also recommended the manifestation periods for cataracts and thyroid disease and that the time restriction for the manifestation of leukemia be deleted.

We propose to implement these recommendations by appropriately amending 38 CFR 3.311b(2) and (b)(4). It is to be noted that the Advisory Committee stated that in order to warrant a causal relationship between exposure to ionizing radiation and the development of opacities of the lens, the radiation dose would have to be at least 200 rads. The dosage is one of the factors for consideration in claims based on radiation exposure (38 CFR 3.311b(e)(1)). We also propose to add, in parentheses, the term "lymphocytic" for chronic lymphatic leukemia as it is the preferred medical term.

We also propose to amend 38 CFR 3.311b(h) and 38 CFR 3.311a(g) to specify that the other provisions under which service connection may be established for injury or disease claimed to be the result of exposure to ionizing radiation or to herbicides containing dioxin during service in the Republic of Vietnam, respectively, are those governing direct service connection, service connection by aggravation, or presumptive service connection.

The Radiation-Exposed Veterans Compensation Act of 1988, Pub. L. 100–321, amended Title 38, United States Code, section 312, to establish presumptive service connection for certain radiation-exposed veterans. A separate proposed rule is being prepared to amend 38 CFR 3.309 to implement the above-cited law. We propose to amend 38 CFR 3.311b(a)(1) by adding a reference to § 3.309.

The Administrator hereby certifies that these regulatory proposed amendments will not have a significant economic impact on the substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601–612. The reason for this certification is that these proposed amendments would not directly affect any small entities. Only VA beneficiaries could be directly affected. Therefore, pursuant to 5 U.S.C. 605(b), these proposed amendments are exempt from the initial and final regulatory flexibility analyses requirements of sections 603 and 604.

In accordance with Executive Order 12291, Federal Regulation, the VA has determined that these proposed regulatory amendments are non-major for the following reasons:

(1) They will not have an annual effect on the economy of $100 million or more.

(2) They will not cause a major increase in costs or prices.

(3) They will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic and export markets.

Catalog of Federal Domestic Assistance program numbers are 64.100, 64.101, 64.106, 64.109, and 64.110.

List of Subjects in 38 CFR Part 3

Administrative practice and procedure, Claims, Handicapped, Health care, Pension, Veterans.

Approved: October 12, 1988.

Thomas K. Turnage,

Administrator.

38 CFR Part 3, Adjudication, is proposed to be amended as follows:

PART 3—[AMENDED]

1. In § 3.311a, paragraph (g) is revised to read as follows:

§ 3.11a Claims based on exposure to herbicides containing dioxin during service in the Republic of Vietnam.

* * * * *

(g) *Service connection under other provisions.* Nothing in the section will be construed to prevent the establishment of service connection for any disease or injury shown to have been incurred or aggravated during active service in accordance with §§ 3.304, 3.306, or 3.307. However, service connection will not be established on the basis of a causal relationship to exposure to herbicides containing dioxin during service in the Republic of Vietnam for any disease not specified in paragraph (c) of this section.

(Authority: 38 U.S.C. 210(c))

* * * * *

2. In § 3.111b, the first sentence of paragraph (a)(1) is revised, paragraphs (b)(2)(i), (b)(2)(iii), (b)(2)(xiv), (b)(2)(xv), (b)(4), and (h) are revised, and paragraphs (b)(2)(xvi) and (xvii) and authority citations for paragraphs (a)(1), (b)(2), and (h) are added to read as follows:

§ 3.311b Claims based on exposure to ionizing radiation.

(a) * * *

(1) *Dose assessment.* In all claims in which it is established that a radiogenic disease, listed in paragraph (b)(2) of this section, first became manifest after service and was not manifest to a compensable degree within any applicable presumptive period as specified in §§ 3.307 and 3.309, and it is contended the disease is a result of exposure to ionizing radiation in service, an assessment will be made as to the size and nature of the radiation dose or doses. * * *

(Authority: 38 U.S.C. 210(c))

* * * * *

(b) * * *

(2) * * *

(i) All forms of leukemia except chronic lymphatic (lymphocytic) leukemia;

* * * * *

(iii) Breast cancer;

* * * * *

(xiv) Salivary gland cancer;

(xv) Multiple myeloma;

(xvi) Posterior subcapsular cataracts; and

(xvii) Non-malignant thyroid nodular disease.

(Authority: 38 U.S.C. 210(c))

* * * * *

(4) For the purposes of paragraph (b)(1) of this section:

(i) Bone cancer must become manifest within 30 years after exposure;

(ii) Leukemia may become manifest at any time after exposure;

(iii) Posterior subcapsular cataracts must become manifest 6 months or more after exposure; and

(iv) Other diseases specified in paragraph (b)(2) of this section must become manifest 5 years or more after exposure.

(Authority: 38 U.S.C. 210(c))

* * * * *

(h) *Service connection under other provisions.* Nothing in this section will be construed to prevent the establishment of service connection for any injury or disease shown to have been incurred or aggravated during active service in accordance with §§ 3.304, 3.306, 3.307, or 3.309. However, service connection will not be established on the basis of a causal relationship to exposure to ionizing radiation in service for any disease not specified in paragraph (b)(2) of this section.

(Authority: 38 U.S.C. 210(c); Pub. L. 98–542)

BILLING CODE 8320–01–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 51 and 52

[FRL–3478–6; AL–016]

Approval and Promulgation of Implementation Plans, Alabama; New Source Review Regulatory Changes

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA proposes to approve revisions to the Alabama State Implementation Plan (SIP) which were submitted to EPA on November 20, 1985. Alabama has revised its regulation for new source review in nonattainment areas (NSR) to add an exemption for sources which would be considered major solely by virtue of their fugitive emissions. This exemption does not apply to twenty-six source categories which are listed in the regulation. This provision is identical to the requirements of 40 CFR 51.165(a)(4) (formerly 40 CFR 51.18(j)(4)). Also, Alabama is adding to their regulation a section to allow public participation in the State's construction permit review process for nonattainment areas. This addition to the Alabama regulation meets the requirements of 40 CFR 51.165 (formerly 40 CFR 51.18(h)) for those permits, except that 40 CFR 51.161(2)(ii) requires a public comment period of at least thirty days.

DATE: To be considered, comments must reach us by January 3, 1989.

ADDRESSES: Copies of the documents relevant to this action are available for public inspection at the following locations:

Environmental Protection Agency, Region IV, Air Programs Branch 345 Courtland Street, NE., Atlanta, Georgia 30365.

Air Division Alabama Department of Environmental Management, 1751 Federal Drive Montgomery, Alabama 36109.

FOR FURTHER INFORMATION CONTACT: Beverly T. Hudson of the EPA Region IV Air Programs Branch, at the above address and telephone (404) 347–2864 or FTS 257–2864.

SUPPLEMENTARY INFORMATION: On November 20, 1985, Alabama submitted regulation changes and revisions to the Alabama State Implementation Plan (SIP). This submittal contained certification that the revisions were preceded by adequate notice and a public hearing. EPA proposes to approve these revisions as submitted on the above dates. A discussion of the revisions and the basis for EPA's proposal action now follows.

Two revisions to Chapter 16 of Alabama's Air Pollution Control Commission Rules and Regulations were adopted by the Alabama Department of Environmental Management (ADEM) on November 13, 1985. The first is a change in 16.3.2(1). Specifically, subparagraph 16.3.2(1)(2) has been added to exempt certain nonattainment area sources from review under this new source review regulation. These sources are included in specific industry categories and would not be considered major sources or major modifications unless fugitive emissions were included in the total emissions calculations. The list of source categories and exemption provisions is identical to that in EPA's nonattainment area exemption rule found at 40 CFR 51.165(a)(4), except that "Fossil fuel-fired steam electric plants of more than 250 million British thermal units per hour heat input" is omitted. This was an oversight on the part of the State, and will be corrected by the State in the near future. In the meantime no environmental effect is expected from the omission, since the only possible effect is to exclude fugitive emissions in determining if a steam electric plant is a major source, and the nature of steam electric plants causes them to be major even excluding all fugitive emissions.

As indicated above, the addition of subparagraph 16.3.2(1)(2) changes the Alabama NSR rule to match the federal NSR rule in fugitive emissions contained in 40 CFR 51.165. However, it represents a technical relaxation in the SIP as it could result in sources in certain categories becoming newly exempt from NSR requirements in nonattainment areas including those lacking fully approved plans. Nevertheless, EPA believes this change is approvable, for the following reasons. In practical terms the only area likely to be affected is the Jefferson County ozone nonattainment area. Jefferson County is also a designated particulate matter nonattainment area. All construction bans that were in effect for particulate matter (TSP) nonattainment areas were lifted with the promulgation of a new particulate standard (PM_{10}) on July 1, 1987 (52 FR 24634). Portions of Jackson, Colbert and Lauderdale Countries are nonattainment for sulfur dioxide (SO_2), but fugitive emissions are generally not significant in determining NSR applicability for SO_2 sources. Etowah and Mobile Counties are designated ozone nonattainment areas, but EPA has redesignated them to attainment. See 52 FR 17952 (May 13, 1987). As to the Jefferson County ozone nonattainment area, the County adopted an attainment plan for ozone, which was submitted to EPA for review in November, 1986. However, before EPA completed its substantive review, it determined that the plan needed to be adopted by Alabama as well to ensure state enforceability. This must be accomplished before EPA can complete its review and determine whether to propose approval of the plan. Alabama has notified EPA that it expects state approval to occur in the near future.

Thus, it appears that reasonable efforts are being made to adopt and submit a complete plan for the remaining ozone nonattainment areas in Alabama. In addition, the State has indicated that it expects that few, if any, sources will actually be exempted from NSR by virtue of this change. No major ozone sources subject to NSR have located in Alabama since this regulation was adopted four years ago. In addition, Alabama has stated that this change would not constrain the State's ability to obtain any additional emissions reductions needed in its attainment efforts. Thus, EPA does not expect this change to have a significant effect on air quality in Alabama.

This revision originally addressed the Total Suspended Particulate (TSP) ambient air quality standards. However, EPA on July 1, 1987 (52 FR 24634), replaced the TSP ambient air quality standards with a new standard that measures only those particles with an aerodynamic diameter equal to or less than 10 micrometers (PM10). At the State's option, EPA is continuing to process TSP SIP revisions which were in process at the time the new PM10 standard was promulgated. In the policy published on July 1, 1987 (52 FR 24679, Column 2), EPA stated that it would regard existing TSP SIP's as necessary interim particulate matter plans during the period preceding the approval of State plans specifically aimed at PM10.

Since 16.3.2 already requires review of all National Ambient Air Quality Standards, the State's regulation automatically requires that new and modified sources be reviewed for PM10. Alabama requested that Jefferson County be redesignated to unclassifiable for TSP in a letter dated February 2, 1988. This redesignation will be granted upon approval of Alabama's PM10 SIP. Significant level values will be included in a separate **Federal Register** *Notice* which addresses the PM10 provisions.

Alabama's SIP does not contain a definition of fugitive emissions, as required by 40 CFR 51.165(a)(1)(ix) (formerly 40 CFR 51.18(j)(ix)) whenever the exemption for fugitive emissions is used. This was an oversight, and Alabama is currently in the process of adopting the required definition. Final approval of 16.3.2(l)(2) will be made only after this definition is adopted and submitted to EPA.

The second revision was the addition of a new paragraph, 16.3.2(m), which requires public participation during State evaluation of applications for sources to construct or modify a facility in a nonattainment area. Previously Alabama only required public participation in prevention of significant deterioration (PSD) areas. This regulation includes procedures similar to the procedure which Alabama follows for PSD, and it allows the public to comment on all applications. All comments and response are considered before a final decision is made to accept or reject the permit application and to issue the permit.

However, the regulation differs from the EPA requirements for public notice at 40 CFR 51.161 in that it specifies Alabama will determine the length of each public comment period, rather than require a 30-day notice for each permit. EPA proposes to approve the regulation in spite of this deficiency because the regulation represents a significant improvement over the present regulation, which does not provide for any public notice. The Alabama SIP will still be deficient because of this particular item, and also because public notice is provided for only PSD and NSR

VOL 53 ISS 231 DE 1 1988 UMI

permits rather than for all permits as required by 40 CFR 51.161(l).

Further details pertaining to these regulation changes are contained in the technical support document, which is available for public inspection at EPA's Regional Office in Atlanta, Georgia.

Proposed Action

After reviewing Alabama's New Source Review SIP revisions, EPA has found they substantially meet the requirements contained in 40 CFR Part 51. EPA is therefore proposing to approve them.

Under 5 U.S.C. 605(b), I certify that this SIP revision does not have a significant economic impact on a substantial number of small entities (see 46 FR 8709).

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

[FRL–3474–3]

Approval and Promulgation of State Implementation Plans; North Dakota

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to approve the revision to the Implementation Plan for the Control of Air Pollution for the State of North Dakota. The revisions were submitted on January 26, 1988, by the Governor of North Dakota. The revisions established new regulations and revised existing regulations and procedures to make them equivalent to the New Source Performance Standards (NSPS), National Emission Standards for Hazardous Air Pollutants (NESHAPs), Prevention of Significant Deterioration (PSD), Stack Heights and Visibility. The revisions also updated existing State rules and provided new State rules for oil and gas production facilities. This action only addresses the PSD rule revisions, the updating of existing State rules and the addition of the new rules for oil and gas production facilities. This action does *not* address the new and revised rules for NSPS, NESHAPs, Stack Heights or Visibility. These latter items are being addressed in separate actions.

DATES: Comments must be received on or before January 3, 1989.

ADDRESSES: Written comments on this action should be addressed to: Chief, Air Programs Branch, Environmental Protection Agency, Denver Place, Suite 500, 999 18th Street, Denver, Colorado 80202.

Copies of the State submittal are available for public inspection between 8:00 a.m. and 4:00 p.m. Monday through Friday at the following office: Environmental Protection Agency, Region VIII, Air Programs Branch, Denver Place, Suite 500, 999 18th Street, Denver, Colorado 80202.

FOR FURTHER INFORMATION CONTACT: Laurie Ostrand, Environmental Protection Agency, Denver Place, Suite 500, 999 18th Street, Denver, Colorado 80202, (303) 293–1764, FTS 564–1764.

SUPPLEMENTARY INFORMATION: On January 26, 1988, the Governor of North Dakota submitted to EPA revisions to the Implementation Plan for the Control of Air Pollution for the State of North Dakota. The revisions established new regulations and revised existing regulations and procedures to make them equivalent to NSPS, NESHAPs, PSD, Stack Heights and Visibility. The revisions also updated various existing State rules and provided new State rules for oil and gas production facilities. This action only addresses the PSD rule revisions, the updating of various existing State rules and the addition of the new rules for oil and gas production facilities. A more detailed discussion of the revisions follows below.

1. Chapter 33–15–01—General Provisions

The definition of "Trade waste" [33–15–01–04(36)] was revised by adding the term "wood-containing preservatives" to the list of what constitutes a "trade waste."

A change was made in the malfunctions regulation [33–15–01–13(2)]. Prior to this change, the malfunction subsection required companies to notify the State immediately concerning any malfunction that was expected to cause a violation of any article or other applicable rules and regulations of the State. This proved to be unworkable in some situations, and, as a matter of practice, the State had been requiring notifications only if the malfunction was expected to last greater than 24 hours or if the discharge of the contaminant posed an immediate danger. The regulations have been amended to require sources to report a malfunction to the State as soon as possible if the malfunction is expected to last longer than 24 hours and cause the emission of air contaminants in violation of this article or other applicable rules and regulations of the State. The regulation has also been amended to require immediate notification to the State for any malfunction that would threaten health or welfare, or pose an imminent danger.

A subsection on continuous emission monitoring system (CEM) failures [33–15–01–13(3)] was added. This addition requires that when a CEM fails, an alternative method acceptable to the State for measuring or estimating emissions must be undertaken as soon as possible. In addition, timely repair of the emission monitoring system must be made.

The State added a new section on the confidentiality of records [33–15–01–16] to clarify the State's procedure concerning the submittal of confidential information. This section addresses public inspection, information submitted as trade secrets, accepted trade secret claims, rejected trade secret claims, appeal of nondisclosure claims, retention of confidential information, maintenance of log, transmittals of confidential information, and relationship to issuance of permits.

2. Chapter 33–15–02—Ambient Air Quality Standards

There were numerous changes to this Chapter to bring the wording of the regulation up-to-date and to clarify the Air Quality Guidelines the State follows.

The State rescinded several Ambient Air Quality Standards (AAQS) which were no longer used or necessary. The rescinded AAQS included settled particulate (dustfall), coefficient of haze, reactive sulfur (sulfation), suspended sulfate, sulfuric acid mist, sulfur trioxide or any combination thereof, and hydrocarbons.

The State also amended its hydrogen sulfide (H_2S) AAQS. Prior to the regulation change, there were two AAQS for H_2S. Both standards were based on ½-hour concentrations. This proved to be cumbersome for dispersion modeling purposes, as well as general review of monitoring data. The State changed the H_2S standard to one 1-hour standard that it believes is as stringent as the two ½-hour standards.

The State deleted Table 2–Methods of Air Contaminant Measurement. Methods of measurement have been

incorporated by reference into 33–15–02–05, Methods of Sampling and Analysis.

3. Chapter 33–15–03—Restriction of Emission of Visible Air Contaminants

The State added provisions into 33–15–03–01 that require: (1) Existing sources to comply with the visible air contaminant restrictions for new installations in 33–15–03–02 when technology and feasibility develop; and (2) existing sources that install control technology capable of meeting the restrictions of 33–15–03–02 to meet those restrictions. The State also added provisions to allow parties aggrieved by the above two items the ability to request a hearing before the department, according to Article 33–22 and North Dakota Century Code Chapter 28–32.

In Method of Measurement, 33–15–03–05, the State defined "per hour" for Reference Method 9. The State also added to this subsection a sentence that allows sources to use a continuous opacity monitor to determine compliance with visible emission standards when Reference Method 9 opacity readings are not available.

For clarification, additional minor wording changes were incorporated into this Chapter.

4. Chapter 33–15–04—Open Burning Restrictions

Minor changes were adopted in a 33–15–04–02. One of these changes includes the addition of the requirement that open burning comply with the Rural Fire Mitigation Action Guide included in the North Dakota Rural Fire Contingency Plan.

Language in 33–15–04–02 (7)(c) and (8)(c), which restricted open burning between three hours after sunrise and three hours before sunrise, was omitted. Deleting this language allows open burning during times of the day when dampness and calm conditions prevail, and thus provides for safer burning conditions.

Language was also added [33–15–04–02(8) (c) and (d)] to restrict the burning of liquid hydrocarbons near Class I areas if it will adversely affect the ambient air or visibility of such areas, except in emergencies.

5. Chapter 33–15–05—Emissions of Particulate Matter Restricted

The State added 33–15–05–01(2)(b) and 33–15–05–02(2)(g) to provide a mechanism for parties aggrieved by restrictions applied on them to request a hearing, according to article 33–22 and North Dakota Century Code Chapter 28–32.

The maximum allowable emissions of particulate matter from fuel burning equipment used for indirect heating (33–15–05–02) ws amended to exempt the following from the particulate standard: (1) Sources with a heat input of not more than ten million BTU/hour and (2) sources with multiple boilers with a total aggregate heat input of not more than ten million BTU/hour. Previous to this revision, the rule had exempted sources with a heat input of less than five million BTU/hour or sources with multiple boilers each with heat inputs of five million BTU/hour or less and a total aggregate heat input of less than ten million BTU/hour.

Subdivision (f) was added to 33–15–05–02 and requires existing sources whose heat input is greater than 250 million BTU/hour and who are equipped with state-of-the-art control technology to comply with the particulate emission limitation of the fossil fuel-fired NSPS when directed by the State.

6. Chapter 33–15–07—Control of Organic Compounds Emissions

The State amended this Chapter to correct the overlap that existed between this Chapter and the NSPS Chapter concerning storage tanks. Storage tanks are now incorporated in the NSPS for storage tanks [33–15–12–01(8)].

7. Chapter 33–15–10—Control of Pesticides

The State added to this Chapter paragraph 33–15–10–02(3) to highlight the disposal requirements for surplus pesticides and empty pesticide contain.

8. Chapter 33–15–11—Prevention of Air Pollution Emergency Episodes

The State made minor wording changes in this Chapter to update its regulations.

9. Chapter 33–15–14—Designated Air Contaminant Sources, Permit To Construct, Permit To Operate

This Chapter was amended by adding alcohol plants to the list of designated air contaminant sources [33–15–14–01(1)(x)]. A paragraph was also added that prohibits permits to construct from being transferred without prior approval by the State [33–15–14–02(11)]. The permit to construct and permit to operate fees were compiled into one section [33–15–14–04] and updated. The fees were adopted as follows:

1. The filing fee of $75.00 or $100.00 was increased to $150.00 for all sources.

2. A new classification system was developed based upon the frequency of inspections and the amount of staff time spent on projects. Annual costs were adjusted based upon the amount of staff time involved with the various classifications.

3. An addition was made that allows the State to collect annual fees for sources operating under a permit to construct that have not yet received a permit to operate.

The State also changed the permit exemption limit [33–15–14–05(1) ((b) and (c)] for fuel burning equipment to be consistent with the language in the particulate emission rate exemption discussed in Chapter 33–15–05. Previous to the revision, fuel burning equipment, other than smokehouse generators, which had a heat input of not more than ten million BTUs/hour (and burned gaseous fuels containing not more than 2 and 5-tenths grain H_2S per 100 standard cubic feet; or distillate oil) or one million BTU/hour (and burned residual oil); or 350,000 BTU/hour (and burned solid fuel), were exempt from obtaining a permit to construct or operate. The rule has been revised to exempt fuel burning equipment, other than smokehouse generators, which meet the following criteria:

(1) The aggregate heat input does not exceed ten million BTU/hour.

(2) The total aggregate heat input from all equipment does not exceed ten million BTU/hour.

(3) The emissions from all equipment do not exceed 25 tons per year of any contaminant.

Finally, the State amended this Chapter to correct the overlap that existed between this Chapter and the NSPS Chapter concerning storage tanks. Storage tank exemptions are now incorporated in the NSPS Chapter (33–15–12).

10. Chapter 33–15–15—Prevention of Significant Deterioration

This Chapter was amended by updating the regulations and making them consistent with Federal regulations. The stack height section [33–15–15–01(3)] was revised by deleting all the stack height regulations from 33–15–15 and referencing the new stack height Chapter (33–15–18).

The State updated the air quality models subdivision [33–15–15–01(4)(f)(1)] by deleting the reference to outdated EPA modeling guidelines and inserting general language on modeling requirements. Dana Mount, Director, Division of Environmental Engineering, submitted a letter of interpretation on June 29, 1987, stating that the general language means the applicant must comply with the requirements of EPA 1986 version "Guidelines on Air Quality Models (Revised)", EPA 450/2–78–027R.

To the subdivision on additional impact analyses [33–15–15–01(04)(i)], the State added language to require evaluation of endangered and threatened species of vegetation and wildlife. To the subdivision on sources impacting federal Class I areas—additional impacts [33–15–15–01(4)(j)], the State clarified the notice requirements to the federal land managers. To the subdivision on Public Participation [33–15–15–01(5)], the State clarified the procedures on public hearings.

11. Chapter 33–15–16—Restriction of Odorous Air Contaminants

In this Chapter, the State made wording changes to clarify the rules. The changes allow a State-certified inspector to determine whether an odor is objectionable.

12. Chapter 33–15–20—Control of Emission from Oil and Gas Production Facilities

The State added this Chapter to establish registration and reporting requirements for oil and gas production facilities. The registration and reporting requirements provide a means to determine if sources are subject to PSD (33–15–15). They also provide requirements for the control of production facility emissions.

The State received numerous public comments, as well as comments from EPA, on the draft regulation revisions. In some instances the State amended its regulations in addressing such comments. EPA feels the State has adequately addressed all of the public comments, as well as EPA comments.

EPA made several interpretations regarding this submittal. The State was notified on June 13, 1988 of such interpretations. In a letter dated June 16, 1988, Dana Mount, Director, Division of Environmental Engineering, confirmed EPA's interpretations. The following are EPA's interpretations:

1. Subsequent to the State revising Chapter 33–15–11, Prevention of Air Pollution Emergency Episodes, 40 CFR 51, Appendix L, was amended to address PM–10 (see 52 FR 24672, 7/1/87). The State submitted draft regulations on March 8, 1988. EPA interprets the State's submittal of the draft regulations as a commitment to revise its regulations as required.

2. Subsequent to the State revising 33–15–15, 40 CFR 51.166, Prevention of Significant Deterioration, was amended to address PM–10 (see 52 FR 24672, 7/1/87). As required by Section 110(a)(2) of the Act, the State must adopt and submit to the [EPA] Administrator, within nine months, a plan to implement, enforce and maintain the PM–10 ambient air quality standards. The State has submitted draft regulations to EPA and held a public hearing to address the PM–10 amendments to 40 CFR 51.166. EPA interprets the State's submittal of draft regulations and the holding of a public hearing as a commitment to revise its regulations as required.

3. Subsequent to the State revising 33–15–15, EPA promulgated Supplement A (1987) to the Guidelines on Air Quality Models on January 6, 1988 (see 53 FR 392). Supplement A (1987) adds four additional models to the Guidelines. Although the State has nine months from the effective date (November 6, 1988 in this case) to submit revisions to the rule, EPA is addressing Supplement A in this package. Because North Dakota's air quality modeling regulations [33–15–15–01(4)(f)] are written in such a manner as to not preclude the use of Supplement A (1987), EPA interprets the State's rules to mean that Supplement A (1987) and any future additions to the modeling guidelines promulgated by EPA will be utilized by the State to estimate ambient air concentration required under PSD.

4. Regarding Chapter 33–15–20, Control of Emissions from Oil and Gas Production Facilities, EPA would like to point out that it interprets the State's requirement that demonstrations must be performed in accordance with the "North Dakota Guideline for Air Quality Modeling Analyses" in 33–15–20–03(3) to mean that EPA's Guidelines on Air Quality Models (Revised) will also be followed, as appropriate. EPA makes this interpretation because, even though 33–15–20–03(3) specifically references the State's modeling guidelines, it also says that all sources that emit greater than 250 tpy must comply with the State's PSD chapter. In the State's PSD chapter, EPA modeling guidelines are required.

One further interpretation not addressed in the June 13, 1988, letter is with respect to the malfunction notification regulation, 33–15–01–13(2). EPA interprets this regulation as merely a notification requirement for sources that have a malfunction that can be expected to last longer than 24 hours and cause the emission of air contaminants in violation of statutes and regulations. Additionally, EPA interprets that all sources will report a malfunction, regardless of duration, if it would threaten health or welfare, or pose imminent danger. Whether a source is required to report a malfunction or not does not obviate such a source from meeting its obligation to comply with applicable emission limitations and federal and State statutes and regulations.

In addition to the interpretations addressed in the June 13, 1988, letter to the State, EPA also requested the State to commit to correcting a few discrepancies found in the PSD regulations. When EPA reviewed the draft submittal which addressed PM–10, it found a few discrepancies in the State's PSD regulations that had not been detected earlier. The discrepancies are as follows: (1) In 33–15–15–01(2)(a), the following statement appeared, "the provisions of this Chapter do not apply to those counties or other functionally equivalent areas on a contaminant specific basis that exceed the national ambient air quality standard for sulfur dioxide or particulate matter." This is incorrect because PSD applies to those areas that have been designated attainment or unclassifiable for any National Ambient Air quality Standard (NAAQS) under Section 107 of the Clean Air Act. EPA pointed this out to the State and is requiring the State to amend this paragraph to say that this Chapter applies to areas designated as attainment or unclassifiable for *any* NAAQS. (2) In 33–15–15–01(6)(d), "subsections 5 and 6" should be "subsections 5, 6 and 7". (3) In 33–15–15–02(1), "subdivision d or e" should be "subdivision c or d". Although these discrepancies were noted in a submittal subsequent to the submittal EPA is currently processing, the EPA required the State to commit to correct these deficiencies in order to proceed with this submittal. In a letter dated June 16, 1988, Dana Mount, Director, Division of Environmental Engineering, committed to correct such discrepancies.

EPA proposes to take no action on the revisions to Chapter 33–15–16, Restrictions of Odorous Air Contaminants. This Chapter is not a part of the federally enforceable SIP, since it bears no relationship to attainment or maintenance of any NAAQS. (See 44 FR 63102, November 2, 1979.) Likewise, EPA has no basis for approving or disapproving these revisions to the Chapter.

Proposed Action

EPA hereby proposes to approve the revisions to the Implementation Plan for the Control of Air Pollution for the State of North Dakota as submitted on January 26, 1988, (except for the additions and revisions to the NSPS, NESHAPs, Stack Height and Visibility regulations which are being addressed in separate actions and the odor regulation which is not a part of the federally enforceable SIP) with the

interpretations as discussed and the understanding that the State will correct the discrepancies noted in the PSD regulations.

Under 5 U.S.C. § 605(b), I certify that this SIP revision will not have a significant economic impact on a substantial number of small entities.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

List of Subjects in 40 CFR Part 52

Air pollution control, Carbon monoxide, Hydrocarbons, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides.

Authority: 42 U.S.C. 7401–7642.

Date: June 30, 1988.

James J. Scherer,

BILLING CODE 6560–50–M

DEPARTMENT OF TRANSPORTATION

Coast Guard

46 CFR Parts 56 and 164

[CGD 86–035]

RIN 2115–AC32

Prohibition of Asbestos-Containing Construction Materials

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard proposes to revise the approval specification for noncombustible materials to delete references to asbestos as an acceptable noncombustible material for the construction of merchant vessels, and to update the list of designated testing laboratories for noncombustible materials. It is also proposed to delete references to asbestos gaskets form the regulations on piping systems. The Coast Guard no longer issues approvals for asbestos-containing structural fire protection materials, and does not permit the use of such materials in merchant vessel construction. The action taken under this docket will make the regulations consistent with established Coast Guard practice.

DATE: Comments must be received on or before January 17, 1989.

ADDRESSES: Comments should be mailed to Commandant (G–LRA–2/3600) (CGD 86–035), U.S. Coast Guard, 2100 Second Street, SW., Washington, DC 20593–0001. Comments may be delivered to and will be available for inspection and copying at the Marine Safety Council (G–LRA–2/3600), Room 3600, U.S. Coast Guard, 2100 Second Street, SW., Washington, DC between the hours of 8:00 a.m. and 3:00 p.m. Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Mr. Klaus Wahle, Office of Marine Safety, Security, and Environmental Protection, (202) 267–1444.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this rulemaking by submitting written views, data, or arguments. Comments should include the names and addresses of persons making them, identifying this rulemaking (CGD 86–035), and the specific section or paragraph of the rules to which each comment applies, and give reasons for each comment. Receipt of comments will be acknowledged if a stamped self-addressed envelope or postcard is enclosed. The regulations may be changed in light of the comments received. All comments received before the expiration date of the comment period will be considered before final action is taken on this proposal. No public hearing is planned, but one may be held if a written request for a hearing is received and it is determined that the opportunity to make oral presentations will aid the rulemaking process.

A regulatory information number (RIN) is assigned to each regulatory action listed on the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN number contained in the heading of this document can be used to cross reference this action with the Unified Agenda.

Discussion

Coast Guard regulations require the construction of sections of certain types of commercial vessels to be of approved structural fire protection materials. The materials approval specifications are contained in Subchapter Q of Title 46 CFR. Materials which have complied with the applicable provisions of these specifications are issued Certificates of Approval.

Traditionally, many materials approved for fire protection purposes have contained asbestos. As the health hazards of asbestos became known, manufacturers of structural fire protection materials switched from producing asbestos-containing materials to asbestos-free substitutes. Now, no asbestos-containing materials are used.

The approval specification for noncombustible materials, 46 CFR 164.009, needs to be revised to formally remove references to asbestos as an acceptable structural fire protection material. Additionally, this rulemaking proposes to update the list of designated laboratories contained in § 164.009–1. The Coast Guard also proposes to revise 46 CFR 56.25–15, to delete reference to asbestos-metallic gaskets for high temperature or high pressure piping systems.

Drafting Information

The principal persons involved in drafting this proposal are: Mr. Klaus Wahle, Project Manager, and Lieutenant Commander Don M. Wrye, Project Attorney, Office of Chief Counsel.

Regulatory Evaluation

These proposed regulations are considered to be non-major under Executive Order 12291 and nonsignificant under DOT regulatory policies and procedures (44 FR 11034, February 26, 1979). The economic impact of this proposal is expected to be minimal. The proposed regulations simply delete references to asbestos and asbestos-containing materials as acceptable for use in vessel construction and as gasket material, and update the list of designated testing laboratories for noncombustible materials. Since the use of asbestos is now obsolete, there should be no economic impact on vessel construction or replacement of gaskets. Accordingly, the Coast Guard certifies that the proposal, if adopted, will not have a significant economic impact on a substantial number of small entities.

A draft regulatory evaluation has been prepared and placed in the rulemaking docket. The evaluation may be inspected and copied at the address listed above under **ADDRESSES.** Copies may also be obtained by contacting the person listed under **FOR FURTHER INFORMATION CONTACT.**

Paperwork Reduction Act

The proposed regulations do not contain any information collection or recordkeeping requirements.

Environmental Analysis

This rulemaking has been thoroughly reviewed by the Coast Guard and it has been determined to be categorically excluded from further environmental documentation in accordance with section 2.B.2. of Commandant Instruction (COMDTINST) M16475.1B. A Categorical Exclusion Determination statement has been prepared and has been placed in the docket.

BEST COPY AVAILABLE

Federalism

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that this notice of proposed rulemaking does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

List of Subjects

46 CFR Part 56

Reporting and recordkeeping requirements, Vessels.

46 CFR Part 164

Fire prevention, Marine safety, Reporting and recordkeeping requirements.

In consideration of the foregoing, the Coast Guard proposes to amend Chapter I of Title 46, Code of Federal Regulations as follows:

PART 56—[AMENDED]

1. The authority citation for Part 56 continues to read as follows:

Authority: 33 U.S.C. 1321(j), 1509; 43 U.S.C. 1333; 46 U.S.C. 3306, 3703, 5515; E.O. 11735, 38 FR 21243, 3 CFR, 1971–1975 Comp., p. 793; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

2. In § 56.25–15, paragraphs (b) and (c) are revised to read as follows:

§ 56.25–15 Gaskets (reproduces 108.4).

* * * * *

(b) Only metallic gaskets may be used on flat or raised face flanges if the expected normal operating pressure exceeds 720 pounds per square inch or the operating temperature exceeds 750° F.

(c) The use of metal gaskets is not limited as to pressure provided the gasket materials are suitable for the maximum fluid temperatures.

PART 164—[AMENDED]

3. The authority citation for Part 164 continues to read as follows:

Authority: 46 U.S.C. 3306, 3703, 4104, 4302; E.O. 12234, 45 FR 58801 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

4. In § 164.009–1, paragraph (b) is revised to read as follows:

§ 164.009–1 General.

* * * * *

(b) The test and measurements described in this subpart are conducted by a laboratory designated by the Commandant. The following laboratories are so designated:

Underwriters Laboratories, Inc., 333 Pfingsten Road, Northbrook, IL 60062.

Dantest, National Institute for Testing and Verification, Amager Boulevard 115, DK 2300 Copenhagen S., Denmark.

§ 164.009–3 [Removed]

5. Section 164.009–3 is removed.

6. Section 164.009–5 is revised to read as follows:

§ 164.009–5 Noncombustible materials not requiring specific approval.

The following noncombustible materials may be used in merchant vessel construction though not specifically approved under this subpart:

(a) Sheet glass, block glass, clay, ceramics, and uncoated fibers.

(b) All metals, except magnesium and magnesium alloys.

(c) Portland cement, gypsum, and magnesite concretes having aggregates of only sand, gravel, expanded vermiculite, expanded or vesicular slags, diatomaceous silica, perlite, or pumice.

(d) Woven, knitted or needle punched glass fabric containing no additives other than lubricants not exceeding 2.5 percent.

Dated: October 21, 1988.

J.D. Sipes,

Rear Admiral, U.S. Coast Guard, Chief, Office of Marine Safety, Security and Environmental Protection.

BILLING CODE 4910–14–M

---

46 CFR Part 161

[CGD 85–208]

RIN 2115–AC95

Floating Electric Waterlight

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard proposes to revise 46 CFR 161.010 to replace the existing detailed-design requirements with the incorporation by reference of Underwriters Laboratories, Inc. (UL), ANSI/UL 1196, Standard for Floating Waterlights. Also, the Coast Guard proposes to replace the detailed plan approval process with a manufacturer self-certification method. Incorporation by reference of a current industry consensus standard, which is revised at more frequent intervals, will allow for the most current technological innovations to be incorporated into equipment design. Also, the manufacturer self-certification method will improve the plan approval process by reducing time delays and administrative procedures.

DATE: Comments must be received on or before March 1, 1989.

ADDRESSES: Comments may be mailed to the Commandant (G–LRA–2/21) (CGD 85–208), U.S. Coast Guard, Washington, DC 20593–0001. Comments may be delivered to, and are available for inspection and copying at the Marine Safety Council (G–LRA–2/21), Room 2110, U.S. Coast Guard, 2100 Second Street, SW., Washington, DC, between 8:00 a.m. and 3:00 p.m., Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Mr. Randall N. Crenwelge, Marine Technical and Hazardous Materials Division, Room 1218, U.S. Coast Guard, 2100 Second Street, SW., Washington, DC 20593–0001, (202) 267–2206. Normal office hours are from 7:30 a.m. until 4:00 p.m., Monday through Friday, except holidays.

SUPPLEMENTARY INFORMATION: Interested persons are inivited to participate in this rulemaking procedure by submitting written comments, data, or arguments. Each comment should include the name and address of the person submitting the comment, identify this notice (CGD 85–208), the specific section of the proposal to which each comment applies, and the reason for the comments. No public hearing is anticipated at this time, however, one may be held if written requests for a hearing are received, and it is determined that the opportunity to make oral presentations will benefit the rulemaking process. All comments will be reviewed and considered by the Coast Guard before taking further rulemaking action.

A regulatory information number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN number contained in the heading of this document can be used to cross reference this action with the Unified Agenda.

Drafting Information

The principal persons involved in drafting this proposal are Mr. Randall N. Crenwelge, Project Manager, and Lieutenant Commander Don M. Wrye, Project Counsel, Office of Chief Counsel.

Background

Coast Guard regulations require floating electric waterlights to be attached to ring life buoys, liferafts, lifefloats, and other buoyant apparatus. Floating electric waterlights are required to be constructed and marked in accordance with 46 CFR 161.010, and they must be U.S. Coast Guard Approved.

The Coast Guard, waterlight manufacturers, and Underwriters Laboratories, Inc. (UL), an independent standards development and product certification agency, have worked together to develop an industry standard for floating waterlights. The result is ANSI/UL 1196, Standard for Floating Waterlights. The standard specifies construction and test requirements for floating waterlights, and it is equivalent to the existing U.S. Coast Guard regulations. It also contains the requirement of the 1983 amendments to the Safety of Life at Sea Convention of 1974.

This proposal modifies 46 CFR 161.010 by deleting the specific material, construction, performance, and test requirements. These sections would be replaced by incorporating ANSI/UL 1196 by reference. Also, the manufacturer would be required to test the waterlight using an independent laboratory which complies with Subpart 159.010–3. The manufacturer of a new waterlight would be required to submit to the Commandant (G–MTH–2), U.S. Coast Guard, a pre-approval sample, plans, specifications, a test report, and a self-certification statement indicating compliance with § 161.010. After receiving all the required items, an approval certificate would be issued to the manufacturer, and the plans, test report, and other materials would be retained for future reference. The manufacturer could then label the light with an approval number as required by the ANSI/UL standard. The light could then be mass produced.

Waterlights which have been previously approved and are currently being or will be manufactured with an existing approval number will not be affected by this proposed rulemaking as long as the present certificate is up-to-date. The Coast Guard will continue to accept extensions of approval for existing previously approved waterlights when their certificates expire.

Regulatory Evaluation

The proposed regulations are considered to be non-major under Executive Order 12291 and nonsignificant under DOT regulatory policies and procedures (44 FR 11034; February 26, 1979). The economic impact of this proposal has been found to be so minimal that further evaluation is unnecessary. Presently, 46 CFR 161.010 requires waterlight manufacturers to submit plans, specifications, test records, and a pre-approval sample to the Coast Guard. The proposed regulations wil not impose any new or additional submission requirements on the manufacturer. This proposal removes the manufacturer's option to perform tests using Coast Guard supervision. This does not differ from present practice. Manufacturers usually do not have the required equipment for testing. The Coast Guard has not been contacted to witness any tests during the last several years. Therefore, any additional expense would be minimal. Since the impact of the proposal is minimal, the Coast Guard certifies that, if adopted, it will not have a significant economic impact on a substantial number of small entities.

Paperwork Reduction Act

The proposed regulations do not impose any new information collection or record-keeping requirements on the public. The only paperwork requirements involve design, plan development, and submittal of plans and test results for record-keeping and oversight purposes, which are similar to requirements already approved by the Office of Management and Budget (OMB).

Environmental Impact

The Coast Guard has considered the environmental impact of the proposed regulations and, in accordance with section 2.B.2.C. of Commandant Instruction M16475.1B, has determined that this rulemaking is categorically excluded from further environmental documentation.

Federalism

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that this rulemaking does not have sufficient federalism implications to warrant the preparation of a Federalism Asessment.

List of Subjects in 46 CFR Part 161

Fire prevention, Marine safety, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, the Coast Guard proposes to amend Part 161 of Chapter 1 of Title 46, Code of Federal Regulations, as follows:

PART 161—[AMENDED]

1. The authority citation for Part 161 continues to read as follows:

Authority: 46 U.S.C. 3306, 3703, 4104; 49 CFR 1.46.

2. Section 161.010–1 is revised to read as follows:

§ 161.010–1 Incorporation by reference.

(a) Certain materials are incorporated by reference into this part with the approval of the Director of the Federal Register in accordance with 5 U.S.C. 552(a). To enforce any edition other than the one listed in paragraph (b) of this section, notice of change must be published in the **Federal Register** and the material made available to the public. All approved material is on file at the Office of the Federal Register, 1100 L Street, NW., Washington, DC, and at the U.S. Coast Guard, Marine Technical and Hazardous Materials Division (G–MTH), 2100 Second Street, SW., Washington, DC 20593–0001, and is available from the sources indicated in paragraph (b) of this section.

(b) The material approved for incorporation by reference in this part, and the sections affected are:

Underwriters Laboratories, Inc.

333 Pfingsten Road, Northbrook, Illinois 60062, ANSI/UL 1196, Standard for Floating Waterlights, 161.010–3; 161.010–5, Second Edition—March 23, 1987.

3. Section 161.010–3 is revised to read as follows:

§ 161.010–3 Design, Construction, and Test Requirements.

(a) Each floating electric waterlight shall meet the requirements of ANSI/UL 1196.

4. Section 161.010–4 is revised to read as follows:

§ 161.010–4 Inspections and methods of test.

(a) Each inspection and test report required by this subpart shall comply with Section 159.005–11 of this chapter.

(b) The U.S. Coast Guard reserves the right to make any inspection or test it deems necessary to determine the conformance of the materials and equipment to this subpart.

(c) The facilities, materials, and labor for all tests shall be furnished at no cost to the U.S. Coast Guard.

5. Section 161.010–5 is revised to read as follows:

§ 161.010–5 Procedure for approval.

(a) A request for approval of an automatic floating electric waterlight must be submitted to the Commandant (G–MTH–2), U.S. Coast Guad, 2100 Second Street, SW., Washington, DC 20593–0001.

(b) All inspections and tests shall be performed by an independent laboratory which meets the requirements of Subpart 159.010–3.

(c) Each request for approval must contain:

(1) The name and address of the applicant,

(2) One copy of all plans and specifications that meet the

requirements of § 159.005–12 of this chapter,

(3) A pre-approval sample of the waterlight,

(4) An inspection and test report verifying compliance with the construction and test requirements of ANSI/UL 1196, and

(5) A statement by the manufacturer certifying that the waterlight complies with the requirements of this subpart.

§§ 161.010–6 and 161.010–7 [Removed].

6. Sections 161.010–6 and 161.010–7 are removed.

Dated: October 14, 1988.

BILLING CODE 4910–14–M

Federal Railroad Administration

49 CFR Part 225

[Docket No. RAR–3, Notice No. 1; Regulation Identifier Number 2130–AA44]

Railroad Accidents/Incidents; Reports Classification, and Investigations; Miscellaneous Proposed Amendments

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to amend the rules pertaining to the reporting of railroad accidents and incidents to FRA. When a railroad alleges an employee human factor as the primary cause or contributing cause of an accident, it would be required to notify the employee involved/implicated that the railroad has made such allegations and that the employee has the right to submit a statement to FRA concerning the accident. This action is taken in order to implement section 24 of the Rail Safety Improvement Act of 1988 (Pub. L. 100–342), which provides that "if a railroad, in reporting an accident or incident under the Accident Reports Act (45 U.S.C. 38 *et seq.*), assigns human error as a cause of the accident or incident, such report shall include, at the option of each employee whose error is alleged, a statement by such employee explaining any factors the employee alleges contributed to the accident or incident." Interested parties are invited to submit comments for inclusion in the docket of this rulemaking.

DATES: (1) *Written Comments:* Written comment must be received on or before January 27, 1989. Comments received after that date will be considered to the extent possible without incurring additional expense or delay.

(2) *Public Hearing:* A public hearing will be held at 10:00 a.m. on January 11, 1989. Any person who desires to make an oral statement at the hearing must notify the Docket Clerk by telephone or mail on or before January 5, 1989, and must submit three copies of the oral statement that he or she intends to make at the hearing by January 6, 1989.

ADDRESSES: (1) *Written Comments:* Written comments should identify the docket number and the notice number and must be submitted in triplicate to the Docket Clerk, Office of the Chief Counsel, Federal Railroad Administration, 400 Seventh Street SW., Room 8201, Washington, DC 20590. Written comments will be available for examination, both before and after the closing date for written comments, during regular business hours at the same address.

(2) *Public Hearing:* The public hearing noted about will be held in room 6200 of the Nassif Building at the same street address. Persons desiring to make oral statements at the hearing should notify the Docket Clerk on or before January 5, 1989, by telephone (202–366–0635; FTS 366–0635) or by writing to: Docket Clerk, Office of the Chief Counsel, Federal Railroad Administration, 400 Seventh Street SW., Room 8201, Washington, DC 20590. In addition, each person who desires to make an oral statement at the hearing must submit to the Docket Clerk three copies of the oral statement that he or she intends to make at the hearing by January 6, 1989.

FOR FURTHER INFORMATION CONTACT:

Principal Program Person: Mr. T.S. Ellis, Office of Safety, Federal Railroad Administration, Washington, DC 20590, Telephone 202–366–2760 (FTS 366–2760).

Principal Attorney: Ms. Billie Stultz, Office of the Chief Counsel, Federal Railroad Administration, Washington, DC 20590, Telephone 202–366–0635 (FTS 366–0635).

SUPPLEMENTARY INFORMATION:

Background

On June 22, 1988, the President signed into the Rail Safety Improvement Act of 1988 (RSIA). Section 24 of that Act provides that "(i)f a railroad, in reporting an accident or incident under the Accident Reports Act (45 U.S.C. 38 *et seq.*), assigns human error as a cause of the accident or incident, such report shall include, at the option of each employee whose error is alleged, a statement by such employee explaining any factor the employee alleges contributed to the accident or incident."

The legislative history of this provision indicates that Congress intended for FRA to allow submission of the employee's statement without delaying the submission of the railroad's accident report and for FRA to file the employee's statement with the applicable report from the railroad. (See "Joint Explanatory Statement of the Committee of Conference," in the Conference Report to accompany S. 1539, H.R. Rept. No. 100–637 (100th Cong. 2d Sess.).) That is in fact FRA's practice today and has been its practice for many years. The principal purpose of this provision appears to be threefold: (1) Ensuring that employees are aware of this right, (2) ensuring that employees are notified of the instances where the right may be execised, and (3) institutionalizing the practice in regulations.

The central requirement of the proposed rule is that the railroad provide written notification to any employee whom the railroad alleges to have been responsible, at least in part, for an act, omission, or condition cited by the railroad as a primary or contributing cause of a certain type of employee human factor accident, informing the employee of the relevant allegations and of his or her right to file a statement with FRA. A copy of the proposed standard form for notification of employees is appended to this Notice of Proposed Rulemaking.

Section 209 of the Federal Railroad Safety Act of 1970 (FRSA) provides that "(t)he Secretary shall include in, or make applicable to, any railroad safety * * * regulation issued under this title a civil penalty for violation thereof * * *." The RSIA increases the maximum penalty for violation of a regulation issued under the FRSA from $2,500 to $10,000 and, in certain circumstances, $20,000. See 53 FR 28594–28598 (1988). The final rule will include a revised penalty schedule for Part 225 reflecting the higher maximum penalties now available and adding entries for the new section proposed herein. See the recent revisions to the penalty provision and penalty schedule of Part 225 required by the RSIA. 53 FR 28594, 28601 (1988). Because FRA's penalty schedules are statements of policy, notice and comment are not required to revisions to those schedules. See 5 U.S.C. 553(b)(3)(A). Nevertheless, interested parties are welcome to submit their views on what penalties may be appropriate.

Environmental Impact

FRA has evaluated this proposed rule in accordance with its procedures for ensuring full consideration of the potential environmental impacts of FRA actions, as required by the National Environmental Policy Act and related directives. This notice meets the criteria that establish this as a non-major action for environmental purposes.

E.O. 12291 and DOT Regulatory Policies and Procedures

This proposed rule has been evaluated in accordance with existing policies and procedures. It is considered to be non-major under Executive Order 12291 but significant under the DOT policies and procedures (44 FR 11034; February 26, 1979).

This rule will not have any significant direct or indirect economic impact for four reasons. First, its requirements apply only in the case of a rail equipment accident/incident that the reporting railroad alleges to have resulted from an employee human factor. FRA statistics, based on the railroads' reports, show that there were 855 such accidents in 1987. Second, compliance with the notification requirements should not be difficult because it is accomplished by filling in a short standard form supplied by the agency. Third, the Railroad Employee Accident Statement provided for in the rule is also to be written on a short standard form, partially completed by the railroad. Fourth, the Statement is submitted at the employee's option; employees who have no interest in filling it out are not required to do so.

The benefit of the rule is that employees are informed of their rights, which is likely to result in FRA's receiving more complete information on employees' views of the causes of accidents. The cost to the railroads for completing, mailing or delivering, and maintaining these records is insignificant. Additionally, we estimate that the cost to the employees is insignificant. For these reasons, a draft regulatory evaluation has not been prepared; however, the agency invites comments on the costs expected to be incurred.

Regulatory Flexibility Act

FRA certifies that this proposed rule will not have a significant impact on a substantial number of small entities. There are no direct or indirect economic impacts for small units of government, businesses, or other organizations. State rail agencies remain free to participate in the administration of FRA's rules, but are not required to do so.

Federalism

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that the proposed rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Paperwork Reduction Act

Public reporting burden for this collection of information is estimated to average fifteen minutes per employee notification and an average of fifteen minutes per employee statement, with an estimated total annual burden (based on an estimated 832 notifications and 416 statements) of 312 hours. All of these estimates include time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to: Ms. Gloria Swanson, Federal Railroad Administration, 400 Seventh Street SW., Room 8314, Washington, DC 20590; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

List of Subjects in 29 CFR Part 225

Railroad safety, Railroad accident reporting rules.

In consideration of the foregoing, FRA proposes to amend Chapter II, Subtitle B, of Title 49, Code of Federal Regulations as follows:

PART 225—[AMENDED]

The authority citation for Part 225 continues to read as follows (see 53 FR 28594, 28601):

Authority: 45 U.S.C. 38, 42, and 43, as amended; 45 U.S.C. 431, 437, and 438, as amended; Pub. L. 100–342, 102 Stat. 624; and 49 CFR 1.49 (c) and (m).

1. Add new 49 CFR 225.12 to read as follows:

§ 225.12 Notice to railroad employee involved in rail equipment accident/incident attributed to employee human factor; railroad employee accident statement.

(a) If, in reporting to FRA a "rail equipment accident/incident," as that term is defined in § 225.19(c), a railroad assigns any of the cause codes listed under "Train Operation—Human Factors" in the "FRA Guide for Preparing Accident/Incident Reports," except Cause Code 506, as the primary cause or a contributing cause of the rail equipment accident/incident; has actual knowledge, or through reasonable inquiry should have actual knowledge, that a railroad employee was responsible, at least in part, for the act, omission, or condition cited by that railroad as the primary cause or contributing cause; and has actual knowledge of, or through reasonable inquiry should have actual knowledge of, the identity of that employee; then the railroad must, as to each employee human factor and each such employee—

(1) State in the narrative section of the rail equipment accident/incident report—

(i) The nature of the alleged employee human factor and

(ii) The identity (by name and position) of the employee alleged to have been responsible, at least in part, for the act, omission, or condition cited by that railroad as the human factor (the back of the form or a separate sheet of paper shall be used if additional space is needed); and

(2) Complete Part I, "Notice to Railroad Employee Involved in Rail Equipment Accident/Incident Attributed to Employee Human Factor," of Form FRA F 6180.78, in accordance with instructions on the form; and

(3) Hand deliver or mail first class (postage prepaid) to that employee within 45 days after the month in which the rail equipment accident/incident occurred—

(i) A copy of Form FRA F 6180.78, "Notice to Railroad Employee Involved in Rail Equipment Accident/Incident Attributed to Employee Human Factor; Railroad Employee Accident Statement," with Part I completed as to the applicable employee and accident; and

(ii) Two copies of the railroad's report to FRA on the rail equipment accident/incident involved.

(b) If, in reporting to FRA a "rail equipment accident/incident," as that term is defined in § 225.19(c), a railroad assigns any of the cause codes listed under "Train Operation—Human Factors" in the "FRA Guide for Preparing Accident/Incident Reports," except Cause Code 506, as the primary cause or a contributing cause of the rail equipment accident/incident; but after reasonable inquiry has determined that a railroad employee was not responsible, even in part, for the act, omission, or condition cited by that railroad as the primary cause or contributing cause; or after reasonable inquiry has determined that a railroad employee was responsible, at least in part, but cannot determine the identity

of that employee, then the railroad must, as to each employee human factor and each such employee, state that fact in the narrative section of the rail equipment accident/incident report.

(c) Employee accident statements are voluntary, not mandatory; however, if an employee wishes to submit a statement and assure that it will be filed with the railroad's accident/incident report, the statement must be made on Part II of From FRA F 6180.78 (entitled "Notice to Railroad Employee Involved in Rail Equipment Accident/Incident Attributed to Employee Human Factor; Railroad Employee Accident Statement"), following the instructions printed on the form.

(d) If an employee chooses to submit an employee accident statement to FRA, all of the employee's statements in the Railroad Employee Accident Statement must be true and correct to the best of the employee's knowledge and belief. Under sections 3(a) and 15 of the Rail Safety Improvement Act of 1988, any person who willfully files a false Railroad Employee Accident Statement with FRA is subject to a civil penalty of up to $10,000, and where the willful violation is also grossly negligent or involves a pattern of repeated violations that creates an imminent hazard of death or injury to persons or has caused death or injury, a penalty not to exceed $20,000 per violation may be assessed. Additionally, any person who knowingly and willfully files a false Railroad Employee Accident Statement is subject to a $5,000 fine, or up to two years' imprisonment, or both, under the Federal Railroad Safety Act of 1970 (45 U.S.C. 438(e)).

2. Revise 49 CFR 225.27(a) to read as follows:

§ 225.27 Retention of records.

(a) Each railroad must retain the logs, supplementary records and annual summaries required by § 225.25 for at least 5 years after the end of the calendar year to which they relate and the written notices to employees required by § 225.12 for at least 2 years after the end of the calendar year to which they relate.

* * * * *

Issued in Washington, DC, on November 28, 1988.

John H. Riley,
Administrator.

[**Editorial Note:** The following appendix will not appear in the Code of Federal Regulations.]

Appendix—Notice to Railroad Employee Involved in Rail Equipment Accident/Incident Attributed to Employee Human Factor; Railroad Employee Accident Statement

PART I - NOTICE TO RAILROAD EMPLOYEE INVOLVED IN RAIL EQUIPMENT ACCIDENT/INCIDENT ATTRIBUTED TO EMPLOYEE HUMAN FACTOR (TO BE COMPLETED BY RAILROAD INVOLVED)

Name of Reporting Railroad	Railroad Accident/Incident No. and Location	Date of Accident/ Incident (month, day, year)

Check the Cause Code Applicable to this Employee

Cause Codes Listed on Accident/Incident Report (State what each cause code stands for.)

_____ Primary Cause: _____

Number Meaning

_____ Contributing Cause: _____

Number Meaning

Employee's Name (First, middle, last) Job Title on Date of Accident

Employee's Address or RFD No. (include apt. no., if any) City State Zip

Notice to Employee

This railroad, in submitting its Rail Equipment Accident/Incident Report to the Federal Railroad Administration (FRA) on the accident described above, has identified you as being responsible, at least in part, for an act, omission, or condition cited by the railroad as the primary cause or a contributing cause of the accident. (For the railroad's specific allegations, please see above on this form and the report itself, which is enclosed in duplicate, particularly the narrative section.)

Under FRA safety regulations (49 CFR 225.12), you may submit a statement to FRA explaining any factors that you believe caused or contributed to the accident. You are not required to submit this statement to FRA; however, if you choose to make such a statement, you must do so in the following way:

1. Fill in Part II of this form, "Railroad Employee Accident Statement," according to the instructions on the form;

2. Attach one copy of the railroad's Rail Equipment Accident/Incident Report on this accident; and

3. Mail the entire form (Parts I and II), with one copy of the railroad's report, continuation pages (if any), and any other supporting documents, to: Office of Safety (RRS–22), Federal Railroad Administration, 400 Seventh Street, SW., Washington, DC 20590.

FRA's time limit for filing such a statement is 35 days from the date that this notice was mailed or hand delivered to you. FRA suggests that you keep one copy of the railroad's report for your records and that you make and keep a copy of your statement and any other supporting material submitted with it.

Signature of Railroad Representative

Title

Date of Mailing or Hand Delivery to Employee

PART II—RAILROAD EMPLOYEE ACCIDENT STATEMENT (TO BE COMPLETED BY EMPLOYEE)

Explain any factors that you believe caused or contributed to the accident described above. Please print or type. (If more room is needed, attach one or more additional pieces of paper.) Also, please attach to this form one copy of the railroad's Rail Equipment Accident/Incident Report on this accident.

Attention—This Statement Must be Signed (Otherwise it will be returned to the employee.)

Any person who willfully files a false Railroad Employee Accident Statement with FRA is subject to a civil penalty of up to $10,000. Sections 3(a) and 15 of the Rail Safety Improvement Act of 1988. Any person who knowingly and willfully files a false Railroad Employee Accident Statement is subject to a $5,000 fine or up to two years' imprisonment, or both. Federal Railroad Safety Act of 1970, 45 U.S.C. 438(e).

I have carefully read this statement and confirm that it is true and correct to the best of my knowledge and belief.

This section of the FEDERAL REGISTER contains documents other than rules, or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Federal Grain Inspection Service

Designation Renewal of the States of Minnesota (MN) and Mississippi (MS)

AGENCY: Federal Grain Inspection Service (Service), USDA.

ACTION: Notice.

SUMMARY: This notice announces the designation renewal of the Minnesota Department of Agriculture and the Mississippi Department of Agriculture and Commerce as official agencies responsible for providing official services under the U.S. Grain Standards Act, as Amended (Act).

EFFECTIVE DATE: January 1, 1989.

ADDRESS: James R. Conrad, Chief, Review Branch, Compliance Division, FGIS, USDA, Room 1647 South Building, P.O. Box 96454, Washington, DC 20090–6454.

FOR FURTHER INFORMATION CONTACT: James R. Conrad, telephone (202) 447–8525.

SUPPLEMENTARY INFORMATION: This action has been reviewed and determined not to be a rule or regulation as defined in Executive Order 12291 and Departmental Regulation 1512–1; therefore, the Executive Order and Departmental Regulation do not apply to this action.

The Service announced that Minnesota's and Mississippi's designations terminate on December 31, 1988, and requested applications for official agency designation to provide official services within specified geographic areas in the June 30, 1988, **Federal Register** (53 FR 24753). Applications were to be postmarked by August 1, 1988. Mississippi was the only applicant for designation in its area and applied for designation renewal in the entire area currently assigned to that agency. There were four applications for the Minnesota designation. Minnesota applied for designation renewal for inspection and weighing functions in the entire area currently assigned to that agency. The other three applicants for designation were: David N. Puetz, dba Licensed Inspections for Minnesota, for inspection only designation for any portion of Minnesota; Aberdeen Grain Inspection, Inc., for inspection only designation in two counties in southwest Minnesota; and North Dakota Grain Inspection Service, Inc.; for inspection only designation for approximately a 3 county area due east of Fargo, North Dakota, along the west central border of Minnesota.

The Service announced the applicant names in the September 1, 1988, **Federal Register** (53 FR 33828) and requested comments on the applicants for designation. Comments were to be postmarked by October 18, 1988; no comments were received regarding Mississippi's designation renewal. A total of 18 comments were received regarding the designation of an official agency in the State of Minnesota. Fourteen comments, submitted by grain firms were received in favor of North Dakota Grain Inspection Service Inc. Several of these commenters expressed concern regarding the proximity of their grain firms to, respectively, North Dakota Grain Inspection Service, Inc. and the Minnesota specified service points. Commenters stated that the location of these Agencies impact on the timeliness and costliness of services. Four comments were received in favor of Minnesota which were submitted by grain trade organizations.

The Service has evaluated Minnesota's operation with regard to the designation criteria in the Act and comments received. The Service has not found any deficiencies that would indicate that Minnesota fails to meet the designation criteria to perform official services in the entire geographic area for which the agency applied and that would serve as a basis for not renewing its designation to perform official services in the geographic area currently assigned to Minnesota.

Minnesota's fee schedules previously have been approved by FGIS as reasonable and nondiscriminatory. Additionally, the Service has determined that Minnesota currently provides official services in a timely manner consistent with the Act and the regulations.

The Service evaluated all available information regarding the designation criteria in section 7(f)(1)(A) of the Act; and, in accordance with section 7(f)(1)(B), determined that Mississippi is able to provide official services in the geographic area for which the Service is renewing their designation. The Service has also determined that Minnesota is better able than any other applicant to provide official services in the geographic area for which the Service is designating it. Effective January 1, 1989, and terminating December 31, 1991, Minnesota and Mississippi will provide official inspection and Class X or Class Y weighing services in their specified geographic area, as previously described in the June 30 **Federal Register**.

Interested persons may obtain official services by contacting the agencies at the following telephone numbers: Minnesota at (612) 341–7190, Mississippi at (601) 762–6141.

Pub. L. 94–582, 90 Stat. 2867, as amended. (7 U.S.C. 73 *et seq.*)

Date: November 28, 1988.

J.T. Abshier,

Director, Compliance Division.

BILLING CODE 3410–EN–M

Request for Comments on Designation Applicants in the Geographic Area Currently Assigned to the Ohio Valley (IN) and Quincy (IL) Agencies

AGENCY: Federal Grain Inspection Service (Service), USDA.

ACTION: Notice.

SUMMARY: This notice requests comments from interested parties on the applicants for official agency designation in the geographic areas currently assigned to James L. Goodge, Sr., dba Ohio Valley Grain Inspection (Ohio Valley), and Anthony L. Marquardt dba Quincy Grain Inspection & Weighing Service (Quincy).

DATE: Comments must be postmarked on or before January 17, 1989.

ADDRESS: Comments must be submitted in writing to Lewis Lebakken, Jr., RM, FGIS, USDA, Room 0628 South Building, P.O. Box 96454, Washington, DC 20090–6454. *Telemail* users may respond to [LLEBAKKEN/FGIS/USDA] telemail. *Telex* users may respond as follows:

TO: Lewis Lebakken, TLX: 7607351. ANS:FGIS UC.

All comments received will be made available for public inspection at the above address located at 1400 Independence Avenue, SW., during regular business hours (7 CFR 1.27(b)).

FOR FURTHER INFORMATION CONTACT: Lewis Lebakken, Jr., telephone (202) 475–3428.

This action has been reviewed and determined not to be a rule or regulation as defined in Executive Order 12291 and Departmental Regulation 1512–1; therefore, the Executive Order and Departmental Regulation do not apply to this action.

The Service requested applications for official agency designation to provide official services within specified geographic areas in the October 5, 1988, **Federal Register** (53 FR 39121). Applications were to be postmarked by November 3, 1988. Ohio Valley and Quincy were the only applicants for designation in those areas and each applied for designation renewal in the entire area currently assigned to that agency.

This notice provides interested persons the opportunity to present their comments concerning the applicants' designation. Commenters are encouraged to submit reasons for support or objection to these designation actions and include pertinent data to support their views and comments. All comments must be submitted to the Resources Management Division, at the above address.

Comments and other available information will be considered in making a final decision. Notice of the final decision will be published in the **Federal Register**, and the applicants will be informed of the decision in writing.

Pub. L. 94–582, 90 Stat. 2867, as amended. (7 U.S.C. 71 *et seq.*)

Date: November 28, 1988.

J.T. Abshier,

Director, Compliance Division.

BILLING CODE 3410–EN–M

Request for Designation Applicants To Provide Official Services in the Geographic Area Currently Assigned to the Champaign (IL) and Springfield (IL) Agencies

AGENCY: Federal Grain Inspection Service (Service), USDA.

ACTION: Notice.

SUMMARY: Pursuant to the provisions of the U.S. Grain Standards Act, as Amended (Act), official agency designations shall terminate not later than triennially and may be renewed according to the criteria and procedures prescribed in the Act. This notice announces that the designation of two agencies will terminate, in accordance with the Act, and requests applications from parties interested in being designated as the official agency to provide official services in the geographic area currently assigned to the specified agencies. The official agencies are the Champaign-Danville Grain Inspection Departments, Inc. (Champaign), and Glen Wallace dba Springfield Grain Inspection Department (Springfield).

DATE: Applications must be postmarked on or before January 3, 1989.

ADDRESS: Applications must be submitted to James R. Conrad, Chief, Review Branch, Compliance Division, FGIS, USDA, Room 1647 South Building, P.O. Box 96454, Washington, DC 20090–6454. All applications received will be made available for public inspection at this address located at 1400 Independence Avenue, SW., during regular business hours.

FOR FURTHER INFORMATION CONTACT: James R. Conrad, telephone (202) 447–8525.

SUPPLEMENTARY INFORMATION: This action has been reviewed and determined not to be a rule or regulation as defined in Executive Order 12291 and Departmental Regulation 1512–1; therefore, the Executive Order and Departmental Regulation do not apply to this action.

Section 7(f)(1) of the Act specifies that the Administrator of the Service is authorized, upon application by any qualified agency or person, to designate such agency or person to provide official services after a determination is made that the applicant is better able than any other applicant to provide official services in an assigned geographic area.

Champaign, located at 527 E. Main Street, Danville, IL 61832; and Springfield, located at 1301 North Fifteenth Street, Springfield, IL 62702; were each designated under the Act as an official agency on June 1, 1986, to provide official inspection functions.

Each official agency's designation terminates on May 31, 1989. Section 7(g)(1) of the Act states that designations of official agencies shall terminate not later than triennially and may be renewed according to the criteria and procedures prescribed in the Act.

The geographic area presently assigned to Champaign, in the States of Illinois and Indiana, pursuant to section 7(f)(2) of the act, which may be assigned to the applicant selected for designation is as follows:

Bounded on the North by the northern Iroquois County line east to the Illinois-Indiana State line; the Illinois-Indiana State line south to U.S. Route 24; U.S. Route 24 east to U.S. Route 41;

Bounded on the East by U.S. Route 41 south to the southern Fountain County line; the Fountain County line west to Vermillion County (in Indiana); the eastern Vermillion County line south to U.S. Route 36;

Bounded on the South by U.S. Route 36 west into Illinois, to the Douglas County line; the eastern Douglas and Coles County lines; the southern Coles County line; and

Bounded on the West by the western Coles and Douglas County lines; the western Champaign County line north to Interstate 72; Interstate 72 southwest to the Piatt County line; the western Piatt County line; the southern McLean County line west to a point 10 miles west of the western Champaign County line; a straight line running north to U.S. Route 136; U.S. Route 136 east to Interstate 57; Interstate 57 north to the Champaign County line; the northern Champaign County line; the western Vermillion (in Illinois) and Iroquois County lines.

The following locations, all in Illinois, outside of the above contiguous geographic area, are part of this geographic area assignment: Moultrie Grain Association, Cadwell, Moultrie County; Tabor and Company, Weedman Grain Company, and Pacific Grain Company, all in Farmer City, Dewitt County; Moultrie Grain Association, Lovington, Moultrie County; and Monticello Grain Company, Monticello, Piatt County; (all located inside Decatur Grain Inspection, Inc.'s area).

Exceptions to Champaign's assigned geographic area are the following locations inside Champaign's area which have been and will continue to be serviced by the following official agencies:

1. Paris Illinois Grain Inspection: Tabor Grain Co., Newman, Douglas County, Illinois; Tabor Grain Co., Oakland, Coles County, Illinois; and Cargill, Inc., Dana, Vermillion County, Indiana; and

2. Titus Grain Inspection, Inc.: Boswell Grain Company, Boswell, Benton County, Indiana; Dunn Grain, Dunn, Benton County, Indiana; York Richland Grain Elevator, Inc., Earl Park, Benton County, Indiana; and Raub Grain Company, Raub, Benton County, Indiana.

The geographic area presently assigned to Springfield, in the State of

VOL 53 ISS 231 DE 1 1988 UMI

Illinois, pursuant to section 7(f)(2) of the Act, which may be assigned to the applicant selected for designation is as follows:

Bounded on the North by the northern Schuyler, Cass, and Menard County lines; the western Logan County line north to State Route 10; State Route 10 east to the west side of Beason;

Bounded on the East by a straight line from the west side of Beason southwest to Elkhart on Interstate 55; a straight line from Elkhart southeast to Stonington on State Route 48; a straight line from Stonington southwest to Irving on State Route 16;

Bounded on the South by State Route 16 west to Interstate 55; a straight line from the junction of Interstate 55 and State Route 16 northwest to the junction of State Route 111 and the Morgan County line; the southern Morgan and Scott County lines.

Bounded on the West by the western Scott, Morgan, Cass, and Schuyler County lines.

The following locations, outside of the above contiguous geographic area, are part of this geographic area assignment: East Lincoln Farmers Grain Co., Lincoln, Logan County (located inside Bloomington Grain Inspection Department's area); Chestervale Elevator Company, Chestervale, Logan County (located inside Decatur Grain Inspection, Inc.'s area); and Pillsbury Co., Florence, Pike County (located inside Quincy Grain Inspection & Weighing Service's area).

Interested parties, including Champaign and Springfield, are hereby given opportunity to apply for official agency designation to provide the official services in each geographic area, as specified above, under the provisions of section 7(f) of the Act and § 800.196(d) of the regulations issued thereunder. Designation in each specified geographic area is for the period beginning June 1, 1989, and ending May 31, 1992. Parties wishing to apply for designation should contact the Review Branch, Compliance Division, at the address listed above for forms and information.

Applications and other available information will be considered in determining which applicant will be designated to provide official services in a geographic area.

Pub. L. 94–582, 90 Stat. 2867, as amended. (7 U.S.C. 71 *et seq.*)

Date: November 28, 1988.

J.T. Abshier,

Director, Compliance Division.

BILLING CODE 3410–EN–M

Forest Service

Record of Decision; California-Oregon Transmission Project; Final Environmental Impact Statement; Pacific Southwest Region

AGENCY: Forest Service, USDA.

ACTION: Record of decision.

Background

The Secretary of Energy, through Western Area Power Administration (Western), and the Transmission Agency of Northern California (TANC) developed a proposal to construct facilities that would allow mutually beneficial power sales between the Pacific Northwest and California. The proposal, known as the California-Oregon Transmission Project (COTP), would have the purpose of expanding the bidirectional capability of the Pacific Northwest-Pacific Southwest Intertie transmission system and help serve California's need for economical power, would facilitate the Pacific Northwest's desire to sell surplus power, and would meet the need for maintaining and increasing the reliability of the existing transmission system.

The California-Oregon Transmission Project (COTP) proposal is to construct and operate approximately 340 miles of transmission lines, three substations, a series compensation station, communication facilities, and to modify two existing substations. The specific portions of this proposal that involve National Forest System lands include:

Construction of a new 500 KV AC transmission line and associated facilities from the California-Oregon border area to the proposed Olinda Substation near Redding, California, approximately 58 miles of which crosses National Forest System lands.

Modification of existing and construction of a new communication system and associated facilities on National Forest System lands.

The Department of Energy, Western, and the Transmission Agency of Northern California, were designated as lead agencies for the development of the final EIS/EIR for the California-Oregon Transmission Project (DOE/EIS–0128). The USDA Forest Service was a cooperating agency in the development of this joint EIS/EIR.

Decision

Based on the analysis and information contained in the Draft, Supplement to the Draft, and Final Environmental Impact Statement (EIS), it is my decision to select the North D Alternative for the 500 KV powerline and associated improvements on National Forest System lands. It is also my decision to authorize the construction of the project under a Special-Use Permit with appropriate clauses and stipulations, as shown in the attached exhibit, and to issue an easement for the right-of-way covering the operation and maintenance of the transmission line and associated facilities after construction is completed.

The North D Alternative consists of the following route segments discussed in the EIS/EIR which cross National Forest System lands between the Oregon border and Redding, California (a general description of the route follows):

N–10K	N–10I.
N–10M1	N–10M2(A)
N–10M2(A1)	North 2B
N–10Alt5(B)	N–10Alt5(D)
N–10Alt5(C)	N–7Alt1(A)
N–7Alt1(B)	North 3J
N–8A(3)	N–8C
N–8Alt2(A)	

Alternative North D crosses onto National Forest System lands southeast of the town of Newell in Modoc County, near Casuse Mountain. It then travels in a southwesterly direction across portions of the Doublehead and Big Valley Districts of the Modoc National Forest, crossing into Siskiyou County near Border Mountain. The route crosses onto the McCloud District of the Shasta-Trinity National Forest about two miles southwest of Snell Butte. About two miles southeast of Hambone Butte, the route crosses about one-half mile of the Shasta National Forest administered by the Hat Creek District of the Lassen National Forest, where it turns and proceeds in a westerly direction. Approximately three miles west of Bear Mountain Lookout, the route turns south toward Dead Horse Summit, turning to the southwest again about one mile southeast of Curtis Meadows, where it crosses Highway 89. From this point it crosses mostly private lands, crossing into Shasta County about three miles before it reaches Grizzly Peak. From Grizzly Peak it turns to the south, staying to the east side of Little Meadows. The route crosses onto the Shasta Lake District of the Shasta-Trinity National Forest near Stump Creek Butte, and continues south. After crossing private lands in the Flat Woods area, the route crosses about two miles of National Forest land near Hogback Mountain and then proceeds to the south across private lands toward Redding, California.

Routing Alternatives Considered

Four major routes, North A, B, C, and D, were analyzed in the Draft EIS/EIR. Alternative North A travels generally south down the east side of Shasta

Valley, then southeast (staying north and east of Mount Shasta) to about six miles past Ash Creek Butte, where it then turns south toward Grizzly Peak. Alternatives North B and North C both come south through the Butte Valley area. North B passes near the town of Macdoel, while North C stays to the east of Dorris. Both join just to the northeast of Tennant, and continue south to the Ash Creek Butte area, where they then follow the same route as North A. All routes have the same location from Grizzly Peak to the forest boundary. To arrive at the point where the four major routes were analyzed in the EIS, a full range of route segments and alternatives were considered on National Forest System lands. Routing guidelines which took into account engineering, earth sciences, water quality, biological resources, visual resources, socioeconomics, land status, land use, cultural resources, and electrical/magnetic effects were applied in order to develop preliminary routes. After public review, revised preliminary alternative routes were identified, and a second round of route review and revision was initiated.

Additional modifications and adjustments were made during the impact assessment. Multidisciplinary comparisons were done between the different route alternatives in order to identify the preliminary environmentally superior as well as the preliminary project preferred alternatives in the Draft EIS/EIR, issued in November, 1986.

Public and Agency comments on the Draft EIS/EIR resulted in a Supplement to the Draft, issued in June of 1987. The Supplement was issued in order to get public review of proposed new routing options and an alternate Southern Oregon Switching Station site. Seven new route options within Alternative North D north of Redding were analyzed in the Supplement in a similar manner as were the routes in the Draft EIS/EIR.

The Final EIS/EIR incorporated all analyses made the for the Draft EIS/EIR and the Supplement to the Draft, and indentified the environmentally superior and project preferred alternatives for the COTP. The Forest Service participated in and reviewed the route selection process throughout, and my decisions reflect that involvement in the route selection process, as well as the impact assessment and the review of public comment as described below.

Other Alternatives Considered

A full range of alternatives were considered for the entire project, as described in the Phase II Report of Volume 2A of the draft EIS/EIR, supplement to the draft, and Section 1.2.2 of Volume I of the final EIS/EIR. Numerous routes within the basic alternatives were also considered, as described in the EIS/EIR sections listed above. Some other alternatives considered are as follows:

No Action—The no action alternative would have no environmental impacts in the short run. In the long term, participating utilities would undertake other transmission construction projects, and the operation of the western region transmission system would continue to be subject to the effects of outages of the existing AC intertie and operating restrictions on the interconnected system.

Upgrade Existing 500 KV Pacific AC Transmission Intertie—This alternative considered upgrading two existing 500 KV Pacific AC Intertie lines to provide two 2,400 MW AC lines, an increase of 800 MW on each line. This alternative would have fewer environmental impacts, but is rejected based on physical, economic, and outage/reliability problems.

DC Transmission—This alternative would replace the COTP with a second DC transmission line. The environmental impacts of this alternative would be similar to those from the selected alternative. This alternative would require multi-tap DC technology for the multiple points of delivery for the COTP, and would have substantially higher costs.

Parallel Existing Intertie Lines—This alternative considered using the existing right-of-way of the Pacific AC Intertie lines. This alternative does not meet the reliability criteria requiring separation of the new line sufficiently from the two existing lines.

East of Existing Intertie Lines—These options considered placing the COTP to the east of the existing Pacific AC Intertie lines. This would require that the COTP cross the existing lines twice north of Olinda Substation. These options were not considered further due to system reliability concerns and technological difficulties associated with the crossovers.

Underground Construction—Underground construction was considered, but rejected due to economics, reliability, and feasibility. Underground transmission would have a greater environmental impact in terms of soil disturbance. Underground transmission of 500 KV lines for long distances such as this is still an unproven technology.

Nontransmission Alternatives—A variety of nontransmission alternatives were considered, as discussed in section 2.5.2 of the draft EIS. Many combinations of generation and conservation technologies and programs could be developed to provide 1,600 MW of additional capacity to the COTP participants. Generation technologies which could individually or in combination, be compared to the Combined Projects include the following conventional large central station facilities and renewable resource or preferred technology facilities:

Conventional Generation Technologies—Coal-fired; nuclear; combustion turbines; combined cycle (oil or natural gas); large hydroelectric (new dam and reservoir); refurbishment of existing oil and gas-fired capacity; compressed air energy storage; pumped storage hydroelectric.

Renewable and Preferred Technologies—Cogeneration; biomass (wood residue, agricultural waste, municipal solid waste); small hydroelectric; photovoltaic; solar thermal; geothermal; wind turbines; solar space heating and cooling; residential, commercial, and industrial load conservation; load management.

These nontransmission alternatives would not provide for bidirectional capability, and would not facilitate the Pacific Northwest's desire to distribute surplus power.

Reasons for Selection

Impact assessment for the EIS/EIR identified some major resource impacts and concerns for the route segments on National Forest System lands. Major environmental issues pertinent to my decision are the protection of old growth timber, total amount of commercial timber impacted, protection of sensitive wildlife species habitat, minimizing resource impacts in geologically sensitive areas, and that the route best meets public demands for reliable bulk electrical power transmission.

Old growth timber areas provide important habitat for wildlife species dependent on old growth forests, as well as ecological diversity, and of the routing alternatives considered, North D minimizes impacts to old growth timber. Total commercial timber resources impacted by each alternative were analyzed, and Alternative North D would impact less commercial timber than alternatives A, B, and C.

Protection of sensitive wildlife species and their habitats was also an important consideration. In particular, impacts to sensitive species such as Goshawk and spotted owls were analyzed during the impact assessment. The North D alternative route avoids spotted owl network territories designated to maintain viability of the species, and

minimizes impacts to Goshawks. A variety of other important wildlife areas are crossed, but impacts are adequately mitigated through use of seasonal construction activity closures and road management, as outlined in the EIS/EIR.

Alternative A would have major impacts associated with possible line collisions by the bald eagle and other sensitive raptors. Alternative A also passes near a bald eagle nest territory, and would pass through a spotted owl management area near the McCloud River. Alternative B passes within a mile of bald eagle winter roost and a nest near Coleman Lake and the Klamath River. Collision potential is high with this alternative as well, and the same spotted owl management area impacted by alternative A would also be impacted by alternatives B and C. Alternative C also impacts bald eagle roost sites near Bear Valley, and moderate collision potential exists for eagles moving across the line to Butte Valley foraging areas. Alternative D passes on the east side of the Klamath Basin, which also supports high populations of migratory waterfowl and wintering bald eagles, but collision potential here is not significant because use of the corridor area is low and topography shields birds from collisions. Alternative North D passes through the Glass Mountain Known Geothermal Resource Area, as well as the Giant Crater Lava Flow area, but careful placement of towers will mitigate any impacts or concerns regarding lava tube collapse, and the transmission line should not effect or be affected by the known geothermal resource area. Alternatives A, B, and C all would be subject to potential geologic risks associated with Mount Shasta and earthquake faults in the Tennant area.

Alternative North D also minimizes impacts on recreation and visual resources. Alignment and design considerations reduce the visual impact (see mitigations listed below), and crossing of high use scenic roads such as the Powder Hill Road to Medicine Lake is avoided. Alternatives A, B, and C cross through the visually sensitive areas of Shasta Valley and Butte Valley.

Issues Raised by Public Comment

Major issues pertinent to National Forest System lands were raised by the public during the review periods, as described below. Many of the route options presented in the Supplement to the Draft EIS/EIR were developed in response to these issues.

A major concern of many commentors was the overall impact on timberland. The powerline right-of-way represents a permanent loss of productive timerland, and many landowners and communities in the study area are economically dependent on the timber resource. Alternative North D was selected in part because of fewer overall impacts on forest lands. For instance, route segment N–10M2 is located on less productive timerland than N–10 Alt.5. The loss of timber on the National Forests represents less than one-half of one percent reduction in the long-term sustained yield and allowable cut for the affected Forests.

Transmission system reliability and its effects on the location of the routing alternatives was another major issue. The Forest Service has addressed the need for separation from the existing intertie based on concerns for system reliability and good engineering and technological considerations related to minimize the potential for a three line outage. Sufficient separation of the COTP from the existing intertie is an issue where fire has significant potential for causing a simultaneous three line outage. This aspect of the transmission reliability issue is adequately resolved through selection of the N–10M route option (a route option closer to the existing intertie than originally proposd in the Draft EIS/EIR), and with the implementation of a fuels management plan and fire response plan. The fuels management and fire response plans will be developed jointly by TANC and the Forest Service. Separation for other reasons such as natural or man-caused disasters was also considered in assessing the need for separation from the existing intertie.

A second aspect of transmission system reliability relates to the feasibility of crossing the two existing intertie lines with this powerline. Proposals to cross the existing intertie and put the new line to the east were carefully analyzed, but were not considered feasible because of the technical problems with crossovers. Crossing the existing intertie results in reduced reliability by having all three lines in a position where a single event could cause a three line outage at the point of crossover.

Visual impacts of the transmission line were also a major public concern. Routing guidelines emphasized minimizing visual impacts through careful siting. Full application of measures to reduce the visibility of the towers and conductors, as well as selective clearing of the right-of-way, will be done to minimize the visual impacts.

Environmentally Preferred Alternative

The environmentally preferred alternative on National Forest System lands is alternative North D. The No Action and Nontransmission alternatives, while having no or little impact in the short term, would both lead in the long term to proposals for additional power and transmission projects that would have at least the same, or significantly greater impact on National Forest System lands. The North D route, as developed through this EIS/EIR and with the required mitigations, is the preferred route in terms of having lower overall impact on the human environment.

Mitigation

All practicable means to avoid or minimize environmental harm from the selected alternative have been adopted. The full list of mitigation measures adotped are listed in section 1.1.5 of the final EIS. The following is a summary of the key resource areas that are mitigated:

Threatened, Endangered, and Sensitive plant and animal species: Construction of new access roads will be minimized in stream drainages which support special-status aquatic species such as Redband Trout, or in areas that support sensitive plants or threatened, endangered, or sensitive wildlife species; preclude access roads in sensitive areas until after biological surveys are completed and mitigation coordinated with appropriate agencies; avoid siting of transmission line towers, access roads and/or construction work areas in those unique or sensitive plant communities to the maximum extent possible; avoid disturbance to nests and dens; restrict activities during breeding periods that could disturb species sufficiently to cause reproductive failure and other important activity timeframes.

Floodplains and wetlands (Ref. Executive Order 11990): Site structures to span wetland areas and floodplains, place access roads outside wetland areas, and avoid use of heavy equipment in wetlands.

Loss of timberland due to right-of-way clearing: Use directional felling on right-of-way; minimize locating right-of-way on ridgetops where potential windthrow is maximized; emphasize selective clearing removing only tall growing vegetation which could interfere with the conductors; prepare a vegetation management plan which will consider clearing requirements and long-term right-of-way management needs; off-site mitigation such as reforestation or other timber stand improvement treatments on timber sites currently not in production.

Visual resource management: Use non-specular conductors; minimize

vegetation clearing along roads and highways, rivers, trails and residential areas; minimize sitings of towers on ridgelines/hilltops; feather edges of right-of-way clearing; use opaque porcelain insulators; darken tower steel will be used where it can be expected to reduce impacts.

New road construction: Minimize new access road construction; close all roads not needed for long-term maintenance activities.

Archaeological resource protection: Site structures to span sites; plan access roads to avoid these sites and monitor construction to minimize impact; if site cannot be avoided, scientific excavation to recover data or stabilization and protection of sites; consult with Native Americans concerning potential mitigation measures; if cemeteries cannot be avoided, arrange for reburial.

The Forest Service will, through permit administration, monitor compliance to ensure that the terms of the permit are met. A Compliance Monitoring Plan developed by the proponent (TANC) and the lead agency (Western) will track responsibility and accomplishment of mitigation for the entire project. The lead agency will ensure that the applicable mitigation measures are included in construction contracts. Construction inspectors for the lead agency will verify that the mitigation measures are implemented.

Mitigation of impacts of the selected alternative on Floodplains and Wetlands is addressed in the final EIS, Volume I, Section 1.1.5. All potential impacts to wetlands on National Forest System lands are fully mitigable. A Memorandum of Agreement between Western Area Power Administration, the Transmission Agency of Northern California, the California State Historic Preservation Officer, and the Advisory Council on Historic Preservation specifies the process for documenting and fully mitigating archaeological and cultural resource impacts for the project.

Impacts to threatened and endangered species on National Forest System lands are fully mitigatable as described in the mitigation section of the final EIS. The Final Biological Opinion by the U.S. Fish and Wildlife Service requires that prior to the season of construction, a survey be conducted for potential bald eagle nest sites near the Pit River crossing on National Forest System lands, and for potential perigrine falcon use of a site at Horse Mountain in the Klamath Basin. Shield wires will be marked at all Pit River crossings with aviation marker balls to increase their visibility to bald eagles and perigrine falcons. All disturbed sites will be repeat seeded as necessary until restored to pre-project conditions.

This decision is subject to appeal in accordance with the provisions of 36 CFR 211.18.

Dated: November 15, 1988.

Paul F. Barker,

Regional Forester.

BILLING CODE 3410-11-M

Bucks Creek Allotment Management Plan, Plumas National Forest, Plumas County, CA; Intent To Prepare an Environmental Impact Statement

The Department of Agriculture, Forest Service will prepare an environmental impact statement for the development of a new Allotment Management Plan for the Bucks Creek Allotment on the Oroville Ranger District. The Mill Creek Unit, which is in the Bucks Lake Wilderness, is within this allotment.

A range of alternatives for this plan will be considered. One of these will consider continued use, the no action alternative, as per the existing Allotment Management Plan. Another alternative will consider reducing the total number of cattle using the Mill Creek Unit of the allotment. A third alternative to consider will be to reduce the season of use in the Mill Creek Unit. Another possible alternative to consider will be the elimination of the Mill Creek Unit of the allotment and replacement of the animal unit months in another grazing area outside the wilderness.

Federal, State, and local agencies; range permittee; and other individuals or organizations who may be interested in or affected by the decision will be invited to participate in the scoping process. This process will include:

1. Identification of potential issues.
2. Identification of issues to be analyzed in depth.
3. Elimination of insignificant issues or those which have been covered by a previous environmental review.

Mary J. Coulombe, Forest Supervisor, Plumas National Forest, Quincy, California, is the responsible official.

The analysis is expected to take about 9 months. The draft environmental impact statement should be available for public review by September 1989. The final environmental impact statement is scheduled to be completed by June 1990.

Written comments and suggestions concerning the analysis should be sent to Mary J. Coulombe, Forest Supervisor, Plumas National Forest, P.O. Box 11500, Quincy, California 95971, by January 15, 1989.

Questions about the proposed action and environmental impact statement should be directed to Jack Horner, Resource Officer, Oroville Ranger District, Plumas National Forest, phone 916-534-6500.

Date: November 18, 1988.

Mary J. Coulombe,

Forest Supervisor.

[FR Doc. 88-27650 Filed 11-30-88; 8:45 am]

BILLING CODE 3410-11-M

Duncan and Sunflower Timber Sales, Tahoe National Forest, Placer County, CA; Intent to Prepare an Environmental Impact Statement

The Department of Agriculture, Forest Service will prepare an environmental impact statement (EIS) for a proposal to harvest and regenerate timber in portions of the former Duncan Canyon Inventoried Roadless Area on the Foresthill Ranger District, Tahoe National Forest, Placer County, California.

A range of alternatives for these timber sales will be considered. One of them will be the no action alternative. Various intensities for road construction, timber harvesting and regeneration within the area will be analyzed. The different timber sale alternatives will address different resource values such as visual quality, recreation, wildlife, and timber.

Comments from other Federal, State and local agencies, organizations and individuals who may be interested in, or affected by the decisions are being solicited to identify significant issues. Written comments concerning the project should be directed to Richard A. Johnson, District Ranger, Foresthill District, 22830 Foresthill Rd., Foresthill, California 95631.

Comments should be received by January 15, 1988 to receive timely consideration in the development of the draft EIS.

The draft EIS is expected to be filed with the Environmental Protection Agency (EPA) and to be available for public review by April 1989. At that time EPA will publish a notice of availability of the draft EIS in the **Federal Register**.

The comment period on the draft EIS will be 45 days from the date of the EPA's notice of availability in the **Federal Register**. It is very important that those interested in the management of the former Duncan Canyon Inventoried Roadless Area participate at that time. To be the most helpful, comments on the draft EIS should be as specific as possible and may address the adequacy of the statement or the merits

of the alternatives discussed (see The Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3). In addition, Federal court decisions have established that reviewers of a draft EIS must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewers' position and contentions, *Vermont Yankee Nuclear Power Corp.* v. *NRDC*, 435 U.S. 519, 553 (1978). Such decisions have also established that environmental objections that could have been raised at the draft stage may be waived if not raised until after completion of the final EIS, *Wisconsin Heritages, Inc.* v. *Harris*, 490 F Supp. 1334, 1338 (E.D. Wis. 1980). The reason for this requirement is to ensure that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final.

After the end of the comment period on the draft EIS, the comments will be analyzed and considered by the Forest Service in preparing the final EIS. The final EIS is expected to be completed by July 1989. In the final EIS, the Forest Service is required to respond to comments received (40 CFR 1503.4). The responsible official will consider the comments, responses, environmental consequences discussed in the EIS and applicable laws, regulations, and policies in making a decision regarding this proposal. The responsible official, who is the Tahoe National Forest Supervisor, will document the decision and reasons for the decision in the Record of Decision. That decision will be subject to appeal under standard agency procedures (36 CFR 211.18).

Date: November 21, 1988.

Geri Bergen Larson,

Forest Supervisor.

DEPARTMENT OF COMMERCE

Agency Information Collection Under Review by the Office of Management and Budget (OMB)

DOC has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Oceanic and Atmospheric Administration.

Title: Flood Damage Report.

Form Number: Weather Service Form E-7.

Type of Request: Reinstatement of a previously approved collection.

Burden: 1500 respondents; 4500 reporting hours; average hours per response—3 hours.

Needs and Uses: NOAA requests information on flood damages from local and state officials, or from others affected by the event. NOAA and other agencies use the information to improve flood warnings, flood control projects, and related activities.

Affected Public: All groups and individuals.

Frequency: On occasion.

Respondent's Obligation: Voluntary.

OMB Desk Officer: Francine Picoult, 395-7340.

Copies of the above information collection proposal can be obtained by calling or writing DOC Clearance Officer, Edward Michals, (202) 377-3271, Department of Commerce, Room 6622, 14th and Constitution Avenue, NW., Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent to Francine Picoult, OMB Desk Officer, Room 3208, New Executive Office Building, Washington, DC 20503.

Dated: November 22, 1988.

Edward Michals,

Departmental Clearance Officer, Office of Management and Organization.

Agency Information Collection Under Review by the Office of Management and Budget (OMB)

DOC has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Oceanic and Atmospheric Administration.

Title: Application for a Federal Fisheries Permit for Atlantic Swordfish.

Form Number: None.

Type of Request: Request for extension and revision of a currently approved collection.

Burden: 700 respondents; 350 reporting hours; average hours per response—.5 hours

Needs and Uses: U.S. vessels that will fish for, possess, retain, or land Atlantic Swordfish for sale, trade, or barter must obtain a Federal Fisheries Permit to operate in the U.S. Exclusive Economic Zone. The information obtained is used for fishery enforcement and management.

Affected Public: Businesses or other for-profit, Small businesses or organizations.

Frequency: Annual.

Respondent's Obligation: Required to obtain a benefit.

OMB Desk Officer: Francine Picoult, 395-7340.

Copies of the above information collection proposal can be obtained by calling or writing DOC Clearance Officer, Edward Michals, (202) 377-3271, Department of Commerce, Room 6622, 14th and Constitution Avenue, NW., Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent to Francine Picoult, OMB Desk Officer, Room 3208, New Executive Office Building, Washington, DC 20503.

BILLING CODE 3510–07–M

Assistant Secretary for Communications and Information

Advisory Committee on Advanced Television; Partially Closed Meeting

A meeting of the Commerce Advisory Committee on Advanced Television will be held December 15, 1988, 10:00 a.m. to 12:00 noon, in Room 4830, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC.

The Committee advises the Secretary on the impact of advanced television on the competitiveness of U.S. industry, what policies may be pursued to heighten the development of advanced television in the public interest, and other related issues. The meeting is scheduled to consist of a discussion of the impact of advanced television on the competitiveness of U.S. industry and matters related to the development and implementation of advanced television.

The General Session of the meeting will be open to the public and a limited numbers of seats will be available on a first-come first-served basis. To the extent that time permits, members of the public may present oral statements to the Committee. Written statements may be submitted at any time before or after the meeting.

The Assistant Secretary for Administration, with the concurrence of the General Counsel, formally determined on November 2, 1988, pursuant to section 10(d) of the Federal Advisory Committee Act, that the agenda items covered in the closed session may be exempt from the provisions of the Act relating to open meetings and public participation therein because these items will be concerned with matters that are within the purview of 5 U.S.C. 552b (c)(4) and (c)(9)(B). The discussions are likely to disclose privileged or confidential commercial information and information for which premature disclosure would likely significantly frustrate the implementation of proposed agency actions. (A copy of the determination is available for public inspection and copying in the Public Reading Room, Central Reference and Record Inspection Facility, Room 6628, Department of Commerce.)

FOR FURTHER INFORMATION CONTACT: Richard M. Firestone, Chief Counsel, Office of the Chief Counsel, National Telecommunications and Information Administration, Room H4717, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone 202–377–1816.

Date: November 28, 1988.

Alfred C. Sikes,

Assistant Secretary for Communications and Information.

BILLING CODE 3510–60–M

National Oceanic and Atmospheric Administration

Coastal Zone Management; Federal Consistency Appeal by Sucesion Alberto Bachman From an Objection by the Puerto Rico Planning Board

AGENCY: National Oceanic and Atmospheric Administration, Commerce.

ACTION: Request for comments.

On March 18, 1988, Sucesion Alberto Bachman (Appellant), through counsel, filed with the Secretary of Commerce (Secretary) a notice of appeal under section 307(c)(3)(A) of the Coastal Zone Management Act of 1972 (CZMA), 16 U.S.C. 1456(c)(3)(A), and the Department of Commerce's implementing regulations, 15 CFR Part 930, Subpart H. The appeal arises from an objection by the Puerto Rico Planning Board (PRPB) to the Appellant's certification that his proposed installation of a swimmer's protection barrier at Palominos Island would be consistent with Puerto Rico's coastal management program. The PRPB's objection precludes the U.S. Army Corps of Engineers from issuing to the Appellant a permit to perform these activities pending the outcome of Appellant's appeal.

The CZMA provides that a timely objection by a state to a consistency certification precludes any Federal agency from issuing licenses or permits for the activity unless the Secretary finds that the activity is either "consistent with the objectives" of the CZMA (Ground I) or "necessary in the interest of national security" (Ground II). Section 307(c)(3)(A). To make such a determination, the Secretary must find that the proposed project satisfies the requirements of 15 CFR 930.121 or 930.122. The Appellant requests that the Secretary override the PRPB's consistency objection based on Ground I. To make the determination that the proposed activity is "consistent with the objectives" of the CZMA, the Secretary must find that (1) the proposed activity furthers one or more of the national objectives contained in sections 302 or 303 of the CZMA; (2) the adverse effects of the proposed project do not outweigh its contribution to the national interest; (3) the proposed project will not violate the Clean Air Act or the Federal Water Pollution Control Act; and (4) no reasonable alternative is available that would permit the proposed activity to be conducted in a manner consistent with Puerto Rico's coastal management program.

Public comments are invited on the findings that the Secretary must make as set forth in the regulations at 15 CFR 930.121. Comments are due within thirty days of the publication date of this notice, and should be sent to Sydney Anne Minnerly, Attorney-Adviser, Office of General Counsel, National Oceanic and Atmospheric Administration (NOAA), U.S. Department of Commerce, 1825 Connecticut Avenue, NW., Suite 603, Washington, DC 20235. Copies of comments should also be sent to Hector F. Oliveras, Esquire, Bufete Y Notaria, Calle Vela No. 3–B, Hato Rey, PR 00917 and Jose S. Rodriguez, Puerto Rico Planning Board, Minillas Governmental Center, North Bldg., De Diego Avenue, Stop 22, San Juan, PR 00940–9985. All nonconfidential documents submitted or received in this appeal are available for public inspection during business hours at the offices of Hector Oliveras, Esquire, the Puerto Rico Planning Board, and the National Oceanic and Atmospheric Administration (NOAA) Office of General Counsel.

FOR ADDITIONAL INFORMATION CONTACT: Sydney Anne Minnerly, Attorney-Adviser, NOAA Office of General Counsel, U.S. Department of Commerce, 1825 Connecticut Avenue, NW., Suite 603, Washington, DC 20235, (202) 673–5200.

Date: November 23, 1988.

BILLING CODE 3510–08–M

Coastal Zone Management; Federal Consistency Appeal by Donald A. Benson from an Objection by the Alaska Division of Governmental Coordination

AGENCY: National Oceanic and Atmospheric Administration, Commerce.

ACTION: Notice of appeal and dismissal of appeal.

On April 27, 1988, the Secretary of Commerce received a Notice of Appeal and supporting data and information from Mr. Donald A. Benson. Mr. Benson appealed to the Secretary under section 307(c)(3)(A) of the Coastal Zone Management Act (CZMA) and the Department's implementing regulations, 15 CFR Part 930, Subpart H. The appeal arises from an objection by the Alaska Division of Government Coordination to Mr. Benson's consistency certification for U.S. Army Corps of Engineers (Corps) Permit No. N–820189, Knik River 6, modification and time extension to extend a previously constructed airplane runway, to dredge a seaplane basin, and to construct additional service areas and access roads. The proposed construction is for a privately owned airport located on the Glenn Highway, six miles south of Palmer, Alaska.

The regulations which implement the CZMA provide that the Secretary may dismiss an appeal for good cause. Good cause is defined to include, but is not limited to, Secretarial receipt of a detailed comment from the Federal agency to which application has been made for a Federal license or permit, or for Federal assistance, stating that the agency has disapproved that application. *See*, 15 CFR 930.128 (1988). In Mr. Benson's case, the Corps has denied the permit request for the proposed expansion project and, simultaneously, denied a request for an extension of time to complete work previously authorized and required mitigation measures to redress problems created by work done under the original authorization.

In view of the detailed and independent denial by the Corps of the underlying permit application, Mr. Benson's appeal has been dismissed for good cause pursuant to 15 CFR 930.128.

FOR FURTHER INFORMATION CONTACT: Hugh C. Schratwieser, Attorny-Adviser, Office of the Assistant General Counsel for Ocean Services, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, 1825 Connecticut Avenue, NW., Suite 603, Washington, DC 20235, (202) 673–5200.

Date: November 23, 1988.

BILLING CODE 3510–08–M

Solicitation for Sea Grant Review Panelists

AGENCY: Department of Commerce.

SUBAGENCY: National Oceanic and Atmospheric Administration, Commerce.

ACTION: Notice of solicitation for Sea Grant Review Panelists.

SUMMARY: This notice responds to section 209(c) of the National Sea Grant College Program Act, 33 U.S.C. 112, which requires the Secretary of Commerce to solicit nominations for membership on the Sea Grant Review Panel at least once a year. This advisory committee provides advice on the implementation of the National Sea Grant College Program.

DATES: Resumes should be sent to the address specified and must be received by January 3, 1989.

ADDRESS: Ned A. Ostenso, Director, National Sea Grant College Program, 6010 Executive Blvd., Rm. 812, Rockville, Maryland 20852.

FOR FURTHER INFORMATION CONTACT: Robert J. Shephard of the National Sea Grant College Program at the address given above; telephone 301/443–8886, (FTS) 443–8886.

SUPPLEMENTARY INFORMATION: Section 209 of the Act establishes a national review panel to advise the Secretary of Commerce, the Under Secretary for Oceans and Atmosphere and the Director of the National Sea Grant College Program on the implementation of the Sea Grant Program. The panel provides advice on such matters as:

(a) The Sea Grant Fellowship program;

(b) Applications or proposals for, and performance under, grants and contracts awarded under sections 205 and 206, and section 3 of the Sea Grant Program Improvement Act of 1976;

(c) The designation and operation of sea grant colleges and sea grant regional consortia; and the operation of the sea grant program;

(d) The formulation and application of the planning guidelines and priorities under section 204 (a) and (c)(1); and

(e) Such other matters as the Secretary refers to the panel for review and advice.

The Panel is to consist of fifteen voting members composed as follows:

Not less than eight of the voting members of the panel should be individuals who, by reason of knowledge, experience, or training, are especially qualified in one or more of the disciplines and fields included in marine science. The other voting members shall be individuals who by reason of knowledge, experience, or training, or especially qualified in, or representative of, education, extension services, state government, industry, economics, planning, or any other activity which is appropriate to, and important for, any effort to enhance the understanding, assessment, development, utilization, or conservation of ocean and coastal resources. No individual is eligible to be a voting member of the panel if the individual is (A) the director of a sea grant college, sea grant regional consortium, or sea grant program, (B) an applicant for or beneficiary (as determined by the Secretary) of, any grant or contract under section 205 or 206; or (C) a full-time officer or employee of the United States.

The Director of the National Sea Grant Program and one Director of a Sea Grant Program also serve as non-voting members.

At the present time, eleven of the fifteen panel members have been appointed. Original appointments include: Five for a 3-year term, three for a 2-year term, and three for a 1-year term.

Date: November 23, 1988.

Alan R. Thomas,

Deputy Assistant Administrator, OAR.

[FR Doc. 88–27545 Filed 11–30–88; 8:45 am]

BILLING CODE 3510–12–M

National Marine Fisheries Service; Marine Mammals; Application for Permit; Micke Grove Zoo (P416)

Notice is hereby given that the Applicant has applied in due form for a Permit to take marine mammals as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216).

1. Applicant: Mick Grove Zoo, 11793 N. Micke Grove Road, Lodi, California 95240

2. Type of Permit: Public display

3. Name and Number of Marine Mammals: harbor seal *(Phoca vitulina)* 1

4. Type of Take: To permanently maintain unreleasable male harbor seal. The animal was deemed unreleasable due to motor damage which impairs use of his foreflippers.

5. Location and Duration of Activity: Animal currently held temporarily at Micke Grove.

The arrangements and facilities for transporting and maintaining the marine mammals requested in the above described application have been inspected by a licensed veterinarian, who has certified that such arrangements and facilities are adequate to provide for the well-being of the marine mammals involved.

Concurrent with the publication of this notice in the **Federal Register**, the Secretary of Commerce is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this application should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, U.S. Department of Commerce, Washington, DC., within 30 days of the publication of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries. All statements and opinions contained in this application are summaries of those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Documents submitted in connection with the above application are available for review by interested persons in the following offices:

Office of Protected Resources, National Marine Fishers Service, 1335 East West Hwy., Silver Spring, MD 20910: and

Director, Southwest Region, National Marine Fisheries Service, 300 South Ferry Street, Terminal Island, California 90731–7415.

Date: November 22, 1988.

Nancy Foster,

Director, Office of Protected Resources and Habitat Programs.

BILLING CODE 3510–22–M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Adjustment of Import Limits for Certain Cotton, Wool and Man-Made Fiber Textile Products Produced or Manufactured in the Republic of Korea

November 23, 1988.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs adjusting limits.

EFFECTIVE DATE: November 23, 1988.

FOR FURTHER INFORMATION CONTACT: Kimbang Pham, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 566–8041. For information on embargoes and quota re-openings, call (202) 377–3715.

SUPPLEMENTARY INFORMATION:

Authority. Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

The current limits for certain categories in Groups I and II are being adjusted, variously, for swing, carryover, carryforward, special carryforward and special shift.

A description of the textile and apparel categories in terms of T.S.U.S.A. numbers is available in the CORRELATION: Textile and Apparel Categories with Tariff Schedules of the United States Annotated (see **Federal Register** notice 52 FR 47745, published on December 6, 1987). Also see 53 FR 161, published in the **Federal Register** on January 5, 1988.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

November 23, 1988.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive of December 30, 1987, as amended, issued to you by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports into the United States of certain cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products, produced or manufactured in the Republic of Korea and exported during the twelve-month period which began on January 1, 1988 and extends through December 31, 1988.

Effective on November 23, 1988, the directive of December 30, 1987 is amended further to adjust the current limits for cotton, wool and man-made fiber textile products in the following categories, as provided under the terms of the current bilateral agreement between the Governments of the United States and the Republic of Korea:

Category	Adjusted 12-month limit [1]
Sublevels in Group I:	
611	2,650,254 square yards.
619/620	108,632,891 square yards.
Sublevels in Group II:	
342	68,262 dozen.
345	85,887 dozen.
435	34,128 dozen.
443	338,159 numbers.
448	34,029 dozen.
641	1,034,508 dozen.
642	96,201 dozen.
645/646	3,646,885 dozen.

[1] The limits have not been adjusted to account for any imports exported after December 31, 1987.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions 5 U.S.C. 553(a)(1).

Sincerely.

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510–DR–M

DEPARTMENT OF DEFENSE

Department of the Army

Chemical Stockpile Disposal Program; Intent To Prepare an Environmental Impact Statement To Initiate the Public Scoping Process for the Construction and Operation of a Chemical Munitions Disposal Facility at Anniston Army Depot, AL

AGENCY: Department of the Army, DOD.

ACTION: Notice of intent.

SUMMARY: This announces the Notice of Intent to prepare an EIS on the potential impact of the design, construction, operation and closure of the proposed chemical agent demilitarization facility at Anniston Army Depot, Alabama. The proposed facility will be used to

demilitarize all chemical agents and munitions currently stored at the Anniston Army Depot. Potential environmental impacts will be examined for several locations of the on-site incineration facility and "no action" alternatives. The "no action" alternative is considered to be deferral of demilitarization with continued storage of the agents and munitions at Anniston Army Depot.

SUPPLEMENTARY INFORMATION: In its Record of Decision (53 **Federal Register**, No. 38, pp. 5816–17) for the Final Programmatic Environmental Impact Statement on the Chemical Stockpile Disposal Program, the Department of the Army selected on-site disposal by incineration at all eight chemical munitions storage sites within the continental United States as the method by which it will destroy its lethal chemical stockpile. In compliance with the National Environmental Policy Act (NEPA), section 102(2)(c), the Army determined that an EIS will be prepared to assess the site-specific health and environmental impacts of on-site incineration of chemical agents and munitions at Anniston Army Depot. The first phase of this effort will entail the collection and analyses of detailed site-specific information to ensure that the programmatic preferred alternative (on-site incineration) remains valid for Anniston Army Depot. A separate report summarizing this effort will be published prior to preparation of the draft EIS for Anniston Army Depot. The draft EIS should be available in the spring of 1990. Upon completion of the draft EIS, public notice of its availability for review will be announced and interested persons may provide comment on that document.

Notice of Public Meeting

Notice is further given of the Army's intention to initiate the scoping process to aid in determining the significant issues related to the proposed action at Anniston Army Depot. Public, as well as Federal, State and local agency, participation and input are desired. An initial scoping meeting will be held on December 15, 1988, at 6:30 p.m., at the Abrams Building, Anniston Army Depot. Interested individuals, government agencies and private organizations are encouraged to attend and submit information and comments for consideration by the Army.

FOR FURTHER INFORMATION CONTACT: Program Manager for Chemical Demilitarization, ATTN: AMCPEO–CDI (Ms. Marilyn Tischbin), Aberdeen Proving Ground, Maryland 21010–5401. Individuals desiring to be placed on a mailing list to receive additional information on the public scoping process and copies of the draft and final EIS should contact the Program Manager at the above address.

Lewis D. Walker,

Deputy for Environment, Safety and Occupational Health OASA(I&L).

BILLING CODE 3710–08–M

DEPARTMENT OF ENERGY

Office of Conservation and Renewable Energy

[Case No. F–016]

Energy Conservation Program for Consumer Products; Decision and Order Granting Waiver From Furnace Test Procedures to Rheem Manufacturing Co.

AGENCY: Department of Energy.

ACTION: Decision and order.

SUMMARY: Notice is given of the Decision and Order (Case F–016) granting Rheem Manufacturing Company a waiver for its Models (—) GEB and (—) GKA condensing warm air furnaces from the existing DOE furnace test procedures.

FOR FURTHER INFORMATION CONTACT:

Esher R. Kweller, U.S. Department of Energy, Office of Conservation and Renewable Energy, Mail Station CE–132, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586–9127

Eugene Margolis, Esq., U.S. Department of Energy, Office of General Counsel, Mail Station GC–12, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586–9507

SUPPLEMENTARY INFORMATION: In accordance with 10 CFR 430.27(1), notice is hereby given of the issuance of the Decision and Order set out below. In the Decision and Order, Rheem Manufacturing Company has been granted a waiver for its models (—) GEB and (—) GKA condensing warm air furnances, permitting the company to use an alternate test method.

Issued in Washington, DC, November 23, 1988.

John R. Berg,

Acting Assistant Secretary, Conservation and Renewable Energy.

Decision and Order

The Energy Conservation Program for Consumer Products was established pursuant to the Energy Policy and Conservation Act, Pub. L. 94–163, 89 Stat. 917, as amended by the National Energy Conservation Policy Act, Pub. L. 95–619, the National Appliance Energy Conservation Act of 1987, Pub. L. 100–12, 92 Stat. 3266, and the National Appliance Energy Conservation Amendments of 1988, Pub. L. 100–357, which requires the Department of Energy (DOE) to prescribe standardized test procedures to measure the energy consumption of certain consumer products, including furnaces. The intent of the test procedures is to provide a comparable measure of energy consumption that will assist consumers in making purchase decisions. These test procedures appear at 10 CFR Part 430, Subpart B.

The Department of Energy amended the test procedure regulations by adding § 430.27 on September 26, 1980, creating the waiver process. 45 FR 64108. DOE further amended the Department's appliance test procedure waiver process to allow the Assistant Secretary for Conservation and Renewable Energy to grant an interim waiver from test procedure requirements to manufacturers that have petitioned DOE for a waiver of such prescribed product test procedures. 51 FR 42823, November 26, 1986.

The waiver process allows the Assistant Secretary of Conservation and Renewable Energy to waive temporarily test procedures for a particular basic model when a petitioner shows that the basic model contains one or more design characteristics which prevent testing of the basic model according to the prescribed test procedures or when the prescribed test procedures may evaluate the basic model in a manner so unrepresentative of its true energy consumption characteristcs as to provide materially inadequate comparative data. 45 FR 64108 (September 26, 1980).

Pursuant to § 430.27(1), the Department shall publish in the **Federal Register** notice of each waiver granted, and any limiting conditions of each waiver.

Rheem Manufacturing Company (Rheem), filed a "Petition for Waiver" in accordance with § 430.27 of 10 CFR Part 430. DOE published in the **Federal Register** Rheem's petition and solicited comments, data, and information respecting the petition. 53 FR 25535 (July 7, 1988). One comment was received, from Teledyne Laars, which supported granting the waiver to Rheem.

DOE consulted with the Federal Trade Commission on October 7, 1988 concerning the Rheem Petition.

Assertions and Determinations

Rheem's petition seeks a waiver from the DOE test provisions that require a 1.5 minute time delay between the ignition of the burner and the starting of the circulating air blower. Instead, Rheem requests the allowance to test using a 30 second blower time delay when testing its (—) GEB and (—) GKA condensing gas furnaces. Rheem states that since the 30 second delay is indicative of how the (—) GEB and (—) GKA models actually operate and since such a delay results in an energy savings of approximately 1.8 percent, the waiver should be granted.

Since the blower controls incorporated on the Rheem condensing furnaces are designed to impose a 30 second blower delay in every instance of start up, and since the current test provisions do not specifically address this type of control, DOE agrees that a waiver should be granted to allow the 30 second blower time delay when testing the Rheem (—) GEB and (—) GKA condensing furnaces. Accordingly, with regard to testing the Rheem (—) GEB and (—) GKA condensing furnaces, today's Decision and Order exempts Rheem from the existing provisions regarding blower controls and allows testing with the 30 second delay.

It is therefore ordered that:

(1) The "Petition for Waiver" filed by Rheem Manufacturing Company (F-016), is hereby granted as set forth in paragraph (2) below, subject to the provisions of paragraph (3) and (4).

(2) Notwithstanding any contrary provisions of Appendix N of 10 CFR Part 430, Subpart B, Rheem Manufacturing Company shall be permitted to test its (—) GEB and (—) GKA condensing gas furnaces on the basis of the test procedure specified in 10 CFR Part 430, with the modification set forth below:

(i) 3.0 Test procedure. Testing and measurements shall be as specified in section 9 of ANSI/ASHARE 103–1982 with the inclusion of the following procedures in lieu of section 9.3.1 of ANSI/ASHARE 103–1982.

Gas- and Oil-Fueled Central Furnaces. After equilibrium conditions are achieved following the cool down test and the required measurements performed, turn on the furnaces and measure the flue gas temperature, using the thermocouple grid described above, at 0.5 and 2.5 minutes after the main burner(s) comes on. After the burner start-up, delay the blower start-up by 1.5 minutes (t—), unless: (1) The furnace employs a single motor to drive the power burner and the indoor air circulating blower, in which case the burner and blower shall be started together; (2) the furnaces are designed to operate using an unvarying delay time that is other than 1.5 minutes, in which case the fan control shall be permitted to start the blower; or (3) the delay time would result in the activation of a temperature safety device which shuts off the burner, in which case the fan control shall be permitted to start the blower. In the latter case, if the fan control is adjustable, set it to start the blower at the highest temperature. If the fan control is permitted to start the blower, measure time delay, (t—), using a stop watch. Record the measured temperatures. During the heat-up test for oil-fueled furnaces, maintain the draft in the flue pipe within ± 0.01 in. of water gauge of the manufacturers recommended on-period draft."

(ii) With the exception of the modification set forth in subparagraphs (i) above, Rheem Manufacturing Company shall comply in all respects with the test procedures specified in Appendix N of 10 CFR Part 430, Subpart B.

(3) The waiver shall remain in effect from the date of issuance of this order until the Department of Energy prescribes final test procedures appropriate to the (—) GEB and (—) GKA models of condensing warm air furnaces manufactured by Rheem Manufacturing Company.

(4) This waiver is based upon the presumed validity of statements, allegations, and documentary materials submitted by the applicant. This waiver may be revoked or modified at any time upon a determination that the factual basis underlying the application is incorrect.

Issued in Washington, DC, November 23, 1988.

John R. Berg,

Acting Assistant Secretary, Conservation and Renewable Energy.

[FR Doc. 88–27717 Filed 11–30–88; 8:45 am]

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket Nos. CP87–358–001 and CP87–428–001]

Tennessee Gas Pipeline Co. and CNG Transmission Corp.; Intent to Prepare an Environmental Assessment on the Proposed Norex Project and Request for Comments on Environmental Issues

November 23, 1988.

Description of Proposed Action and Request for Comments

Notice is hereby given that the staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental assessment (EA) on the facilities proposed in the above-referenced dockets. Tennessee Gas Pipeline Company (Tennessee) would construct a total of 35.7 miles of 10-, 12-, and 30-inch-diameter pipeline loop, 17.4 miles of 10-, 12-, and 24-inch-diameter replacement pipeline, and two new meter stations in New York, Massachusetts, and New Hampshire. Also, 16 existing meter stations would be upgraded and 2,075 horsepower of compression would be added at 2 existing compressor stations. CNG Transmission Corporation (CNG) would construct 12.3 miles of 30-inch-diameter pipeline loop and a new measuring station in New York. The facilities would be used to transport up to 24,418,257 Dth of natural gas per year from Tennessee's Canadian and domestic supplies. Tennessee would deliver the gas to CNG near North Sheldon, New York, and CNG would redeliver it to Tennessee near Morrisville, New York. Tennessee would then transport the gas to Northeast markets.

In the Commission's *Order Finding Additional Projects To Be Discrete And Dismissing Applications*, issued on June 29, 1988, concerning pipeline projects in the Northeast, this project was determined to be "discrete" and was referred to as the Norex Project.[1] Since the facilities proposed by Tennessee and CNG are interdependent and, if authorized, would be constructed simultaneously, the staff of the FERC will analyze them in one EA.

The applications filed by CNG and Tennessee on October 6, 1987, and November 2, 1988, respectively, seek a Certificate of Public Convenience and Necessity under section 7(c) of the Natural Gas Act to increase firm

[1] A discrete project is one that can be processed independently and, if authorized, would not adversely affect the pending competitive projects to supply gas to the Northeast.

transportation service to 10 of Tennessee's existing customers. Tennessee, CNG, and the customers (referred to as the Norex Customers) [2] state that the proposed service is needed by November 1, 1989, to avoid curtailing service during the winter heating season or using more costly supplemental fuels. To meet the in-service date, construction of the facilities is proposed to begin May 1, 1989.

By this notice the FERC staff is requesting comments on the scope of the analysis that should be conducted for the EA. All comments will be reviewed prior to publication of the EA and significant issues will be addressed. Comments should focus on potential environmental effects, alternatives to the proposal (including alternative routes), and measures to mitigate impact. Written comments should be submitted by December 23, 1988, in accordance with the procedures identified at the end of this notice.

Proposed Facilities

Figures 1 and 2 show the general location of the facilities. Appendix A contains detailed maps of the proposed pipeline, compressor stations to be upgraded, and new meter stations.[3] The locations of the facilities and the proposed construction and permanent rights-of-way are identified in table 1.

[2] The Berkshire Gas Company, Boston Gas Company, Colonial Gas Company, Concord Natural Gas Corporation, EnergyNorth, Inc., Essex County Gas Company, Fitchburg Gas and Electric Light Company, City of Holyoke, The Southern Connecticut Gas Company, and the Valley Gas Company.

[3] Figures 1 and 2 and appendix A have not been printed in the **Federal Register**, but are available from the FERC's Division of Program Management, Public Reference Section, (202) 357-8118.

Section 9	Hillsboro/NH	2.1 mi., 12-in. pipeline loop	40	10.
	Merrimack/NH	8.4 mi., 12-in. pipeline loop	40	10.
Section 10	Middlesex/MA	2.3 mi., 24-in. replacement pipeline	40	10 (shift).
Section 11	Essex/MA	2.5 mi., 12-in pipeline loop	40	10.
Tennessee	Columbia/NY	1,240 hp addition, Compressor Station 261		0.
	Worcester/MA	835 hp addition, Compressor Station 264		0.
CNG	Madison/NY	Facilities addition, Morrisville Meter Station		1.
Tennessee	Rockingham/NH	New meter station		1.
	Wyoming/NY	New meter station		1.

[1] ROW—right-of-way.
[2] Pipeline Loop—New pipeline would be installed parallel and adjacent to existing pipeline.
[3] Replacement pipeline—Old pipeline would be removed and larger pipeline would be installed in or near the same trench
[4] Shift—The width of the existing ROW would remain the same but would be relocated 10 feet to either side.

Related Nonjurisdictional Facilities

According to Tennessee, two intrastate pipelines, which are not under FERC jurisdiction, would be constructed if the Norex project is approved. EnergyNorth, Inc., plans to construct 3.5 miles of 8-inch-diameter pipeline in the town of Londonderry, New Hampshire, to serve commercial and industrial customers. The pipeline would originate from Tennessee's Concord Lateral and parallel state and local roads for its entire length, crossing mostly residential land. The route is shown on map 27. It is unknown at this time whether EnergyNorth, Inc., would construct the pipeline within the existing road right-of-way (ROW) or seek new ROW from adjacent property owners. Also, Berkshire Gas Company plans to build 2.5 miles of 8-inch-diameter pipeline near Northampton, Massachusetts, to enable it to receive Norex gas. The pipeline would cross state land for a few tenths of a mile and would then be parallel and within railroad and highway ROW's for the remainder of the route. The area is predominantly residential and commercial. The route is shown on map 30.

Construction Techniques

Constructing the proposed interstate pipeline would involve clearing and grading the construction ROW, excavating a trench of sufficient depth to allow 18 to 36 inches of cover over the line, welding and laying the pipeline, backfilling the trench, and regarding and seeding the ROW. In a number of locations blasting would be required to excavate the trench. Blast rock would be disposed of on-site, if approved by the landowner, or in local landfills. For the projects indicated in table 1 as pipeline replacements, the existing pipeline would be removed and the new line would be installed in or near the same ditch. For the pipeline loops, the new line would be installed parallel to the existing line and the permanent ROW would be widened by 10 to 25 feet. After construction, the construction ROW would revert in full to the landowner. Any new permanent ROW would be restricted from development for the life of the facility. All disturbed areas would be cleaned up, graded to conform to the original contours, and revegetated in accordance with the landowner's specifications or a revegetation plan.

Areas of Special Concern

Tennessee's pipeline would cross about 2 miles of wetland. Also, a number of creeks and rivers would be crossed, including the watersheds for Manchester, New Hampshire

(Tennessee's section 9) and Ithaca, New York (Consolidated's loop). High quality streams would be crossed during low-flow and non-spawning periods. Clean rock tramways or portable bridges would be used to reduce turbidity where equipment crosses streams. Some rivers, including the Housatonic and Nashua Rivers in Massachusetts, may contain sediments contaminated by polychlorinated biphenyls (PCB's), a toxic substance, within the area to be trenched. Directional drilling is proposed for the Housatonic River crossing to avoid disturbing contaminated sediments. A sediment analyses is proposed for the Nashua River to determine the content of PCB's. All stream, river, and wetland crossings would be subject to the Commission's environmental review process, state permit requirements, and the U.S. Army Corps of Engineers sections 404 and 10 permits.

Tennessee's proposed Section 3 pipeline near Agawam, Massachusetts, would cross Leonard Pond, a wetland that the U.S. Environmental Protection Agency has identified as being sensitive to disturbance. Section 6, near Pittsfield, Massachusetts, would cross Brattle Brook Park, a wetland that is habitat for a state-listed rare plant, and the Twin Meadows Wildlife Sanctuary, which is operated by the Massachusetts Audobon Society. Section 10 would cross the Middlesex Canal, which is on the National Register of Historic Places, and a historic homestead known as Butter's Farm, which was built in the late 1600's.

Tennessee's pipeline traverses a number of residential areas in Massachusetts. Tennessee has proposed route alternatives to avoid a subdivision on the east side of Holmes Road in Pittsfield, a subdivision on the east side of County Road North in Easthampton, and a residential area east of Russell Street in Peabody. According to Tennessee, there are no reasonable alternatives to avoid White Fox Estates in Agawam, a residential area between Elm and Williams Streets in Pittsfield, a subdivision between West and Oliver Streets in Easthampton, and a residential area between Lowell and Russell Streets in Peabody. For these areas, Tennessee proposes special construction techniques to minimize the work area and reduce the time of disturbance to any one location. All driveways, lawns, shrubs, fences, and other landscaping would be restored.

Tennessee's facilities are potentially contaminated by PCB's used in the past for lubricating fluids. Tennessee must file a plan for abandonment and disposal of the facilities with the FERC and the U.S. Environmental Protection Agency, and the plan must be approved prior to construction.

Environmental Issues

The EA will address a number of environmental concerns that have been raised in previous projects in the region, and specific concerns identified by the staff and various state and Federal agencies. The following issues have been identified to date:

Land Use

—Eminent domain.
—Impact on homes, future development, and public recreation areas.
—Impact on nature perserves.

Aesthetics

—Affect of appearance of ROW and above-ground facilities on neighborhoods and scenic areas.
—Affect of construction across scenic streams.

Pipeline Safety

—Probability of pipeline rupture.
—Blasting in populated areas.

Cultural Resources

—Effect of the project on properties listed on or eligible for the National Register of Historic Places.

Water Resources

—Effects of construction on potable water supplies.
—Excavation of stream sediments contaminated by toxic substances.

Wildlife

—Impact on fisheries.
—Impact on state and federally listed threatened and endangered species.

Vegetation

—Impact on wetlands.
—Short- and long-term effects on vegetation from clearing, seeding, and right-of-way management.

Soils and Geology

—Erosion control and revegetation.
—Effect on crop production and farmland.
—Proximity to bedrock and the effects of blasting.

Air and Noise

—Impact of additional compression on air quality and noise levels.

PCB's

—Removal and disposal of facilities contaminated by PCB's.

Alternatives

—Pipeline route variations and alternative system designs.

Comment Procedures

The EA will be based on the staff's independent analysis of the proposal and, together with the comments received, will comprise part of the record to be considered by the Commission in this proceeding. The EA will be sent to all parties in this proceeding, to those providing comments in response to this notice, to Federal, state, and local agencies, to interested members of the public, and to those individuals that have sent letters to the Commission.

The EA may be offered as evidentiary material if an evidentiary hearing is held in this proceeding. In the event that an evidentiary hearing is held, anyone not previously a party to this proceeding and wishing to present evidence on environmental or other matters must first file with the Commission a motion to intervene pursuant to Rule 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.214).

Comments from Federal, state, and local agencies and the public are requested to help identify significant issues or concerns related to the proposed action, to determine the scope of the issues that need to be analyzed, and to identify and eliminate from detailed study the issues which are not significant. All comments on specific environmental issues should contain supporting documentation or rationale. Written comments should be submitted on or before December 23, 1988, reference *Docket Nos. CP87–358–001 and CP87–428–001*, and be addressed to the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. A copy of the comments should also be sent to Mr. James Daniel, Project Manager, Federal Energy Regulatory Commission, Office of Pipeline and Producer Regulation, Environmental Analysis Branch, Room 7312, 825 North Capitol Street, NE., Washington, DC 20426.

Maps showing the location of the proposed pipeline facilities have been provided to parties in this proceeding, to Federal, state, and local governmental agencies, and the public. Additional information on environmental matters concerning the proposal is available

BILLING CODE 6717–01–M

[Docket Nos. CP89–137–000 et al.]

Mid-Louisiana Gas Co. et al.; Natural Gas Certificate Filings

November 23, 1988.

Take notice that the following filings have been made with the Commission:

1. Mid-Louisiana Gas Company

[Docket No. CP89–137–000]

Take notice that on November 7, 1988, as supplemented on November 15, 1988, Mid-Louisiana Gas Company (Mid-La) 5251 DTC Parkway, Suite 550, Englewood, Colorado 80111, filed in Docket No. CP89–137–000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas on behalf of Wintershall Pipeline Corporation (WIPC), under its blanket authorization issued in Docket No. CP86–214–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Mid-La would perform the proposed interruptible transportation service for WIPC, an intrastate pipeline, pursuant to a service agreement for transportation of natural gas dated June 1, 1988. The term of the transportation agreement is from the date of execution and shall remain in full force and effect for one year and month-to-month thereafter. Mid-La proposes to transport on a peak day up to 20,000 MMBtu per day; on an average day up to 20,000 MMBtu; and on an annual basis 7,300,000 MMBtu of natural gas for WIPC. It is stated that WIPC would pay Mid-La for all natural gas delivered pursuant to the transportation agreement in accordance with Mid-La's Rate Schedule IT–1. Mid-La states that it would transport natural gas for WIPC from points of receipt located in the Monroe Field, Louisiana to points of interconnections in that same field between its facilities and facilities owned by WIPC. Mid-La avers that the transportation would be behind field gathering systems and would involve potentially up to 20 different metering facilities. It is further averred that the meter runs involve approximately $2,000 each, so that the maximum expenditure would not exceed $40,000. The location of such facilities is Mid-La's field gathering facilities in the Monroe field, Ouachita, Morehouse and Union Parishes, Louisiana. Mid-La states that any expenses incurred from the construction of these interconnects would be paid for from cash on hand.

It is explained that the proposed service is currently being performed pursuant to the 120-day self implementing provision of § 284.223(a)(1) of the Commission's Regulations. Mid-La commenced such self-implementing service on September 28, 1988, as reported in Docket No. ST89–406–000.

Comment date: January 9, 1989, in accordance with Standard Paragraph G at the end of this notice.

2. Northwest Pipeline Corporation

[Docket No. CP89–137–000]

Take notice that on November 21, 1988, Northwest Pipeline Corporation (Northwest), 295 Chipeta Way, Salt Lake City, Utah 84108, filed in Docket No. CP89–263–000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport natural gas under its blanket certificate issued in Docket No. CP86–578–000 pursuant to section 7 of the Natural Gas Act for Universal Frozen Foods Corporation (Universal Foods), all as more fully set forth in the request on file Corporation with the Commission and open to public inspection.

Northwest proposes to transport natural gas for Universal Foods, on an interruptible basis, pursuant to a transportation agreement dated September 15, 1988. Northwest explains that service commenced September 24, 1988, under § 284.223(a) of the Commission's Regulations, as reported in Docket No. ST89–301–000. Northwest further explains that the peak day quantity would be 8,000 MMBtu, the average daily quantity would be 100 MBtu, and that the annual quantity would be 36,500 MMBtu. Northwest explains that it would receive natural gas from various sources in Wyoming, Colorado, Utah, New Mexico, and Washington, and would redeliver the gas to Intermountain Gas Company, a local distribution company, Twin Falls County, Idaho.

Comment date: January 9, 1989, in accordance with Standard Paragraph G at the end of this notice.

3. Panhandle Eastern Pipe Line Company

[Docket No. CP89–253–000]

Take notice that on November 21, 1988, Panhandle Eastern Pipe Line Company (Panhandle), P.O. Box 1642, Houston, Texas 77251–1642, filed in Docket No. CP89–253–000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to provide firm transportation service for General Motors Corporation (General Motors), an end-user, under the blanket certificate issued in Docket No. CP86–585–000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Panhandle states that pursuant to a transportation agreement dated October 1, 1988, and under its Rate Schedule PT-Firm, it proposes to transport up to 1,600 dekatherms (dt) per day equivalent of natural gas on a firm basis for General Motors from points of receipt listed in Exhibit "A" of the agreement to delivery points also listed in Exhibit "A", which transportation service may involve interconnections between Panhandle and various transporters. Panhandle states that it would receive the gas at various existing points on its system in Texas, Oklahoma, Kansas, Colorado, Wyoming, and Illinois, and that it would transport and redeliver the gas, less fuel used and unaccounted for line loss, to General Motors in Vermillion Parish, Louisiana.

Panhandle advises that service under § 284.223(a) commenced on October 1, 1988, as reported in Docket No. ST89–517. Panhandle further advises that it would transport 1,640 dt on an average day and 598,600 dt annually.

Comment date: January 9, 1989, in accordance with Standard Paragraph G at the end of this notice.

4. Northwest Pipeline Corporation

[Docket No. CP89–262–000]

Take notice that on November 21, 1988, Northwest Pipeline Corporation, (Northwest), 295 Chipeta Way, Salt Lake City, Utah 84108, filed in Docket No. CP89–262–000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to provide a transportation service for Chevron U.S.A. Inc. (Chevron), a producer, under the blanket certificate issued in Docket No. CP86–578–000 on January 19, 1988, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Northwest states that pursuant to a transportation agreement dated June 10, 1988, as amended October 20, 1988,

under Rate Schedule TI–1, it proposes to transport up to 100,000 MMBtu per day equivalent of natural gas for Chevron from points of receipt listed in Exhibit "A" of the agreement to delivery points listed in Exhibit "B", which transportation service may involve interconnections between Northwest and various transporters. Northwest states that it would receive the gas at existing points on its system in Colorado, Wyoming, New Mexico, Utah and Washington, and that it would transport and redeliver the gas to various delivery points located on Northwest's system in Washington, Oregon, Colorado and Wyoming.

Northwest advises that service under § 284.223(a) commenced October 10, 1988, as reported in Docket No. ST89–565 (filed November 7, 1988). Northwest further advises that it would transport 5,500 MMBtu on an average day and 2,000,000 MMBtu annually.

Comment date: January 9, 1989, in accordance with Standard Paragraph G at the end of this notice.

5. Northwest Pipeline Corporation

[Docket No. CP89–264–000]

Take notice that on November 21, 1988, Northwest Pipeline Corporation, (Northwest), 295 Chipeta Way, Salt Lake City, Utah 84108, filed in Docket No. CP89–264–000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to provide a transportation service for Occidental Chemical Company (Occidental), an end-user, under the blanket certificate issued in Docket No. CP86–578–000 on January 19, 1988, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Northwest states that pursuant to a transportation agreement dated July 14, 1988, under Rate Schedule TI–1, it proposes to transport up to 5,000 MMBtu per day equivalent of natural gas for Occidental, which transportation service may involve interconnections between Northwest and various transporters. Northwest states that it would receive the gas from the existing Green River receipt point in Sweetwater County, Wyoming, the Ignacio receipt point in La Plata County, Colorado, the Opal Plant receipt point in Lincoln County, Wyoming, and the Sumas receipt point in Whatcom County, Washington, and that it would transport and redeliver the gas to the North Tacoma Meter Station delivery point to Washington Natural Gas in Pierce County, Washington.

Northwest advises that service under § 284.223(a) commenced October 17, 1988, as reported in Docket No. ST89–610 (filed November 8, 1988). Northwest further advises that it would transport 40 MMBtu on an average day and 15,000 MMBtu annually.

Comment date: January 9, 1989, in accordance with Standard Paragraph G at the end of this notice.

6. Northwest Pipeline Corporation

[Docket No. CP89–266–000]

Take notice that on November 21, 1988, Northwest Pipeline Corporation, (Northwest), 295 Chipeta Way, Salt Lake City, Utah 84108, filed in Docket No. CP89–266–000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to provide a transportation service for Williams Gas Marketing (Williams), a marketer, under the blanket certificate issued in Docket No. CP86–578–000 on January 19, 1988, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Northwest states that pursuant to a transportation agreement dated September 26, 1988, as amended September 26, 1988, under Rate Schedule TI–1, it proposes to transport up to 12,000 MMBtu per day equivalent of natural gas for Williams, which transportation service may involve interconnections between Northwest and various transporters. Northwest states that it would receive the gas from existing wells located in Lincoln, Sublette and Sweetwater Counties, Wyoming, to the Moxa Arch delivery points located in Lincoln County, Wyoming, and the Opal Plant delivery point located in Lincoln County, Wyoming.

Northwest advises that service under § 284.223(a) commenced October 1, 1988, as reported in Docket No. ST89–509 (filed November 2, 1988). Northwest further advises that it would transport 8,000 MMBtu on an average day and 3,000,000 MMBtu annually.

Comment date: January 9, 1989, in accordance with Standard Paragraph G at the end of this notice.

7. Arkla Energy Resources a division of Arkla, Inc.

[Docket No. CP89–195–000]

Take notice that on November 14, 1988, Arkla Energy Resources (AER), a division of Arkla, Inc., P.O. Box 21734, Shreveport, Louisiana 71151, filed in Docket No. CP89–195–000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to construct and operate a tap and related jurisdictional facilities necessary to deliver gas from its jurisdictional system for resale by Arkansas Louisiana Gas Company (ALG), a division of Arkla, Inc., under its blanket certificate issued in Docket Nos. CP82–384–000 and CP82–384–001 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

AER specifically proposes (1) to construct and operate a sales tap on its Line 4–1–4 in Grant County, Oklahoma, to deliver gas to ALG for service to Glen Webster, a domestic customer who would use approximately 240 Mcf per year; (2) to construct and operate a sales tap on its Line 633 in Pontotoc County, Oklahoma, to deliver gas to ALG for service to Tommy Palmer, a domestic customer who would use approximately 160 Mcf per year.

AER states that gas would be delivered from its general system supply, which it is stated is adequate to provide the service.

Comment date: Janaury 9, 1989, in accordance with Standard Paragraph G at the end of this notice.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Lois D. Cashell,

Secretary.

[FR Doc. 88–27657 Filed 11–30–88; 8:45 am]

BILLING CODE 6717–01–M

[Docket Nos. CP89-214-000, et al.]

Texas Gas Transmission Corp. et al.; Natural Gas Certificate Filings

November 25, 1988.

Take notice that the following filings have been made with the Commission:

1. Texas Gas Transmission Corporation

[Docket No. CP89-214-000]

Take notice that on November 16, 1988, Texas Gas Transmission Corporation (Texas Gas), 3800 Frederica Street, Owensboro, Kentucky 42301, filed in Docket No. CP89-214-000 a request pursuant to § 157.205 of the Commission's Regulations for authorization to transport natural gas on behalf of ARMCO, Inc. (ARMCO), under Texas Gas' blanket certificate issued in Docket No. CP88-686-000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Texas Gas proposes to transport on an interruptible basis up to 42,743 MMBtu equivalent of natural gas on a peak day for ARMCO, 20,000 MMBtu equivalent on an average day and 15,601,195 MMBtu equivalent on an annual basis. It is stated that the transportation service would be effected using existing facilities and would not require any construction of additional facilities. It is explained that the service commenced October 1, 1988, under the automatic authorization provisions of § 284.223 of the Commission's Regulations, as reported in Docket No. ST89-163.

Comment date: January 9, 1989, in accordance with Standard Paragraph G at the end of this notice.

2. Panhandle Eastern Pipe Line Company

[Docket No. CP89-211-000]

Take notice that on November 16, 1988, Panhandle Eastern Pipe Line Company (Panhandle), P.O. Box 1642, Houston, Texas 77251-1642 filed in Docket No. CP89-211-000 a request pursuant to § 157.205 of the Commission's Regulations for authorization to transport natural gas on behalf of Mobil Natural Gas, Inc. (Mobil), a shipper of natural gas, under Panhandle's blanket certificate issued in Docket No. CP86-585-000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Panhandle proposes to transport on an interruptible basis up to 30,000 dt equivalent on an average day and 3,650,000 dt equivalent on an annual basis. It is stated that the transportation service would be effected using existing facilities and would not require any construction of additional facilities. It is stated that Panhandle would receive the gas for Mobil's account at existing receipt points in Texas, Oklahoma, Kansas, Colorado, Wyoming and Illinois. It is further stated that Panhandle would deliver equivalent volumes of gas less fuel used and unaccounted for line loss to Northern Natural Gas Company in Kiowa County, Kansas. It is explained that the service commenced September 22, 1988, under the automatic authorization provisions of § 284.223 of the Commission's Regulations, as reported in Docket No. ST89-238.

Comment date: January 9, 1989, in accordance with Standard Paragraph G at the end of this notice.

3. Tennessee Gas Pipeline Company

[Docket No. CP89-142-000]

Take notice that on November 7, 1988, Tennessee Gas Pipeline Company (Tennessee), P.O. Box 2511, Houston, Texas 77252, filed in Docket No. CP89-142-000, an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon an interruptible transportation service provided by Tennessee for Northern Natural Gas Company (Northern) all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Tennessee states that it was authorized to provide the transportation service for Northern pursuant to certificate authorization granted in Docket Nos. CP84-415-000 and CP84-417-000 and that the underlying transportation agreements expired on November 1, 1988. Tennessee further states that Northern has agreed to the abandonment and that Tennessee will continue transporting the gas for Northern under its blanket certificate authorization issued pursuant to Part 284 of the Commission's Regulations.

Comment date: December 16, 1988, in accordance with Standard Paragraph F at the end of the notice.

4. Panhandle Eastern Pipe Line Company

[Docket No. CP89-210-000]

Take notice that on November 14, 1988, Panhandle Eastern Pipe Line Company (Panhandle), P.O. Box 1642, Houston, Texas 77251-1642 filed in Docket No. CP89-183-000 a request pursuant to § 157.205 of the Commission's Regulations for authorization to transport natural gas on behalf of Mountain Iron & Supply Company (Mountain Iron), a shipper of natural gas and agent for IBS, Inc., an end-user of natural gas, under Panhandle's blanket certificate issued in Docket No. CP86-585-000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Panhandle proposes to transport on an interruptible basis up to 200 dt equivalent of natural gas on a peak day for Mountain Iron, 100 dt equivalent on an average day and 36,500 dt equivalent on an annual basis. It is stated that the transportation service would be effected using existing facilities and would not require any construction of additional facilities. It is stated that Panhandle would receive the gas for Mountain Iron's account at existing receipt points in Texas, Oklahoma, Kansas, Colorado, Wyoming and Illinois. It is further stated that Panhandle would deliver equivalent volumes of gas less fuel used and unaccounted for line loss to Central Illinois Light Company in Illinois. It is explained that the service commenced September 26, 1988, under the automatic authorization provisions of § 284.223 of the Commission's Regulations, as reported in Docket No. ST89-322.

Comment date: January 9, 1989, in accordance with Standard Paragraph G at the end of this notice.

5. Texas Gas Transmission Corporation

[Docket No. CP89-183-000]

Take notice that on November 14, 1988, Texas Gas Transmission Corporation (Texas Gas), 3800 Frederica Street, Owensboro, Kentucky 42301, filed in Docket No. CP89-183-000 a request pursuant to § 157.205 of the Commission's Regulations for authorization to transport natural gas on behalf of Franklin Boxboard Corporation (Franklin), under Texas Gas' blanket certificate issued in Docket No. CP88-686-000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Texas Gas proposes to transport on an interruptible basis up to 1,323 MMBtu equivalent of natural gas on a peak day for Franklin, 979 MMBtu equivalent on an average day and 482,895 MMBtu equivalent on an annual basis. It is stated that Texas Gas would receive the gas for Franklin's account at various existing receipt points on Texas Gas' system and that Texas Gas would

deliver equivalent volumes in Butler County, Ohio. It is asserted that the transportation service would be effected using existing facilities and would not require any construction of additional facilities. It is explained that the service commenced September 17, 1988, under the automatic authorization provisions of § 284.223 of the Commission's Regulations, as reported in Docket No. ST89–167.

Comment date: January 9, 1989, in accordance with Standard Paragraph G at the end of this notice.

6. Texas Gas Transmission Corporation

[Docket No. CP89–193–000]

Take notice that on November 14, 1988, Texas Gas Transmission Corporation (Texas Gas), 3800 Frederica Street, Owensboro, Kentucky 42301, filed in Docket No. CP89–193–000 a request pursuant to § 157.205 of the Commission's Regulations for authorization to transport natural gas on behalf of CSX NGL Corporation (CSX NGL), under Texas Gas' blanket certificate issued in Docket No. CP88–686–000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Texas Gas proposes to transport on an interruptible basis up to 85,000 MMBtu equivalent of natural gas on a peak day for CSX NGL, 50,000 MMBtu equivalent on an average day and 31,025,000 MMBtu equivalent on an annual basis. It is stated that Texas Gas would receive the gas at various existing receipt points on Texas Gas' system and would deliver equivalent volumes in Louisiana and offshore Louisiana. It is asserted that the transportation service would be effected using existing facilities and would not require any construction of additional facilities. It is explained that the service commenced September 17, 1988, under the automatic authorization provisions of § 284.223 of the Commission's Regulations, as reported in Docket No. ST89–169.

Comment date: January 9, 1989, in accordance with Standard Paragraph G at the end of this notice.

7. Texas Gas Transmission Corporation

[Docket No. CP89–191–000]

Take notice that on November 14, 1988, Texas Gas Transmission Corporation (Texas Gas), 3800 Frederica Street, Owensboro, Kentucky 42301, filed in Docket No. CP89–191–000 a request pursuant to § 157.205 of the Commission's Regulations for authorization to transport natural gas on behalf of Georgia-Pacific Corporation (Georgia-Pacific), under Texas Gas' blanket certificate issued in Docket No. CP88–686–000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Texas Gas proposes to transport on an interruptible basis up to 1,628 MMBtu equivalent of natural gas on a peak day for Georgia-Pacific, 1,628 MMBtu equivalent on an average day and 594,220 MMBtu equivalent on an annual basis. It is stated that Texas Gas would receive the gas for Georgia-Pacific's account at existing receipt points on Texas Gas' system in Texas and Louisiana and would redeliver equivalent volumes of gas in Butler County, Ohio. It is asserted that the transportation service would be effected using existing facilities and would not require any construction of additional facilities. It is explained that the service commenced September 17, 1988, under the automatic authorization provisions of § 284.223 of the Commission's Regulations, as reported in Docket No. ST89–164.

Comment date: January 9, 1989, in accordance with Standard Paragraph G at the end of this notice.

8. Texas Gas Transmission Corporation

[Docket No. CP89–190–000]

Take notice that on November 14, 1988, Texas Gas Transmission Corporation (Texas Gas), 3800 Frederica Street, Owensboro, Kentucky 42301, filed in Docket No. CP89–190–000 a request pursuant to § 157.205 of the Commission's Regulations for authorization to transport natural gas on behalf of Middletown Paperboard Company (Middletown), under Texas Gas' blanket certificate issued in Docket No. CP88–686–000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Texas Gas proposes to transport on an interruptible basis up to 1,500 MMBtu equivalent of natural gas on a peak day for Middletown, 1,000 MMBtu equivalent on an average day and 547,500 MMBtu equivalent on an annual basis. It is stated that Texas Gas would receive the gas for Middletown's account at various existing receipt points on Texas Gas' system and would redeliver equivalent volumes in Butler County, Ohio. It is stated that the transportation service would be effected using existing facilities and would not require any construction of additional facilities. It is explained that the service commenced September 17, 1988, under the automatic authorization provisions of § 284.223 of the Commission's Regulations, as reported in Docket No. ST89–165.

Comment date: January 9, 1989, in accordance with Standard Paragraph G at the end of this notice.

9. Texas Gas Transmission Corporation

[Docket No. CP89–189–000]

Take notice that on November 14, 1988, Texas Gas Transmission Corporation (Texas Gas), 3800 Frederica Street, Owensboro, Kentucky 42301, filed in Docket No. CP89–189–000 a request pursuant to § 157.205 of the Commission's Regulations for authorization to transport natural gas on behalf of Olin Corporation (Olin), under Texas Gas' blanket certificate issued in Docket No. CP88–686–000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Texas Gas proposes to transport on an interruptible basis up to 7,500 MMBtu equivalent of natural gas on a peak day for Olin, 5,500 MMBtu equivalent on an average day and 2,737,500 MMBtu equivalent on an annual basis. It is stated that Texas Gas would receive the gas for Olin's account at various existing points on Texas Gas' system in Texas, Louisiana, offshore Louisiana and Arkansas, and that Texas Gas would deliver equivalent volumes in Meade County, Kentucky. It is stated that the transportation service would be effected using facilities and would not require any construction of additional facilities. It is explained that the service commenced September 17, 1988, under the automatic authorization provisions of § 284.223 of the Commission's Regulations, as reported in Docket No. ST89–168.

Comment date: January 9, 1989, in accordance with Standard Paragraph G at the end of this notice.

10. Texas Gas Transmission Corporation

[Docket No. CP89–231–000]

Take notice that on November 17, 1988, Texas Gas Transmission Corporation (Texas Gas), 3800 Frederica Street, Owensboro, Kentucky 42301, filed in Docket No. CP89–231–000 a request pursuant to § 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport natural gas for Gulf Coast Industrial Gas, Inc. (Gulf Coast), under its blanket certificate issued in Docket No. CP86–686–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Texas Gas proposes to transport up to 1,000 MMBtu of natural gas per day for Gulf Coast on an interruptible basis pursuant to a transportation agreement dated September 26, 1988, between Texas Gas and Gulf Coast. Texas Gas states that it would receive the gas for Gulf Coast's account in St. Mary Parish, Louisiana and would redeliver the natural gas for the account of Gulf Coast in Acadia Parish, Louisiana. It is indicated that the ultimate consumer of the gas would be Tomke Aluminum.

Texas Gas states that the estimated average daily quantity would be 1,000 MMBtu and that the annual quantities would be 365,000 MMBtu. It is further stated that service under § 284.223(a) commenced October 1, 1988, as reported in Docket No. ST89–420. Texas Gas indicates that the service would have an initial term continuing through the end of the month in which the agreement is dated and continue on a monthly basis thereafter. Texas Gas proposes to charge Gulf Coast a rate pursuant to Texas Gas' currently effective Rate Schedule T. No new facilities are proposed herein.

Comment date: January 9, 1989, in accordance with Standard Paragraph G at the end of this notice.

11. Texas Gas Transmission Corporation

[Docket No. CP89–182–000]

Take notice that on November 14, 1988, Texas Gas Transmission Corporation (Texas Gas), 3800 Frederica Street, Owensboro, Kentucky 42301, field in Docket No. CP89–182–000 a request pursuant to § 157.205 of the Commission's Regulations for authorization to transport natural gas on behalf of Westvaco Corporation (Westvaco), under Texas Gas' blanket certificate issued in Docket No. CP88–686–000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Texas Gas proposes to transport on an interruptible basis up to 10,177 MMBtu equivalent of natural gas on a peak day for Westvaco, 4,500 MMBtu equivalent on an average day and 3,714,605 MMBtu equivalent on an annual basis. It is stated that Texas Gas would receive the gas for Westvaco's account at various existing receipt points on Texas Gas' system in Texas, Louisiana, offshore Louisiana and Arkansas, and that Texas Gas would deliver equivalent volumes to Westvaco in Wickliffe County, Kentucky. It is stated that the transportation service would be effected using existing facilities and would not require any construction of additional facilities. It is explained that the service commenced September 17, 1988, under the automatic authorization provisions of § 284.223 of the Commission's Regulations, as reported in Docket No. ST89–162.

Comment date: January 9, 1989, in accordance with Standard Paragraph G at the end of this notice.

12. Tennessee Gas Pipeline Company

[Docket No. CP89–180–000]

Take notice that on November 14, 1988, Tennessee Gas Pipeline Company (Tennessee), P.O. Box 2511, Houston, Texas 77252, filed in Docket No. CP89–180–000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) and the Natural Gas Policy Act (18 CFR 284.223) for authorization to transport gas for Cornerstone Production Corporation (Cornerstone), a marketer of natural gas, under Tennessee's blanket certificate issued in Docket No. CP87–115–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Tennessee proposes to transport on an interruptible basis up to 50,000 dekatherm (dkt) of natural gas per day on behalf of Cornerstone pursuant to a transportation agreement dated October 5, 1988 as amended on October 27, 1988, between Tennessee and Cornerstone. Tennessee would receive gas at various existing points of receipt on its system in Louisiana, offshore Louisiana, Texas, Mississippi, Massachusetts, Pennsylvania, New York, New Jersey, Ohio and West Virginia and redeliver equivalent volumes, less fuel and lost and unaccounted for volumes, at existing delivery points in multiple states.

Tennessee further states that the estimated average daily and annual quantities would be 50,000 dkt and 18,250,000 dkt, respectively. Service under § 284.223(a) commenced on October 5, 1988, as reported in Docket No. ST89–557, it is stated.

Comment date: January 9, 1989, in accordance with Standard Paragraph G at the end of this notice.

13. Inexco Oil Company

[Docket No. CI73–715–001]

Take notice that on November 8, 1988, Inexco Oil Company (Inexco) of 909 Poydras Street, New Orleans, Louisiana 70160, filed an application pursuant to section 7(c) of the Natural Gas Act and §§ 2.75 and 157.23, *et seq.* of the Commission's regulations requesting that the Commission amend Inexco's certificate in Docket No. CI73–715 issued under the optional procedure in § 2.75 of the Commission's regulations to authorize the continued sale by Inexco of its interest in natural gas from the Furlow B–2 well located in DeSoto Parish, Louisiana, to Southern Natural Gas Company (Southern), all as more fully set forth in the application which is on file with the Commission and open to public inspection. Inexco also requests waiver of § 2.75 of the Commission's regulations to the extent necessary to permit amendment of its certificate as requested.

In support of its application, Inexco states that by amendment dated August 1, 1988, the Furlow B–2 well was added to its January 1, 1949, contract with Southern. Inexco indicates that sales from the Furlow B–2 well were previously covered by the operator OXY USA Inc. under its certificate in Docket No. G–2712 and related FERC Gas Rate Schedule No. 351.

Comment date: December 9, 1988, in accordance with Standard Paragraph J at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held

without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Standard Paragraph

J. Any person desiring to be heard or make any protest with reference to said filings should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426 a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in any proceeding herein must file a petition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

Lois D. Cashell,

Secretary

BILLING CODE 6717-01-M

[Docket No. RP89-29-000]

Tennessee Gas Pipeline Co.; Filing

November 25, 1988.

Take notice that on November 21, 1988, Tennessee Gas Pipeline Company (Tennessee) filed alternative tariff sheets to its FERC Gas Tariff in response to the Commission's Order on Rehearing issued October 31, 1988 in Docket No. RP88-228-002. By that Order, the Commission requires Tennessee to develop Demand$_2$ Rates for its firm transportation and sales customers based on customer nominations of annual requirements for service rather than the customers' certificated annual entitlements to service. The Commission did not, however, relieve Tennessee of its obligation to provide service to its customers up to their full certificated annual entitlements.

Tennessee states that in order to establish a balance of obligations between Tennessee and its customers and to provide an incentive for customers to communicate accurate market signals by their D_2 nominations, Tennessee is proposing that the Commission accept one of the three alternatives.

Tennessee states that the tariff sheets listed as Alternative I implement a D_2 nomination procedure for its firm sales and transportation customers and establish an Authorized Overrun Demand Charge. This Demand Charge is applicable to the difference between the customer's certificated service entitlement and his D_2 nomination and compensates Tennessee for standing ready to provide service up to the customers' full certificated entitlement.

Tennessee states the tariff sheets listed as Alternative II implement a D_2 nomination procedure for its firm sales and transportation customers and provide for the suspension of Tennessee's service obligation in excess of a customer's D_2 nomination. Tennessee retains the right to provide service but may file to permanently abandon its certificated sales service to the extent that service permits Tennessee to deliver quantities in excess of a customer's D_2 nomination. Tennessee is also establishing an authorized overrun provision which includes penalties in the event a customer takes quantities in excess of his D_2 nomination without Tennessee's prior approval. To the extent a firm sales customer does take unauthorized overrun quantities, revisions to Tennessee's Purchased Gas Adjustment provide for the direct billing of any increase in gas costs incurred by Tennessee as a result of those authorized takes. Tennessee has also revised Article XXIV (Curtailment) and XXVI (Annual Quantity Limitations) of the General Terms and Conditions consistent with the customers' right to nominate their own service levels. To the extent a customer nominates less than his certificated annual entitlement to service, the customer's end-use quantities will be reduced pro rata across all end-use priorities. Lastly, Tennessee has revised its R Rate Schedule to eliminate the 10 cent rate discount now available to Tennessee's AQL restricted customers to the extent one of those customers nominates a D_2 quantity less than his current annual quantity entitlement.

Tennessee states that the tariff sheets listed as Alternative III are the same as Alternative II excluding the service suspension provisions of Alternative II.

Tennessee has also filed Tenth Revised Sheet No. 20 to correct an inadvertent error in its Daily Demand Rate.

The tariff sheets are proposed to be effective February 1, 1989.

Tennessee states that copies of the filing have been mailed to all parties in this proceeding, affected customers and affected state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before December 2, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 88-27659 Filed 11-30-88; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RP89-31-000]

West Texas Gathering Co.; Tariff Filing

November 25, 1988.

Take notice that on November 21, 1988, West Texas Gathering Company ("West Texas"), 550 WestLake Park

Blvd., Suite 170, Houston, Texas 77079, submitted for filing Original Sheet Nos. 1–41 of its FERC Gas Tariff, Original Volume No. 2. The Tariff filing sets forth rates, terms and conditions for gas transportation service.

West Texas states that its tariff filing is designed to open access to West Texas' services, within the contemplation of Part 284 of the Commission's Regulations, 18 CFR Part 284. West Texas' tariff filing sets out transportation rates which include minimum and maximum rates separately identifying cost components attributable to transportation and gathering costs, includes a cost basis for rates, and expresses rates on an MMBtu basis, all as required by the Commission's Regulations.

West Texas states these tariff sheets provide that they are filed to be made effective on November 21, 1988. West Texas has requested such waiver of the Commission's regulations as may be required in order to permit the proposed effective date.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.211 and 385.214 of the Commission's regulations. All such motions or protests must be filed on or before December 2, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

Western Area Power Administration

Boulder Canyon Project Proposed Power Rate

AGENCY: Western Area Power Administration, DOE.

ACTION: Notice of extension of consultation and comment period for a proposed power rate adjustment.

SUMMARY: The Western Area Power Administration (Western) announced in the **Federal Register** published June 22, 1988 (53 FR 23446), a proposed adjustment of the rates for power and energy from the Boulder Canyon Project (BCP). In that notice, Western scheduled a public information forum for June 30, 1988, with the consultation and comment period to end August 8, 1988. Western also stated that consideration would be given to an extension of the consultation and comment period if requested by customers or interested parties.

Western received several requests for an extension of 45 days to the originally published consultation and comment period. The basis for the extension was to allow all interested parties an opportunity to review and analyze a new energy forecast, a new method of forecasting future replacement requirements, and new rate calculations.

After reviewing those requests for extension, Western concurred with the requests and rescheduled for September 7, 1988, the public comment forum previously scheduled for July 22, 1988. In addition, the ending date of the consultation and comment period was changed to September 22, 1988. This was noticed in the **Federal Register** at 53 FR 29085, August 2, 1988.

An additional public comment forum was scheduled (53 FR 38779, October 3, 1988) for October 28, 1988, and the end of the consultation and comment period extended to November 14, 1988.

Due to the need for further data input and analysis the October 28, 1988, public comment forum was canceled by written notification to the BCP customers and interested parties and is rescheduled by this **Federal Register** notice. Also, the consultation and comment period is being extended.

DATES: The consultation and comment period which began with the notification of the BCP rate adjustment (53 FR 23446, June 22, 1988) will end December 30, 1988. A public comment forum will be held at 10 a.m. on December 15, 1988.

ADDRESSES: The public comment forum will be held at the Boulder City Area Office, 3 miles south on Buchanan Road, Boulder City, Nevada, on the dates and times cited above. Written comments may be sent to: Mr. Thomas A. Hine, Area Manager, Boulder City Area Office, Western Area Power Administration, P.O. Box 200, Boulder City, NV 89005, (702) 477–3255.

FOR FURTHER INFORMATION CONTACT: Mr. Earl W. Hodge, Assistant Area Manager for Power Marketing, Boulder City Area Office, Western Area Power Administration, P.O. Box 200, Boulder City, NV 89005, (702) 477–3255.

Issued at Golden, Colorado, November 23, 1988.

William H. Clagett,

Administrator.

ENVIRONMENTAL PROTECTION AGENCY

[OPTS–140109; FRL–3484–6]

Access to Confidential Business Information by ICF Incorporated

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has authorized its contractor, ICF Incorporated (ICF) of Fairfax, VA for access to information which has been submitted to EPA under sections 4, 5, 6, and 8 of the Toxic Substances Control Act (TSCA). Some of the information may be claimed or determined to be confidential business information (CBI).

FOR FURTHER INFORMATION CONTACT: Michael M. Stahl, Director, TSCA Assistance Office (TS–799), Office of Toxic Substances, Environmental Protection Agency, Rm. EB–44, 401 M St., SW., Washington, DC 20460, (202) 554–1404, TDD: (202) 554–0551.

SUPPLEMENTARY INFORMATION: In accordance with 40 CFR 2.306(j), EPA has determined that ICF will require access to CBI submitted to EPA under sections 4, 5, 6, and 8 of TSCA to perform successfully work specified under this contract. EPA is issuing this notice to inform all submitters of information under sections 4, 5, 6, and 8 of TSCA that EPA may provide ICF access to these materials on a need-to-know basis.

Under contract No. 68–D8–0116, ICF, 9300 Lee Highway, Fairfax, VA, will assist the Office of Toxic Substances' Economics and Technology Division by providing market, economic, and financial information to support activities under sections 4, 5, 6, and 8 of TSCA. All access to TSCA CBI under this contract will take place at EPA Headquarters and ICF's facilities. Upon completing review of the CBI materials, ICF will return all transferred materials to EPA.

Clearance for access to TSCA CBI under this contract is scheduled to expire on September 30, 1991.

ICF has been authorized for access to TSCA CBI at its facilities under the EPA "Contractor Requirements for the Control and Security of TSCA

Confidential Business Information" security manual. EPA has approved the ICF security plan, has performed the required inspection of its facilities, and has found them to be in compliance with the requirements of the manual. ICF personnel will be required to sign non-disclosure agreements and will be briefed on appropriate security procedures before they are permitted access to TSCA CBI.

Dated: November 19, 1988.

Charles L. Elkins,

Director, Office of Toxic Substances.

BILLING CODE 6820-25-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Final Funding Priorities for Grants for Graduate Training in Family Medicine

The Health Resources and Services Administration announces the final funding priorities for Grants for Graduate Training in Family Medicine which will be used in addition to other criteria in making grant awards for Fiscal Year 1989.

Section 786(a) authorizes the Secretary to make grants to public or nonprofit private hospitals, accredited schools of medicine or osteopathy, and other public or private nonprofit entities to assist in meeting the cost of planning, developing and operating or participating in approved graduate training programs in the field of family medicine. In addition, section 786(a) authorizes assistance in meeting the cost of supporting trainees in such programs who plan to specialize or work in the practice of family medicine.

To receive support, programs must meet the requirements of regulations as set forth in 42 CFR Part 57, Subpart Q.

Review Criteria

The review of applications will take into consideration the following criteria:

1. The degree to which the proposed project provides for the project requirements;

2. The administrative and management ability of the applicant to carry out the proposed project in a cost-effective manner; and

3. The potential of the project to continue on a self-sustaining basis.

In addition, the following mechanisms may be applied in determining the funding of approved applications:

1. Funding preferences—funding of a specific category or group of approved applications ahead of other categories or groups of applications, such as completing continuations ahead of new projects.

2. Funding priorities—favorable adjustment of review scores when applications meet specified objective criteria.

3. Special considerations—enhancement of priority scores by merit reviewers based on the extent to which applications address special areas of concern.

Proposed funding priorities for Grants for Graduate Training in Family Medicine were published in the Federal Register of August 15, 1988 (53 FR 30717).

One comment was received during the 30-day comment period in support of attracting and retaining health professionals and increasing primary care services to special populations e.g., HIV/AIDS patients and the elderly. Therefore, the funding priorities as proposed are retained as follows:

1. Projects which satisfactorily demonstrate a net increase in enrollment of underrepresented minorities in proportion or more to their numbers in the general population or can document extent of demonstrated net increases of underrepresented minorities (i.e. Black, Hispanic and American Indian/Alaskan Native) over average enrollment of the past three years in postgraduate year (PGY) trainees.

2. Projects in which substantial training experience is in a PHS 332 health manpower shortage area and/or PHS 329 migrant health center, PHS 330 community health center or PHS 781 funded Area Health Education Center or State designed clinic/center serving an underserved population.

3. Applications proposing to develop, expand or implement curricula concerning ambulatory and inpatient case management of HIV/AIDS patients.

4. Applications which are innovative in their educational approaches to quality assurance/risk management activities, monitoring and evaluation of health care services and utilization of peer-developed guidelines and standards.

5. Applications proposing to provide substantial multidisciplinary geriatric training experiences in multiple ambulatory settings and inpatient and extended care facilities.

This program is listed at 13.379 in the *Catalog of Federal Domestic Assistance.* It is not subject to the provisions of Executive Order 12372, Intergovernmental Review of Federal Programs (as implemented through 45 CFR Part 100).

Dated: November 23, 1988.

John H. Kelso,

Acting Administrator.

BILLING CODE 4160-15-M

National Vaccine Injury Compensation Program; List of Petitions Received

AGENCY: Public Health Service, HHS.

ACTION: Notice.

SUMMARY: The Public Health Service (PHS) is publishing this notice of petitions received under the National Vaccine Injury Compensation Program ("the Program"), as required by section 2112(b)(2) of the PHS Act, as amended. While the Secretary of Health and Human Services is named as the respondent in all proceedings brought by the filing of petitions for compensation under the Program, the United States Claims Court is charged by statute with responsibility for considering and acting upon the petitions.

FOR FURTHER INFORMATION CONTACT: For information about requirements for filing petitions, and the Program generally, contact the Clerk, United States Claims Court, 717 Madison Place, NW., Washington, DC 20005, (202) 633-7257. For information on the Public Health Service's role in the Program, contact the Administrator, Vaccine Injury Compensation Program, Parklawn Building, 5600 Fishers Lane, Room 4-101, Rockville, MD 20857, (301) 443-6593.

SUPPLEMENTARY INFORMATION: The Program provides a system of no-fault compensation for certain individuals who have been injured by specified childhood vaccines. Subtitle 2 of Title XXI of the PHS Act, 42 U.S.C. 300aa-10 *et seq.*, provides that those seeking compensation are to file a petition with the U.S. Claims Court and to serve a copy of the petition on the Secretary of Health and Human Services, who is named as the respondent in each proceeding. The Secretary has delegated his responsibility under the Program to PHS. The Claims Court is directed by statute to appoint special masters to take evidence, conduct hearings as appropriate, and to submit to the Court proposed findings of fact and conclusions of law.

A petition may be filed with respect to injuries, disabilities, illnesses, conditions, and deaths resulting from vaccines described in the Vaccine Injury Table set forth at section 2114 of the PHS Act. This table lists for each covered childhood vaccine the conditions which will lead to compensation and, for each condition, the time period for occurrence of the first symptom or manifestation of onset or of significant aggravation after vaccine administration. Compensation may also be awarded for conditions not listed in the table and for conditions that are manifested after the time periods specified in the table, but only if the petitioner shows that the condition was caused by one of the listed vaccines.

Section 2112(b)(2) of the PHS Act, 42 U.S.C. 300aa-12(b)(2), requires that the Secretary publish in the **Federal Register** a notice of each petition filed. Set forth below is a list of petitions received by PHS through November 15, 1988. Section 2112(b)(2) also provides that the special master "shall afford all interested persons an opportunity to submit relevant, written information" relating to the following, which quote the statute:

1. Any allegation in a petition that the petitioner either;

(a) "sustained, or had significantly aggravated, any illness, disability, injury, or condition not set forth in the Vaccine Injury Table (see section 2114 of the PHS Act) but which was caused by" one of the vaccines referred to in the table, or

(b) "sustained, or had significantly aggravated, any illness, disability, injury, or condition set forth in the Vaccine Injury Table the first symptom or manifestation of the onset or significant aggravation of which did not occur within the time period set forth in the Table but which was caused by a vaccine" referred to in the table and

2. The existence of evidence "that there is not a preponderance of the evidence that the illness, disability, injury, condition, or death described in the petition is due to factors unrelated to the administration of the vaccine described in the petition."

This notice will also serve as the special master's invitation to all interested persons to submit written information relevant to the issues described above in the case of the petitions listed below. Any person choosing to do so should file an original and three (3) copies of the information with the Clerk of the U.S. Claims Court at the address listed above (under the heading "For Further Information Contact"), with a copy to PHS addressed to Director, Bureau of Health Professions, 5600 Fishers Lane, Room 8-05, Rockville, MD 20857. The Court's caption (Petitioner's Name v. Secretary of Health and Human Services) and the docket number assigned to the petition should be used as the caption for the written submission.

Chapter 35 of Title 44, United States Code, related to paperwork reduction, does not apply to information required for purposes of carrying out the Program.

List of Petitions Received

1. Harry Gregson on Behalf of Ashley Gregson, Anchorage, Alaska, Claims Court Docket No. 88-1V.

2. Thomas Mikulich on Behalf of Jennifer Mikulich, West Allis, Wisconsin, Claims Court Docket No. 88-2V.

3. John and Phyllis McNerney on Behalf of Mark McNerney, Des Moines, Iowa, Claims Court Docket No. 88-3V.

4. Lewis and Maude Ray on Behalf of Shelby Ray, Maceo, Kentucky, Claims Court Docket No. 88-4V.

5. Yang Kue on Behalf of Khoua Kue, Providence, Rhode Island, Claims Court Docket No. 88-5V.

6. Ann Heeley on Behalf of Brad Heeley, Sidney, Ohio, Claims Court Docket No. 88-6V.

7. Roland Brandt on Behalf of Carol Brandt, St. Paul, Minnesota, Claims Court Docket No. 88-7V.

8. James and Doris Hart on Behalf of Amanda Hart, Huber Heights, Ohio, Claims Court Docket No. 88-8V.

9. Marian Rick on Behalf of Brett Rick, Delevan, New York, Claims Court Docket No. 88-9V.

BILLING CODE 4160–15–M

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Announcement of Vacancy; Osage Tribal Education Committee

November 22, 1988.

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice, announcement of vacancy—Osage Tribal Education Committee.

SUMMARY: A Member At Large vacancy has occurred on the Osage Tribal Education Committee. The purpose of this announcement is to solicit nominations from individuals or from Osage organizations on behalf of nominees for this vacancy.

DATES: Applications and nominations must be made no later than January 3, 1989.

ADDRESSES: Deputy to the Assistant Secretary/Director—Indian Education (Indian Education Programs), Room 3512, 18th & C Streets NW., Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT: Dr. Virgil Akins, Bureau of Indian Affairs, Office of Indian Education Programs, Main Interior Building, Mail Stop Room 3522, 18th & C Streets NW., Washington, DC 20240, (202) 343–4871.

SUPPLEMENTARY INFORMATION: Because a Member At Large vacancy has occurred on the Osage Tribal Education Committee, this announcement solicits nominations from individuals or from Osage organizations on behalf of nominees for this vacancy. All vacancies on the committee will be filled as described in 25 CFR 122.5(e)(5). The period of time for receiving applications shall not exceed 30 days with the expiration date to be announced by the assistant Secretary.

The requirements of the Member at Large are:

(a) Must be an adult person of Osage Indian Blood, who is an allottee or a descendant of an allottee; and

(b) May include residents who are living anywhere in the United States.

The nominee or his representative organization should submit a brief statement requesting that he/she be considered as a candidate for the vacancy and the reason for desiring to serve on the committee. If one is nominated by an Osage organization, a written statement from the nominee stating his/her willingness to serve on the committee must be included with the Osage organization nomination.

This notice is published in accordance with authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs by 209 DM 8.

Hazel E. Elbert,

Acting Assistant Secretary—Indian Affairs.

BILLING CODE 4310–02–M

Bureau of Land Management

[NV–930–09–4212–24; Nev–066601]

Termination of Segregative Effect of Airport Lease; Nevada

November 23, 1988.

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice; Termination of segregative effect, Nevada.

SUMMARY: This notice terminates the segregative effect of airport lease, Nev-066601.

EFFECTIVE DATE: January 3, 1989.

FOR FURTHER INFORMATION CONTACT: Kenneth G. Walker, District Manager, Bureau of Land Management, Ely District Office, Star Route 5, Box 1, Ely, Nevada 89301, (702) 289–4865.

SUPPLEMENTARY INFORMATION: Pursuant to 43 CFR 2091.3–2(a)(2), the segregative effect, as it pertains to the following described lands, will terminate on January 3, 1989:

Mount Diablo Meridian, Nevada

T. 6 N., R. 66 E.,
Sec. 15, SW¼SE¼;

Sec. 22, W½E½;
Sec. 27, W½NE¼.

The airport lease application was filed on October 25, 1965, at which time the lands became segregated from all forms of appropriation.

The lease has expired and the lessee, Federal Land Bank Association of Utah, no longer has a need for the facility. Improvements have been removed and the airstrip has been appropriately marked to indicate closure.

At 10:00 a.m., on January 3, 1989, the land will be open to the operation of the public land laws, subject to valid existing rights. All valid applications received prior to or at 10:00 a.m., on January 3, 1989, will be considered as simultaneously filed. All other applications received will be considered in the order of filing.

At 10:00 a.m., on January 3, 1989, the land will also be open to the operation of the mining laws.

Appropriation of lands under the general mining laws prior to the date and time of restoration is unauthorized. Any such attempted appropriation, including attempted adverse possession under 30 U.S.C. 38, shall vest no rights against the United States. Acts required to establish a location and to initiate a right of possession are governed by State law where not in conflict with Federal law. The Bureau of Land Management will not intervene in disputes between rival locators over possessory rights since Congress has provided for such determination in local courts.

The land remains open to mineral leasing and material sale laws.

Fred Wolf,

Associate State Director, Nevada.

BILLING CODE 4310-HC-M

[ES-030-09-4212-11; ES-00157-003; MNES-31841]

Land Classification for Recreation and Public Purposes, Carlton County, MN

SUMMARY: The following described parcels have been classified as suitable for disposal to the State of Minnesota by conveyance pursuant to the provisions of the Recreation and Public Purposes Act of 1926 (44 Stat. 741) as amended (43 U.S.C. 869):

Fourth Principal Meridian, Minnesota

1. MNES-31841, Carlton County: T.48N., R.16W., Tracts 37, 38, 39, 40, 41 and 42 totaling 4.22 acres

The purpose of the conveyance is the preservation of the islands in their natural state and management as a part of Jay Cooke State Park.

Any patent issued under this notice shall be subject to the provisions in 43 CFR 2741.8. In the event of noncompliance with the terms of the patent, title to the land shall revert to the United States. Classification of this land segregates it from all appropriation except as to applications under the mineral leasing laws and the Recreation and Public Purposes Act.

This segregation will terminate upon issuance of a patent, or eighteen (18) months from the date of this notice, or upon publication of a Notice of Termination.

COMMENTS: For a period of 45 days from the date of first publication of this notice, interested parties may submit comments to: District Manager, Milwaukee District Office, Bureau of Land Management, P.O. Box 631, Milwaukee, Wisconsin 53201-0631.

FOR FURTHER INFORMATION: Detailed information concerning this application is available for review at the Milwaukee District Office, 310 West Wisconsin Avenue, Suite 225, Milwaukee, Wisconsin 53203; or by calling Larry Johnson at (414) 291-4413.

Bert Rodgers,

District Manager.

BILLING CODE 4130-DQ-M

[AZ-020-09-4212; AZA-21945 through AZA-21951]

Realty Action; Competitive Sale of Public Lands in Yavapai County; AZ

The Bureau of Land Management will offer seven tracts of land for public sale. These tracts are located near Wickenburg, Arizona. It has been determined that the sale of these tracts is consistent with section 203 of the Federal Land Policy and Management Act of October 21, 1976. These tracts will be sold at no less than the appraised fair market value.

The subject lands are located at:

Gila and Salt River Meridian, Yavapai County, Arizona

Serial No.	Legal description	Acres
AZA-21945	T. 8 N., R. 5 W., sec. 15, NE¼NE¼NW¼.	10.00
AZA-21946	T. 8 N., R. 5 W., sec. 15, SE¼NE¼NW¼.	10.00
AZA-21947	T. 8 N., R. 5 W., sec. 15, W½NE¼NW¼.	20.00
AZA-21948	T. 8 N., R. 5 W., sec. 15, NW¼NW¼.	40.00
AZA-21949	T. 8 N., R. 5 W., sec. 15, N½SW¼NW¼.	20.00
AZA-21950	T. 8 N., R. 5 W., sec. 15, W½SE¼NW¼.	20.00
AZA-21951	T. 8 N., R. 5 W., sec. 15, E½SE¼NW¼.	20.00

The above aggregates 140.00 acres of land in Yavapai County.

Federal law limits the sale of this land to United States citizens, corporations subject to the law of any State or of the United States, States, State instrumentalities or political subdivisions authorized to hold property, and any entity legally capable of conveying and holding lands or interests therein under the laws of the State within which the lands to be conveyed are located. The purchaser is deemed to be the individual(s) or corporation that will actually take title to the land from the government; the citizenship limitation does not apply to agents who bid on behalf of an associate, client, or employer.

All of the parcels listed will be subject to the following reservations when patented.

1. A right-of-way for ditches and canals constructed by the authority of the United States. (Act of August 30, 1890, 26 Stat. 391, 43 U.S.C. 945.)

2. A reservation of all oil and gas to the United States with the right to prospect for, mine, and remove such deposits.

The following tracts will be sold subject to the following reservations:

1. Tracts AZA–21945-AZA–21951 will be sold subject to BLM road right-of-way A–18698.

2. Tract AZA–21949 will be subject to BLM road right-of-way A–18699.

Additionally, all parcels will be sold subject to the Wickenburg Inn grazing lease No. AZ–026–2530. The purchaser of the land will honor the terms and conditions of this lease until February 28, 1991. The purchaser will not charge more than the BLM grazing fee schedule for a given year. Modification of these terms and conditions will occur only through mutual agreement between the purchaser and the lessee.

The successful bidder will also be required to purchase the mineral estate at or before the time of final payment.

Upon publication of this notice in the **Federal Register**, the land described above will be segregated from all forms of non-discretionary appropriation under the public land laws, including the mining laws, except the mineral leasing laws, for a period of 270 days or until the lands are sold. The segregative effect may otherwise be terminated by the authorized officer by publication of a termination notice in the **Federal Register**, prior to the expiration of the 270 day period.

Additional information regarding these tracts of land will be contained in the sales brochure made available at least 30 days prior to the sale. This additional information includes: (1) Bidding instructions, (2) date(s) of sale, (3) appraised fair market value of the tracts, (4) any reservations or terms and conditions that apply to the tracts of land, (5) maps showing the location of the tracts of land, (6) requirements of parties wishing to bid, and (7) payment procedures for this successful bidder.

For a period of forty-five (45) days from the date of this notice, interested parties may submit comments regarding the proposed action. Any adverse comments will be evaluated by the District Manager who may vacate or modify this realty action and issue a final determination. In the absence of any action by the District Manager, this realty action will become the final determination of the Department of the Interior. Comments regarding this action or requests for additional information should be sent to the Phoenix District Manager, Bureau of Land Management, 2015 W. Deer Valley Road, Poenix, Arizona 85027.

Henri R. Bisson,

District Manager.

Date: November 22, 1988.

[FR Doc. 88–27703 Filed 11–30–88; 8:45 am]

BILLING CODE 4310–32–M

[CA–010–09–3110–CAPL; Casefile # CA 23587]

Realty Action; Exchange of Public and Private Lands in Kern and San Luis Obispo Counties, CA

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of realty action, CA 23587.

SUMMARY: The following described lands have been determined to be suitable for disposal by exchange under section 206 of the Federal Land Policy and Management Act of October 21, 1976 (43 U.S.C. 1716):

Mt. Diablo Meridian, California

T.32S., R.32E.
Sec. 22 N1/2N1/2, SE1/4NE1/4, SW1/4NW1/4, W1/2SW1/4.

Containing 320 acres of public land.

In exchange for these lands, the United States will acquire an equal value of lands within the Carrizo Plain Natural Area from The Nature Conservancy, a private, nonprofit organization.

SUPPLEMENTARY INFORMATION: The purpose of this exchange is to acquire a portion of the non-federal lands within the Carrizo Plain Natural Area. This Natural Area would promote the conservation of threatened and endangered species and preserve a representative sample of the historic southern San Joaquin Valley flora and fauna.

The ultimate goal of the Bureau of Land Management is to acquire approximately 155,000 acres within the Natural Area. A secondary purpose of the exchange is to consolidate the Bureau lands and reduce the number of scattered, isolated Bureau parcels that are difficult for the Bureau to manage. The public interest will be well served by completing the exchange.

Publication of this notice in the **Federal Register** segregates the public lands from the operation of the public land laws, mining laws, and mineral leasing laws. The segregative effect will end upon issuance of patent or two years from the date of publication in the **Federal Register**, whichever occurs first.

After the exchange is completed, The Nature Conservancy plans to offer the former BLM land for sale to adjacent landowners or other interested parties. The Nature Conservancy's representative can be contacted at (415) 325–9669; 541 Bryson, Palo Alto, CA 94306.

The exchange will be on an equal value basis. Acreage of the private land will be adjusted to approximate equal values. Full equalization of value will be achieved by future exchanges under a pooling agreement with the Nature Conservancy.

Land transferred from the United States will retain the following reservation:

A right-of-way for ditches or canals constructed by the authority of the United States, Act of August 30, 1890 (43 U.S.C. 945).

FOR FURTHER INFORMATION CONTACT: Bureau of Land Management, Caliente Resource Area Office, 4301 Rosedale Highway, Bakersfield, California 93308; (805) 861–4236.

DATE: For a period of 45 days from the date of publication of this notice in the **Federal Register**, interested parties may submit comments to the Area Manager, Caliente Resource Area Office, Bureau of Land Management, at the above address. Objections will be reviewed by the State Director who may sustain, vacate or modify this realty action. In the absence of any objections, this realty action will become the final determination of the Department of Interior.

Date: November 4, 1988.

Glenn A. Carpenter,

Caliente Resource Area Manager.

- Sec. 27: E½SW¼, SW¼SW¼, SE¼ 280
- Sec. 28: SE¼ 160
- Sec. 34: NW¼NE¼, NW¼ 200

Containing 640 acres of non-federal land, more or less.

One third (⅓) interest in the 3.5 second feet of water allowed to flow in the Burke Ditch under Priority No. 54.

All interest in the 12 second feet of water allowed to flow in the New Burke Ditch under Priority No. 182.

FURTHER INFORMATION AND PUBLIC COMMENT: Additional information concerning this exchange, including the planning documents and environmental assessment, is available for review in the Kremmling Resource Area Office at 1116 Park Avenue, Kremmling, Colorado 80459.

For a period of 45 days from the date of this notice, interested parties may submit comments to the District Manager, Craig District Office, Bureau of Land Management, 455 Emerson Street, Craig, Colorado 81625. Any adverse comments will be evaluated by the State Director, who may vacate or modify this realty action and issue his final determination. In the absence of objections, this realty action will become a final determination of the Department of the Interior.

SUPPLEMENTARY INFORMATION: The purpose of this exchange is to facilitate improved resource management and to dispose of scattered, difficult to manage public land parcels while consolidating ownership of other public lands.

The values of lands to be exchanged are approximately equal: full equalization of value will be achieved through acreage adjustment, or by cash payment in an amount not to exceed 25 percent of the value of the lands being transferred out of federal ownership.

The exchange will be subject to:

1. A reservation to the United States of a right-of-way for ditches and canals constructed by the authority of the United States in accordance with 43 U.S.C. 945.

2. All mineral resources and related rights shall be reserved to the United States together with the right to prospect for, mine and remove the minerals. A more detailed description of this reservation, which will be incorporated in the patent document, is available for review at this BLM office.

3. All valid existing rights and reservations of record including the following: Powerline rights-of-way C–8481 and C–8482. Access road right-of-way D–057181.

4. Continued grazing use for a period of two years consistent with grazing permits 1746, 1832, 1737, unless waived.

Publication of this notice in the **Federal Register** segregates the public lands from operation of the public land laws and the mining law, except for mineral leasing and exchanges under section 206 of FLPMA. The segregated effect will end upon issuance of patent or two years from the date of publication, whichever occurs first.

Jerry L. Kidd,
Acting District Manager.

BILLING CODE 4310–JB–M

[NV–930–09–4212–11; N–48112]

Realty Action; Lease of Public Land for Recreation and Public Purposes; Carson City, NV

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Realty Action classifying public land.

SUMMARY: The following described 15 acres of public land has been examined and identified as suitable to be classified for lease under the Recreation and Public Purposes Act, as amended (43 U.S.C. 869, *et seq.*):

Mount Diablo Meridian, Nevada

T. 15 N., R. 21 E.,
Sec. 6, W½NE¼W½ of Lot 2 of the NW¼, NW¼W½ of Lot 2 of the NW¼.

A 5-year lease with the option to renew will be offered to Carson City for the subject 15 acres of land to be used as a model airplane-radio control flying field.

The land is not required for federal purposes. Classification and issuance of a lease is consistent with Bureau planning for this area and would be in the public interest.

The lease, when issued, will be subject to the provisions of the Recreation and Public Purposes Act and applicable regulations of the Secretary of the Interior, and will be subject to:

1. Those rights for transmission line purposes granted to Sierra Pacific Power Company by Right-of-Way Grant Nev-059133.

Detailed information concerning this action is available for review at the Bureau of Land Management Carson City District Office.

Upon publication of this notice in the **Federal Register**, the above described land will be segregated from all forms of appropriation under the public land laws, including location under the general mining laws, but not the Recreation and Public Purposes Act, the mineral leasing laws, and material sales. The segregative effect will terminate as specified in an opening to be published in the **Federal Register**.

For a period of 45 days from the date of publication of this notice in the **Federal Register**, interested parties may submit comments to the District Manager, 1535 Hot Springs Road, Suite 300, Carson City, Nevada 89706. Any adverse comments will be reviewed by the State Director. In the absence of any adverse comments, the classification of the land described in this notice will become effective 60 days from the date of publication in the **Federal Register**.

Dated: November 22, 1988.

James W. Elliott,
District Manager.

BILLING CODE 4310–HC–M

[NM–060–4760–90; 73098]

Realty Action; Noncompetitive Sale of Public Lands in Eddy County, NM

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of realty action—New Mexico 73098.

SUMMARY: The following land has been found suitable for direct sale under section 203 of the Federal Land Policy and Management Act of 1976 (90 State 2750, 43 U.S.C. 1713), at not less than the appraised fair market value. The land will not be offered for sale until at least 60 days after the date of this notice.

T. 17 S., R. 30 E., NMPM
Sec. 21: Lots 91, 92, 93, containing 2.6 acres

The land is hereby segregated from appropriation under the public land laws, including the mining laws, pending disposition of this action or 270 days from date of this notice, whichever occurs first.

The land is being offered by direct sale to Eddy County for use as a transfer station for refuse collection. Refuse will be regularly transported to a permanent landfill location. The subject lands are not required for any other Federal purpose and meet the disposal criteria of the regulations contained in 43 CFR 2710.03(a) and 43 CFR 2711.3–3(a)(2).

The patent, when issued, will contain certain reservations to the United States and will be subject to three existing rights-of-way. Detailed information concerning these reservations, as well as specific conditions of the sale are available for review at the Carlsbad Resource Area Office, Bureau of Land Management, 101 East Mermod Street, Carlsbad, New Mexico 88220.

For a period of 45 days from the date of this notice, interested parties may submit comments to the District Manager at 1717 West Second Street (P.O. Box 1497), Roswell, New Mexico 88201. Any adverse comments will be evaluated by the District Manager, who may vacate or modify this realty action and issue a final determination. In absence of objections, this realty action will become the final determination of the Department of the Interior.

Francis R. Cherry, Jr.,

District Manager.

[FR Doc. 88–27705 Filed 11–30–88; 8:45 am]

BILLING CODE 4310–FB–M

[OR–010–09–4212–14:GP9–041]

Realty Action; Direct Sale of Public Land in Lake County, OR

The following lands are suitable for direct sale under section 203 and 209 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1713 (and 1719), at no less than the appraised fair market value.

Serial No.	Legal description	Acreage	Value	Minimum deposit (percent)	Bidding procedure
OR 39536	T.27S., R.19E. Willamette Meridian, Oregon Sec. 18: NW¼SE¼, Sec. 20 NE¼NW¼, Sec. 28: E½SW¼, Sec. 29: SE¼SE¼.	200	$12,250	20	Direct

The above described land(s) are hereby segregated from appropriation under the public land laws, including the mining laws, but not from sale under the above cited statute. The segregative effect of the notice of realty action shall terminate upon issuance of patent or other document of conveyance to such lands, upon publication in the **Federal Register** of a termination of the segregation or 270 days from the date of this publication, whichever occurs first.

The sale will be held 60 days after publication of this notice at the Bureau of Land Management, Lakeview District Office, P.O. Box 151, 1000 South Ninth Street, Lakeview, Oregon 97630. These parcels represent four (4) isolated parcels which are difficult and uneconomic to manage as part of the public lands and are not suitable for management by another Federal Agency. No significant resource values will be affected by this disposal. The sale is in conformance with BLM's planning for the land involved and the public interest will be best served by offering this land for sale.

Bidders Qualifications

Bidders must be U.S. citizens, 18 years of age or more; a state or state instrumentality authorized to hold property; or a corporation authorized to own real estate in the state in which the land is located.

Direct Sale Procedures

Direct sale procedures are being used since competitive sale is not appropriate and the public interest would be best served by a direct sale. Benefits to direct sale would be: (1) The elimination of scattered isolated public land inholdings from an existing ranch property; and (2) to allow the ranch to acquire title to the inholdings which it currently uses as an integral part of the ranch operation.

The parcels identified in this notice are to be offered to ZX Land and Cattle Company, using direct sale procedures authorized under 43 CFR 2711.3–3. The land will be sold at fair market value to the designated purchaser without competitive bidding. The designated purchaser will be required to render the minimum percent bid deposit indicated, by the sale date, and the balance of the purchase price within 180 days from the date of sale. If the required desposit is not submitted and the balance of the full purchase price not rendered within 180 days of the sale date, the preference right is cancelled, and the deposit will be forfeited.

Terms and Conditions of the Sale

The terms, conditions and reservations applicable to the sale are as follows:

1. As to the parcels identified in this notice, all minerals will be reserved to the United States in accordance with section 209 of the Federal Land Policy and Management Act of October 21, 1976; and

2. Rights-of-way for ditches and canals will be reserved to the United States under 43 U.S.C. 945; and

3. Patents will be issued subject to all valid existing rights and reservations of record; and

4. The BLM may accept or reject any and all offers, or withdraw any land or interest in land from sale if, in the opinion of the authorized officer, consummation of the sale would not be fully consistent with the Federal Land Policy and Management Act or other applicable laws.

Unsold Parcels

If any of the parcels identified by serial number OR 39536 are not sold on the date of the sale, the parcels will then be offered to the public, using competitive sale procedures 43 CFR 2711.3–3, until sold or withdrawn from the market. Sealed bids will be solicited at the BLM, Lakeview District Office, during regular business hours, 7:45 a.m. to 4:30 p.m. All bids received will be opened the first Wednesday of each subsequent month. To be considered, bids must be received by 10:00 a.m. on the day of the bid opening.

Comments

For a period of 45 days from the date of publication of this notice in the **Federal Register**, interested parties may submit comments to the District Manager, Bureau of Land Management, Lakeview, Oregon. Objections will be reviewed by the State Director who may sustain, vacate, or modify this realty action. In the absence of any objections, this realty action will become the final determination of the Department of the Interior.

Date: November 23, 1988.

Judy Ellen Nelson,

District Manager.

Fish and Wildlife Service

Receipt of Applications for Permits

The following applicants have applied for permits to conduct certain activities with endangered species. This notice is provided pursuant to section 10(c) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531, *et seq.*):

Applicant: Paul C. Kao, Northridge, CA, PRT-733207.

The applicant requests a permit to purchase one male and two female captive-hatched nene geese (*Nesochen* (=*Branta*) *sandvicensis*) from Mr. Mike Lubbock, Sylvan Heights Waterfowl, Sylva, North Carolina, for captive breeding purposes.

Applicant: AAZPA Species Survival Plan for Black Rhino, c/o Ed Maruska, Cincinnati Zoo, Cincinnati, OH, PRT-733166.

The applicant requests a permit to import five pairs of wild-caught black rhinoceroses (*Diceros bicornis minor*) from Zimbabwe for captive breeding in accordance with the guidelines set forth by the AAZPA, Game Conservation International, and the Government of Zimbabwe. The rhinos will be placed with the following institutions for breeding: La Coma Ranch, Texas; San Diego Zoo, California; Fort Worth Zoo, Texas; Dallas Zoo, Texas; and Milwaukee Zoo, Wisconsin.

Applicant: LSA Associates, Inc., Point Richmond, CA, PRT-733333.

The applicant requests a permit to live-trap and release Stephens' kangaroo rats (*Dipodomys stephensi*) in Riverside County, California, for determination of this species' presence in proposed project sites.

Applicant: Zoological Society of San Diego, San Diego, CA, PRT-733111.

The applicant requests a permit to import one female harpy eagle (*Harpia harpyja*) from the Instituto Nacional para el Desarrollo de Recursos Naturales Renovables, Bogata, Columbia, for the purpose of enhancement of propagation. This eagle was removed from the wild and has been held in captivity since 1978.

Documents and other information submitted with these applications are available to the public during normal business hours (7:45 am to 4:15 pm) Room 403, 1375 K Street NW., Washington, DC 20005, or by writing to the Director, U.S. Office of Management Authority, P.O. Box 27329, Washington, DC 20038-7329.

Interested persons may comment on any of these applications within 30 days of the date of this publication by submitting written views, arguments, or data to the Director at the above address. Please refer to the appropriate applicant and PRT number when submitting comments.

Date: November 25, 1988.

Minerals Management Service

Development Operations Coordination Document; Pelto Oil Co.

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of the receipt of a proposed Development Operations Coordination Document (DOCD).

SUMMARY: Notice is hereby given that Pelto Oil Company has submitted a DOCD describing the activities it proposes to conduct on Lease OCS–G 9698, Blocks 42 and 43, South Pass Area, offshore Louisiana. Proposed plans for the above area provide for the development and production of hydrocarbons with support activities to be conducted from an existing onshore base located at Venice, Louisiana.

DATE: The subject DOCD was deemed submitted on November 22, 1988. Comments must be received within 15 days of the publication date of this Notice or 15 days after the Coastal Management Section receives a copy of the plan from the Minerals Management Service.

ADDRESSES: A copy of the subject DOCD is available for public review at the Public Information Office, Gulf of Mexico OCS Region, Minerals Management Service, 1201 Elmwood Park Boulevard, Room 114, New Orleans, Louisiana (Office Hours: 8 a.m. to 4:30 p.m., Monday through Friday). A copy of the DOCD and the accompanying Consistency Certification are also available for public review at the Coastal Management Section Office located on the 10th Floor of the State Lands and Natural Resources Building, 625 North 4th Street, Baton Rouge, Louisiana (Office Hours: 8 a.m. to 4:30 p.m., Monday through Friday). The public may submit comments to the Coastal Management Section, Attention OCS Plans, Post Office Box 44487, Baton Rouge, Louisiana 70805.

FOR FURTHER INFORMATION CONTACT: Michael J. Tolbert; Minerals Management Service, Gulf of Mexico OCS Region, Field Operations, Plans, Platform and Pipeline Section, Exploration/Development Plans Unit: Telephone (504) 736–2867.

SUPPLEMENTARY INFORMATION: The purpose of this Notice is to inform the public, pursuant to sec. 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the DOCD and that it is available for public review. Additionally, this Notice is to inform the public, pursuant to § 930.61 of Title 15 of the CFR, that the Coastal Management Section/Louisiana Department of Natural Resources is reviewing the DOCD for consistency with the Louisiana Coastal Resources Program.

Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in DOCDs available to affected States, executives of affected local governments, and other interested parties became effective May 31, 1988 (53 FR 10595).

Those practices and procedures are set out in revised § 250.34 of Title 30 of the CFR.

Dated: November 23, 1988.

J. Rogers Pearcy,

Regional Director, Gulf of Mexico OCS Region.

BILLING CODE 4310-70-M

INTERSTATE COMMERCE COMMISSION

[Docket No. AB-6 (Sub-No. 303X)]

Burlington Northern Railroad Co.; Abandonment Exemption in Barnes County, ND

Applicant has filed a notice of exemption under 49 CFR Part 1152, Subpart F—*Exempt Abandonments* to abandon its 7.67-mile line of railroad between milepost 9.64 near Rogers and milepost 17.31 near Dazey, in Barnes County, ND.

Applicant has certified that: (1) No local or overhead traffic has moved over the line for at least 2 years; and (2) no formal complaint filed by a user of rail service on the line (or by a State or local governmental entity acting on behalf of such user) regarding cessation of service over the line either is pending with the Commission or any U.S. District Court, or has been decided in favor of the complainant within the 2-year period. The appropriate State agency has been notified in writing at least 10 days prior to the filing of this notice.

As a condition to use of this exemption, any employee affected by the abandonment shall be protected pursuant to *Oregon Short Line Co.—Abandonment—Goshen*, 360 I.C.C. 91 (1979). To address whether this condition adequately protects affected employees, a petition for partial revocation under 49 U.S.C. 10505(d) must be filed.

Provided no formal expression of intent to file an offer of financial assistance has been received, this exemption will be effective December 30, 1988 (unless stayed pending reconsideration). Petitions to stay regarding matters that do not involve environmental issues [1] and formal expressions of intent to file an offer of financial assistance under 49 CFR 1152.27(c)(2) [2] must be filed by December 12, 1988. Petitions to stay regarding matters that involve environmental issues and petitions for reconsideration, including environmental, energy, and public use concerns, must be filed by December 20, 1988 with: Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

A copy of any petition filed with the Commission should be sent to applicant's representative: Ethel A. Allen, Assistant General Counsel, Burlington Northern Railroad Company, 3800 Continental Plaza, 777 Main Street, Fort Worth, TX 76102.

If the notice of exemption contains false or misleading information, use of the exemption is void *ab initio*.

Applicant has filed an environmental report which addresses environmental or energy impacts, if any, resulting from this abandonment.

The Section of Energy and Environment (SEE) will prepare an environmental assessment (EA). SEE will issue the EA by December 5, 1988. Interested persons may obtain a copy of the EA from SEE by writing to it (Room 3115, Interstate Commerce Commission, Washington, DC 20423) or by calling Carl Bausch, Chief, SEE at (202) 275-7316.

A notice to the parties will be issued if use of the exemption is conditioned

[1] A stay will be routinely issued by the Commission in those proceedings where an informed decision on environmental issues (whether raised by a party or by the Section of Energy and Environment in its independent investigation) cannot be made prior to the effective date of the notice of exemption. *See Exemption of Out-of-Service Rail Lines*, 4 I.C.C. 2d 400 (1988).

[2] *See Exempt. of Rail Abandonment—Offers of Finan. Assist.*, 4 I.C.C. 2d 164 (1987), and final rules published in the **Federal Register** on December 22, 1987 (53 FR 48440-48446).

upon environmental or public use conditions.

Decided: November 25, 1988.

By the Commission.

Jane F. Mackall,

Director, Office of Proceedings.

Noreta R. McGee,

Secretary.

[FR Doc. 88-27738 Filed 11-30-88; 8:45 a.m.]

BILLING CODE 7035-01-M

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

Records Schedules; Availability and Request for Comments

AGENCY: National Archives and Records Administration, Office of Records Administration.

ACTION: Notice of availability of proposed records schedules; request for comments.

SUMMARY: The National Archives and Records Administration (NARA) publishes notice at least once monthly of certain Federal agency requests for records disposition authority (records schedules). Records schedules identify records of sufficient value to warrant preservation in the National Archives of the United States. Schedules also authorize agencies after a specified period to dispose of records lacking administrative, legal, research, or other value. Notice is published for records schedules that (1) propose the destruction of records not previously authorized for disposal, or (2) reduce the retention period for records already authorized for disposal. NARA invites public comments on such schedules, as required by 44 USC 3303a(a).

DATE: Requests for copies must be received in writing on or before January 17, 1989. Once the appraisal of the records is completed, NARA will send a copy of the schedules. The requester will be given 30 days to submit comments.

ADDRESS: Address requests for single copies of schedules identified in this notice to the Records Appraisal and Disposition Division (NIR), National Archives and Records Administration, Washington, DC 20408. Requesters must cite the control number assigned to each schedule when requesting a copy. The control number appears in parentheses immediately after the time of the requesting agency.

SUPPLEMENTARY INFORMATION: Each year U.S. Government agencies create billions of records on paper, film, magnetic tape, and other media. In order to control this accumulation, agency records managers prepare records schedules specifying when the agency no longer needs the records and what happens to the records after this period. Some schedules are comprehensive and cover all the records of an agency or one of its major subdivisions. These comprehensive schedules provide for the eventual transfer to the National Archives of historically valuable records and authorize the disposal of all other records. Most schedules, however, cover records of only one office or program or a few series of records, and many are updates of previously approved schedules. Such schedules also may include records that are designated for permanent retention.

Destruction of records requires the approval of the Archivist of the United State. This approval is granted after a thorough study of the records that takes into account their administrative use by the agency of origin, the rights and interests of the Government and of private persons directly affected by the Government's activities, and historical or other value.

This public notice identifies the Federal agencies and their subdivisions requesting disposition authority, includes the control number assigned to each schedule, and briefly describes the records proposed for disposal. The records schedule contains additional information about the records and their disposition. Further information about the disposition process will be furnished to each requester.

Schedules Pending

1. Department of the Air Force (N1-AFU 88-7 and -19). Facilitative records relating to communications projects program management and acquisition.

2. Department of the Air Force (N1-AFU-88-35). Nuclear Reactor maintenance and operation records.

3. Department of the Army (N1-AU-88-13). Routine textual and machine-readable records relating to the management of U.S. Army Libraries.

4. Federal Emergency Management Agency, Office of Training (N1-311-88-2). National Emergency Training Center application and stipend agreement forms.

5. Department of Justice, Executive Secretariat, Information Management Staff (N1-60-88-14). Citizen mail of the Executive Secretariate.

6. National Labor Relations Board (N1-25-88-1). Electronic records created by routine automated case tracking and handling, personnel, and procurement systems.

7. National Security Agency (N1-457-89-4). This NSA schedule is classified in the interest of national security pursuant to Executive Order 12356 and is further exempt from public disclosure pursuant to the National Security Act of 1947, 50 U.S.C. 403(d)(3), and Pub. L. 86-36.

8. Nuclear Regulatory Commission, Office of Nuclear Reactor Regulation (N1-431-88-5). Regulatory Effectiveness Reviews (RER) of selected nuclear power plants.

9. Department of State, Bureau of Oceans and International Environmental and Scientific Affairs, Coordinator for Population Affairs (N1-59-88-36). Reference, administrative, and facilitative records. Records documenting policies and programs are permanent.

10. Tennessee Valley Authority Office of Power, Division of Energy Use and Distributor Relations (N1-142-87-10). Comprehensive records schedule.

11. Tennessee Valley Authority Office of Power, Division of Energy Use and Distributor Relations (N1-142-88-12). Commercial and Industrial Energy Survey records and database.

12. Department of Transportation (N1-398-88-2). Copies of proposed and final rules as published in the **Federal Register** and related documents.

Dated: November 21, 1988.

Claudine J. Weiher,

Acting Archivist of the United States.

[FR Doc. 88-27652 Filed 11-30-88; 8:45 am]

BILLING CODE 7515-01-M

NUCLEAR REGULATORY COMMISSION

Documents Containing Reporting or Recordkeeping Requirements; Office of Management and Budget Review

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of the Office of Management and Budget review of information collection.

SUMMARY: The Nuclear Regulatory Commission (NRC) has recently submitted to the Office of Management and Budget (OMB) for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

1. *Type of submission, new, revision, or extension:* Extension.

2. *The title of the information collection:* 10 CFR Part 72—Licensing Requirements for the Independent Storage of Spent Nuclear Fuel and High Level Radioactive Waste.

3. *The form number if applicable:* Not applicable.

4. *How often the collection is required:* Required reports are collected and evaluated on a continuing basis as events occur. Applications for new licenses or amendments may be submitted at any time. Applications for renewal of licenses would be required every 20 years for an Independent Spent Fuel Storage Facility (ISFSI) and every 40 years for a Monitored Retrievable Storage (MRS) facility.

5. *Who will be required or asked to report:* Licenses and applicants for a license to possess power reactor spent fuel and other radioactive materials associated with spent fuel storage in an ISFSI, and the Department of Energy for licenses to receive, transfer, package and possess power reactor spent fuel, high-level waste, and other radioactive materials associated with spent fuel and high-level waste storage in an MRS.

6. *An estimate of the number of responses:* 12.

7. *An estimate of the total number of hours needed to complete the requirement or request:* Approximately 1,191 hours per response for applications and reports, plus approximately 5.175 hours annually per recordkeeper. The total industry burden is 18,267 hours.

8. *An indication of whether section 3504(h), Pub. L. 96–511 applies:* Not applicable.

9. *Abstract:* 10 CFR Part 72 establishes requirements, procedures, and criteria for the issuance of licenses to possess power reactor spent fuel and other radioactive materials associated with spent fuel storage, in an independent spent fuel storage installation, and requirements for the issuance of licenses to the Department of Energy to receive, transfer, package, and possess power reactor spent fuel and high level radioactive waste, and other associated radioactive materials, in a monitored retrievable storage facility.

Copies of the submittal may be inspected or obtained for a fee from the NRC Public Document Room, 2120 L Street, NW., Washington, DC.

Comments and questions should be directed to the OMB reviewer, Nicolas B. Garcia, (202) 395–3084.

The NRC Clearance Officer is Brenda Jo. Shelton, (301) 492–8132.

Dated at Bethesda, Maryland, this 18th day of November 1988.

For the Nuclear Regulatory Commission.

William G. McDonald,

Director, Office of Administration and Resources Management.

BILLING CODE 7590-01-M

Advisory Panel For Decontamination of Three Mile Island, Unit 2; Renewal

The United States Nuclear Regulatory Commission (NRC) announces the renewal of the Advisory Panel for Decontamination of Three Mile Island, Unit 2. It has been determined that renewal of the charter for this advisory committee is in the public interest in order for NRC to continue to receive public input and enhance public understanding of the major activities required to decontaminate and safely clean up the damage at Three Mile Island Nuclear Power Station Unit 2. The charter which continues the Panel through November 28, 1990, has been filed with the appropriate Congressional Committees and the Library of Congress.

For Further Information Contact: Michael Masnik Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555, 301–492–1373.

Date: November 28, 1988.

John C. Hoyle,

Advisory Committee Management Officer.

BILLING CODE 7590-01-M

[Docket No. 40–8943]

Draft Finding of No Significant Impact Regarding the Issuance of a Source Material License To Ferret Exploration Co. of Nebraska, Inc., Crow Butte Commercial Operation Location In Dawes County, NE

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Notice of draft finding of no significant impact.

1. Proposed Action

The proposed administrative action is to issue a commercial Source and Byproduct Material License. This license would allow in situ leach uranium recovery at the Crow Butte Operation located in Dawes County, Nebraska.

2. Reasons for Draft Finding of No Significant Impact

An environmental assessment was prepared by the staff at the U.S. Nuclear Regulatory Commission (NRC) and issued by the Commission's Uranium Recovery Field Office, Region IV. The environmental assessment performed by the Commission's staff evaluated potential impacts on-site and off-site due to radiological releases that may occur during the course of the operation. Documents used in preparing the assessment included operational data from the Crow Butte Research and Development in situ leach operation and the licensee's application dated October 7, 1987. Based on the review of the operational data and the application materials, the Commission has determined that no significant impact will result from the proposed action, and therefore, an Environmental Impact Statement is not warranted.

The following statements support the draft finding of no significant impact and summarize the conclusions resulting from the environmental assessment.

A. The ground-water monitoring program proposed by Ferret Exploration Company of Nebraska, Inc. is sufficient to monitor the operations and will provide a warning system that will minimize any impact on ground water. Furthermore, aquifer testing indicates that the production zone is adequately confined, thereby assuring hydrologic control of mining solutions.

B. Radiological effluents from the proposed operation of the well field and processing plant will be within regulatory limits and will be continuously monitored.

C. The environmental monitoring program is comprehensive and will detect any radiological releases resulting from the operation.

D. Radioactive wastes will be minimal and will be disposed of at an approved site in accordance with applicable Federal and State regulations.

E. Ground water, based upon previous testing, can be restored to baseline concentrations or applicable class of use standards.

In accordance with 10 CFR Part 51.33(a), the Director of the Uranium Recovery Field Office, made the determination to issue a draft finding of no significant impact and accept comments on the draft finding for a period of 30 days after issuance in the **Federal Register**.

This finding, together with the environmental assessment setting forth the basis for the findings, is available for public inspection and copying at the Commission's Uranium Recovery Field Office at 730 Simms Street, Golden, Colorado and at the Commission's Public Document Room at 2120 L Street, Washington, DC.

Dated at Denver, Colorado, this 17th day of November, 1988.

For the Nuclear Regulatory Commission.

Edward F. Hawkins,

Chief, Licensing Branch 1, Uranium Recovery Field Office, Region IV.

BILLING CODE 7590-01-M

Advisory Committee on Reactor Safeguards (ACRS) and Advisory Committee on Nuclear Waste (ACNW); Proposed Meetings

In order to provide advance information regarding proposed public meetings of the ACRS Subcommittees and meetings of the ACRS full Committee, and of the ACNW, the following preliminary schedule is published to reflect the current situation, taking into account additional meetings which have been scheduled and meetings which have been postponed or cancelled since the last list of proposed meetings published October 20, 1988 (53 FR 41259). Those meetings which are definitely scheduled have had, or will have, an individual notice in the **Federal Register** approximately 15 days (or more) prior to the meeting. It is expected that sessions of ACRS full Committee and ACNW meetings designated by an asterisk (*) will be open in whole or in part to the public. ACRS full Committee and ACNW meetings begin at 8:30 a.m. and ACRS Subcommittee meetings usually begin at 8:30 a.m. The time when items listed on the agenda will be discussed during ACRS full Committee and ACNW meetings and when ACRS Subcommittee meetings will start will be published prior to each meeting. Information as to whether a meeting has been firmly scheduled, cancelled, or rescheduled, or whether changes have been made in the agenda for the December 1988 ACRS full Committee meeting can be obtained by a prepaid telephone call to the Office of the Executive Director of the Committee (telephone: 301/492–7288, ATTN: Barbara Jo White) between 7:30 a.m. and 4:15 p.m., Eastern Time.

ACRS Subcommittee Meetings

Containment Systems, December 6, 1988, Bethesda, MD. The Subcommittee will review the NRC staff's document on final recommendations for containment performance and improvements (BWR Mark I only).

Thermal Hydraulic Phenomena, December 7, 1988, Bethesda, MD. The Subcommittee will review: (1) The report of the joint NRC/B&W Technical Advisory Group on the need for follow-on research concerning thermal hydraulic phenomena of the B&W once through steam generator (OTSG), and (2) the final report of the NRC–RES Technical Program Group on the Code Scaling, Applicability and Uncertainty (CSAU) Evaluation Methodology.

Reliability Assurance, December 12, 1988, Bethesda, MD. The Subcommittee will continue the discussion of the Equipment Qualification-Risk Scoping Study with special emphasis on peer-review comments.

Mechanical Components, December 12, 1988, Bethesda, MD—CANCELLED.

Advanced Reactor Designs, December 13, 1988, Bethesda, MD. The Subcommittee will review the draft SER for the Sodium Advanced Fast Reactor (SAFR) design.

Regional Programs, January 5–6, 1989, Region IV Office, Arlington, TX. The Subcommittee will review the activities under the purview of the NRC Region IV Office.

Improved Light Water Reactors, January 10, 1989, Bethesda, MD. The Subcommittee will review: (1) the proposed final version of 10 CFR Part 52, Early Site Permits, Standard Design Certification, and Combined Licenses for Nuclear Power Reactors, and (2) the progress of the Requirements Document for the EPRI ALWR.

Auxiliary and Secondary Systems, January 11, 1989, Bethesda, MD. The Subcommittee will discuss Control Air System Design and Operating Experience, and the proposed resolution of Generic Issue 43, "Air Systems Reliability."

Mechanical Components, January 11, 1989, Bethesda, MD. The Subcommittee will discuss Air Operated Valve Testing and Operating Experience (including Solenoid Air Control Valves) and other related matters.

Auxiliary and Secondary Systems, January 27, 1989, Bethesda, MD. The Subcommittee will review the adequacy of the proposed staff's plans to implement the recommendations resulting from the Fire Risk Scoping Study.

Mechanical Components, January 27, 1989, Bethesda, MD. The Subcommittee will review Generic Issues 70, "PORV Reliability," and 94, "Low Temperature Over Pressure Protection," and other related matters.

Babcock & Wilcox Reactor Plants, February 1 and 2, 1989, Sacramento, CA. The Subcommittee will discuss the lessons learned from the approximately 2-year shutdown of Rancho Seco that occurred following the December 16, 1985, overcooling event. Topics include monitoring extended start-up program, as well as, plant and organization changes as a result of the restart effort.

Safety Research Program, February 8, 1989, Bethesda, MD. The Subcommittee will discuss the ongoing and proposed NRC Safety Research program and budget.

Materials and Metallurgy, February 15–16, 1989, Columbus, OH. The Subcommittee will review the degraded piping program, including NDE and aging of centrifugally cast stainless steel piping material.

Occupational and Environmental Protection Systems, March 1–2, 1989, Bethesda, MD. The Subcommittee will discuss the general status of emergency planning for nuclear power plants.

Advanced Pressurized Water Reactors, Date to be determined (January), Bethesda, MD. The Subcommittee will discuss the licensing review bases document being developed for Combustion Engineering's Standard Safety Analysis Report-Design Certification (CESSAR–DC).

Human Factors, Date to be determined (January), Bethesda, MD. The Subcommittee will review the Human Research Factors program plan.

Instrumentation and Control Systems, Date to be determined (January/February), Bethesda, MD. The Subcommittee will review the proposed resolution of Generic Issue 101, "Break Plus Single Failure in BWR Water Level Instrumentation."

Decay Heat Removal Systems, Date to be determined (January/February), Bethesda, MD. The Subcommittee will review the proposed resolution of Generic Issue 23, "RCP Seal Failures."

General Electric Reactor Plants (Peach Bottom Restart), Date to be determined (January/February), Bethesda, MD. The Subcommittee will review the proposed restart plan for the Peach Bottom Plant.

Joint Core Performance/Thermal Hydraulic Phenomena, Date to be determined (January/February), Bethesda, MD. The Subcommittee will review the implications of the core power oscillation event at LaSalle, Unit 2.

Extreme External Phenomena, Date to be determined (January/February), Bethesda, MD. The Subcommittee will review planning documents on external events.

AC, DC Power Systems Reliability, Date to be determined (February), Bethesda, MD. The Subcommittee will review the proposed resolution of Generic Issue 128, "Electrical Power Reliability."

Materials and Metallurgy, Date to be determined (February/March), Bethesda, MD. The Subcommittee will review low upper shelf fracture energy concerns of reactor pressure vessels.

Materials and Metallurgy, Date to be determined (April), Palo Alto, CA. The Subcommittee will discuss the status of the following matters: erosion/corrosion of pipes, hydrogen water chemistry, zinc addition to primary coolant loop and its effects on materials, decontamination

BEST COPY AVAILABLE

effects on materials and other related matters.

Advanced Pressurized Water Reactors, Date to be determined (April), Bethesda, MD. The Subcommittee will discuss the comparison of WAPWR (RESAR SP/90) design with other modern plants (in U.S. and abroad).

Plant Operating Procedures, Date to be determined (early spring), Bethesda, MD. The Subcommittee will review the status of the NRC Program on Technical Specifications update. Also, to review anonymous letter to Weiss, dated September 27, 1988, on Technical Specifications inadequacies.

Decay Heat Removal Systems, Date to be determined, Bethesda, MD. The Subcommittee will explore the issue of the use of feed and bleed for decay heat removal in PWRs.

Thermal Hydraulic Phenomena, Date to be determined, Bethesda, MD. The Subcommittee will discuss the status of Industry Best-Estimate ECCS Model submittals for use with the revised ECCS Rule.

Auxiliary and Secondary Systems, Date to be determined, Bethesda, MD. The Subcommittee will discuss the: (1) Criteria being used by utilities to design Chilled Water Systems, (2) regulatory requirements for Chilled Water Systems design, and (3) criteria being used by the NRC staff to review the Chilled Water Systems design.

ACRS Full Committee Meetings

December 15–17, 1988—Items are tentatively scheduled.

*A. *Meeting with Director, NRC Office of Research (Open)*—Discuss topics of mutual interest, including the status of implementation of recommendations of the National Research Council on Revitalizing Nuclear Safety Research and on Human Factors Research.

*B. *Quantitative Safety Goals (Open)*—Review and comment on proposed NRC Staff plan for implementation of NRC's Safety Goal Policy.

*C. *Containment Systems (Open)*—Review and comment on the final recommendations for containment performance and improvements for BWR Mark I containment.

*D. *Thermal-Hydraulic Phenomena (Open)*—Review NRC Code Scaling Applicability and Uncertainty (CSAU) Evaluation Methodology proposed for use with best-estimate ECCS evaluation models.

*E. *Equipment Qualification-Risk Scoping Study (Open)*—Review and comment on the Equipment Qualification-Risk Scoping Study.

*F. *LaSalle Power Oscillation Event (Open)*—Briefing regarding status of programs to address implications of the core power oscillation event which occurred recently at the LaSalle Nuclear Power Plant.

*G. *Reactor Operator Requalification (Open)*—Briefing regarding lessons learned from revised operator qualification methodology.

*H. *Sodium Advanced Fast Reactor (SAFR) (Open)*—Initial session to discuss the SAFR design.

*I. *NRC Regulatory Philosophy (Open)*—Discuss issues related to the NRC Regulatory Philosophy that need to be examined.

*J. *ACRS Subcommittee Activities (Open)*—Reports regarding status of assigned ACRS subcommittee activities, including thermal-hydraulic phenomena regarding status of joint NRC/B&W OTSG follow-on research program, and international conference on quality and quality assurance.

*K. *Anticipated ACRS Activities (Open)*—Discuss anticipated ACRS subcommittee activities and topics proposed for consideration by the full Committee. Discuss ACRS/ACNW interface.

L. *Election of ACRS Officers (Closed)*—Discuss qualifications of members proposed as candidates for ACRS Officers for CY 1989.

*M. *Meeting with Director, OGPA (Open/Closed)*—Report regarding visit to USSR Nuclear installations.

January 12–14, 1989—Agenda to be announced.

February 9–11, 1989—Agenda to be announced.

ACNW Full Committee Meetings

5th Meeting, January 23–24, 1989—Agenda to be announced.

6th Meeting, February 22–23, 1989—Agenda to be announced.

7th Meeting, March 22–23, 1989—Agenda to be announced.

Date: November 25, 1988.

John C. Hoyle,

Advisory Committee Management Officer.

[FR Doc. 88–27681 Filed 11–30–88; 8:45 am]

BILLING CODE 7590–01–M

[Docket Nos. 030–13105 and 030–17570; License Nos. 37–17637–01 and 37–17637–02; EA 88–248]

E.L. Conwell & Co.; Order To Show Cause Why License Should Not Be Modified

I.

E.L. Conwell & Company (licensee), Bridgeport, Pennsylvania, is the holder of Byproduct Material Licenses Nos. 37–17637–01 and 37–17637–02 issued by the Nuclear Regulatory Commission (the Commission or NRC). The licenses authorize the licensee, in part, to possess and use byproduct nuclear material in sealed sources (for use in nuclear gauges) to measure the properties of materials in accordance with the condition specified in the licenses. The licenses were most recently renewed on October 20, 1983 (License No. 37–17637–01) and February 5, 1987 (License No. 37–17637–02), and are due to expire on October 31, 1988, and January 31, 1992, respectively.

II.

On September 12–13, 1988, an announced radiation safety inspection of licensed activities was performed at the licensee's facility in Bridgeport, Pennsylvania, and at a temporary job location in Conshohocken, Pennsylvania. During the inspection at the field site on September 12, 1988, the NRC found that a Troxler nuclear density gauge, containing millicurie quantities of cesium-137 and americium-241, was being used at the field site, and the gauge, which was not secured, was not under constant surveillance and immediate control of a licensee employee as required. In addition, the NRC found that the source lock on the gauge was not in place (i.e., was not locked in the safe store position) when the gauge was not in use, and that the gauge was not accompanied by adequate shipping papers as required. Furthermore, when the inspector visited the same field site on the following day, he again found that the gauge was not locked in the safe store position when not in use, and again was not accompanied by the appropriate shipping papers as required. These failures constitute violations of NRC requirements.

III.

These violations raise significant regulatory concerns regarding the adequacy of management control of, and the degree of management attention to, NRC licensed activities, given the fact that (1) two of the three violations recurred within the same two day period, and (2) one of these two violations, involving a lack of adequate shipping papers, as well as the violation involving the failure to maintain constant surveillance or immediate control of unsecured gauges, had been identified during several previous NRC inspections. These previous inspections resulted in enforcement conferences being conducted with the licensee on November 19, 1985, and July 22, 1987,

and civil penalties of $500 and $1,000 being proposed for these violations on December 10, 1985, and August 18, 1987, respectively.

IV.

In addition to these violations, the NRC also found that in a letter dated September 9, 1988, from the licensee's General Manager to the NRC Region I, inaccurate information was provided to the NRC. The letter was sent to the NRC in response to a Notice of Violation issued on August 19, 1988, for two violations identified during an inspection in June 1988, including a violation involving the failure to include all of the required information on shipping papers. The letter stated that on September 7, 1988, the licensee had obtained and placed with each device a shipping document from the manufacturer which contained the transport index, chemical and physical form of radioactive material, and the category of label applied to the package. The statement was inaccurate in that an inspection of one of the devices on September 12 and 13, 1988, revealed that the shipping document described in the licensee's letter, dated September 9, 1988, was not with the device. This is a violation of 10 CFR 30.9.

V.

The licensee's continued failure to adhere to NRC requirements (as evidenced by the recurrence of previously identified violations), as well as the submittal of inaccurate information to the NRC, demonstrates that additional actions are needed, in addition to those currently imposed by the license, to increase and improve management attention to licensed activities so as to ensure that these activities are conducted safely and in accordance with NRC requirements. The NRC recognizes that the licensee, in a letter dated September 29, 1988, informed the NRC that subsequent to the enforcement conference, it (1) suspended use of the gauges until the provisions of the license have been reviewed with all certified technicians, and (2) established a disciplinary procedure for failure to comply with its prescribed procedures. Nonetheless, I have determined that the measures proposed by the licensee do not sufficiently address the underlying causes of the violations and that additional requirements are necessary to ensure that your licensed activities are conducted safely and in accordance with the terms of your license. Specifically, I have determined that the license should be modified to require that (1) the duties and responsibilities of the Radiation Safety Officer be more clearly defined, (2) a training program be established for gauge users, (3) a program of field audits of nuclear gauge users be implemented, and (4) a defined disciplinary program be developed and implemented for those nuclear gauge users who fail to comply with license requirements, as steps to preclude recurrence of these violations.

VI.

Accordingly, in view of the foregoing, and pursuant to sections 81, 161b, 161i, 161o, and 182 of the Atomic Energy Act of 1954, as amended, and the Commission's regulations in 10 CFR 2.202 and 10 CFR Part 30, it is hereby ordered that the licensee shall:

A. Within 30 days of the date of this order, submit to the Regional Administrator, Region I, a description of how the designated Radiation Safety Officer (RSO) will implement his responsibilities to:

1. Ensure that radioactive materials are handled, and licensed activities are conducted, in accordance with the terms of the license and NRC requirements;

2. Provide appropriate training, and periodic retraining, to all individuals handling licensed materials or performing licensed activities, including training concerning appropriate NRC requirements and the conditions of the license;

3. Perform appropriate audits of licensed activities at both the permanent facilities and temporary field sites, at a minimum at intervals not to exceed three months, for each individual who used a nuclear guage during any of those three months, to verify that all personnel are adhering to the conditions of the license; and

4. Advise all employees of the disciplinary policy that will be utilized for individuals who do not adhere to the conditions of the license.

B. Within 30 days of the date of this Order, submit to the Regional Administrator, Region I,

1. A detailed description of the specific training to be provided to all employees, and specific checklist(s) that the RSO will use in performing the quarterly audits;

2. A description of the disciplinary program that the licensee intends to follow to ensure that individuals are held accountable whenever NRC requirements are violated, and verification that the terms of the disciplinary program have been communicated to all licensee employees.

C. Maintain records of all training, retraining, and audits, for at least three years.

The Regional Administrator, Region I, may, in writing, relax, rescind, or terminate any of the above provision upon good cause shown.

VII.

The licensee may show cause why this Order should not have been issued and should be vacated by filing a written answer under oath or affirmation within 30 days of the date of this Order which sets forth the matters of fact and law on which the licensee relies. The licensee may answer as provided in 10 CFR 2.202(d) by consenting to this Order. If the license fails to answer within the specified time or consents to this Order, this Order shall be final without further Order.

VIII.

The licensee, or any other person adversely affected by this Order, may request a hearing within 30 days after issuance of this Order. Any answer to this Order or any request for hearing shall be submitted to the Director, Office of Enforcement, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Copies shall also be sent to the Assistant General Counsel for Enforcement at the same address and to the Regional Administrator, U.S. Nuclear Regulatory Commission, Region I, 475 Allendale Road, King of Prussia, Pennsylvania 19406. If a person other than the licensee requests a hearing, that person shall set forth with particularity the manner in which the petitioner's interest is adversely affected by the Order and should address the criteria set forth in 10 CFR 2.714(d). Upon the failure of the licensee, or any other person adversely affected by this Order to answer or request a hearing within the specified time, this Order shall be final without further proceedings.

If a hearing is requested by the licensee or a person whose interest is adversely affected, the Commission will issue on Order designating the time and place of any hearing. If a hearing is held, the issue to be considered at such a hearing shall be whether this Order should be sustained.

For the Nuclear Regulatory Commission.

James M. Taylor,

Deputy Executive Director for Regional Operations.

Dated at Rockville, Maryland this 18th day of November 1988.

BILLING CODE 7590-01-M

VOL 53 ISS 231 DEC 1 1988 UMI

[Docket No. 50-302; License No. DPR-72; EA 87-216]

Florida Power Corp., Crystal River Unit 3; Order Imposing Civil Monetary Penalty

I.

Florida Power Corporation, Crystal River, Florida (licensee) is the holder of Operating License No. DPR-72 (license) issued by the Nuclear Regulatory Commission (Commission or NRC) on January 28, 1977. The license authorizes the licensee to operate the Crystal River facility in accordance with the conditions specified therein.

II.

NRC inspections of the licensee's activities under the license were conducted on October 14-16, 1987 and January 5-7, 1988. The results of these inspections indicated that the licensee had not conducted its activities in full compliance with NRC requirements. A written Notice of Violation and Proposed Imposition of Civil Penalty (NOV) was served upon the licensee by letter dated March 17, 1988. The NOV stated the nature of the violations, the provisions of the NRC's requirements that the license had violated, and the amount of the civil penalty proposed for the violations. The licensee responded to the NOV by letter dated May 16, 1988. In its response, the licensee admitted certain violations, denied other violations, and stated that the Enforcement Policy had been inapproprately applied in this case and that the facts of the matter support full remission of the civil penalty.

III.

After consideration of the licensee's response and the statements of fact, explanations, and argument for mitigation contained therein, the Deputy Executive Director for Regional Operations has determined, as set forth in the Appendix to this Order, that the violations, except for Violation I.C.4, occurred as stated and, for reasons set forth in the attached Appendix, the penalty proposed for the violations described in the Notice of Violation and Proposed Imposition of Civil Penalty should be mitigated by 50 percent and imposed.

IV.

In view of the foregoing and pursuant to section 234 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2282, Pub. L. 96-295 and 10 CFR 2.205, it is hereby ordered that:

The licensee pay a civil penalty in the amount of Fifty Thousand Dollars ($50,000) within 30 days of the date of this Order, by check, draft, or money order, payable to the Treasurer of the United States and mailed to the Director, Office of Enforcement, U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, DC 20555.

The licensee may request a hearing within 30 days of the date of this Order. A request for a hearing shall be clearly marked as a "Request for an Enforcement Hearing" and shall be addressed to the Director, Office of Enforcement, U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, DC 20555, with a copy to the Regional Administrator, Region II, 101 Marietta Street, NW., Atlanta, Georgia 30323.

If a hearing is requested, the Commission will issue an Order designating the time and place of the hearing. If the licensee fails to request a hearing within 30 days of the date of this Order, the provisions to this Order shall be effective without further proceedings. If payment has not been made by that time, the matter may be referred to the Attorney General for collection.

In the event the licensee requests a hearing as provided above, the issues to be considered at such hearing shall be whether the licensee committed the violations that are denied and whether the proposed civil penalty mitigated by 50 percent should be imposed.

For the Nuclear Regulatory Commission.

James M. Taylor,

Deputy Executive Director for Operations.

Dated at Rockville, Maryland this 17th day of November 1988.

Appendix—Evaluation and Conclusion

Introduction

On October 14-16, 1987 and January 5-7, 1988, inspections were conducted at the Crystal River facility. Violations identified during these inspections led to the issuance of a Notice of Violation and Proposed Imposition of Civil Penalty on March 17, 1988. Florida Power Corporation, in their response, admitted violations I.A.1 and 2, I.C.3 and 5, II.A and B; denied violations I.B., I.C.1, 2 and 4 and requested mitigation of the civil penalty. Provided below are: (1) a restatement of each violation denied, (2) a summary of the licensee's response regarding each denied violation, (3) NRC's evaluation of the licensee's response, (4) the licensee's request in support of withdrawal of the proposed civil penalty, and (5) NRC's conclusions regarding the violations and the proposed civil penalty.

I. Violation I.B

Restatement of Violation

10 CFR 19.12 requires that all individuals working in or frequenting any portion of a restricted area shall be instructed in the purpose and functions of protective devices employed, shall be instructed of their responsibility to report promptly to the licensee any condition which may lead to or cause a violation of Commission regulations and licenses or unnecessary exposure to radiation or to radioactive material, and shall be instructed in the appropriate response to warnings made in the event of any unusual occurence or malfunction that may involve exposure to radiation or radioactive material. The extent of these instructions shall be commensurate with potential radiation health protection problems in the restricted area.

Contrary to the above, the licensee failed to adequately provide instruction to an Auxiliary Nuclear Operator working in the restricted area of the Reactor Building on October 9, 1987, on the limitations and posible failure modes of a radiation survey instrument that had been provided for his use in controlling his exposure in the restricted area and on the appropriate response to take when the radiation level present exceeded the maximum scale reading on the radiation survey meter.

Summary of Licensee's Response

Florida Power Corporation denies the violation and believes it should be withdrawn. The ANO received training on radiation detection instruments during the Radiation Protection lesson provided in the Assistant Nuclear Auxiliary Operator course and the Auxiliary Nuclear Operator courses for non-licensed operators. This training included information on radiation detection principles, ionization chambers, proportional counters, and Geiger-Mueller (GM) tubes. The radiation detection instrument utilized by the ANO did not respond incorrectly or fail, it indicated an off-scale reading in response to the high radiation field to which it was exposed. Based on the individual's training and extensive work experience history including nuclear navy experience, non-licensed operator training, General Employee Training, and his Crystal River Unit 3 (CR-3) work experience, it is reasonable to assume he knew the correct response to an off-scale radiation detection instrument. It is also clear from the ANO's actions (i.e., pattern of brick removal, dosimetry positioning, warning of others, etc.) that additional training was unnecessary.

The ANO failed to take the proper actions not out of lack of training but due to his decision to perform work that exceeded the authorized scope of approved activities.

Florida Power Corporation subsequently provided specific supplemental retraining to the ANO on the use and limitations of survey instruments. Radiation Safety Procedures have also been enhanced with respect to response to off-scale readings, and General Employee Training has been enhanced to include failure modes of survey instruments. These actions by Florida Power Corporation represent positive actions to improve the training and instruction already provided to radiation workers. The NOV could be read to assume that adoption of these additional measures is an indication that previous practices were insufficient to meet regulatory requirements. Such a view is contrary to the Enforcement Policy in that it could discourage improvements out of fear that the NRC will construe such improvements as an admission of past violations.

NRC Evaluation

The inspection revealed that the ANO was trained in certain subjects related to survey instruments but, was not trained on the limitations and possible failure modes of radiation survey instruments and the correct response to take to off-scale readings. The inspector reviewed the lesson plans with licensee representatives and verified that these subjects were not addressed. The licensees subsequent statement that these topics were added to the training program also incidates they were not there when reviewed by the inspector. The staff cannot agree with the licensee's statement that it is reasonable to assume the individual knew the correct response to an off-scale instrument since the individual was confronted with that very situation and did not respond appropriately. Supporting this position is the fact that the second ANO also failed to respond to an off-scale survey instrument, indicating there most likely was a deficiency in their training in this area. The ANOs stated in interviews with the inspector that they had not received training on the correct response to take when off-scale instrument readings are observed. The NRC decision to cite this violation was based on a review of the facts and was not, as claimed by the licensee, based on construing their corrective actions as an admission of a violation. This violation was first presented in the October 16, 1987 exit interview as documented in the inspection report which occurred prior to the corrective actions described by the licensee. The licensee's corrective actions appear appropriate and in no way were used as a basis for identifying this circumstance as a violation.

NRC Conclusion

For the above reason, the NRC staff concludes that the violation occurred as stated.

II. Violation I.C.

Restatement of Violation

Technical Specification 6.11 requires that procedures for personnel radiation protection shall be prepared consistent with the requirements of 10 CFR Part 20 and shall be approved, maintained, and adhered to for all operations involving personnel radiation exposure.

Technical Specification 6.8.1.b requires that written procedures shall be established, implemented, and maintained covering refueling operations.

Contrary to the above, the licensee's procedures for personnel radiation protection and refueling operations were inadequate as evidenced by the October 8, 1987 reactor cavity access shielding removal event in that they did not specify that:

1. Permanent shielding removed during outage activities is to be reinstalled properly;

2. Health physics is to be notified prior to the removal of permanent shielding;

3. Health physics is to be notified when unexpected radiological conditions are encountered or scope of previously authorized work changed;

4. High radiation areas in the Reactor Building area are to be posted and controlled following a plant shutdown and prior allowing general access; and

5. Personnel assigned to observe for seal leakage in the Reactor Building while filling the fuel transfer canal are to be instructed in the procedure for observing leaks and the precautions to be observed while performing that task, particularly with regard to entries into the reactor cavity.

Summary of Licensee's Response

Florida Power Corporation admits the violation based on examples 3 and 5 but denies the violation with respect to examples 1, 2, and 4.

A. Licensee's Comment On Violation I.C.1

The original function of the lead bricks placed at the reactor cavity access was twofold. First to function as shielding and second as a barrier to prevent inadvertent access to the cavity area. Since FPC admits Violation I.A.1 which states the barrier was inadequate to meet the locked gate criteria, the shielding qualities of the barrier is the issue here. FPC contends that work instructions are adequate to control the removal and reinstallation of shielding.

The lead bricks were installed properly at the end of CR–3's 1985 refueling outage as can be shown by the reduction of radiation levels on radiation surveys taken in the reactor cavity area following the installation of the lead bricks. Shielding installation instructions are routinely included on Radiation Work Permits in the "Remarks and Special Instructions" section. A review of RWP's 85–550 and 85–551 which covered installation and removal of shielding for the 1985 refuel outage provided the following instructions:

(a) HP to direct placement of shielding.

(b) HP to be present at the start of each job.

These RWPs show that it is standard practice at CR–3 for Health Physics to oversee evolutions involving shielding.

FPC concludes that the lead bricks at the reactor cavity access were installed properly after the 1985 refuel outage inasmuch as they provided adequate shielding prior to their unauthorized removal. Therefore, adequate guidance was provided for the control of shielding.

NRC Evaluation

At the time the shield wall was replaced in 1985, the licensee intended the shield wall to function as the physical barrier to access the cavity area. The wall also served a radiation shielding function. The craft group reinstalled the shield wall without any written specifications and the adequacy of their work, either as a barrier or as shielding, was not formally reviewed upon completion. The instructions provided on RWP's 85–550 and 85–551 were also inadequate in that they failed to provide specifications for reinstallation of this shielding (e.g., shims were to be added such that the bricks could not be easily removed) and they did not call for HP to be present at the completion of the shielding installation to ensure that the shield had been properly installed. Thus, the licensee did not have adequate procedures in place to ensure that the shielding was properly reinstalled.

B. Licensee's Comment On Violation I.C.2

All radiation workers at CR-3 are required to comply with Radiation Safety Procedures (RSPs). General Employee Training also specifies to never remove temporary shielding without Health Physics approval. The procedure RSP-101, "Basic Radiological Safety Information and Instructions for Radiation Workers," revision 8, was in effect at the time of the incident and states in section 3.1.3, "Rules within the RCA," step 3.1.3.7, "notify Health Physics personnel and obtain appropriate approvals prior to breeching any container, containment, system and/or component integrity." Section 2.3.5 defines containment(s)/container(s) as "any device (e.g., bag, box, drum, tent, glove box, etc.) used to control the release of radioactive material or radiation." The lead bricks served as a containment device and a radiological control device in regard to the high radiation area that existed in the cavity area. The ANO proceeded to remove the shielding contrary to radiation protection program instructions and procedural requirements in an effort to discover leakage from the seal plate. If the ANO had followed RSP-101, he would have contacted Health Physics prior to removing the shielding as required.

NRC Evaluation

The inspector determined that the licensee's procedures did contain guidance on notifying health physics before removing temporary shielding but did not address comparable controls for permanent shielding. The licensees position that shielding is considered a "containment device" and is therefore covered by their procedure goes beyond what one would reasonably expect a radiation worker to consider a containment. It should be noted that at the time of the inspection the licensee did not offer the explanation that they considered their shielding as containment. Assuming procedure RSP-101 was intended to address shielding, its guidance was inadequate to convey its intent.

C. Licensee's Comment On Violation I.C.4

In order for the Reactor Building to be accessed, RWPs must be issued. For an RWP to be issued, surveys must be performed in the designated work areas. When high radiation areas are identified during these surveys, they must be posted and controlled. Therefore, following a plant shutdown, surveys must be performed and high radiation areas posted and controlled prior to allowing general access to the Reactor Building. These actions are covered in HPP-106, "Radiation Work Permit Procedure," and HPP-202, "Scheduled Radiological Surveys and Controls." Therefore procedures are adequate to assure the Reactor Building is posted and controlled following a plant shutdown and prior to allowing general access.

NRC Evaluation

This violation is withdrawn.

III. Licensee's Request for Withdrawal of the Civil Penalty

Summary of Licensee's Position

Florida Power Corporation believes that the violations were the result of actions by individuals beyond the authorized scope and are not indicative of programmatic weakness in the radiation protection program. The NOV and the associated civil penalty could be read to imply that the adoption of improvements in response to the events in question is an indication of deficiencies in the program. Such a view is fundamentally unfair and is contrary to the Enforcement Policy in that it may tend to discourage voluntary improvements by licenses. The licensee urges caution is using the term "reactor cavity access" since this event differed significantly from this class of events in the industry's experience since access, per se, was never attempted.

The licensee reviewed the applicability of the mitigation factors in the NRC Enforcement Policy. The licensee promptly identified the problem and voluntarily reported the event to the NRC telephonically and with an LER. Immediate and followup corrective actions were extensive.

The licensee discussed the factors for escalation of the civil penalty stated in the March 17, 1988 letter transmitting the NOV. The licensee acknowledges that there had been an outstanding work order since 1985 to provide a lockable barrier for the cavity access, but priority on completing it was based on the presumed adequacy of the lead bricks as a barrier. Personnel who observed the ANO had reason to believe that he was authorized to remove the lead bricks, there was no reason for them to report any apparent improper radiological activities and none of the personnel had authority to stop the work.

In regard to the events described in the second violation, they were committed by the same individual, who was eventually terminated. The fact that the individual was allowed to remain in the high radiation area was reasonable considering the dose rates in the area.

In regard to the four prior notifications of similar events, the licensee stated that workers were made aware of the hazard and the shield wall barrier was evaluated for adequacy. No action taken by management can prevent individual actions which are outside the bounds of preestablished programs.

NRC Evaluation

The NRC Enforcement Policy states that licensee's are generally held responsible for the acts of their employees. The staff believes that the root cause of this problem was a lack of management controls in this area as evidenced by inadequate training and supervision as detailed in the NOV and not merely employee misconduct. The NRC's characterization of violations and severity levels was based on a review of the facts as determined by the onsite inspections and the licensee's presentation at the Enforcement Conferences. The NRC did not view the corrective actions as admissions of any problem not otherwise fully supported and indicated by the facts at hand. The NRC Enforcement Policy recognizes the importance of licensee initiative in identifying and correcting problems. The staff does not agree that this event was significantly different from other industry events of this type. A common element of each uncontrolled access to the cavity area involved potential or actual entry by personnel while searching for leaks. The ANO did not actually enter the cavity in this case, but could have had he removed additional shielding bricks. It is fundamental that individuals be knowledgeable of the potential hazards in the reactor cavity. The admission of Violation I.C.5 is in itself of significance.

Based upon the licensee's response regarding mitigation and escalation of the civil penalty, the NRC has reconsidered the amount of the civil penalty. The NRC recognizes that the licensee reported these events, even though they were not required to be reported, and has taken extensive corrective action. However, the NRC maintains that the licensee's Radiation Safety Program was deficient regarding the events because of: (1) The prior notice of similar reactor cavity events; (2) the fact that a work order to install a strongback on the existing lead brick barricade with an appropriate locking device was outstanding since 1985, and if completed would have prevented the occurrence of the reactor cavity access event; (3) the fact that there were several opportunities to discover the

reactor cavity access problem in that several members of the licensee's staff passed through the vicinity but did not recognize or report the problem; and (4) the fact that the violations involving unauthorized entries are similar to violations occurring in 1986. The NRC has also reevaluated this case with other similar cases including the two cases the licensee noted in its response (EA 84–13 involving Carolina Power and Light Company and EA 86–38 involving Florida Power and Light Company). These cases are not controlling since different circumstances were involved in each case. Even if similar circumstances were involved, it is not clear that the results in the two cases noted by the licensee are justified under the present Enforcement Policy in view of the significance of the violations. However, after reconsidering your reporting of these events and your extensive corrective actions against your past performance and prior notice of similar events, the NRC is mitigating the civil penalty to $50,000.

IV. NRC Conclusion

The NRC has reviewed Florida Power Corporation's response to the proposed imposition of civil penalty and arguments for withdrawal of the civil penalty. The NRC concludes that the violations, except for Violation I.C.4, occurred as stated in the proposed imposition of civil penalty and that an adequate basis for mitigation of the civil penalty has been provided by the licensee. Consequently, a proposed civil penalty in the amount of $50,000 should be imposed.

BILLING CODE 7590–01–M

[Docket No. 50–344]

Portland General Electrical Co.; Withdrawal of a Portion of an Application for Amendment to Facility Operating License No. NPF–1

The United States Nuclear Regulatory Commission (the Commission) has granted the request of Portland General Electric Company (the Licensee) to withdraw its August 16, 1985 application as supplemented December 19, 1986, to amend the Trojan Nuclear Plant Technical Specifications (TS). The proposed amendment would have revised the Technical Specifications to allow relief from Limiting Condition of Operation 3.0.4 for several specifications. The Commission issued a Notice of Consideration of Issuance of Amendment in the **Federal Register** on February 10, 1988 (53 FR 3958). By letter dated April 20, 1988 the licensee stated that a portion of the above application for amendment, TS 3.3.3.5, "Remote Shutdown Instrumentation," was withdrawn. The other items in the application for amendment were approved in Amendment No. 142, dated May 11, 1988.

For further details with respect to this action, see (1) the application for amendment dated August 16, 1985, as supplemented December 19, 1986, and (2) the licensee's letter of April 20, 1988 requesting withdrawal of the application. Both of the above documents are available for public inspection at the Commission's Public Document Room, 2120 L Street, NW., Washington, DC and at the Portland State University Library, 731 SW Harrison Street, Portland, Oregon 92707.

Dated at Rockville, Maryland, this 16th day of October, 1988.

Roby Bevan,

Project Manager, Project Directorate V, Division of Reactor Projects—III, IV, V and Special Projects.

[FR Doc. 88–27684 Filed 11–30–88; 8:45 am]
BILLING CODE 7590–01–M

[Docket No. 50–461A]

Clinton Power Station; Proposed License Amendment; Merger of Licensees Soyland Power Cooperative, Inc., and Western Illinois Power Cooperative, Inc.; Request for Comments on Antitrust Issues

By application dated November 2, 1988, Illinois Power Company (IP) requested that Operating License NPF–62 for the Clinton Power Station (CPS) be amended to reflect a change in ownership interest in CPS. The change in ownership interest would result from the proposed merger of Soyland Power Cooperative, Inc. (Soyland) and Western Illinois Power Cooperative, Inc. (WIPCO), the two minority owners of CPS. The surviving entity resulting from the merger will be called Soyland Power Cooperative, Inc. and will own slightly less than 15% of CPS—an ownership share identical to the combined interests of Soyland and WIPCO.

IP, WIPCO and Soyland are currently the only licensees for CPS. The merger of WIPCO and Soyland will not result in the transfer of any interest in the license to an entity not currently a CPS licensee. Soyland will assume full responsibility for all CPS obligations currently being discharged by WIPCO. The proposed license amendment will not change IP's ownership share of CPS, nor will it change IP's commitments related to capital and operating and maintenance costs, and it will not affect IP's role as project manager for CPS.

Pursuant to 10 CFR 50.90 of the Commission's Rules and Regulations and section 105c of the Atomic Energy Act, as amended, the staff is publishing notice of receipt of the proposed amendment and requesting comments on its competitive impact. A copy of the application for amendment has been forwarded to the Attorney General for his review and comment. Moreover, a copy of the application for amendment will be available for public inspection in the local public document room at the Vespasian Warner Public Library, 120 West Johnson Street, Clinton, Illinois 61727 and at the Commission's Public Document Room at 2120 L Street, NW., Washington, DC 20555.

Any person who wishes to express views pursuant to antitrust issues that may be raised by this amendment request, should submit said views within 15 days from the initial publication of this notice in the **Federal Register** to the U.S. Nuclear Regulatory Commission, Washington, DC 20555; Attention: Chief, Policy Development and Technical Support Branch, Office of Nuclear Reactor Regulation.

Dated at Rockville, Maryland, this 22nd day of November, 1988.

For The Nuclear Regulatory Commission.

Daniel R. Muller,

Director, Project Directorate III–2, Office of Nuclear Reactor Regulation.

[FR Doc. 88–27692 Filed 11–30–88; 8:45 am]
BILLING CODE 7590–01–M

[Docket No. 50–346; License No. NPF–3; EA 88–234]

Toledo Edison Co., Davis-Besse Nuclear Power Station; Order Modifying License

I.

The Toledo Edison Company (Licensee) is the holder of Operating License No. NPF–3 issued by the Nuclear Regulatory Commission (NRC/Commission) on April 22, 1977. The license authorizes the Licensee to operate the Davis-Besse Nuclear Power Station (Davis-Besse) in accordance with the conditions specified therein.

II.

A special NRC safety inspection (Inspection Report No. 50–346/88027(DRP)) conducted during the period from May 4 through September 2, 1988, and an NRC investigation (Investigation No. 3–88–008) confirmed an allegation regarding the discriminatory layoff by the former Quality Control (QC)

Manager at Davis-Besse, Louis R. Wade, of a contract QC Inspector who had raised safety concerns to licensee senior management. Specifically, the NRC concluded that the termination of the QC Inspector was a discriminatory act in violation of 10 CFR 50.7 and is described in a Notice of Violation and Proposed Imposition of Civil Penalty being issued this date. The details of the 10 CFR 50.7 violation are as follows.

On July 10, 1986, a Potential Condition Adverse to Quality Report (PCAQR) was written by a QC Inspector concerning deficiencies in the installation of an electrical wire splice. Mr. Wade (who at the time was a QA engineer) was instrumental in having the PCAQR improperly invalidated instead of processing it in accordance with station procedures which require that PCAQRs be processed through the Shift Supervisor, the Plant Technical Support Department and the PCAQR Review Board. (Mr. Wade was promoted shortly thereafter to QC Supervisor and then to QC Manager in 1987.) Because the QC Inspector was still concerned about the issue and refused to dismiss it, Mr. Wade requested that he formally document and clarify his concerns. The QC Inspector reiterated his safety concerns and the improper way his concerns were handled in a memorandum dated October 10, 1986, and provided copies to the Quality Assurance (QA) Director and the Senior Vice-President, Nuclear. As a result of the QC Inspector's memorandum, the QA Director (Mr. Wade's supervisor) investigated the matter and subsequently after several discussions with Mr. Wade, issued a memorandum dated October 29, 1986, to Mr. Wade reprimanding him for his improper handling of the QC Inspector's safety concerns.

During the period between late September and early October 1986, in preparation for an upcoming reduction in contact QC Inspector workforce due to the end-of-outage reduction in workload, Mr. Wade requested that the lead QC inspectors provide him with a list indicating the layoff sequence for contract QC inspectors. This QC Inspector's lead considered the QC Inspector to be one of approximately four or five inspectors who were good performers with multidisciplinary inspection skills who should not be laid off if possible. There is no question that the QC organization thought highly of the QC Inspector who was considered a competent and respected inspector. Despite the recommendation to retain the QC Inspector if possible, Mr. Wade directed that the QC Inspector be laid off. Therefore, on October 31, 1986, the QC Inspector was laid off. In addition, the QC Inspector was one of the first contract QC Inspectors to be laid off and he was the first QC Inspector to be laid off from his particular QC section. Moreover, within 15 days, the vacancy in that section created by his employment termination was filled by another contract QC Inspector.

At the enforcement conference on September 26, 1988, the licensee informed the staff that it had removed Mr. Wade's site access on September 23, 1988, and that it had terminated Mr. Wade's employment effective November 1988.

III.

In addition to the discrimination issue addressed in section II above, additional concerns have been identified relative to the performance of Mr. Wade. A second special NRC safety inspection (Inspection Report No. 50–346/88012 (DRP)) confirmed other allegations of activities conducted by or under the direction of Mr. Wade. A Notice of Violation concerning several violations identified during this inspection was issued on September 22, 1988.

IV.

Based on the results of the NRC inspection and investigation, the staff has concluded that Mr. Wade intentionally removed the QC Inspector from the Davis-Besse facility for raising a safety issue. For almost two years, until disclosure by the NRC, the effect of this act had the potential to "chill" the proper actions of others. The conduct of Mr. Wade removing the QC Inspector who was properly raising safety issues cannot be tolerated. The public health and safety requires an effective quality assurance program in order to provide assurance that licensed activities are properly conducted. Moreover, a basic tenet of the Commission's quality assurance requirements, is that quality control workers must be free to be able to raise safety concerns without fear of retaliation.

The actions of Mr. Wade as described in sections II and III above, demonstrate that he cannot be relied upon to assure that quality assurance programs are properly conducted and that quality control workers will be permitted and encouraged to raise safety issues. Therefore, I have determined that I no longer have reasonable assurance that licensed activities conducted by or under the supervision of Mr. Wade will be conducted in accordance with NRC requirements. Accordingly, I have concluded that it is necessary for the NRC to be informed if Mr. Wade is rehired to permit the NRC to determine, at that time, whether further regulatory action is required.

V.

Accordingly, pursuant to sections 103, 161 b, 8, and o, 182, and 186 of the Atomic Energy Act of 1954, as amended, and the Commission's regulations in 10 CFR 2.204 and 10 CFR Part 50, it is hereby ordered that:

License No. NPF–3 is amended adding the following conditions:

The Licensee shall provide the NRC Regional Administrator, RIII, written notice within one week of Mr. Louis R. Wade's reinvolvement in safety-related activities authorized under License No. NPF–3. The notice shall include a statement from the Licensee as to its basis for concluding that, in light of Mr. Wade's conduct which resulted in his removal, he will properly carry out licensed activities.

The Regional Administrator, Region III, may relax or terminate this condition for good cause shown.

VII.

The Licensee, Mr. Wade, or any other person adversely affected by this Order may request a hearing within 30 days after issuance of this Order. Any answer to this Order or any request for hearing shall be submitted to the Director, Office of Enforcement, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Copies shall also be sent to the Assistant General Counsel for Enforcement at the same address and to the Regional Administrator, U.S. Nuclear Regulatory Commission, Region III, 799 Roosevelt Road, Glen Ellyn, Illinois 60137. If a person other than the Licensee requests a hearing, that person shall set forth with particularly the manner in which the petitioner's interest is adversely affected by the Order and should address the criteria set forth in 10 CFR 2.714(d). Upon the failure of the Licensee, Mr. Wade, or any other person adversely affected by this Order to request a hearing within the specified time, this Order shall be final without further proceedings.

If a hearing is requested, the Commission will issue an order designating the time and place of any hearing. If a hearing is held, the issue to be considered at such hearing shall be whether this Order should be sustained.

For the Nuclear Regulatory Commission.

James M. Taylor,

Deputy Executive Director for Regional Operations.

Dated at Rockville, Maryland this 21st day of November 1988.

[FR Doc. 88-27685 Filed 11-30-88; 8:45 am]

BILLING CODE 7590-01-M

SECURITIES AND EXCHANGE COMMISSION

Agency Information Collection Activities Under OMB Review

Agency Clearance Officer—Kenneth Fogash, (202) 272-2141.

Upon written request, copy available from: Securities and Exchange Commission, Office of Consumer Affairs and Information Services, Washington, DC 20549.

Extension

Proposed Extension of Regulation S-X (17 CFR 210)

SEC File No. 270-3

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission has submitted regulation S-X (17 CFR 210) for approval of an extension of clearance.

Information collected and records prepared pursuant to Regulation S-X focus on the form and contents of, and requirements for, financial statements filed with periodic reports and in connection with the offer or sale of securities.

The potential respondents include all entities that file registration statements or reports pursuant to the Securities Act of 1933, the Securities Exchange Act of 1934, the Public Utility Holding Company Act of 1935, or the Investment Company Act of 1940.

Regulation S-X specifies the form and content of financial statements when those financial statements are required to be filed by other rules and forms under the Federal securities laws. Compliance burdens associated with the financial statements are assigned to the rule or form that directly requires the financial statements to be filed, not Regulation S-X. Instead, an estimated burden of one hour traditionally has been assigned to Regulation S-X for incidental reading of the regulation. The estimated average burden hours are made solely for purposes of the Paperwork Reduction Act and are not derived from a comprehensive or even a representative survey or study of the costs of SEC rules or forms. Direct any comments concerning the accuracy of estimated average burdens hours for compliance to Kenneth A. Fogash, Deputy Executive Director, 450 Fifth Street NW., Washington, DC 20549-6004 and to Gary Waxman at the address listed below.

Submit comments to OMB Desk Officer: Gary Waxman (202) 395-7450, Office of Management and Budget, Paperwork Reduction Project 3435-0009, Office of Information and Regulatory Affairs, Room 3228 NEOB, Washington, DC 20503.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

[Rel. No. IC-16654; 812-7116]

Boston Financial Qualified Housing Tax Credits L.P. III and Arch Street III, Inc.; Application

November 25, 1988.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for Exemption under the Investment Company Act of 1940 ("1940 Act").

Applicants: Boston Financial Qualified Housing Tax Credits L.P. III, a Delaware limited partnership, (the "Partnership") and its managing general partner, Arch Street III, Inc., a Massachusetts corporation ("Managing General Parnter").

Relevant 1940 Act Sections: Exemption under section 6(c) from all provisions of the 1940 Act.

Summary of Application: Applicants seek an order exempting the Partnership from all provisions of the 1940 Act and the rules thereunder to permit the Partnership to invest in other limited partnerships that in turn will engage in the development, rehabilitation, ownership and operation of low and moderate income housing projects.

Filing Date: The application was filed on September 8, 1988 and amended on November 10, 1988.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on December 19, 1988. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicants with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit or, for lawyers, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 5th Street NW., Washington, DC 20549. Applicants, 101 Arch Street, Boston, Massachusetts 02110.

FOR FURTHER INFORMATION CONTACT: Victor R. Siclari, Staff Attorney, at (202) 272-3026 or Stephanie M. Monaco, Branch Chief, at (202) 272-3030 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier who can be contacted at (800) 231-3282 (in Maryland (301) 258-4300).

Applicants' Representations

1. The Partnership was formed on August 9, 1988, as a vehicle for equity investment in apartment complexes to be qualified, in the opinion of counsel, for the low income housing tax credit (the "Low Income Housing Credits") under the Internal Revenue Code of 1986, as amended ("Code"). An unlimited amount of the aggregate capital contributions of the limited parnters ("Limited Partners") of the Partnership may be invested in nonsubsidized apartment complexes that will be qualified for the Low Income Housing Credits, although the Partnership expects to invest a majority of its net proceeds in subsidized apartment complexes.

2. The Partnership will operate as a "two-tier" entity, i.e., the Partnership, as a limited partner, will invest in other limited partnerships ("Local Limited Partnerships") which, in turn, will engage in the development, rehabilitation, ownership and operation of apartment complexes in accordance with the purpose and criteria set forth in Investment Company Act Release No. 8456 (August 9, 1974) ("Release No. 8456"). The Partnership's investment objectives are: (i) To provide current tax benefits in the form of tax credits which Qualified Investors (defined herein) may use to offset their federal income tax liability; (ii) to preserve and protect the Partnership's capital; (iii) to provide limited cash distributions which are not expected to constitute taxable income during Partnership operations; and (iv) to provide cash distributions from sale or refinancing transactions, as defined in the Partnership's partnership

agreement (the "Partnership Agreement").

3. The Partnership will normally acquire at least a 90% interest in the cash distributions, profits, losses and tax credits of the Local Limited Partnerships, with the balance remaining with the local general partners. However, in certain cases, at the discretion of the Managing General Partner, the Partnership may acquire a lesser interest in a Local Limited Partnership. Should Partnership invest in any Local Limited Partnership in which it acquires less than 50% of the limited partnership interest, the Partnership Agreement will provide that the Partnership will have at least a 50% vote to: Amend such partnership agreement of such Local Limited Partnership; dissolve such Local Limited Partnership; remove the local general partner and elect a replacement; and approve or disapprove the sale of substantially all of the assets of such Local Limited Partnership. In addition, in connection with the qualification of the sale of the units of Limited Partnership interests in the Partnership and the compensation arrangements discussed below, the Partnership has entered into an undertaking with certain state securities authorities indicating that the Local Limited Partnership agreements will provide to the limited partners of the Local Limited Partnership substantially all of the rights required by Section VII of the guidelines adopted by the North American Securities Administrators Association, Inc. ("NASAA").

4. On September 6, 1988, the Partnership filed a registration statement (as amended on November 15, 1988) under the Securities Act of 1933 (the "Securities Act") for the sale of up to 100,000 units of Limited Partnership interest ("Units") at $1,000 per Unit with a minimum subscription of five units ($5,000) per investor.

5. Subscriptions for Units must be approved by the Managing General Partner, and such approval will be made conditional upon representations as to suitability of the investment for each subscriber. The form of subscription agreement for Units, set forth as Exhibit B to the Prospectus, provides that each subscriber will represent, among other things, that he meets the general investor suitability standards established by the Partnership and set forth in the Prospectus under the heading "Who Should Invest." Such general investor suitability standards provide, among other things, that investment in the Partnership is suitable only for an investor (a "Qualified Investor") who meets the following requirements: (a) In the case of an investor that is a corporation, other than a corporation subject to Subchapter S of the Code, such corporation (a "C Corporation") has a net worth of not less than $75,000; (b) in the case of a noncorporate investor, such investor reasonably expects to have substantial, unsheltered passive income or, if an individual, such investor reasonably expects to have adjusted gross income of *less* than $250,000 in the next twelve years and reasonably expects to have income tax liability during those years in respect of which the tax credits can be utilized and either (1) he has a net worth (exclusive of home, furnishings and automobiles) of at least $50,000 ($35,000, if such investor is a resident of New Hampshire) and an annual gross income of not less than $30,000 ($35,000, if such investor is a resident of New Hampshire) in the current year and estimates he will maintain these levels for the twelve succeeding years and that (without regard to investment in the Partnership) some part of his income for the current year and the twelve succeeding years will be subject to Federal income tax at the rate of 28% or more, or (2) irrespective of annual taxable income, he has a net worth (exclusive of home, furnishings and automobiles) of at least $75,000, or (3) is purchasing in a fiduciary capacity for a person or entity having such net worth and annual gross income as set forth in clause (1) or such net worth as set forth in clause (2); or (c) in the case of an investor that is a corporation subject to Subchapter S of the Code each of its shareholders (or if a partnership each of its partners) holding a material interest therein meets the criteria applicable to non-corporate investors. Units will be sold in certain states only to persons who meet additional or alternative standards which will be set forth in the Prospectus, any supplement to the Prospectus or the Subscription Agreement; *provided, however,* that in no event shall the Partnership employ any such suitability standard which is less restrictive than that set forth above. The Partnership Agreement also imposes certain restrictions on transfer and assignment of the Units. The Partnership will not redeem or repurchase Units, does not anticipate formation of a public market for the Units, and thus believes purchases of Units should be considered illiquid investments.

6. The Partnership will be controlled by the Managing General Partner and Arch Street III Limited Partnership, its general partners (the "General Partners"). The Limited Partners, consistent with their limited liability status, will not be entitled to participate in the control of the business of the Partnership. However, the majority in interest of the Limited Partners will have the right to amend the Partnership Agreement (subject to certain limitations), dissolve the Partnership, and remove any General Partner and elect a replacement therefor. In addition, under the Partnership Agreement, each Limited Partner is entitled to review all books and records of the Partnership at any and all reasonable times.

7. The Partnership Agreement provides that certain significant actions cannot be taken by the Managing General Partner without the express consent of a majority in interest of the Limited Partners. Such actions include: (a) Sale at any one time of all or substantially all of the assets of the Partnership, except for (1) a sale of any one Local Limited Partnership interest in a twelve month period or (2) sales in connection with the liquidation and winding up of the Partnership's business upon its dissolution; (b) dissolution of the Partnership; and (c) causing the Partnership to merge or be consolidated with any other entity. The admission of a successor or additional General Partner would also require express consent under the Partnership Agreement.

8. Boston Financial Securities, Inc., an affiliate of the General Partners (the "Selling Agent"), will receive customary commissions and an underwriting advisory fee on the sale of the Units together with an expense allowance to defray accountable due diligence activities. The Selling Agent may authorize other members ("Soliciting Dealers") of the National Association of Securities Dealers, Inc. ("NASD") to sell Units. The Selling Agent will pay a concession to each Soliciting Dealer on all sales of Units by such Soliciting Dealer and may reallow all or any portion of its expense allowance to such Soliciting Dealer. Such selling commissions are customarily charged in securities offerings of this type and are consistent with the guidelines of the NASD.

9. During the offering and organizational phase, the Managing General Partner and its Affiliates (as defined in the Partnership Agreement) will receive from the Partnership reimbursement of organizational, offering and selling expenses and an allowance for marketing expenses.

10. Acquisition phase fees payable to all persons, including the General Partners or their Affiliates, in

connection with the acquisition of interests in Local Limited Partnerships, will be limited by the guidelines adopted by NASAA. During the operating phase, the Partnership may pay additional fees or compensation to the General Partners or their Affiliates including, without limitation, an asset management fee. Such asset management fee is paid in consideration of the administration of the affairs of the Partnership in connection with each Local Limited Partnership in which the Partnership invests. Such other fees may be paid in consideration of property management services rendered by the General Partners or their Affiliates as the management and leasing agent for some of the Local Limited Partnerships and for consulting services rendered by the General Partners or their Affiliates as consultants to some of the Local Limited Partnerships. All such fees shall be subject to the terms of the Partnership Agreements. As well, the General Partners or their Affiliates may receive amounts from Local Limited Partnerships to the extent permitted by applicable law and regulations. Such amounts shall be paid in the event that the General Partners or their Affiliates are local general partners of the Local Limited Partnerships and all such amounts shall be subject to the terms of the Partnership Agreement. Compensation to the General Partners or their Affiliates during the liquidating stage will be in the form of distributions of the proceeds of the sale or refinancing of Local Limited Partnership projects or interest, or of real personal property of the Partnership. In addition to the foregoing fees and interests, the General Partners or their Affiliates will be allocated generally 1% of profits and losses of the Partnership for tax purposes.

11. The substantial fees and other forms of compensation that will be paid to the General Partners or their Affiliates will not have been negotiated through arm's length negotations. Terms of all such compensation, however, will be fair and not less favorable to the Partnership than would be the case if such terms had been negotiated with independent third parties. In addition, compensation in various forms will be paid to the local general partner of each Local Limited Partnership.

12. All proceeds of the public offering of Units will initially be placed in an escrow account with Shawmut Bank, N.A. ("Escrow Agent"). Pending release of offering proceeds to the Partnership, the Escrow Agent will deposit escrowed funds in the "Shawmut Interest Bearing Account," a federally insured money market deposit account. The offering of Units will terminate not later than one year from the date upon which the Partnership's Registration Statement shall have been declared effective. If subscriptions for at least 5,000 Units have not been received by such termination date, no Units will be sold and funds paid by subscribers will be returned promptly, together with a pro rata share of any interest earned thereon. The Partnership will not accept any subscriptions for Units until the exemptive order applied for herein is granted or the Partnership receives an opinion of counsel that it is exempt from registration under the 1940 Act. Upon receipt of the prescribed minimum number of subscriptions, funds in escrow will be released to the Partnership and held in trust pending investment in Local Limited Partnerships. Any net proceeds not immediately utilized to acquire Local Limited Partnership interests or for other Partnership purposes will be invested and held in highly liquid, non-speculative securities which provide adequately for the preservation of capital. It is the Partnership's intention to apply capital raised in its public offering to the acquisition of Local Limited Partnership interests as soon as possible.

13. The Partnership Agreement provides that, subject to certain limitations including negligence and misconduct, the Partnership shall indemnify the General Partners and certain Affiliates for losses sustained by them or their Affiliates in connection with the business of the Partnership. However, the Partnership has been advised that in the opinion of the SEC indemnification for liabilities under the Securities Act is contrary to public policy as expressed in the Securities Act and is therefore unenforceable.

Applicants' Legal Conclusions

1. The exemption of the Partnership from all provisions of the 1940 Act is both necessary and appropriate in the public interest, because: (a) Investment in low and moderate income housing in accordance with the national policy expressed in Title IX of the Housing and Urban Development Act of 1968 is not economically suitable for private investors without the tax and organizational advantages of the limited partnership form; (b) the limited partnership structure provides the only means of bringing private equity capital into such housing; (c) the limited partnership form insulates each Limited Partner from personal liability and limits his financial risk to the amount he has invested in the program, while also allowing the Limited Partner to claim on his individual tax return his proportionate share of the tax credits, income and losses from the investment; (d) the limited partnership form of organization is incompatible with fundamental provisions of the 1940 Act, such as the requirement of annual approval by investors of a management contract and the requirements concerning election of directors and the termination of the management contract; and (e) real estate limited partnerships such as the Partnership generally cannot comply with the asset coverage limitations imposed by section 18 of the 1940 Act. Also, an exemption from these basic provisions is necessary and appropriate so as not to discourage use of the two-tier limited partnership entity or frustrate the public policy established by the housing laws.

2. Interests in the Partnership will be sold only to (and transfers will be permitted only to) investors who meet specified suitability standards (as described above) which the Partnership believes are consistent with the requirements in Release No. 8456, with the guidelines of those states which prescribe suitability standards, and with the securities laws of all states where the Units will be sold. Such investors will receive extensive reports concerning the Partnership's business and operations. Although the interests of the General Partners and their Affiliates may conflict in various ways with the interests of Limited Partners, Limited Partners are adequately protected through disclosure of all potential conflicts in the Prospectus, including competition by Local Limited Partnerships with Affiliates for properties and the participation by an Affiliate as the Selling Agent for the offering. To address this conflict, the General Partners agree, in section 5.7 of the Partnership Agreement, that each General Partner and each Affiliate thereof, prior to entering into an investment which could be suitable for the Partnership or recommending such investment to others, must present to the Partnership the opportunity to enter into such investment and may not enter into such investment on its own behalf nor recommend it to others unless the Partnership has declined to enter into such investment. Further protection for the interests of Limited Partners is provided by the numerous provisions of the Partnership Agreement designed to prevent over-reaching by the General Partners and to assure fair dealing by the General Partners vis-a-vis the

Limited Partners. The Partnership will also file with the SEC and distribute certain financial documents and reports on its activities.

3. In addition, all compensation to be paid to the General Partners and their Affiliates is specified in the Partnership Agreement and Prospectus and no compensation will be payable to the General Partners or any of their Affiliates not so specified.

4. Release No. 8456 lists two conditions, designed for the protection of investors, which must be satisfied in order to qualify for the type of exemptive relief which the Partnership seeks: (1) "interests in the issuer should be sold only to persons for whom investments in limited profit, essentially tax-shelter, investments would not be unsuitable * * *"; and (2) "requirements for fair dealing by the general partner of the issuer with the limited partners of the issuer should be included in the basic organizational documents of the company." The Partnership will comply with these conditions and will otherwise operate in a manner designed to insure investor protection.

5. The contemplated arrangement of the Partnership is not susceptible to abuses of the sort the 1940 Act was designed to remedy. The suitability standards described above, the requirements for fair dealing provided by the Partnership's governing instruments, and pertinent governmental regulations imposed on each Local Limited Partnership by various federal, state and local agencies, provide protection to investors in Units comparable to and in some respects greater than that provided by the 1940 Act. An exemption would therefore be entirely consistent with the protection of investors and the purposes and policies of the 1940 Act.

For the Commission, by the Division of Investment Management, under delegated authority.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[Rel. No. IC-16655; 811-956, 811-1240]

Royal Business Funds Corp.; Deregistration

November 25, 1988.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for Deregistration under the Investment Company Act of 1940 ("1940 Act").

Applicant: Royal Business Funds Corporation.

Relevant 1940 Act Section: Section 8(f).

Summary of Application: Applicant seeks an order declaring that it has ceased to be an investment company.

Filing Dates: The application was filed on November 9, 1987, and amended on October 17, and November 21, 1988. A letter was submitted as an exhibit to the application on March 18, 1988, by the Small Business Administration ("SBA") regarding Applicant's liquidation status.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on December 20, 1988. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicant with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit or, for lawyers, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 5th Street NW., Washington, DC 20549. Applicant, c/o William J. Foster, IV, Esq., Hertzog, Calamari & Gleason, 100 Park Avenue, New York, New York 10017.

FOR FURTHER INFORMATION CONTACT: Victor R. Siclari, Staff Attorney, at (202) 272-3026 or Stephanie M. Monaco, Branch Chief, at (202) 272-3030 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier who can be contacted at (800) 231-3282 (in Maryland (301) 258-4300).

Applicant's Representations

1. Applicant is a New York corporation formed in 1960 and licensed as a Small Business Investment Company ("SBIC") under the Small Business Investment Act of 1958. Applicant is registered with the SEC under the 1940 Act as a closed-end, non-diversified, management investment company. As a SBIC-licensed company, Applicant borrowed funds, the repayment of which was guaranteed by the SBA. Such funds were loaned to render financial assistance to small business concerns.

2. As of July 1982, Applicant was indebted to the SBA in an amount equal to $23,321,745.91. At the same time its assets consisted largely of real properties acquired by Applicant as a result of liquidating collateral on defaulted loans which had been made to small business concerns.

3. On July 13, 1982, the United States of America brought an action against Applicant for a money judgment and for various other forms of relief. The SBA was appointed receiver of the Applicant and an orderly liquidation of assets was undertaken. Ernst and Whinney, the Applicant's independent accountants, was retained by the SBA to complete Applicant's financial statements for the four-month period beginning March 31, 1984, and ending on the close of business on July 31, 1984. On May 8, 1984, after a formal notice of the proposed settlement was sent to Applicant's stockholders and they were given an opportunity to object, a consent judgment and order in favor of the United States was issued for the full amount of the outstanding indebtedness. The judgment was settled on July 31, 1984, by a transfer of all of the Applicant's assets (except an office lease, equipment and furniture) to the SBA subject to the Applicant's liabilities. Further, the Applicant's SBIC license was surrendered in connection with the proceeding. As a result of the foregoing, Applicant was left with substantially no assets and no liabilities. On April 6, 1987, the SBA receivership of Applicant was terminated.

4. Applicant's present Board of Directors is constituted so as to comply with section 10 of the 1940 Act and will remain as such until Applicant schedules and holds a shareholder meeting and new directors are elected. At present, S. Pierre Bonan (Applicant's Chairman) and his wife own slightly in excess of 50% of Applicant's outstanding common stock.

5. The Board of Directors has concluded that it is in the best interest of the Applicant's shareholders to attempt to revive the Applicant rather than to dissolve it. In applying for deregistration under the 1940 Act, Applicant expects to recapitalize in an effort to engage in a business other than the investmant company business. If successful, an existing net operating loss carry forward may provide tax relief as an offset to operating income. For this reason and the fact that Applicant is a publicly-owned corporation without substantial liabilities, the shareholders have a legitimate economic basis for reviving Applicant.

6. Applicant is not presently a party to any litigation or administrative proceeding, and Applicant does not anticipate that there will be any law suits or claims asserted against it or its directors and officers prior to being deregistered. Neither the Applicant nor any of its officers or directors is the subject of a court ordered injunction or any administrative proceeding.

7. Since July 31, 1984, the date the SBA assumed Applicant's existing liabilities, Applicant's Chairman has advanced funds to the Applicant for necessary services including rent, telephone, secretarial, accounting and legal expenses which he may seek to recover from the Applicant, with Board of Directors' approval, at some future date.

Applicant's Legal Conclusions

The requested order is necessary and appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the 1940 Act because of the following reasons:

1. Applicant is no longer a closed-end, non-diversified, management investment company, licensed by the SBA as a SBIC, requiring registration under the 1940 Act;

2. The provisions of the 1940 Act and the protections normally afforded thereby to the shareholders of Applicant and the public were not intended to be applied to a company whose activities would not otherwise be covered by the 1940 Act;

3. Since the Applicant has substantially no assets, a dissolution could not be expected to result in distribution benefitting the shareholders; and

4. Continued registration under the 1940 Act will only serve to hamper efforts to raise capital and would be burdensome and involve administrative expenses associated with compliance under the 1940 Act that would have no relevance to the operations of Applicant.

Applicant's Conditions

If the requested order is granted, Applicant agrees to the following conditions:

1. Prior to deregistration, Applicant will obtain approval of its stockholders of the change in the nature of its business, as required under section 13(a)(4) of the 1940 Act, and for amendment of Applicant's Certificate of Incorporation for the same.

2. In soliciting proxies for the stockholder vote noted above, the Applicant agrees to disclose in the proxy materials that deregistration under the 1940 Act is subject to majority stockholder approval, that deregistration is subject to approval of the SEC and that interested persons will have an opportunity to request a hearing on such deregistration.

3. A majority of those directors who are not "interested persons" as defined in section 2(a)(19) of the 1940 Act ("disinterested directors") shall also be required to approve the proposed change in the nature of Applicant's business based on a determination that it is in the best interests of the shareholders to approve such change and the Applicant will not participate in the proposed transaction to change Applicant's business on a basis different from or less advantageous than that of any other participant. The disinterested directors shall have its opportunity to consult with independent legal counsel when making such determinations.

4. A majority of the disinterested directors shall be required to approve reimbursement of costs incurred by the Chairman for necessary services based upon a finding that it is both reasonable and fair to the shareholders. Such reimbursement may not include compensation to the Chairman or his wife for services rendered.

5. Applicant does not intend in the future to hold itself out or propose to engage in the business of investing, reinvesting, owning, holding or trading in securities, or to own or propose to acquire investment securities, in such a manner as would otherwise require Applicant to register under the 1940 Act.

6. Applicant acknowledges, understands and agrees that the SEC's issuance of the order requested shall not limit the SEC's right to commence any future investigation, enforcement action or proceeding for violations of the 1940 Act if Applicant should ever come within the definition of an investment company contained in section 3(a) of the 1940 Act.

7. Applicant will file Form N–SAR for the period up until it is deregistered under the 1940 Act.

For the SEC, by the Division of Investment Management, under delegated authority.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010–01–M

SMALL BUSINESS ADMINISTRATION

[Application No. 02/02–5525]

Brighten Finance & Investment, Inc.; Application for License To Operate as a Small Business Investment Company

Notice is hereby given that an application has been filed with the Small Business Administration pursuant to § 107.102 of the Regulations governing small business investment companies (13 CFR 107.102 (1988)) by Brighten Finance & Investment, Inc., located at 36 West 44th Street, Room 812, New York, New York 10036, for a license to operate as a small business investment company (SBIC) under the Small Business Investment Act of 1958 (the Act), as amended (15 U.S.C. 661 *et seq.*).

The proposed officers, directors, and shareholders of the Applicant are as follows:

Name	Title or Relationship	Percentage of shares owned
Chang WenMing, 185 Kensington Drive, Fort Lee, New Jersey 07024.	Board Chairman and Director.	39
Suez Chen, 229 Emily Drive, Park Ridge, New Jersey 07656.	Vice Chairman and Director.	0
Shiang-Chuan Huang, 33–69 168 Street, Flushing, New York 11358.	Director	11
James Y. A. Wang, 33 Richard Drive, Fort Lee, New Jersey 07024.	President and Director.	11
Chen-Yu Chang, Kensington Drive, Fort Lee, New Jersey 07024.	Director, Treasurer and Vice President.	10
Julius W. Sih, 608 Earlston Road, Kenilworth, Illinois 60043.	Director	6
Irene Wang, 33 Richard Drive, Short Hills, New Jersey 07078.	Secretary	22

The Applicant will conduct its operations in the State of New York. As a small business investment company under section 301(d) of the Act, the Applicant has been organized and chartered solely for the purpose of performing the functions and conducting the activities contemplated under the Act and will provide assistance solely to

small concerns which will contribute to a well balanced national economy by facilitating ownership in such concerns by persons whose participation in the free enterprise system is hampered because of social or economic disadvantages.

Matter involved in SBA's consideration of the application include the general business reputation and character of the proposed owners and management, and the probability of successful operations of the new company under their management including profitability and financial soundness in accordance with the Small Business Investment Act and the SBA Rules and Regulations.

Notice is further given that any person may, not later than 30 days from the date of publication of this Notice, submit written comments on the proposed SBIC to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 L Street NW., Washington, DC 20416.

A copy of the Notice will be published in a newspaper of general circulation in the New York City area.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Busienss Investment Companies)

Dated: November 23, 1988.

Robert G. Lineberry,

Deputy Associate Administrator for Investment.

Newall J. Daughtrey, 2331 NW. 140th Street, Opa Locka, Florida 33054.	President/CEO/ Manager Director.	0
William O. Cullom, 8445 SW. 151st Street, Miami, Florida 33158.	Secretary/Director...	0
Howard F. Kershaw, 8841 SW. 76th Street, Miami, Florida 33173.	Treasurer/Director...	0
Business Assistance Center, Inc., 6600 NW. 27th Avenue, Miami, Florida 33247.	Shareholder.....	[1] 100

[1] Contributors with a 10 percent or more economic interest in Business Assistance Center, Inc. are as follows: Ryder Systems, Inc., 3600 NW. 82nd Avenue, Miami, Florida 33122—10.18 percent; Knight-Ridder Newspaper, One Herald Plaza, Miami, Florida 33132—10.18 percent

The Applicant will begin operations with a capitalization $1,100,000 and will be a source equity capital and long term loan funds for qualified small business concerns.

The Applicant will conduct its operations in the State of Florida.

As a small business investment company under section 301(d) of the Act, the Applicant has been organized and chartered solely for the purpose of performing the functions and conducting the activities contemplated under the Act and will provide assistance solely to small concerns which will contribute to a well balanced national economy by facilitating ownership in such concerns by persons whose participation in the free enterprise system is hampered because of social or economic disadvantages.

Matter involved in SBA's consideration of the application include the general business reputation and character of the proposed owners and management, and the probability of successful operations of the new company under their management including profitability and financial soundness in accordance with the Small Business Investment Act and the SBA Rules and Regulations.

Notice is hereby given that any person may, not late than 30 days from the date of publication of this Notice, submit written comments on the proposed SBIC to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 "L" Street, NW., Washington, DC 20416.

A copy of the Notice will be published in a newspaper of general circulation in the Miami, Florida area.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies)

Dated: November 25, 1988.

Robert G. Lineberry,

Deputy Associate Administrator for Investment.

BILLING CODE 8025-01-M

[License No. 09/09-0377]

Wells Fargo Capital Corp.; Issuance of a Small Business Investment Company License

On July 21, 1988, a notice was published in the **Federal Register** (53 FR 27592), Vol. 53, No. 140, stating that an application has been filed by Wells Fargo Capital Corporation, with the Small Business Administration (SBA) pursuant to § 107.102 of the Regulations governing small business investment companies (13 CFR 107.102 (1988)) for a license as a small business investment company.

Interested parties were given until close of business August 21, 1988, to submit their comments to SBA. No comments were received.

Notice is hereby given that, pursuant to section 301(c) of the Small Business Investment Act of 1958, as amended, after having considered the application and all other pertinent information, SBA issued License No. 09/09-0377 on November 15, 1988, to Wells Fargo Capital Corporation to operate as a small business investment company.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies)

Dated: November 25, 1988

Robert G. Lineberry,

Deputy Associate Administrator for Investment.

BILLING CODE 8025-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Proposed Advisory Circular; Dynamic Evaluation of Transport Airplane Seats

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of availability of proposed Advisory Circular 25.562–1 and request for comments.

SUMMARY: This notice announces the availability of and requests comments on a proposed advisory circular which provides information and guidance for showing compliance with the standards recently promulgated for occupant protection during emergency landing conditions in transport category airplanes.

DATE: Comments must be received on or before December 21, 1988.

ADDRESS: Send all comments on the proposed AC to: Federal Aviation Administration, Transport Airplane Directorate, Aircraft Certification Service, Regulations Branch, ANM–114, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168. Comments may be inspected at the above address between 7:30 a.m. and 4:00 p.m. weekdays, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Patricia Siegrist, Regulations Branch, ANM–114, at the above address, telephone (206) 431–2126.

SUPPLEMENTARY INFORMATION: .

Comments Invited

A copy of the proposed AC may be obtained by contacting the person named above under **"FOR FURTHER INFORMATION CONTACT."** Interested persons are invited to comment on the proposed AC by submitting such written data, views, or arguments as they may desire. Commenters must identify AC 25.562–1, and submit comments in duplicate to the address specified above. All communications received on or before the closing date for comments will be considered by the FAA before issuing the final AC.

Discussion

On May 17, 1988, the FAA published Amendment 25–54 to part 25 of the Federal Aviation Regulations (53 FR 17640). This amendment upgrades the standards for occupant protection during emergency landing conditions in transport category airplanes, by revising the crew and passenger seat restraint requirements and by defining impact injury criteria. These standards require dynamic testing of the seats for strength, deformation, and protection of occupants from impact injury. Proposed Advisory Circular 25.562–1 provides guidance concerning acceptable means of compliance with these new standards, including test procedures for measuring loads and evaluating occupant injuries using an anthropomorphic test dummy. An earlier draft of AC 25.562–1 was published for public comment on July 17, 1986 (51 FR 25990); however, since that time, the AC has undergone a major revision. The FAA therefore invites public comment on this new draft.

Issued in Seattle, Washington, on September 16, 1988.

Leroy A. Keith,

Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 88–27634 Filed 11–30–88; 8:45 am]

BILLING CODE 4910–13–M

Research, Engineering and Development Conference

ACTION: Notice of conference.

SUMMARY: The Federal Aviation Administration will hold a Research, Engineering and Development (R,E&D) Conference for discussion of its R,E&D Plan on December 6 and 7, 1988.

DATE, TIME, AND PLACE: December 5, 1988, registration 12 Noon-8 :00 p.m., registration and conference December 6 and 7, 1988, 8:00 a.m.-5:00 p.m.; Sheraton Washington Hotel, 2660 Woodley Road at Connecticut Avenue NW., Washington, DC 20008.

AGENDA: The conference will employ panel discussions followed by open forums to obtain comments and recommendations from the aviation community on how the FAA should tailor its R,E&D program to fulfill its missions in aviation safety, capacity, efficiency, and security.

Draft copies of the R,E&D Plan will be made available to registered conference attendees on December 5 at the conference location to serve as a basis for discussions. The registration fee is $40.00.

FOR FURTHER INFORMATION CONTACT: Conference coordinators Lois Bossman/Ruth Potter at (617) 494–2307, DTS–930, Transportation Systems Center, Kendall Square, Cambridge, Massachusetts 02142.

T.A. Lorier,

Acting Division Manager, Research Development Management and Control.

DEPARTMENT OF THE TREASURY

Public Information Collection Requirements Submitted to OMB for Review

Date: November 23, 1988.

The Department of Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Pub. L. 96–511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, Room 2224, 15th and Pennsylvania Avenue NW., Washington, DC 20220.

Alcohol, Tobacco and Firearms

OMB Number: New.
Form Number: ATF F 5200.23.
Type of Review: New Collection.
Title: Pipe Tobacco Floor Stocks Tax Return.
Description: Dealers who owe pipe tobacco floor stocks tax are required to complete this form. The form is used to indicate the amount of floor stocks tax liability for each taxpayer. The form is needed for revennue protection purposes.
Respondents: Businesses or other for-profit.
Estimated Number of Respondents: 3,000.
Estimated Burden Hours Per Response: 1 hour.
Frequency of Response: One-time.
Estimated Total Reporting Burden: 3,000 hours.
Clearance Officer: Robert Masarsky, (202) 566–7077, Bureau of Alcohol, Tobacco and Firearms, Room 7011, 1200 Pennsylvania Avenue, NW., Washington, DC 20226.
OMB Reviewer: Milo Sunderhauf, (202) 395–6880, Office of Management and Budget, Room 3001, New Executive Office Building, Washington, DC 20503.

Dale A. Morgan,

Departmental Reports Management Officer.

and to the Treasury Department Clearance Officer, Department of the Treasury, Room 2224, 15th and Pennsylvania Avenue, NW., Washington, DC 20220.

Alcohol, Tobacco and Firearms

OMB Number: 1512–0025.
Form Number: ATF Form 2 (5320.2).
Type of Review: Extension.
Title: Notice of Firearms Manufactured or Imported.
Description: The National Firearms Act required licensed importers and manufacturers to notify ATF when firearms are imported or manufactured. This action registers the firearms in the National Firearms Registration and Transfer Record and makes their possession of the firearms lawful. Tax otherwise due under 26 U.S.C. 5821 does not apply.
Respondents: Businesses or other for-profit.
Estimated Number of Respondents: 160.
Estimated Burden Hours Per Response: 30 minutes.
Frequency of Response: On occasion.
Estimated Total Reporting Burden: 1,200 hours.

OMB Number: 1512–0188.
Form Number: ATF F 5100.1.
Type of Review: Extension.
Title: Signing Authority for Corporate Officials.
Description: ATF F 5100.1 is substituted instead of a regulatory requirement to submit corporate documents or minutes of a meeting of the Board of Directors to authorize an individual or position of power to sign for the corporation on matters dealing with ATF. The form identifies the corporation, the individual or corporation position getting power to sign, and documents authorizing the power.
Respondents: Businesses or other for-profit.
Estimated Number of Respondents: 1,000.
Estimated Burden Hours Per Response: 15 minutes.
Frequency of Response: On occasion.
Estimated Total Reporting Burden: 250 hours.

Clearance Officer: Robert Masarsky, (202) 566–7077, Bureau of Alcohol, Tobacco and Firearms, Room 7011, 1200 Pennsylvania Avenue, NW., Washington, DC 20226.
OMB Reviewer: Milo Sunderhauf, (202) 395–6880, Office of Management and Budget, Room 3001, New Executive Office Building, Washington, DC 20503.

Dale A. Morgan,
Departmental Reports Management Officer.

Sunshine Act Meetings

Federal Register
Vol. 53, No. 231
Thursday, December 1, 1988

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

U.S. COMMISSION ON CIVIL RIGHTS

November 29, 1988.

PLACE: Stouffer Nashville Hotel, 401 Church Street, Nashville, TN 37219.

DATE AND TIME: Friday, December 9, 1988, 3:30 p.m.–5:00 p.m.

STATUS OF MEETING: Open to the public.

MATTERS TO BE CONSIDERED:

I. Approval of Agenda
II. Approval of Minutes of November Meeting
III. Announcements
IV. Discussion and Action: *Patterson v. McLean Credit Union: Should Runyon v. McCrary be Reconsidered*
V. Interim Appointment: Mississippi
VI. SAC Reports:
Racial, Ethnic and Religious Vandalism and Bigotry in Affected Communities in Essex County, New Jersey
Stemming Bias-Related Acts in Massachusetts
The 1990 Census: Preparations and Issues (New York)
VII. Staff Director's Report
A. Status of Earmarks
B. Personnel Report
C. Activity Report
VIII. Discussion and Action Regarding Revised Draft, *Medical Discrimination Against Children with Disabilities*
IX. Future Agenda Items
A motion by the regional forums subcommittee to move the forum scheduled for February to April

PERSON TO CONTACT FOR FURTHER INFORMATION: John Eastman, Press and Communications Division, (202) 376–8312.

William H. Gillers,
Solicitor.

Corrections

Federal Register
Vol. 53, No. 231
Thursday, December 1, 1988

This section of the FEDERAL REGISTER contains editorial corrections of previously published Presidential, Rule, Proposed Rule, and Notice documents and volumes of the Code of Federal Regulations. These corrections are prepared by the Office of the Federal Register. Agency prepared corrections are issued as signed documents and appear in the appropriate document categories elsewhere in the issue.

DEPARTMENT OF DEFENSE

GENERAL SERVICES ADMINISTRATION

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

48 CFR Part 28

Federal Acquisition Regulation (FAR); Individual Sureties

Correction

In proposed rule document 88-25274 beginning on page 44564 in the issue of Thursday, November 3, 1988, make the following correction:

28.203 [Corrected]

On page 44565, in the second column, in 28.203(c), in the 10th line, "note" should read "not be".

BILLING CODE 1505-01-D

ENVIRONMENTAL PROTECTION AGENCY

[OPP-180792; FRL-3473-2]

Receipt of an Application for a Specific Exemption to Use Avermectin B_1; Solicitation of Public Comment

Correction

In notice document 88-25932 beginning on page 45382 in the issue of Wednesday, November 9, 1988, make the following correction:

On page 45382, in the third column, under **SUPPLEMENTARY INFORMATION**, in the second paragraph, in the fifth line, "MSD ABVET" should read "MSD AGVET".

BILLING CODE 1505-01-D

ENVIRONMENTAL PROTECTION AGENCY

[OPTS-44518; FRL-3474-4]

TSCA Chemical Testing; Receipt of Test Data

Correction

In notice document 88-25934 appearing on page 45385 in the issue of Wednesday, November 9, 1988, make the following corrections:

1. In the second column, in the third paragraph under **I. Test Data Submissions**, in the fifth line, "790.1700" should read "799.1700".

2. In the third column, under **II. Public Record**, in the fourth line, "44158" should read "44518".

BILLING CODE 1505-01-D

[ATSDR-6]

Hazardous Substances Priority List, Toxicological Profiles; Second List

Correction

In notice document 88-24295 beginning on page 41280 in the issue of Thursday, October 20, 1988, make the following corrections:

1. On page 41281, in the first column, in the last paragraph, in the fifth line from the bottom, "of" should read "on".

2. On page 41282, in the 2nd column, under "NPL Technical Data Base (NPLt)", in the 14th line, "case" should read "base".

3. On page 41283, in the 3rd column, in the 1st complete paragraph, in the 12th line from the bottom, insert "site" after "their".

4. On page 41284, in the second column, the second table should have been designated as **Priority Group 4**.

5. On page 41285, in the second column, in **Priority Group 4**, the fifth Substance name should read "Hexachloroethane".

BILLING CODE 1505-01-D

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Parts 780, 784, 816 and 817

Surface Coal Mining and Reclamation Operations; Permanent Regulatory Program; Performance Standards; Permanent and Temporary Impoundments

Correction

In rule document 88-24536 beginning on page 43584 in the issue of Thursday, October 27, 1988, make the following corrections:

1. On page 43586, in the 2nd column, under **II Discussion of Final Rule and Comments**, in the 1st paragraph, in the 12th line, "hs" should read "has".

2. On page 43589, in the third column, in the first complete paragraph, in the third line, "is" should read "in".

3. On page 43593, in the third column, in the second complete paragraph, in the last line, after "process", insert "in".

4. On page 43598, in the 2nd column, in the 4th complete paragraph, in the 13th line, "storage" was misspelled.

5. On page 43600, in the 3rd column, in the 2nd complete paragraph, in the 12th line, "rule" should read "rules".

6. On page 43602, in the first column, in the first complete paragraph, in the seventh line, "believes" was misspelled.

7. On the same page, in the 2nd column, each time the acronym "OSRME" appears, it should read "OSMRE".

8. On page 43603, in the second column, in the third complete paragraph, in the fourth line, "MSHJA" should read "MSHA".

§ 784.16 [Corrected]

9. On page 43605, in the second column, in § 784.16(c)(3), in the second line, "of" should read "or".

BILLING CODE 1505-01-D

VETERANS ADMINISTRATION

48 CFR Part 852

Acquisition Regulations Relating to Cost Comparisons

Correction

In rule document 88-26695 appearing on page 46872 in the issue of Monday, November 21, 1988, make the following correction:

In the first column, in amendatory instruction 3, in the second line, "852-72" should read "852.207-72".

Neurological Devices; Effective Date of Requirement for Premarket Approval; Implanted Intracerebral/Subcortical Stimulator for Pain Relief; Final Rule

BEST COPY AVAILABLE

VOL 53 ISS 231 DE 1 1988 UMI

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 882

[Docket No. 85M-0056]

Neurological Devices; Effective Date of Requirement for Premarket Approval; Implanted Intracerebral/Subcortical Stimulator for Pain Relief

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule to require the filing of an application for premarket approval (PMA) or a notice of completion of a product development protocol (PDP) for the implanted intracerebral/subcortical stimulator for pain relief, a generic type of medical device. After the effective date, commercial distribution of this device must cease, unless a manufacturer or importer has filed with FDA a PMA or a notice of completion of a PDP for its version of the implanted intracerebral/subcortical stimulator for pain relief. The requirement of premarket approval does not compel explantation (surgical removal) of previously implanted devices, whether or not the manufacturer or importer files a PMA or PDP. A decision on whether to recommend explantation of an already-implanted intracerebral/subcortical stimulator for pain relief should be made on an individual basis, depending on whether that course of action is necessary to protect an individual patient's health. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: March 1, 1989.

FOR FURTHER INFORMATION CONTACT: Robert F. Munzner, Center for Devices and Radiological Health (HFZ-430), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7226.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of September 4, 1979 ((44 FR 51772), FDA published a final rule (21 CFR 882.5840) classifying into class III (premarket approval) the implanted intracerebral/subcortical stimulator for pain relief, a medical device. Section 882.5840 applies to (1) any implanted intracerebral/subcortical stimulator for pain relief that was in commercial distribution before May 28, 1976, the date of enactment of the Medical Devices Amendments of 1976 (the amendments) (Pub. L. 94-295), and (2) any device that FDA has found to be substantially equivalent to the implanted intracerebral/subcortical stimulator for pain relief and that has been marketed on or after May 28, 1976. For the sake of convenience, both the devices that were on the market before May 28, 1976, and the substantially equivalent devices that were marketed on or after that date are referred to as "preamendments devices."

In the **Federal Register** of July 25, 1985 (50 FR 30277), FDA published a proposed rule to require the filing under section 515(b) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 360e(b)] of a PMA or a notice of completion of a PDP for the implanted intracerebral/subcortical stimulator for pain relief. In accordance with section 515(b)(2)(A) of the act, FDA included in the preamble to the proposal the agency's proposed findings with respect to the degree of risk of illness or injury designed to be eliminated or reduced by requiring the device to meet the premarket approval requirements of the act, and the benefits to the public from use of the device (50 FR 30278). The preamble to the proposal also provided an opportunity for interested persons to submit comments on the proposed rule and the agency's proposed findings. Under section 515(b)(2)(B) of the act, FDA also provided an opportunity for interested persons to request a change in the classification of the device based on new information relevant to its classification. Any petition requesting a change in the classification of the implanted intracerebral/subcortical stimulator for pain relief was required to be submitted by August 9, 1985. The comment period closed on September 23, 1985.

Although FDA did not receive any petitions requesting a change in the classification of the device, several persons submitted comments relating their clinical experiences with the device. Summaries of these comments and the agency's responses follow:

1. Many comments were concerned that FDA may intend to remove the device from commercial distribution by requiring premarket approval. Some persons who submitted comments provided data on the device's safety and effectiveness to persuade FDA to allow its continued distribution.

The agency has not yet made a decision regarding the safety and effectiveness of the generic type of device, the implanted intracerebral/subcortical stimulator for pain relief. (See 21 CFR 860.3(i) for a definition of the term "generic type of device.") The purpose of requiring premarket approval of the device is to obtain the data necessary for FDA to evaluate its safety and effectiveness. FDA believes that safety and effectiveness data are (or should be) readily available to the manufacturers of the device, because the manufacturers have known since the device was classified into class III in 1979 that the device would eventually be subject to the premarket approval requirements in section 515 of the act (21 U.S.C. 360e) and 21 CFR Part 814. Thus, FDA believes that it has given ample notice. FDA believes that much of the data submitted in the comments on the proposal would be useful to manufacturers during their preparation of PMA's for the device.

2. One comment argued that sufficient data currently exist to determine the safety and effectiveness of the device and that further data collection is unnecessary and unduly burdensome.

Because of the kinds of data submitted by the comments on the proposal, FDA agrees that manufacturers of the implanted intracerebral/subcortical stimulator for pain relief may have sufficient data available now and generation of much additional data may not be necessary. Under the amendments enacted by Congress (section 515 of the act) and FDA's implementing regulations, the agency proposed to require that manufacturers submit data on the safety and effectiveness of the device in the form of a PMA as described in 21 CFR Part 814, or submit to FDA a petition requesting reclassification of the device under section 513(e) of the act (21 U.S.C. 360c(e)) and Subpart C of 21 CFR Part 860. Because no petitions requesting reclassification of the device have been received, FDA now is requiring each manufacturer to submit a PMA or cease commercial distribution of the device.

3. Many comments said that the risks to health identified in the proposed regulation (damage to neural tissue, surgical complications, tolerance to stimulation, skin erosion, cerebrospinal fluid leakage, and tissue toxicity) appear exaggerated, as discussed below:

a. The comments said that in the proposed rule FDA had described neural damage and undesirable neurological effects as a result of implantation and use of this device. Several comments stated that little, if any, evidence has been observed of neural damage, either clinically or in histological data. The comments stated that few post-mortem studies have been performed, but in those done, only minimal morphological changes were seen, and those changes observed were considered to be of no greater extent than damage caused by other routine neurological procedures. In addition, comments argued that

neurological deficits and side effects are rare, and the comments concluded that these risks to health generally resulted from improper placement of electrodes or overstimulation. The comments stated that new designs for electrodes and the development of more precise placement sites, techniques, and stimulation parameters have alleviated most risks of neural damage.

FDA agrees that neural damage and neurological deficits may be infrequent occurrences. In the proposed rule, FDA presented sufficient data to establish that some neural risks to health are associated with the use of this device. The discussion of risks to health presented in the proposed regulation omits any conclusion with regard to these risks. FDA intended to identify the risks that might be eliminated or reduced by requiring premarket approval. FDA also recognizes that improvements may have been made in some of the electrodes used. However, FDA believes that it must perform a detailed analysis of the data on the risks to health from use of the device to provide reasonable assurance of its safety and effectiveness.

b. Several comments believe that FDA's proposed rule exaggerated the risks to health of intraventricular hemorrhage and infection which can result from the implantation procedure. According to studies cited by the comments, infection occurs in a very small percentage of patients; and in these few cases, infection is easily treated with antibiotics or by explanation of the device. The comments stated that the risk of infection is the same or less than from use of similar stereotaxic techniques. The comments also regard the incidence of hemorrhage caused by implantation to be rare, and suggest that the risk is also no more than that involved in similar stereotaxic procedures.

FDA agrees that the incidence of hemorrhage and infection may be infrequent. The proposed rule cites the occurrence of these complications as potentially serious adverse effects associated with the use of this device. The agency believes that regulation of the intracerebral/subcortical stimulator for pain relief through premarket approval is appropriate to assure that these risks are minimized.

c. Some comments asserted that electrode migration is a former problem attributable to poor electrode design and to difficulty in securing the wires to the skull. The comments also asserted that improved electrode design and use of a new burr hole cover and locking component have alleviated the electrode migration problem.

FDA recognizes that new electrode designs and new surgical methods may have reduced the incidence of electrode migration. However, FDA believes that these innovations must be evaluated carefully to determine their impact on the safety and effectiveness of each manufacturer's device.

d. The development of tolerance to electrical stimulation was discussed by several comments. The comments agreed with data cited in the proposed rule which indicated that patients' development of tolerance to electrical stimulation may be the reason that the device becomes ineffective in about 30 percent of patients in whom it is implanted. However, most of the comments disagreed with the data cited in the proposed rule which indicated that a patient who develops tolerance to electrical stimulation frequently also develops tolerance to pain-relieving drugs. The comments also said that, in many cases, the electrical tolerance can be treated through administration of certain drugs.

FDA recognizes that tolerance to stimulation has been reported in 30 percent of the patients treated with the implanted intracerebral/subcortical stimulator for pain relief. These data, along with other data on effectiveness, will be considered by FDA during its review of any PMA's submitted for the device.

e. Several comments discussed the risk to health of cerebrospinal fluid leakage. The comments noted that the studies cited in the proposed rule that pertained to CSF leakage were studies of cerebellar stimulation using the implanted cerebellar stimulator (21 CFR 882.5820). The comments noted that the implant procedure for the cerebellar stimulator involves an open craniotomy as opposed to the burr hole implant procedure used for the intracerebral/subcortical stimulator for pain relief. Therefore, the comments said, the data from these cited studies do not provide an accurate assessment of the risk of cerebrospinal fluid leakage associated with the latter device.

FDA recognizes that the level of risk to health of cerebrospinal fluid leakage associated with use of the intracerebral/subcortical stimulator for pain relief may be lower than the level of risk of cerebrospinal fluid leakage associated with use of the implanted cerebellar stimulator. However, FDA believes that these two devices are sufficiently similar to suggest that a potential risk of cerebrospinal fluid leakage may result from use of the implanted intracerebral/subcortical stimulator for pain relief and that premarket approval is necessary to minimize this risk to health.

FDA advises that the agency has already promulgated a rule requiring any manufacturer of the implanted cerebellar stimulator to submit a PMA for the device or cease commercial distribution (49 FR 26574; June 28, 1984).

f. Several comments said that skin erosion occurs infrequently and that skin erosion was caused by bulky electrode connectors. The comments said that the design of these connectors have been modified to reduce their bulk.

FDA recognizes that manufacturers have made improvements in the design of the electrode connectors which may reduce the risk of skin erosion. However, FDA believes that it should review these data in the form of a PMA to provide reasonable assurance of the safety and effectiveness of this device.

4. Many comments said that in the proposed regulation FDA understated the benefits that can be derived from use of the implanted intracerebral/subcortical stimulator for pain relief. The comments said that use of this device has improved the quality of life for many patients who otherwise are often addicted to drugs, or become suicidal. The comments stated that use of this device for pain relief is a reversible therapy, as opposed to other surgical and ablative techniques. Many comments said that site selection for implantation of the electrodes to treat specific types of pain has become more accurately defined, making patient selection easier and, thus, making use of the device more effective.

FDA recognizes that there are reports of patients who have achieved relief of pain through the use of this device, and also that improvements are being made with respect to the site of electrode implantation and patient selection. However, FDA believes that the degree of benefit offered by this device must be carefully and accurately defined by analysis of all relevant data. Data in the proposed rule indentified some of the benefits found in the scientific literature and also identified some areas where FDA believes that more data need to be studied to assure the safety and effectiveness of these devices.

FDA has reexamined its proposed findings with respect to the degree of risk of illness of injury designed to be eliminated or reduced by requiring the implanted intracerebral/subcortical stimulator for pain relief to meet the statute's approval requirements. The agency concludes that its proposed findings and its conclusion discussed in the preamble to the proposed rule are appropriate. Accordingly, FDA is promulgating a final rule requiring premarket approval of the implanted

intracerebral/subcortical stimulator for pain relief under section 515(b)(3) of the act and is summarizing its findings with respect to the degree of risk of illness or injury designed to be eliminated or reduced by requiring that the implanted intracerebral/subcortical stimulator for pain relief have an approved PMA or declared completed PDP, and with respect to the benefits to the public from the use of the device.

I. Findings With Respect to Risks and Benefits

A. Degree of Risk

1. *Damage to neural tissue.* The electrical current used for stimulation and the presence of the electrode may cause injury to brain tissue. Charge densities used to treat patients cannot be determined from published reports of clinical studies. Animal studies indicate that by using low charge densities, electrical injury to brain tissue can be minimized. One study concluded that the upper limit for safe stimulation is 0.05 watt per square inch when biphasic electrical pulses are used. Another study concluded that some neural damage is consistently produced if the charge per phase of the stimulus pulse is 0.45 microculomb or greater. Still another study revealed that neural damage in the cerebral cortex of cats increased proportionally as the charge density per phase increased over the range of 40 to 400 microcoulombs per square centimeter per phase. Several undesirable neurological effects, including coagulated brain tissue, blurring of vision, lesions in the target points, vertigo, focal and motor seizures, and emotional changes have been reported in patients treated with deep brain stimulation.

2. *Surgical complications.* Complications may occur because of the surgical implantation procedures. Because the surgical procedures involve the brain, complications such as punctured blood vessels, intraventricular hemorrhage, and infections are usually serious. One reported death has occurred due to infection.

3. *Electrode migration.* Implanted electrodes can spontaneously move from their original position or they can be dislodged. Electrode movement may cause damage to brain tissue or produce stimulation in an area of the brain which may result is undesirable neurological effects. Electrode migration has been reported in 2 to 17 percent of patients.

4. *Tolerance.* Tolerance to stimulation may develop and has been reported to occur in 30 percent of patients in whom the device is implanted. Patients who have become tolerant to deep brain stimulation may also demonstrate tolerance to some pharmacological opiates. If such tolerance occurs, the patient would not be able to obtain relief of pain with electrical stimulation or with narcotic analgesics.

5. *Skin erosion.* Erosion of the skin can occur in the scalp over the area where the electrodes exit from the cranium or can occur over the site of the receiver. Erosion of the device through the scalp may be the most troublesome source of infection and may necessitate the explanation of the device.

6. *Cerebrospinal fluid leakage.* Cerebrospinal fluid leakage is a risk common to devices implanted in the central nervous system. When this occurs, reoperation is required to correct the condition.

7. *Tissue toxicity.* Although the surface materials used in the implanted receiver, lead wires, or electrodes are generally believed to be biocompatible, it is possible that contaminants may be introduced into the materials used in the device during its manufacture, causing adverse tissue reactions.

Considering the risks and probable benefits associated with the implanted intracerebral/subcortical stimulator for pain relief, FDA concludes that the device should undergo premarket approval to establish conditions for use that will minimize risks and determine whether the risks of using the device are balanced by benefits to patients.

B. Benefits of the Device

The benefits of the implanted intracerebral/subcortical stimulator for pain relief to patients are questionable. Published reports indicate that the device may provide pain relief for selected patients, but may not be suitable for treating certain patients or all types of pain.

The implanted intracerebral/subcortical stimulator for pain relief has been reported to provide relief from peripheral chronic pain syndrome resulting from carcinomas, failed low backs, nerve entrapments, and phantom limb syndromes. Some investigators have reported successful treatment of pain of central origin, e.g., thalmic syndromes, brain stem infarction, and spinal cord injury. Other investigators have concluded that the device is probably not beneficial in treating central pain. Electrical stimulation of both the periaqueductal gray and periventricular gray matter appears to produce opiate-mediated analgesia; stimulation in these areas may produce unpleasant or intolerable side effects. Other researchers have reported pain relief with stimulation within the internal capsule, although there is not any indication that endogenous opiates are produced when this area is stimulated. Additional data are required to explain the variable clinical results obtained to date with the device.

II. Final Rule

Under section 515(b)(3) of the act, FDA is adopting the proposed findings as published in the preamble to the proposed rule and is issuing this final rule to require premarket approval of the generic type of device, the implanted intracerebral/subcortical stimulator for pain relief, by revising paragraph (c) in § 882.5840.

Under the final rule, a PMA or a notice of completion of a PDP is required to be filed on or before March 1, 1989, for any implanted intracerebral/subcortical stimulator for pain relief that was in commercial distribution before May 28, 1976, or that has been found by FDA to be substantially equivalent to such a device on or before March 1, 1989. An approved PMA or a declared completed PDP is required to be in effect for any such device on or before August 28, 1989. (If FDA finds that continued availability of an implanted intracerebral/subcortical stimulator for pain relief for which a PMA has been timely filed is necessary for the public health, FDA may, under section 515(d)(1)(B)(i) of the act, extend the 180-day period for taking action on the PMA.) Any implanted intracerebral/subcortical stimulator for pain relief that was not in commercial distribution before May 28, 1976, or that has not on or before March 1, 1989, been found by FDA to be substantially equivalent to an implanted intracerebral/subcortical stimulator for pain relief that was in commercial distribution before May 28, 1976, is required to have an approved PMA or a declared completed PDP in effect before it may be marketed.

If a PMA or a notice of completion of PDP for an implanted intracerebral/subcortical stimulator for pain relief is not filed on or before March 1, 1989, that device will be deemed adulterated under section 501(f)(1)(A) of the act (21 U.S.C. 351(f)(1)(A)), and commercial distribution of the device will be required to cease. The device may, however, be distributed for investigational use, if the requirements of the investigational device exemption (IDE) regulations (21 CFR Part 812) are met.

Under § 812.2(d) of the IDE regulations, FDA hereby stipulates that the exemptions from the IDE requirements in § 812.2(c) (1) and (2) will no longer apply to clinical investigations

of the implanted intracerebral/subcortical stimulators for pain relief. Further, FDA concludes that investigational implanted intracerebral/subcortical stimulators for pain relief are significant risk devices as defined in § 812.3(m), and advises that as of the effective date of § 882.5840(c) the requirements of the IDE regulations regarding significant risk devices will apply to any clinical investigation of an implanted intracerebral/subcortical stimulator for pain relief. For any such device, therefore, an IDE submitted to FDA, under § 812.20, is required to be in effect under § 812.30 before an investigation is initiated or continued on or after March 1, 1989. FDA advises all persons who intend to sponsor any clinical investigation involving the implanted intracerebral/subcortical stimulator for pain relief to submit an IDE application to FDA no later than January 30, 1989, to avoid the interruption of ongoing investigations.

As discussed at length in paragraph 1 of the preamble to the final PMA rule (51 FR 26342, 26343; July 22, 1986), FDA will not request recall, or recommend seizure, of an implanted device under circumstances that would necessitate explantation of the device to effect recall or seizure unless such action is necessary to protect the health of the patient. If an implanted device is adulterated under section 501(f)(1)(A) of the act because of the manufacturer's failure to submit a PMA and explantation of the device is not necessary to protect the health of the patient, FDA will require only that commercial distribution of the device cease. FDA also may invoke its authorities under section 518 of the act (21 U.S.C. 360h) to require notification, repair, replacement, or refund when a device in commercial distribution presents an unreasonable risk of substantial harm to the public health.

III. Environmental Impact

The agency has determined under 21 CFR 25.24(a)(8) and (e)(4) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

IV. Economic Impact

FDA has examined the economic consequences of this final rule in accordance with the criteria in section 1(b) of Executive Order 12291 and found that the rule will not be a major rule as specified in the Order. The agency believes that only three small firms will be affected by this rule. Therefore, the agency certifies under the Regulatory Flexibility Act (Pub. L. 96–354) that the rule will not have a significant economic impact on a substantial number of small entities. An assessment of the economic impact of this final rule has been placed on file in the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857, and may be seen by interested persons between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects in 21 CFR Part 882

Medical devices.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, Part 882 is amended as follows:

PART 882—NEUROLOGICAL DEVICES

1. The authority citation for 21 CFR Part 882 continues to read as follows:

Authority: Sec. 501(f), 510, 513, 515, 520, 701(a), 52 Stat. 1055, 76 Stat. 794–795 as amended, 90 Stat. 540–546, 552–559, 565–574, 576–577 (21 U.S.C. 351(f), 360, 360c, 360e, 360j, 371(a)); 21 CFR 5.10.

2. Section 882.5840 is amended by revising paragraph (c) to read as follows:

§ 882.5840 Implanted intracerebral/subcortical stimulator for pain relief.

* * * * *

(c) *Date premarket approval application (PMA) or notice of completion of a product development protocol (PDP) is required.* A PMA or a notice of completion of a PDP is required to be filed with the Food and Drug Administration on or before March 1, 1989, for any implanted intracerebral/subcortical stimulator for pain relief that was in commercial distribution before May 28, 1976, or that has on or before March 1, 1989, been found to be substantially equivalent to an implanted intracerebral/subcortical stimulator for pain relief that was in commercial distribution before May 28, 1976. Any other implanted intracerebral/subcortical stimulator for pain relief shall have an approved PMA or a declared completed PDP in effect before being placed in commercial distribution.

Dated: October 11, 1988.

John M. Taylor,

Associate Commissioner for Regulatory Affairs.

Part III

Department of the Treasury

Comptroller of the Currency

12 CFR Part 8

Assessment of Fees; National Banks and District of Columbia Banks; Final Rule

DEPARTMENT OF THE TREASURY

Comptroller of the Currency

12 CFR Part 8

[Docket No. 88-17]

Assessment of Fees; National Banks and District of Columbia Banks

AGENCY: Comptroller of the Currency, Treasury.

ACTION: Final rule.

SUMMARY: The Office of the Comptroller of the Currency ("OCC") is revising the semiannual assessment schedule for national banks, District of Columbia banks, and federally licensed branches and agencies of foreign banks. The revised schedule replaces the current schedule for assessments due by January 31, 1989, and beyond. Assessments are increased by 14 percent. This revision is necessary due to a predicted revenue shortfall which results from decreased revenue growth and increased supervisory responsibilities brought on by the increasing complexity of the financial services industry and the deteriorated condition of many national banks. This action will permit the OCC to continue to fulfill its statutory responsibilities. For long-term planning purposes, the OCC has established a task force to study the agency's revenue policy and structure.

EFFECTIVE DATE: January 3, 1989.

FOR FURTHER INFORMATION CONTACT: Roy C. Madsen, Associate Director, Financial Management Division, (202) 447-0956 or Ferne Fisherman Rubin, Attorney, Legal Advisory Services Division, (202) 447-1880, Office of the Comptroller of the Currency, 490 L'Enfant Plaza East SW., Washington, DC 20219.

SUPPLEMENTARY INFORMATION:

Background

The OCC was created by Federal legislation for the purpose of regulating and supervising the national banking system. Under the National Bank Act, 12 U.S.C. 1 *et seq.*, the OCC has a responsibility to supervise national banks and to ensure that they comply with applicable law. Pursuant to 12 U.S.C. 482, the OCC recovers its expenses by assessing national banks "in proportion to their assets or resources." The statute also requires that the rate of assessment be the same for all banks of the same asset size. The current assessment schedule, found at 12 CFR Part 8, fulfills this statutory requirement.

Proposal

On August 19, 1988, the OCC published a notice of proposed rulemaking (Docket No. 88-13) in the **Federal Register** (53 FR 31705), concerning the assessment schedule. In that notice, the OCC proposed to increase the assessments due by January 31, 1989 and beyond by 14 percent. The OCC estimates this will increase its assessment revenue in 1989 by approximately $28 million. In future years, the amount of increased revenue will vary, based on the growth in banking assets, ths size distribution of banks, and the rate of inflation. A copy of the proposal was sent as Banking Bulletin 88-25 dated August 24, 1988, to the chief executive officer of each national bank. The purpose of the Banking Bulletin was to ensure that each national bank received direct and timely notice of the proposed assessment increase and to explain the reasons in detail.

On September 6, 1988 (53 FR 34307), the OCC published a technical correction to the notice of proposed rulemaking in the **Federal Register**. The correction restored a line to a table showing the proposed assessment schedule. The line was inadvertently deleted due to a printing error. None of the proposed rates were changed by the technical correction.

On September 20, 1988 (53 FR 36556), the OCC extended the comment period to October 3, 1988 to address a request by an association representing approximately 2,000 national banks. The purpose of the extended comment period was to allow additional time for all interested parties to assess the proposal further and to file comments. With this action, we are finalizing the proposal to increase the assessment rates by 14 percent.

Reason for the Action

As a result of stringent cost reduction efforts, the OCC expects expenses to match its revenues in 1988. However, unless the present assessment schedule is revised, a deficit will occur in 1989, and deficits will increase in future years. The increasing resource demands of the OCC's bank supervisory responsibilities have outpaced the OCC's ability to fund those demands. The 14 percent assessment increase is the amount necessary to fund the projected deficit and provide funds for the resource demands of the supervisory environment. This final rule only addresses anticipated shortfalls brought on by increased OCC supervisory responsibilities, changes in the industry and increased costs since 1984, the year of the last assessment increase.

Supervisory Environment Demands Additional Resources

The OCC serves the national interest by maintaining and promoting a system of bank supervision and regulation that promotes safety and soundness by requiring that national banks adhere to sound management principles and comply with the law. The financial services environment demands adequate resources for the OCC to maintain prudent levels of supervision. Examiner-related expenses account for approximately 80 percent of the OCC's increased costs since 1983. The OCC has hired additional examiners, provided needed training for experienced examiners, and enhanced its technological capabilities. This enhanced examiner force is needed to address the OCC's responsibilities, as particularly affected by the following external factors:

(a) The condition of many national banks has deteriorated. In 1987, bank profitability stabilized after falling in each of the preceding six years. Bank failures and the number of problem banks continue at high levels. Currently, 17 percent of the national banking system's assets and 22 percent of national banks are receiving special supervisory attention. Weaknesses in the energy and certain real estate sectors of the economy, as well as continued difficulties with foreign debt exposure, indicate continued difficulties for national banks.

(b) Since 1984, new OCC supervisory responsibilities have been mandated by the Competitive Equality Banking Act of 1987 (Pub. L. 100-86, 101 Stat. 552), the Government Securities Act of 1986 (Pub. L. 99-571, 100 Stat. 3208), the Money Laundering Control Act of 1986 (Subtitle H of the Anti-Drug Abuse Act of 1986, Pub. L. 99-570, 100 Stat. 3207), and the Bank Bribery Amendments Act of 1985 (Pub. L. 99-370, 100 Stat. 779).

(c) The deregulation of depository institutions and the entry of banks into new financial activities have created a more complex banking environment requiring new skills on the part of the OCC's staff and increased OCC technological capabilities.

Decreased Asset Growth

The OCC's assessment income is a function of three factors: (1) The level of nominal national bank assets, (2) the distribution of these assets over different size categories of national banks, and (3) the measured rate of inflation that is used to index the

assessment schedule. Primary among these factors is the rate of growth of bank assets. If there is no growth in assets, then assessment income will not increase beyond the small amount attributable to the indexation for inflation.

As a result of economic trends and conditions in the financial services industry, the current and projected growth rates in national bank assets have fallen dramatically. In the early 1980s, national bank assets grew at an annual rate of 7.0 percent or higher. In 1986, the growth rate fell to 6.6 percent and to less than 2.0 percent in 1987, the lowest rate since 1948. The OCC's assessment income in 1988 grew by only 1.8 percent.

Legal Criteria

Under 12 U.S.C. 482, assessments must be in proportion to the assets or resources of the bank. The annual rate must be the same for all banks of the same size; however, banks examined more than twice in a single calendar year must pay for any additional examinations.

The basic characteristics (*i.e.*, use of asset brackets with declining marginal rates) of the OCC assessment schedule were instituted in 1976, continued in 1984, and are used again today. This final rule does not alter those characteristics, which were approved by the United States Court of Appeals for the Eighth Circuit in *First National Bank of Milaca v. Heimann*, 572 F.2d 1244 (8th Cir. 1978) ("*Milaca*"). The court held that the OCC's 1976 revision complied with the requirements of 12 U.S.C. 482.

Various legal criteria imposed by 12 U.S.C. 482 and the *Milaca* decision limit the OCC's options with regard to the range of available assessment procedures. For example, 12 U.S.C. 482 provides for the assessment of an additional fee only if a bank is examined more than twice in a calendar year. The statute therefore prohibits the assessment of an additional fee for the second examination in a year, as one commenter suggested.

Another example of the statutory constraints imposed upon the OCC is that the current statute does not appear to allow the OCC to exempt rural banks, banks that suffer from increased competition, or banks in any other specialized category from the assessment increase, unless the exemption is related to assets or resources. No information that would permit the OCC to exempt banks in special categories has been received or identified. However, this and other suggestions from commenters will be referred to the OCC Comprehensive Revenue Study Task Force for further consideration. That Task Force is described later in this preamble.

Some commenters suggested that assessments be based upon the actual number of hours or resources expended in supervising an institution The current statute does not appear to allow the OCC to implement that suggestion unless it can be directly related to bank assets or resources. Nevertheless, this suggestion, as with other suggestions, will be referred to the OCC Comprehensive Revenue Study Task Force for further consideration.

Comments Received

The OCC received 225 comments in response to the proposal. The commenters were national banks, their directors, officers, and employees, trade organizations and a United States Senator. Most commenters opposed the proposed assessment increase. The commenters' concerns fell into four categories of issues, and, in some instances, the commenters suggested alternative methods to resolve those issues. Commenters asserted: That healthy banks should not subsidize problem banks; that their banks were not examined during the year but their assessments had increased; that the assessment schedule is discriminatory or burdensome to small banks; and that the OCC should reduce its expenses.

Issues Raised

Healthy Banks Should Not Subsidize Problem Banks

Approximately 10 percent of the commenters suggested that the current assessment methodology requires well-run banks to pay some of the costs of special supervisory attention given to problem banks. The commenters strongly urged that troubled banks be assessed higher fees, due to the greater level of OCC resources devoted to supervising these banks.

Well-run banks subsidize problem banks. However, it is not clear that 12 U.S.C. 482 allows the OCC to charge higher assessments to those banks that receive disproportionate attention from the OCC, unless a relationship between those banks and bank assets or resources can be shown. The OCC has received no strong evidence thus far that would clearly establish this relationship. However, this suggestion, as with other commenter suggestions, will be referred to the OCC Comprehensive Revenue Study Task Force for further consideration.

Banks Not Examined But Assessments Increased

Several commenters expressed concern that their banks receive fewer on-site examinations than in the past, but their assessments have increased.

The OCC is aware of this perceived inequity. The OCC's mission is to promote safety and soundness by requiring that national banks adhere to sound management principles and comply with the law. Fulfillment of this mission requires the proper allocation of the OCC's limited supervisory resources. One OCC initiative in this regard has been the increased use of off-site monitoring and concentration of resources on those institutions that present the greatest risk to the system.

The OCC believes it has developed a better approach to bank supervision than the previous practice of examining all banks on a fixed schedule. Under the OCC's present procedures, the frequency and depth of on-site bank supervision is a direct function of the risk that any given institution presents to the safety and soundness of the entire system. Examiners now perform increased off-site monitoring, and both routine and special on-site supervision are scheduled to utilize the OCC's resources more efficiently.

As a result, well-run community banks receive less on-site supervision. However, in a departure from past practice, all banks receive continuous off-site monitoring through an off-site "portfolio approach" to bank supervision. Under this supervisory method, each bank is assigned to at least one national bank examiner who monitors the bank and its environment on a continuous off-site basis. Therefore, the amount of on-site supervision by itself is not an accurate indicator of the amount of supervision the bank receives.

Assessment Schedule Is Discriminatory to Small Banks

Most commenters felt that small banks pay a disproportionate share of OCC assessments relative to their actual cost of supervision.

The OCC employs a system of cost accounting that attributes direct supervision costs to banks based on the hours spent on each bank by OCC staff. Indirect costs are allocated to the banks in the same proportions as the direct costs. The OCC, by using that system, has analyzed the relative cost coverage of national banks by asset size. The analysis indicates that banks in the four asset brackets under $185 million, on average, pay 51 percent of their cost of

supervision. Banks in the six asset brackets over $185 million, on average, pay 164 percent of their cost of supervision.

While there is variation within each category, the averages clearly indicate that small banks, as a group, are not discriminated against; rather, the cost of their supervision is subsidized by larger banks. This subsidy was recognized by the Eighth Circuit in *Milaca.* 572 F.2d at 1248.

The final rule maintains the current distribution of assessment burden, which is favorable to small banks, since the 14 percent increase in marginal rates results in the same proportional increase for all banks.

Some commenters suggested that a progressive fee or flat fee schedule be adopted in lieu of the regressive schedule now in use and approved by the *Milaca* court. Other commenters suggested that assessment fees should more accurately reflect the actual cost of supervising large and merged banks. Both of these suggestions seem to be based upon the commenters' belief that small banks subsidize larger institutions. Relative cost coverage data does not support that belief.

A flat fee schedule and a progressive schedule would increase the large banks' current subsidy of small banks. Alternatively, if the assessment schedule more accurately reflected the supervision costs attributable to large and merged banks, the subsidy would be reduced and the assessments levied upon small banks would rise dramatically.

Finally, some commenters suggested including off-balance-sheet activities in the assessment calculation. The OCC does incur expenses attendant to the supervision of off-balance-sheet activities. However, these activities are usually conducted by large banks, which already subsidize small banks. Effective assessment of off-balance-sheet activities requires further study. This suggestion, as well as various other suggestions, will be referred to the OCC Comprehensive Revenue Study Task Force for further consideration.

OCC Should Reduce Expenses

Most commenters questioned whether the OCC has been sufficiently diligent in controlling or cutting costs. As explained earlier in this preamble, throughout the 1980s the OCC has faced continued, increased resource demands in most areas, including operating expenses, additional staff and training. The OCC has cut costs, but increased resource demands have exceeded the OCC's cost cutting efforts.

In the early 1980s, the OCC adopted a new supervisory strategy that improved its ability to achieve its mission, and that utilized its resources more effectively. This strategy involves off-site monitoring of bank performance on a continuous basis, and focuses supervision on the components of the system that present the greatest risk.

Indicators of the OCC's cost reductions that result from the implementation of the supervisory approach are:

(a) Increased efficiency: Under the prior supervisory scheme, the OCC would have needed a staff of more than 4,000. With the new supervisory approach, the OCC's staff level has been held to 3,250.

(b) Lower travel costs: The off-site procedures have resulted in a reduction in average examiner travel cost. More importantly, reduced examiner travel time substitute productive off-site supervisory hours for unproductive travel time.

Another example of cost control is demonstrated by the way the OCC provides computer capability to its work force. Prior to 1986, computer services were provided through a service bureau. Under the supervisory approach, examiners use automated services to facilitate analysis. Continued use of the service bureau would have been very costly. To contain costs, the OCC developed its own data center in 1986. The OCC will save $5.6 million over the first five years of the center's operation. More importantly, the OCC can meet additional data processing demands without significant increases in costs.

The cost containment efforts have been obscured by the increased demands of the OCC's workload and the complexity of that workload. Without the OCC's efforts to contain costs, an even higher assessment increase would be required. In 1982, the OCC's real (inflation adjusted) cost to supervise $1 billion of bank assets was $105,000. In 1987, that cost was $97,000. This cost decrease was achieved despite the increase in the OCC's workload over the same period. If the cost decrease had not been achieved, an assessment increase of 22 percent or $16 million would be needed as opposed to the 14 percent being implemented.

The increased resource demands preclude limiting the assessment increase to the increase in inflation as suggested by several commenters. The increased resource demands greatly exceed inflation. The OCC has cut its expenses, but cannot cut costs to the point where necessary and prudent operations are affected. That action would be inconsistent with the OCC's mission to promote safety and soundness by requiring that national banks adhere to sound management principles and comply with the law.

OCC Comprehensive Revenue Study

Innovation and change in the financial services industry require that the OCC maintain flexible managerial, technological and supervisory postures. As a result, the current assessment practices may need to be revised. Therefore, the OCC believes that a study of its revenue generation methodolgoy is required. The underlying statutory and regulatory basis of the methodology will be reviewed to determine its adequacy to cover long-term needs and to allocate appropriately the costs of supervision.

Consequently, the OCC has convened a Comprehensive Revenue Study Task Force charged with reviewing its revenue policy and structure. The OCC must ensure that any new revenue policy and structure enable it, over time, to accomplish its mission. A comprehensive review of all current and potential revenue sources will be conducted. The Task Force will make recommendations regarding a revenue-generation methodology that accommodates needed supervisory changes in response to legislative, regulatory and economic trends. These recommendations may require statutory and regulatory changes. The OCC will inform national banks of the developments of that study.

OCC Action

Prompt action is needed to prevent a revenue shortfall in 1989 and beyond. To meet its revenue requirements, the OCC is issuing this final rule to revise the Part 8 assessment schedule to reflect a 14 percent increase commencing with the assessment due on January 31, 1989. In keeping with the present schedule, the revised assessment schedule maintains marginal assessment rates that decline as bank assets increase and asset brackets that are indexed annually to changes in the Gross National Product Implicit Price Deflator.

The assessment increase is necessary to avoid deficits, which may impede the OCC's ability to fulfill its statutory, regulatory and supervisory responsibilities. The assessment increase is the minimum amount necessary to support the OCC's increasing and evolving supervisory responsibilities. The effect of the 14 percent assessment increase on the earnings of national banks will be extremely small. For all national banks, the median return on assets ("ROA")

VOL 53 ISS 231 DE 1 1988 UMI

currently is .7834 percent. Because of this increase, this median return would fall by 2.4 tenths of a basis point to .7810 percent. The impact on small national banks is also low. For banks in the $15–$85 million category, the median ROA will change from .7476 percent to .7449 percent. The revision is consistent with the requirements of 12 U.S.C. 482, because the new assessment schedule treats banks of similar asset size in the same manner, and is necessary for the OCC to recover its costs.

Executive Order 12291

It is certified that this final rule does not meet any of the conditions set forth in Executive Order 12291 for designation as a major rule. Consequently, a regulatory impact statement was not prepared.

Regulatory Flexibility Act

Pursuant to section 605(b) of the Regulatory Flexibility Act, 5 U.S.C. 605(b), it is certified that this final rule will not have a significant impact on a substantial number of small entities.

List of Subjects in 12 CFR Part 8

National banks, Banking, Assessments, Fees.

Authority and Issuance

For the reasons set forth above, Chapter I of Part 8 of Title 12 of the Code of Federal Regulations is amended as follows:

PART 8—[AMENDED]

1. The authority citation for 12 CFR Part 8 is revised to read as follows:

Authority: 12 U.S.C. 481, 482 and 3102, and 26 D.C. Code 102.

2. Section 8.1 is revised to read as follows:

§ 8.1 Scope and application.

The assessments contained in this part are made pursuant to the authority contained in 12 U.S.C. 481, 482 and 3102 and in 26 D.C. Code 102.

3. The table in § 8.2(a) is revised to read as follows:

§ 8.2 Semiannual assessment.

(a) * * *

If the bank's total assets (consolidated domestic and foreign subsidiaries) are:		The semiannual assessment is:

FEDERAL REGISTER PAGES AND DATES, DECEMBER

48505-48628.....1

LIST OF PUBLIC LAWS

Note: The list of public laws enacted during the second session of the 100th Congress has been completed.

Last List November 30, 1988

The list will be resumed when bills are enacted into public law during the first session of the 101st Congress, which convenes on January 3, 1989. It may be used in conjunction with "PLUS" (Public Laws Update Service) on 523-6641. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone 202-275-3030).

In the **List of Public Laws** printed in the **Federal Register** on November 25, 1988, S. 2840, Public Law 100-696, was incorrectly printed as H.R. 2840.

VOL 53 ISS 231 DE 1 1988 UMI

TABLE OF EFFECTIVE DATES AND TIME PERIODS—DECEMBER 1988

This table is used by the Office of the Federal Register to compute certain dates, such as effective dates and comment deadlines, which appear in agency documents. In computing these dates, the day after publication is counted as the first day.

When a date falls on a weekend or holiday, the next Federal business day is used. (See 1 CFR 18.17)

A new table will be published in the first issue of each month.

Would you like to know...

if any changes have been made to the Code of Federal Regulations or what documents have been published in the Federal Register without reading the Federal Register every day? If so, you may wish to subscribe to the *LSA (List of CFR Sections Affected)*, the *Federal Register Index*, or both.

LSA • List of CFR Sections Affected

The LSA (List of CFR Sections Affected) is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register. The LSA is issued monthly in cumulative form. Entries indicate the nature of the changes—such as revised, removed, or corrected.
$21.00 per year

Federal Register Index

The index, covering the contents of the daily Federal Register, is issued monthly in cumulative form. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references.
$19.00 per year.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register.

Note to FR Subscribers
FR Indexes and the LSA (List of CFR Sections Affected) are mailed automatically to regular FR subscribers

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 53 FR 12345.

Rules and Regulations

Federal Register
Vol. 53, No. 232
Friday, December 2, 1988

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Parts 831 and 841

Court Orders Affecting Retirement Benefits

AGENCY: Office of Personnel Management.

ACTION: Final rule.

SUMMARY: The Office of Personnel Management (OPM) is adopting its proposed regulations concerning modifications of State court orders affecting survivor annuities under the Civil Service Retirement System (CSRS) and Federal Employees Retirement System (FERS). These rules implement sections 8341(h)(4) and 8445(d) of Title 5, United States Code, that, after the retirement or death of the employee, prohibit OPM from honoring modifications of State court orders relating to survivor annuities. These regulations clarify that OPM will not honor a State court order awarding a survivor annuity if issued after the retirement of the employee unless that order actually terminates the marriage or after the employee's death. The regulations also clarify that State courts cannot bypass the statutory prohibition against honoring modifications by reserving jurisdiction in the decree terminating the marriage or by making the award effective retroactively to the date of the judgment terminating the marriage.

EFFECTIVE DATE: January 3, 1989.

ADDRESS: Send court orders affecting CSRS or FERS retirement benefits to Allotment Section, Office of Personnel Management, P.O. Box 17, Washington, DC 20044.

FOR FURTHER INFORMATION CONTACT: Harold L. Siegelman, (202) 632–4682.

SUPPLEMENTARY INFORMATION: On August 2, 1988, we published (at 53 FR 29057) proposed rules concerning modifications of State court orders affecting survivor annuities under the Civil Service Retirement System (CSRS) and Federal Employees Retirement System (FERS). We received two comments on the proposed rules.

Both commenters apparently were confused by the term "former spouse annuity." One commenter used statutory references that apply only to benefits payable during the lifetime of the employee. As we use that term throughout our retirement regulations, it only applies to the *survivor* benefits. Sections 831.1703 and 841.902 define "former spouse annuity" to mean "a recurring benefit * * * that is payable to a former spouse after the employee's, Member's, or retiree's death." These regulations only apply to awards of survivor benefits.

One commenter asserted that the proposed regulations are directly in conflict with the statutory provision. As applied to survivor benefits, the statutory authority for these regulations is clear.

The Civil Service Retirement Spouse Equity Act of 1984, Pub. L. 98–615, added section 8341(h) to Title 5, United States Code. This section permits State courts, when terminating a marriage, to award survivor annuities under CSRS to former spouses of employees and retirees covered by that retirement system. Paragraph (h)(4) of this section nullifies modifications of State court orders or court-approved property settlement agreements after the retirement or death of the employee to the extent that the modification involves a CSRS survivor annuity for a former spouse.

Similarly, the FERS Act of 1986, Pub. L. 99–335, applied a similar provision, in section 8445 of Title 5, United States Code, to employees covered by FERS.

Subsection (d) of that section contains the same restriction against modifications involving FERS survivor annuities. These regulations merely implement the statutory requirements.

Both commenters suggested that it could be appropriate for the court to consider the termination of the marriage separate from the property division. As it affects survivor benefits based on the service of a retiree, Federal statute does not permit such a "bifurcated" proceeding. The regulations are intended to give notice of the effect of the statutory prohibition against modification of court orders resulting from bifurcated divorce proceedings (i.e., granting the divorce before division of the marital property). Recently, OPM has received an increasing number of State court orders that terminate marriages of Federal employees and retirees but leave property rights of the parties (including the right to survivor annuities under CSRS or FERS) for later adjudication. These regulations give notice that OPM has no legal authority to honor court orders awarding a survivor annuity if issued after the retirement or death of the employee, unless the award is made in, or prior to, the judgment terminating the marriage, regardless of any reservation of jurisdiction or retroactive effective date of the order granting the survivor annuity.

One commenter also questioned the effect of the rule on cases in which the divorce is granted orally in open court but the written judgment with the property division is signed and recorded at a later date. We considered the written judgment as the order terminating the marriage but the regulations did not make this clear. Accordingly, we have clarified §§ 831.1704(e)(4) and 841.903(d)(4).

E.O. 12291, Federal Regulation

I have determined that this is not a major rule as defined under section 1(b) of E.O. 12291, Federal Regulation.

Regulatory Flexibility Act

I certify that this regulation will not have a significant economic impact on a substantial number of small entities because the regulation will only affect Federal agencies and retirement payments to retired Government employees, spouses, and former spouses.

Constance Horner,

Director.

Accordingly, OPM is amending Title 5, Code of Federal Regulations, as follows:

PART 831—RETIREMENT

Subpart Q—Court Orders Affecting Retirement Benefits

1. The authority citation for Subpart Q of Part 831 continues to read:

Authority: 5 U.S.C. 8347.

2. In § 831.1704, paragraph (e) is revised to read as follows:

§ 831.1704 Qualifying court orders.

* * * * *

(e)(1) For purposes of awarding, increasing, reducing, or eliminating a former spouse annuity, or explaining, interpreting, or clarifying a court order that awards, increases, reduces or eliminates a former spouse annuity, the court order must be—

(i) Issued on a day prior to the date of retirement or date of death of the employee; or

(ii) The first order terminating the marital relationship between the retiree and the former spouse.

(2) In paragraph (e)(1) of this section, "date of retirement" means the later of—

(i) The date that the employee files an application for retirement; or

(ii) The effective commencing date for the employee's annuity.

(3) In paragraphs (e)(1) and (e)(4) of this section, "issued" means actually filed with the clerk of the court, and does not mean the effective date of a retroactive court order that is effective prior to the date when actually filed with the clerk of the court (e.g., order issued *nunc pro tunc*).

(4) In paragraph (e)(1)(ii) of this section, the "first order terminating the marital relationship between the retiree and the former spouse" means the original written order that first ends (or first documents an oral order ending) the marriage, and does not include—

(i) Any order that amends, explains, clarifies, or interprets the original written order regardless of the effective date of the order making the amendment, explanation, clarification, or interpretation; or

(ii) Any order issued under reserved jurisdiction or any other orders issued subsequent to the original written order terminating the marriage that divide marital property (even if no division of marital property was made in the order terminating the marriage) regardless of the effective date of the order.

PART 841—FEDERAL EMPLOYEES' RETIREMENT SYSTEM—GENERAL ADMINISTRATION

3. The authority citation for Subpart I of Part 841 continues to read:

Authority: 5 U.S.C. 8347.

Subpart I—Court Orders Affecting Retirement Benefits

4. In 841.903, paragraph (d) is revised to read as follows:

§ 841.903 Qualifying court orders.

* * * * *

(d)(1) For purposes of awarding, increasing, reducing, or eliminating a former spouse annuity, or explaining, interpreting, or clarifying a court order that awards, increases, reduces or eliminates a former spouse annuity, the court order must be—

(i) Issued on a day prior to the date of retirement or date of death of the employee; or

(ii) The first order terminating the marital relationship between the retiree and the former spouse.

(2) In paragraph (d)(1) of this section, "date of retirement" means the later of—

(i) The date that the employee files an application for retirement; or

(ii) The effective commencing date for the employee's annuity.

(3) In paragraphs (d)(1) and (d)(4) of this section, "issued" means actually filed with the clerk of the court, and does not mean the effective date of a retroactive court order that is effective prior to the date when actually filed with the clerk of the court (e.g., order issued *nunc pro tunc*).

(4) In paragraph (d)(1)(ii) of this section, the "first order terminating the marital relationship between the retiree and the former spouse" means the original written order that first ends (or first documents an oral order ending) the marriage, and does not include—

(i) Any order that amends, explains, clarifies, or interprets the original written order regardless of the effective date of the order making the amendment, explanation, clarification, or interpretation; or

(ii) Any order issued under reserved jurisdiction or any other orders issued subsequent to the original written order terminating the marriage that divide marital property (even if no division of marital property was made in the order terminating the marriage) regardless of the effective date of the order.

BILLING CODE 6325-01-M

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 51

[Docket No. AMS-FV-88-021PR]

Sweet Peppers; Grade Standards

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This rule revises the voluntary United States Standards for Grades of Sweet Peppers by allowing sweet peppers with pod colors other than green or red to be certified to a U.S. grade. Sweet pepper importers, producers, and growers requested this revision in order to improve marketing information and communication between shippers and receivers of sweet peppers with pod colors other than green or red. The Agricultural Marketing Service (AMS), in cooperation with industry, has the responsibility to develop and improve standards of quality, condition, quantity, grade, and packaging in order to encourage uniformity and consistency in commercial practices.

EFFECTIVE DATE: January 3, 1989.

FOR FURTHER INFORMATION CONTACT: Paul W. Manol, Fresh Products Branch, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, P.O. Box 96456, Washington, DC 20090-6456, (202) 447-5410.

SUPPLEMENTARY INFORMATION: This rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512-1 and has been designated as "non major" under the criteria contained therein.

Pursuant to the requirements set forth in the Regulatory Flexibility Act, the Administrator of AMS has determined that this action will not have a significant economic impact on a substantial number of small entities. The revision of the standards for sweet peppers will not impose substantial direct economic cost, recordkeeping, or personnel workload changes on small entities, and will not alter the market share or competitive position of these entities relative to large businesses.

This action revises the U.S. Standards for Grades of Sweet Peppers, last revised on December 15, 1963, and brings the standards into conformity with current marketing practices. A proposal to revise the color sections of the United States Standards for Grades of Sweet Peppers (7 CFR 51.3270 through 51.3272) was published in the **Federal**

Register on June 16, 1988 (53 FR 22498–22499), and invited interested persons to submit written comments.

This proposal was developed at the request of The West Mexico Vegetable Distributors Association, a trade association representing major sweet pepper importers, producers, and growers, because presently there are no provisions for certifying as to grade peppers having pod colors other than green or red. In recent years, peppers showing pod colors such as white, brown, purple, black, orange, and yellow have been developed and introduced into marketing channels. While the grade requirements could be applied, shipments could not be certified to a U.S. grade because the standards required grade-certified peppers to be either green or red. With the adoption of this proposal, color would no longer be a quality requirement except that all peppers in an individual lot shall be of the same varietal color characteristic. Copies of the proposal were distributed to various individuals, growers, handlers, receivers, grocery store chains, Federal and State government officials, and industry associations or organizations for review and comment.

The 60-day comment period ended August 15, 1988, and a total of 24 comments were received concerning the proposal.

The comments were in favor of the proposal. Generally, comments in support stated that with the increased popularity and visibility of peppers having pod colors other than green or red, the changes would allow greater flexibility in grading and a more uniform manner for shipping and marketing peppers.

One comment received from The Royal Netherlands Embassy, Office of the Agricultural Counselor, commenting on behalf of the Netherlands Commodity Board for Fruit and Vegetables, requested that the revised standard include specific provisions concerning the sizing of peppers having pointed or blunt shapes. Their contention was that since the Organization for Economic Cooperation and Development (OECD) and the Economic Commission for Europe (ECE) standards refer to peppers having such shapes, the U.S. standards should also. AMS has determined that these provisions are outside the scope of the proposed rule and therefore should not be incorporated in this final rule. The proposed rule concerned only the color of sweet peppers which could be certified to a U.S. grade. Any proposal to change the grade standards with respect to size or shape would be more appropriately addressed in a separate proposed rulemaking.

One comment was received against the proposal. However, no reason was given for the opposition.

The Agricultural Marketing Service (AMS), in cooperation with industry, has the responsibility to develop and improve standards of quality, condition, grade, and packaging in order to encourage uniformity and consistency in commercial practices. The Agency has determined this final rule will enhance the marketing of sweet peppers. The provisons of this final rule are the same as those in the proposed rule except for a minor non-substantive change made for clarity.

List of Subjects in 7 CFR Part 51

Fresh fruits, Vegetables, and Other products (inspection, certification, and standards).

For reasons set forth in the preamble, 7 CFR Part 51 is amended as follows:

PART 51—[AMENDED]

1. The authority citation for 7 CFR Part 51 continues to read as follows:

Authority: Secs. 203, 205, 60 Stat. 1087, as amended (7 U.S.C. 1622, 1624).

2. In Subpart—*United States Standards for Grades of Sweet Peppers*, § 51.3270, paragraph (b) is revised to read as follows:

§ 51.3270 U.S. Fancy.

* * * * *

(b) *Color.* Any lot of peppers which meets all the requirements of this grade, except those relating to green color, may be designated as "U.S. Fancy" with the characteristic color specified in connection with this grade, provided that at least 90 percent of the peppers show any amount of the specified characteristic color, and provided further, that if the peppers fail to meet the color requirements of either "U.S. Fancy" or "U.S. Fancy (color specified)," they shall be designated as "U.S. Fancy Mixed Color" (See Tolerances, § 51.3274).

3. Section 51.3271, paragraph (b) is revised to read as follows:

§ 51.3271 U.S. No. 1.

* * * * *

(b) *Color.* Any lot of peppers which meets all the requirements of this grade, except those relating to green color, may be designated as "U.S. No. 1" with the characteristic color specified in connection with this grade, provided that at least 90 percent of the peppers show any amount of the specified characteristic color, and provided further, that if the peppers fail to meet the color requirements of either "U.S. No. 1" or "U.S. No. 1 (color specified)," they shall be designated as "U.S. No. 1 Mixed Color" (See Tolerances, § 51.3274).

3. Section 51.3272, paragraph (a) is revised to read as follows:

§ 51.3272 U.S. No. 2.

* * * * *

(a) *Color.* Any lot of peppers which meets all the requirements of this grade, except those relating to green color, may be designated as "U.S. No. 2" with the characteristic color specified in connection with this grade, provided that at least 90 percent of the peppers show any amount of the specified characteristic color, and provided further that if the peppers fail to meet the color requirements of either "U.S. No. 2" or "U.S. No. 2 (color specified)," they shall be designated as "U.S. No. 2 Mixed Color" (See Tolerances, § 51.3274).

Dated: November 28, 1988.

Kenneth C. Clayton,

Deputy Administrator Marketing Programs.

[FR Doc. 88–27758 Filed 12–1–88; 8:45 am]

BILLING CODE 3410-02-M

Food and Nutrition Service

7 CFR Parts 210, 220, and 226

[Amdt. Nos. 1, 20, and 55]

Revision of Infant Meal Pattern for Child Nutrition Programs; Correction

AGENCY: Food and Nutrition Service, USDA.

ACTION: Final rule; correction.

SUMMARY: This regulation corrects a passage in Parts 210, 220, and 226 and corrects the chart in Part 226 in the final rulemaking published on July 6, 1988 (53 FR 25303).

EFFECTIVE DATE: December 2, 1988.

FOR FURTHER INFORMATION CONTACT: Patricia N. Daniels, Branch Chief, Nutrition Science and Education Branch, Nutrition and Technical Services Division, Food and Nutrition Service, USDA, 3101 Park Center Drive, Alexandria, Virginia 22302, (703) 756–3554.

SUPPLEMENTARY INFORMATION: The Department is correcting a passage in Parts 210, 220, and 226 in the final rule published at 53 FR 25303 on July 6, 1988 to help clarify the reimbursement policy for meals containing breast milk. The final rule states that meals containing breast milk are reimbursable when served to infants beginning at 4 months of age "when the other required meal component or components are supplied

* * *." The word "required" may be confusing when applied to the 4 through 7 month age group since all meal components, except formula or breast milk, are optional in that age group. The word "required" is being deleted from the passage to avoid misinterpretation of the policy. In the 4 through 7 month age group meals containing breast milk may be claimed for reimbursement when at least one other meal component is also served.

Accordingly, the final rule published at 53 FR 25303, July 6, 1988, amending 7 CFR Parts 210, 220, and 226 is corrected to read as follows:

PART 210—NATIONAL SCHOOL LUNCH PROGRAM

1. The authority citation for Part 210 continues to read as follows:

Authority: Secs. 2–12, 60 Stat. 230, as amended; sec. 10, 80 Stat. 889, as amended; 84 Stat. 270, 42 U.S.C. 1751–1760, 1779.

§ 210.10 [Amended]

2. On page 25308, in § 210.10(h), the last full sentence of column one is corrected by removing the word "required" after the word "other".

PART 220—SCHOOL BREAKFAST PROGRAM

1. The authority citation for Part 220 continues to read as follows:

Authority: Secs. 4 and 10, 80 Stat. 886, 889 (42 U.S.C. 1773, 1779).

§ 220.8 [Amended]

2. On page 25308, in § 220.8(b)(2), the fifth full sentence of column three is corrected by removing the word "required" after the word "other".

PART 226—CHILD CARE FOOD PROGRAM

1. The authority citation for Part 226 continues to read as follows:

Authority: Secs. 323, 326 and 361, Pub. L. 99–500 and 99–591, 100 Stat. 1783 and 3341 (42 U.S.C. 1758, 1760, and 1766); secs. 803, 810 and 820, Pub. L. 97–35, 95 Stat. 521–535 (42 U.S.C. 1758, 1766); sec. 2, Pub. L. 95–627, 92 Stat. 3603 (42 U.S.C. 1766); sec. 10, Pub. L. 89–642, 80 Stat. 889 (42 U.S.C. 1779), unless otherwise noted.

§ 226.20 [Amended]

2. On page 25309, in § 226.20(b) the last full sentence of column one is corrected by removing the word "required" after the word "other".

3. On page 25309, the chart in § 226.20(b)(4) is corrected by removing the words "or breast milk" in the "4 through 7 months" column under the entry for the Supplement.

Date: November 25, 1988.

Anna Kondratas,

Administrator, Food and Nutrition Service.

[FR Doc. 88–27790 Filed 12–1–88; 8:45 am]

BILLING CODE 3410–30–M

Agricultural Marketing Service

7 CFR Part 910

[Lemon Reg. 642]

Lemons Grown in California and Arizona; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: Regulation 642 establishes the quantity of fresh California-Arizona lemons that may be shipped to market at 338,250 cartons during the period December 4 through December 10, 1988. Such action is needed to balance the supply of fresh lemons with market demand for the period specified, due to the marketing situation confronting the lemon industry.

DATES: Regulation 642 (§ 910.942) is effective for the period December 4 through December 10, 1988.

FOR FURTHER INFORMATION CONTACT: Raymond C. Martin, Section Head, Volume Control Programs, Marketing Order Administration Branch, F&V, AMS, USDA, Room 2523, South Building, P.O. Box 96456, Washington, DC 20090–6456; telephone: (202) 447–5697.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1521–1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

The purpose of the RFA is to fit regulatory action to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Agricultural Marketing Agreement Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

This regulation is issued under Marketing Order No. 910, as amended (7 CFR Part 910) regulating the handling of lemons grown in California and Arizona. The order is effective under the Agricultural Marketing Agreement Act (the "Act," 7 U.S.C. 601 through 674), as amended. This action is based upon the recommendation and information submitted by the Lemon Administrative Committee (Committee) and upon other available information. It is found that this action will tend to effectuate the declared policy of the Act.

This regulation is consistent with the marketing policy for 1988–89. The Committee met publicly on November 29, 1988, in Los Angeles, California, to consider the current and prospective conditions of supply and demand and unanimously recommended a quantity of lemons deemed advisable to be handled during the specified week. The Committee reports that the demand for lemons is good.

Pursuant to 5 U.S.C. 533, it is further found that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice and engage in further public procedure with respect to this action and that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared purposes of the Act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting. It is necessary, in order to effectuate the declared purposes of the Act, to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

7 CFR Part 945

[FV-88-125]

Irish Potatoes Grown in Certain Designated Counties in Idaho and Malheur County, OR; Final Rule Authorizing Collection of Destination Data

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule requires handlers to provide the Idaho-Eastern Oregon Potato Committee with the destinations of all fresh market potato shipments. Although production area potatoes are shipped nationwide, some markets receive heavier shipments than others. Collection of this data should help the committee determine which markets are underutilized and so advise handlers. This information will also assist the committee in performing other duties under the marketing order.

EFFECTIVE DATE: December 2, 1988.

FOR FURTHER INFORMATION CONTACT: Robert F. Matthews, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2525-S, Washington, DC 20090-6456; telephone 202-447-2431.

SUPPLEMENTARY INFORMATION: This rule is effective under Marketing Order No. 945 (7 CFR Part 945), regulating the handling of potatoes grown in certain designated counties of Idaho and Malheur County, Oregon. The order is authorized by the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 through 674), hereinafter referred to as the Act.

This final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512-1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act and rules issued thereunder are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 70 handlers of potatoes subject to regulation under the Idaho-Eastern Oregon Potato Marketing Order and approximately 3,100 potato producers in the production area. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having annual gross revenues for the last three years of less than $500,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. The majority of handlers and producers of Idaho-Eastern Oregon potatoes may be classified as small entities.

This rule requires handlers to provide the Idaho-Eastern Oregon Potato Committee with the destinations of all fresh market potato shipments leaving the production area. The rule is recommended under § 945.80 of the marketing order which authorizes the committee to collect from handlers information necessary to perform its duties. One such committee duty, as set forth in § 945.33, is to investigate and assemble data on potato shipping and marketing conditions. Although potatoes from the production area are distributed nationally and reach nearly all major markets, some markets receive heavier shipments than others. Such differences may be attributed to higher freight costs for more distant markets, competition from other producing areas, or personal preferences of consumers.

At its June 8 meeting the committee unanimously recommended that handlers provide the committee with the zip codes of final destinations of potatoes shipped from the area. The marketing order authorizes the establishment of grade, size, quality, maturity, pack, and container requirements based upon committee recommendations. Prior to making such recommendations, the committee is required to develop and submit a marketing policy which sets forth relevant potato supply and demand conditions, and serves as a basis for regulatory actions. Information compiled on destinations of shipments is useful to the committee in developing its annual marketing policy. The committee will be able to compare movement to various markets over time in recommending regulations. For example, relatively low shipment levels to a specific market may support a modification of regulatory requirements for shipments to that area for market development purposes.

The committee staff will compile a list of destinations and quantities shipped to each from the information provided by handlers. Information gathered by the committee will be disseminated to the trade in aggregate form so that individual handlers' operations will not be divulged. The information thus provided will help the trade to pinpoint markets that seem to be underutilized. The information also will be useful in the planning of individual marketing and promotion programs.

At the present time there is not available from any source a reliable, complete, ongoing record of where production area potatoes are shipped. While the Federal-State Market News Service does publish some potato arrival statistics for certain markets, it does not give a complete picture of potato movement. With a monthly report of potato sales by destination, the committee will be better able to analyze the results of its quality control program.

The committee considered several ways of collecting this information, including requiring handlers to complete and submit reports to the committee on a weekly or monthly basis. However, the mechanism selected to gather the necessary information provides that the Federal or Federal-State inspector copy the zip code from the bill of lading onto the certificate at the time of inspection. The committee staff will then compile the information upon receipt of the inspection certificates, which are already forwarded to the committee by the Inspection Service for billing, statistical reporting, and other purposes. The Inspection Service has agreed to do this, and the additional time required for each certificate should be only a few seconds. Also, many handlers are already providing this information to the Inspection Service. Thus, the burden on the handler imposed by this rule is insignficant.

At times, a load of potatoes may be shipped to other than the destination intended at the time of inspection. In such situations, handlers are required to notify the committee directly of the actual destination of the land. This notification may be provided to the committee office either by telephone or in writing.

This rule imposes some additional reporting requirements on handlers. Specifically, handlers will need to provide the Inspection Service with the intended destination of each shipment. Additionally, handlers are required to contact the committee office directly in

those instances where a shipment is diverted from its intended destination.

In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3507), the information collection requirements included in this rule have been approved by the Office of Management and Budget (OMB) under OMB No. 0581–0069.

Based on the above, the Administrator of AMS has determined that this action will not have a significant economic impact on a substantial number of small entities.

A proposal inviting comments on this action was published in the **Federal Register** on September 8, 1988 (53 FR 34764). Interested persons had until September 19, 1988, to file written comments. None were filed.

After consideration of the information and recommendation submitted by the committee, and other available information, it is hereby found that the rule was hereinafter set forth will tend to effectuate the declared policy of the Act.

Pursuant to 5 U.S.C. 553, it is further found that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** in that: (1) Shipments of potatotes from the production area have begun and this rule should cover as many current-season shipments as possible to be of maximum benefit, (2) this rule imposes no special requirements on handlers that cannot be accomplished by the effective date, and (3) all production area handlers were made aware of the action which was proposed at an open meeting of producers and handlers and were given opportunity to comment.

List of Subjects in 7 CFR Part 945

Marketing agreements and orders, Potatoes, Idaho, Oregon.

For the reasons set forth in the preamble, 7 CFR Part 945 is hereby amended as follows:

Note: This section will appear in the Code of Federal Regulations.

PART 945—IRISH POTATOES GROWN IN CERTAIN DESIGNATED COUNTIES IN IDAHO, AND MALHEUR COUNTY, OREGON

1. The authority citation for 7 CFR Part 945 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Section 945.341 is amended by adding a new paragraph (d)(4) to read as follows:

§ 945.341 Handling regulation.

* * * * *

(d) * * *

* * * * *

(4) Handlers shall provide the committee with the destination zip codes of all potatoes handled by permitting the Federal-State Inspection Service to review the bills of lading upon inspection to determine the destination zip codes. The zip codes shall be included on the inspection certificates. Whenever potatoes are diverted to a different destination, the handler shall notify the committee of the new destination zip code orally or in writing as soon as practicable.

Federal Highway Administration

23 CFR Part 658

[FHWA Docket No. 86–8, Notice No. 3]

RIN 2125–AB55

Truck Size and Weight; Specialized Equipment Boat Transporters

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Final rule.

SUMMARY: In response to petitions, the FHWA is revising certain provisions established by the final rule on truck size and weight published at 49 FR 23302 on June 5, 1984. This rule establishes: (1) A definition of boat transporters, (2) the same lengths and overhang for boat transporters as that provided the automobile transporters, and (3) a definition and a minimum length limit of 65 feet for a truck-trailer boat transporter.

EFFECTIVE DATE: December 2, 1988.

FOR FURTHER INFORMATION CONTACT: Mr. Phillip W. Blow, Office of Motor Carrier Transportation, (202) 366–4036 or Mr. David C. Oliver, Office of the Chief Counsel, (202) 366–1354, Federal Highway Administration, 400 Seventh Street, SW., Washington, DC 20590. Office hours are from 7:45 a.m. to 4:15 p.m., e.t., Monday through Friday, except legal holidays.

SUPPLEMENTARY INFORMATION: A rule implementing the truck size and weight provisions of the Surface Transportation Assistance Act of 1982 (STAA) Pub. L. 97–424, 96 Stat. 2097, was published in the **Federal Register** on June 5, 1984 (49 FR 23302). This document represented the culmination of major efforts by the FHWA to implement the truck size and weight provisions of the STAA and in part determined that auto transporters constituted specialized equipment and were not subject to the provisions of 23 CFR 658.13 (a) through (c). Section 658.13(d) provided final requirements for automobile transporters relative to overall length and allowable overhang.

Subsequently, the National Marine Manufacturers Association and Celebrity Boats, Inc., of Benton, Illinois, have petitioned that FHWA classify "boat haulers" as specialized equipment within the meaning of section 411(d) of the STAA, 49 U.S.C. 2311(d). In summary, that request sought treatment similar to the rules pertaining to automobile transporters. The petitioners indicate that the needs of the boat transporter industry are analogous to the needs of the automobile industry which was afforded "specialized equipment" status as part of the 1982 STAA.

The petitioners also claim that vehicles used to transport boats operate in a manner similar to the operation of vehicles used for automobile transport. The granting of "specialized equipment" designation for boat transporters and treatment analogous to that afforded to automobile transporters would entail the establishment of Federal minimum length specifications that would preclude States from imposing length maximums that are less than the Federal limit on the National Network established by 23 CFR 658.9; grant boat transporters the ability to carry cargo on the power unit of a truck combination; and grant front and rear allowances for overhang. The advantages of "specialized equipment" designation include a greater cargo-carrying capacity and more economical use of boat transporter equipment.

FHWA initiated an advanced notice of proposed rulemaking (ANPRM) Docket 86–8 issued March 25, 1986 at 51 FR 10234.

In consideration of the fifty-four responses to the ANPRM, Docket 86–8, Notice No. 2, a notice of proposed rulemaking (NPRM) was published January 29, 1988, at 53 FR 2602. Comments were requested on the proposed rule which (1) Set out a definition of a boat transporter, (2) extended to boat transporters the same length limits and overhang afforded automobile transporters and, (3) provided a definition and a minimum length limit of 65 feet for a truck-trailer boat transporter.

Thirty-eight responses were received in reply to the January 29 NPRM (Docket No. 86–8). The respondents are generally categorized as State agencies and the District of Columbia—3; trucking companies—3; Associations—2; manufacturers—28 and Congress—2. Most of the manufacturers also operate equipment transporting their products.

Essentially, all of the commenters endorsed the proposed rule. The Kentucky Transportation Cabinet objected to the specialized equipment being designated by commodity transported rather than unique equipment. Other commenters referred to the logic of the specialized equipment designation because the boat transporters equipment was so configured as to limit any type of back haul. The Maine DOT objected to "stinger-steered vehicles which may operate with a pintle-hook arrangement rather than a fifth-wheel arrangement as in the 75 foot auto transporter regulations." This was a misunderstanding as the stinger-steered combination definition stipulates only a fifth-wheel connection. The District of Columbia in its comments, did condition its "no objection" to "when operated on the national network."

The boat manufacturers and transporters endorsed and urged finalization of the proposed rule, noting the similarity of their loadings and equipment to that of the auto transporters. Six of the boat transporters commented on their safety record using the equipment allowed by the proposed rule. Seven commenters specifically endorsed the inclusion and definition of the truck-trailer combination. Two of these commenters referred to their experiences with the truck-trailer combination, i.e., 6 million accident-free miles since 1979, 15,000 boats delivered annually with 12 truck-trailer combinations, no ball and socket failures, better maneuvering, less load damage.

Subsequent to the NPRM it was noted that the stinger-steered definition applied only to automobile transporters. As a result of this oversight we are modifying the definition to refer to all combinations with the fifth wheel located behind and below the rearmost axle of the power unit. This allows the definition to apply to both automobile and boat transporters.

Congressional action since the start of this rulemaking has reinforced the basis for following through with this rule. Section 133(a)(7) at the Federal-Aid Highway Act of 1987 (Pub. L. 100–17, 101 Stat. 132) enacted April 2, 1987 amends section 411(d) at the STAA of 1982 where "boat transporters" is added as an example of specialized equipment.

Therefore, based upon full consideration of public comments received and a further review by FHWA, 23 CFR 658.5 and 658.13 are amended as described. Two paragraphs are being added to § 658.5 to define boat transporter and to define truck-trailer boat transporter. Section 658.13(d) is being revised to add boat transporters as specialized equipment and to provide length and overhang limits.

Regulatory Impact

The FHWA has considered the impacts of this proposal and has determined that it is not a major rulemaking action within the meaning of E.O. 12291. However, pursuant to E.O. 12498, this rulemaking action has been included in the Regulatory Program for significant rulemaking actions. These determinations by the agency are based on the nature of the rulemaking. The FHWA has determined that this rulemaking proposes to technically amend the June 5, 1985, final rule by clarifying and further defining certain issues contained therein. The impacts of the provisions addressed in this proposed rulemaking have already been considered by the impact documentation prepared for the June 5 final rule. Any changes to the NPRM would not appreciably affect the impact documentation initially prepared. The Regulatory Impact Analysis prepared for the June 5 rulemaking (FHWA Docket 83–14) is available for inspection in the headquarters office of FHWA, 400 Seventh Street SW., Washington, DC.

For the same reason and under the criteria of the Regulatory Flexibility Act, FHWA hereby certifies that this section will not have a significant economic impact on a substantial number of small entities.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway, Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program).

A regulatory information number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN number contained in the heading of this document can be used to cross reference this action with the Unified Agenda.

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that the final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

List of Subjects in 23 CFR Part 658

Grant programs—transportation, Highways and roads, Motor carriers—size and weight.

Issued on November 28, 1988.

Robert E. Farris,

Federal Highway Administrator.

In consideration of the foregoing, the FHWA amends Part 658, Chapter 1 of Title 23, Code of Federal Regulations, as set forth below.

PART 658—TRUCK SIZE AND WEIGHT; ROUTE DESIGNATION—LENGTH, WIDTH AND WEIGHT LIMITATIONS

1. The authority citation for 23 CFR Part 658 continues to read as follows:

Authority: Secs. 133, 411, 412, 413, and 416 of Pub. L. 97-424, 96 Stat. 2097 (23 U.S.C. 127; 49 U.S.C. 2311, 2312, 2313 and App. 2316), as amended by Pub. L. 98-17, 97 Stat. 59, and Pub. L. 98-554, 98 Stat. 2829; 23 U.S.C. 315; and 49 CFR 1.48.

2. Section 658.5 is amended by revising paragraph (n) and adding paragraph (p) and (q) as follows:

§ 658.5 Definitions.

* * * * *

(n) *Stinger-steered combination.* A truck tractor semitrailer wherein the fifth wheel is located on a drop frame located behind and below the rear-most axle of the power unit.

* * * * *

(p) *Boat transporters.* Any vehicle combination designed and used specifically to transport assembled boats and boat hulls. Boats may be partially disassembled to facilitate transporting.

(q) *Truck-trailer boat transporter.* A boat transporter combination consisting of a straight truck towing a trailer using typically a ball and socket connection. The trailer axle(s) is located substantially at the trailer center of gravity (rather than the rear of the trailer) but so as to maintain a downward force on the trailer tongue.

3. Section 658.13 is amended by adding paragraph (d)(2) to read as follows:

§ 658.13 Length.

* * * * *

(d) * * *

(2) *Boat transporters.* (i) Boat transporters are considered to be specialized equipment. As provided for automobile transporters in § 658.5(k), boat transporters may carry boats on the power unit so long as the length and width restrictions of the vehicles and load are not exceeded. No State shall impose an overall length limitation of less than 65 feet on traditional boat transporters (fifth wheel located on tractor frame over rear axle(s), including "low boys," or less than 75 feet on stinger-steered boat transporters. In addition, no State shall impose an overall length limitation of less than 65 feet on truck-trailer boat transporters. Paragraph (c) of this section requires the States to allow operation of vehicles with the dimensions that were legal in the State on December 1, 1982.

(ii) All length provisions regarding boat transporters are exclusive of front and rear overhang. Further, no State shall impose a front overhang limitation of less than three (3) feet nor a rearmost overhang limitation of less than four (4) feet.

BILLING CODE 4910-22-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing-Federal Housing Commissioner

24 CFR Parts 201, 203, and 234

[Docket No. N-88-1882; FR-2577]

Mortgage Insurance; Changes to the Maximum Mortgage Limits for Single Family Residences, Condominiums and Manufactured House and Lots

AGENCY: Office of the Assistant Secretary for Housing-Federal Housing Commissioner, HUD

ACTION: Notice of revisions to FHA maximum mortgage limits for high-cost areas.

SUMMARY: This Notice amends the list of areas eligible for "high-cost" mortgate limits under certain of HUD's insuring authorities under the National Housing Act by increasing "high-cost" mortgage limits for Albany and Rensselaer Counties, New York; Carroll County, Maryland; the City of Fredericksburg and Spotsylvania County, Virginia; Jefferson County, Kentucky; the Albuquerque, New Mexico MSA; Denton and Collin Counties, Texas; and Douglas County, Nevada; and adding "high-cost" mortgage limits for Franklin County, Massachusetts; Hall County, Georgia; Indian River County, Florida; and Allen County, Indiana. Mortgage limits are adjusted in an area when the Secretary determines that middle- and moderate-income persons have limited housing opportunities because of high prevailing housing sales prices.

EFFECTIVE DATE: December 2, 1988.

FOR FURTHER INFORMATION CONTACT: For single family: Morris Carter, Director, Single Family Development Division, Room 9270; telephone (202) 755-6720. For manufactured homes: Robert J. Coyle, Director, Title I Insurance Division, Room 9160; telephone (202) 755-6880; 451 Seventh Street, SW., Washington, DC 20410. (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION:

Background

The National Housing Act (NHA), 12 U.S.C. (1710-1749), authorizes HUD to insure mortgages for single family residences (from one- to four-family structures), condominiums, manufactured homes, manufactured home lots, and combination manufactured homes and lots. The NHA, as amended by the Housing and Community Development Amendments of 1980 and the Housing and Community Development Amendments of 1981, permits HUD to increase the maximum mortgage limits under most of these programs to reflect regional differences in the cost of housing. In addition, sections 2(b) and 214 of the NHA provide for special high-cost limits for insured mortgages in Alaska, Guam and Hawaii.

On March 3, 1988 (53 FR 6922), the Department published its most recent annual complete listing of areas eligible for "high-cost" mortgage limits under certain of HUD's insuring authorities under the National Housing Act, and their applicable limits for each area. (See also April 12, 1988, 53 FR 11997.) Amendments to the annual listing were published March 28, 1988 (53 FR 9869), April 25, 1988 (53 FR 13405), June 1, 1988 (53 FR 19897), August 1 1988 (53 FR 28871), and September 20, 1988 (53 FR 36448).

This Document

Today's document increases high-cost mortgage amounts for Albany and Rensselaer Counties, New York; Carroll County, Maryland; the City of Fredericksburg and Spotsylvania County, Virginia; Jefferson County, Kentucky; the Albuquerque, New Mexico MSA; Denton and Collin Counties, Texas; and Douglas County,

Nevada; and adds "high-cost" mortgage limits for Franklin County, Massachusetts; Hall County, Georgia; Indian River County, Florida; and Allen County, Indiana.

These amendments to the high-cost arees appear in two parts. Part I explains high-cost limits for mortgages insured under Title I of the National Housing Act. Part II lists changes for single family residences insured under section 203(b) or 234(c) of the National Housing Act.

National Housing Act High Cost Mortgage Limits

I. Title I: Method of Computing Limits

A. Section 2(b)(1)(D). Combination Manufactured Home and Lot Excluding Alaska, Guam and Hawaii):

To determine the high-cost limit for a combination manufactured home and lot loan, multiply the dollar amount in the "one family" column of Part II of this list by .80. For example, Franklin County, Massachusetts has a one-family limit of $101,250. The combination home and lot loan limit for Franklin County is $101,250 x .80, or $81,000.

B. Section 2(b)(1)(E): Lot Only (Excluding Alaska, Guam and Hawaii):

To determine the high-cost limit for a lot loan, multiply the dollar amount in the "one family" column of Part II of this list by .20. for example, Franklin County, Massachusetts has a one-family limit of $101,250. The lot-only loan limit for Franklin County is $101,250 x .20, or $20,250.

C. Section 2(b)(2). Alaska, Guam and Hawaii Limits:

The maximum dollar limits for Alaska, Guam and Hawaii may be 140% of the statutory loan limits set out in section 2(b)(1).

Accordingly, the dollar limits for Alaska, Guam and Hawaii are as follows:

1. For manufactured homes: $56,700. (40,500 X 140%).

2. For combination manufactured homes and lots: 75,600. ($54,000 X 140%).

3. For lots only: $18,900 (13,500 X 140%).

BILLING CODE 4210-27-M

Office of the Assistant Secretary for Community Planning and Development

24 CFR Part 596

[Docket No. R-88-1392; FR-1913]

Enterprise Zone Development

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Final rule.

SUMMARY: This document:

1. Amends the final rule published on August 16, 1988 (53 FR 30944), captioned as above, by revising the text of two sections of that rule; and

2. Announces that the effective date of the August 16, 1988, rule, as revised in this final rule, is December 2, 1988. The purpose of this document is to implement statutory amendments to Title VII (Enterprise Zone Development) of the Housing and Community Development Act of 1987 that were contained in the recently adopted Stewart B. McKinney Homeless Assistance Amendments of 1988. The effect of the revisions is to alter, in accordance with revised statutory directions, the method of determining the rank order of distress among competing nominees for designation as enterprise zones.

DATES: Effective date: December 2, 1988. Deadline date for submission of nominations: January 17, 1989.

FOR FURTHER INFORMATION CONTACT: Michael T. Savage, Deputy Director, Office of Block Grant Assistance, Room 7280, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410, telephone (202) 755-6588. (This is not a toll-free telephone number.)

SUPPLEMENTARY INFORMATION: On August 16, 1988, the Department published its final rule to implement Title VII of the Housing and Community Development Act of 1987 (Pub. L. 100-242, approved February 5, 1988). That rule provided instructions to potential applicants seeking designation as Federal enterprise zones. Among other things, the rule provided, in §§ 596.302 and 596.303, a description of the method HUD would employ in making competing nominees for designation as enterprise zones.

HUD's rule did not take effect on publication, but instead was required, under section 7(o) of the Department of Housing and Urban Development Act (42 U.S.C. 3535(o)), to await a period of thirty session days of the Congress before it could be announced for effect. The 30-day period on October 6, 1988, but HUD did not announce the effective date of the August 16 rule at that time because there was under consideration in the Congress a statutory amendment that would affect the selection procedure described in HUD's rule. That amendment was adopted as section 1090 of the Stewart B. McKinney Homeless Assistance Act (Pub. L. 100-628, approved November 7, 1988) (1988 Act). The 1988 Act provided clarifying language concerning the method of ranking competing enterprise zone nominees. The clarifying amendment requires changes in HUD's August 16 final rule. Section 1090 also provided for revision of HUD's previously published final rule to effect the statutory change, and for making the revised rule effective immediately.

In a **Federal Register** Notice published on September 22, 1988 (53 FR 36899), the Department advised potential nominees that the deadline date for submitting nominations for enterprise zone designation would be 45 days from the effective date of the final rule. The September 22, 1988, notice indicated HUD's expectation at that time that the rule would be made effective in early October. In light of the delay in announcing the effective date of this final rule caused by the statutory change, the deadline date for submitting nominations will now be January 17, 1989. Any nominating State or local government whose application has already been submitted based on the September 22, 1988, notice is invited to amend the application as necessary in light of the changes contained in this rule.

The following process will be used to rank order, separately, urban and rural enterprise zones.

1. Unique ranks will be assigned to each zone for each of the four criteria on the basis of the degree to which the zone exceeds the threshold for that criterion. A "highest" rank of "1" will be assigned to the zone that exceeds the threshold by the greatest amount.

2. If two or more zones have data with the same value (to the nearest tenth of a percentage point) on a given criterion, each such zone will be assigned the "highest" rank for the group with records of identical value. For example, if three zones are initially assigned ranks 10, 11, and 12, but if the data used to establish the ranks are equal to the same value, then the two "lower" ranks (*i.e.*, 11 and 12) will be revised to share the ranking of 10.

3. Each zone will receive an overall rank based on its urban or rural designation. For urban zones the overall rank will be the *average* of the unemployment rank, the poverty rank, and the *higher* of the rankings received for low income and for population loss. For rural zones, a zone's overall ranking will equal the highest of the four that the zone received.

4. Urban and rural zones will be ranked separately, based on overall rank. If zones are tied in overall rank, they will be further ordered on the basis of the criteria as they appear in the statute. Thus, if zones have the same overall ranking, they will be sequenced, based on, first, unemployment, then poverty, low income, and finally, population loss. (Except for purposes of this "tie breaking" procedure, each of

the statutory criteria will be of equal value.)

Other Matters

A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations in 24 CFR Part 50, which implement section 102(2)(C) of the National Environmental Policy Act of 1969, 42 U.S.C. 4332. The Finding of No Significant Impact is available for public inspection and copying during regular business hours in the Office of the Rules Docket Clerk, Room 10278, 451 Seventh Street SW., Washington, DC 20410.

This rule does not constitute a "major rule" as that term is defined in section 1(b) of the Executive Order on Federal Regulation issued by the President on February 17, 1981. Analysis of the rule indicated that it does not: (1) Have an annual effect on the economy of $100 million or more; (2) cause a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or (3) have a significant adverse effect on competition, employment, investment, productivity, innovations, or the ability of United States-based enterprises in domestic export markets. If Congress passes tax legislation to augment the authority under which this rule is promulgated, the implementing rule for such legislation would constitute a major economic impact and the Department would prepare a Regulatory Impact Analysis at that time.

Under 5 U.S.C. 605(b) (the Regulatory Flexibility Act), the Undersigned hereby certifies that this rule does not have a significant economic impact on a substantial number of small entities. While the Enterprise Zone Program will permit small entities to apply for designation and to benefit from their participation in the program, the impact on these entities is a function of the operation of Title VII of the Housing and Community Development Act of 1987, and is not caused by the rule making, which merely provides the machinery for designations of zones under the statutory criteria.

Executive Order 12612, Federalism

The General Counsel, as the Designated Official under section 6(a) of Executive Order 12612, *Federalism*, has determined that the policies contained in this rule do not have federalism implications and, thus, are not subject to additional review under the Order. While the Enterprise Zone program will encourage State and local governmental actions to augment the advantages intended to be provided in federally designated enterprise zones, nothing in the Federal statute, or in this rule, compels State or local governments to alter their laws or procedures in any manner, and no preemption of State law is involved in the administration of the Enterprise Zone program.

Executive Order 12606, the Family

The General Counsel, as the Designated Official under Executive Order 12606, *the Family*, has determined that this rule does not have a potential significant impact on family formation, maintenance, and general well-being, and thus, is not subject to further review under the Order. The rule provides procedures for the designation of enterprise zones, and there are expected to be indirect benefits to families arising out of zone designations, but the impact on family life is not of a nature that would require further review under the Order.

This rule was listed as sequence number 1032 in the Department's semiannual agenda of regulations published on October 24, 1988 (53 FR 41974, 42003–42004), under Executive Order 12291 and the Regulatory Flexibility Act at 49 FR 15960.

List of Subjects in 24 CFR Part 596

Enterprise zones, Economic development, Housing and urban development, Community development.

Accordingly, the final rule published on August 16, 1988 (53 FR 30944), is amended as follows:

PART 596—ENTERPRISE ZONE DEVELOPMENT

1. The authority citation for Part 596 continues to read as follows:

Authority: Title VII, Housing and Community Development Act of 1987 (42 U.S.C. 11501–11505); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

2. Section 596.302 is revised to read as follows:

§ 596.302 Selection factors for designation of nominated zones.

Zone designations will be based soley on rank order of distress. Each area will be ranked within each of the criteria set forth in § 596.101(d) on the basis of the amount by which the area exceeds the criteria. For the poverty criterion, the ranking will be based on the overall poverty rate for the smallest number of block groups or enumeration districts which contain the zone. Except as otherwise provided for rural areas in § 596.303, the rank order will then be determined by the highest average ranking with respect to the criteria set forth in §§ 596.101(d)(1) and 596.101(d)(2) and the one criterion, of those set forth in § 596.101(d)(3) or § 596.101(d)(4), that would give an area the higher ranking. In any instance where the data are missing and the applicant did not establish that the area would pass the test, the zone would be unranked on that criterion. If two or more zones have the same overall rank, ties will be broken based on the statutory order of the four ranking criteria, with unemployment considered first, followed by poverty, low income, and population loss.

3. Section 596.303 is revised to read as follows:

§ 596.303 Zone designation in rural areas.

For rural areas as defined in § 596.3, designation will be based on the highest ranking with respect to the single criterion among the four set forth in § 596.101(d), that gives an area the highest ranking. If two or more zones have the same overall rank, ties will be broken based on the statutory order of the four ranking criteria, with unemployment considered first, followed by poverty, low income, and population loss.

Date: November 28, 1988.

Jack R. Stokvis,

Assistant Secretary for Community Planning Development.

incentive stock option plans and employee stock purchase plans. The regulations affect corporations establishing incentive stock option or employee stock purchase plans and provide them with guidance concerning plan qualification requirements under sections 422A and 423 of the Code.

EFFECTIVE DATES: Section 14a.422A–2 is effective on August 13, 1981, and applies to options granted on or after such date and to certain options granted after December 31, 1975. Section 1.423–2(c)(1) is effective on January 1, 1964, and applies to options granted on or after such date.

FOR FURTHER INFORMATION CONTACT: Michael J. Grace of the Office of the Assistant Chief Counsel (Passthroughs and Special Industries), within the Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, DC 20224, Attention: CC:CORP:T:R, 202–566–6460 (not a toll-free call).

SUPPLEMENTARY INFORMATION:

Background

This document contains amendments to the Income Tax Regulations (26 CFR Part 1) under section 423 of the Internal Revenue Code of 1954, relating to employee stock purchase plans, and to the Temporary Income Tax Regulations Relating to Incentive Stock Options (26 CFR Part 14a) under section 422A of the Code. These amendments prescribe the method and degree of stockholder approval necessary to qualify a plan under sections 423 and 422A.

Current Stockholder Approval Requirements

For a stock option plan to qualify either as an employee stock purchase plan under section 423 or as an incentive stock option plan under section 422A, the plan must be approved by the stockholders of the corporation within 12 months before or after the date such plan is adopted. The regulations under section 423 provide that the stockholder approval must comply with all applicable provisions of the corporate charter and bylaws and the law of the State of incorporation. In addition, they provide that an employee stock purchase plan must be approved at a duly held stockholders' meeting and that the stockholders voting in favor of the plan must hold a majority of the outstanding voting stock of the corporation.

The temporary regulations under section 422A do not address the stockholder approval issue generally, but proposed regulation § 1.422A–2(b)(2) would permit stockholder approval in any manner consistent with applicable provisions of the corporate charter, bylaws and applicable State law prescribing the method and degree of approval for the granting of incentive stock options. In the absence of such a prescribed method and degree of stockholder approval, the proposed regulations would require an incentive stock option plan to be approved by a simple majority vote of stockholders, voting either in person or by proxy, at a duly held stockholders' meeting.

Explanation of Provisions

This document amends the regulations under sections 423 and 422A to provide uniform rules relating to stockholder approval. Stockholder approval of either an employee stock purchase plan or an incentive stock option plan must comply with all applicable provisions of the corporate charter, bylaws and applicable State law prescribing the method and degree of stockholder approval required for the issuance of corporate stock or options. If the applicable State law does not prescribe a method and degree of stockholder approval in such cases, then the plan must be approved either (a) by a majority of the votes cast at a duly held stockholders' meeting at which a quorum representing a majority of all outstanding voting stock is, either in person or by proxy, present and voting on the plan, or (b) by a method and in a degree that would be adequate under applicable State law in the case of an action requiring stockholder approval. For this purpose, an action requiring stockholder approval is an action on which stockholders would be entitled to vote if the action were taken at a duly held stockholders' meeting. Thus, if the applicable State law provides that an action must be approved either by majority vote of the stockholders at an annual or special meeting or by the written consent of stockholders, the action is one that requires stockholder approval and approval of the action through the use of either procedure is adequate.

Although the amendment of the regulations under section 423 was not the subject of a notice of proposed rulemaking, the issues considered in connection with this amendment were the subject of a notice of proposed rulemaking under section 422A (LR–279–81, 49 FR 4,504 (February 7, 1984)). For this reason, and because the amendment provides a less burdensome standard for stockholder approval than the current regulations, the Service has concluded that it is not necessary to issue a separate notice of proposed rulemaking with respect to the section 423 amendment.

Inconsistent Rulings

In Revenue Ruling 75–256, 1975–2 C.B. 194, the Service ruled that a stockholder approval requirement identical to the requirement in the current regulations under section 423 was not satisfied when votes were cast by stockholders holding 40 percent of the total outstanding voting stock of the corporation, and the plan was approved by 80 percent of the votes cast, because the plan was not approved by stockholders holding a majority of the outstanding voting stock of the corporation. In Revenue Ruling 80–29, 1980–1 C.B. 94, the Service ruled that a stockholders' meeting is not required when, in accordance with State law, a corporation's qualified stock option plan or employee stock purchase plan is approved by unanimous written consent of the stockholders of the corporation, but that a stockholders' meeting is required if there is less than unanimous written consent by the stockholders.

Under the amended regulations, the stockholder approval requirements of sections 423 and 422A may be satisfied even if (a) the stockholders voting in favor of the plan hold less than a majority of the outstanding voting stock, or (b) the plan is approved by written consent that is less than unanimous. Accordingly, the Service will not follow Revenue Rulings 75–256 and 80–29 in determining whether the stockholder approval requirements of sections 423 and 422A are satisfied, and the portion of Revenue Ruling 80–29 that deals with section 423 will be revoked.

Special Analyses

The Commissioner of Internal Revenue has determined that these rules are not major rules as defined in Executive Order 12291. Accordingly, a Regulatory Impact Analysis is not required.

A general notice of proposed rulemaking is not required by 5 U.S.C. 553 for temporary regulations or for final regulations to which 5 U.S.C. 553 (b) does not apply. Accordingly, the temporary and final regulations do not constitute regulations subject to the Regulatory Flexibility Act (5 U.S.C. Chapter 6).

Drafting Information

The principal author of these regulations is Michael J. Grace of the Office of the Assistant Chief Counsel (Passthroughs and Special Industries), within the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing

these regulations on matters of both substance and style.

List of Subjects

26 CFR Part 1

Income taxes, Employee benefit plans, Pensions, Stock options, Individual retirement accounts, Employee stock ownership plans.

26 CFR Part 14a

Income taxes, Incentive stock options.

Adoption of Amendments to the Regulations

For the reasons set out in the preamble, Parts 1 and 14a of Title 26, Chapter 1, Subchapter A of the Code of Federal Regulations are amended as follows:

PART 1—[AMENDED]

Paragraph 1. The authority for Part 1 continues to read in part:

Authority: 26 U.S.C. 7805. * * *

Par. 2. Section 1.423–2 is amended by revising paragraph (c)(1) to read as follows:

§ 1.423–2 Employee stock purchase plan defined.

* * * * *

(c) *Stockholder approval.* (1) An employee stock purchase plan must be approved by the stockholders of the granting corporation within 12 months before or after the date such plan is adopted. The approval of stockholders must comply with all applicable provisions of the corporate charter, bylaws and applicable State law prescribing the method and degree of stockholder approval required for the issuance of corporate stock or options. If the applicable State law does not prescribe a method and degree of stockholder approval in such cases an employee stock purchase plan must be approved—

(i) By a majority of the votes cast at a duly held stockholder's meeting at which a quorum representing a majority of all outstanding voting stock is, either in person or by proxy, present and voting on the plan; or

(ii) By a method and in a degree that would be treated as adequate under applicable State law in the case of an action requiring stockholder approval (i.e., an action on which stockholders would be entitled to vote if the action were taken at a duly held stockholders' meeting).

* * * * *

PART 14a—[AMENDED]

Par. 3. The authority for Part 14a continues to read as follows:

Authority: 26 U.S.C. 7805.

Par. 4. Part 14a is amended by adding § 14a.422A–2 to read as follows:

§ 14a.422A–2 Question and answer relating to the stockholder approval of incentive stock option plans.

The following question and answer relates to the stockholder approval of incentive stock option plans required by section 422A of the Internal Revenue Code as added by section 251 of the Economic Recovery Tax Act of 1981:

Q: In what manner must the stockholders' approval required by section 422A(b)(1) be obtained?

A: The approval of stockholders must comply with all applicable provisions of the corporate charter, bylaws and applicable State law prescribing the method and degree of stockholder approval required for the issuance of corporate stock or options. If the applicable State law does not prescribe a method and degree of stockholder approval in such cases an incentive stock option plan must be approved—

(1) By a majority of the votes cast at a duly held stockholders' meeting at which a quorum representing a majority of all outstanding voting stock is, either in person or by proxy, present and voting on the plan; or

(2) By a method and in a degree that would be treated as adequate under applicable State law in the case of an action requiring stockholder approval (i.e., an action on which stockholders would be entitled to vote if the action were taken at a duly held stockholders' meeting).

There is a need for immediate guidance with respect to the provisions contained in the Treasury decision. For this reason, it is found inpracticable to issue it with notice and public procedure under subsection (b) of section 553 of Title 5 of the United States Code or subject to the effective date limitation of subsection (d) of that section.

Lawrence B. Gibbs,

Commissioner of Internal Revenue.

Approved: November 2, 1988.

O. Donaldson Chapoton,

Assistant Secretary of the Treasury.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[FRL-3485-3]

Approval and Promulgation of State Implementation Plans; Call for Lead SIP Revisions for East Helena, MT

AGENCY: Environmental Protection Agency (EPA)

ACTION: Notice of State Implementation Plan (SIP) inadequacy and call for SIP revisions for East Helena, Montana; information notice

SUMMARY: EPA hereby gives notice that it has notified the Governor of Montana on October 1, 1988, that the Montana State Implementation Plan (SIP) for East Helena (Lewis and Clark County) is substantially inadequate to achieve the National Ambient Air Quality Standard (NAAQS) for lead

DATES: SIP revisions are due within one year of the date that EPA notified the State

ADDRESSES: Written comments should be addressed to: Chief, Air Programs Branch, Environmental Protection Agency, 999 18th Street, Suite 500, Denver, Colorado 80202-2405.

FOR FURTHER INFORMATION CONTACT: Laurie Ostrand, Air Programs Branch, 999 18th Street, Suite 500, Denver, Colorado 80202-2405, (303) 293-1814, (FTS) 564-1814.

SUPPLEMENTARY INFORMATION:

I. Background

On October 5, 1978, the Environmental Protection Agency (EPA) promulgated a National Ambient Air Quality Standard (NAAQS) for lead. The standard was set at a level of 1.5 micrograms of lead per cubic meter of air (ug/m^3), averaged over a calendar quarter. Section 110(a)(1) of the Clean Air Act (CAA) as amended August 1977, requires that each State submit a State Implementation Plan (SIP) which provides for the implementation, enforcement and maintenance of each NAAQS within the State.

II Finding of Inadequacy

The Montana SIP for Lead was approved in 49 FR 27944 (July 9, 1984). The SIP called for the lead NAAQS to be achieved in the East Helena area within three years from the date of EPA approval of the SIP or by August 8, 1987.

The SIP identified the principle sources of lead to be the following: ASARCO smelter complex including fugitive emissions from the ore concentrate piles, and from the ore and zinc handling operations; process and fugitive emissions from the ASARCO blast furnace operation; and fugitive soil and road dust emissions from the ASARCO smelter complex and the City of East Helena and adjacent areas. The strategies to control the emissions from the above mentioned sources were all implemented on schedule and by December 31, 1986.

Since the approval of the Lead SIP, lead levels in the East Helena area have shown a downward trend. However, the NAAQS for lead (1.5 ug/m^3—quarterly average) continues to be violated. The table below shows the ambient lead levels in ug/m^3, for calendar years (CY) 1986 and 1987, and first quarter CY 1988.

[1] Shut down
[2] Collocated site

III. Call for SIP Revision

This finding of inadequacy requires Montana, pursuant to the provision of section 110(a)(2)(H) of the CAA, 42 U.S.C. section 7410(a)(2)(H), to carry out its SIP obligations and to adopt and submit to EPA for approval whatever additional control measures are necessary to assure timely attainment and maintenance of the lead NAAQS.

EPA is extending the section 110(c)(1)(C) of the CAA, 42 U.S.C. 7410(c)(1)(C), revision period to one year from the date of the letter notifying the Governor of the Lead SIP inadequacies to adopt and submit the necessary revision. In the absence of a curative SIP revision submitted within the one year period, EPA will be obliged to propose the appropriate CAA sanctions for the area in question. The State is to submit to EPA, within 60 days of the letter to the Governor, a schedule for the development of the SIP revisions to ensure that the SIP will be submitted on time.

IV. Final Action

In EPA's view, this finding of inadequacy does not constitute final actions that are reviewable inasmuch as they are not ripe for review. The determinations will not be sufficiently concrete for judicial resolution until additional action is taken by EPA in reliance on them. Further, Montana will not suffer hardship from delaying review because the findings do not have an immediate, direct and substantial impact. Also, Montana will have a later opportunity to obtain judicial review of the findings.

The 60-day time period for filing a petition for review under section 307(b) of the CAA is tolled until EPA makes the findings ripe by taking additional action in reliance on them, such as imposing sanctions or promulgating revisions, because a time limitation on petitions for judicial review can only run against challenges ripe for review.

40 CFR Part 52

[FRL-3481-3; TN-077]

Approval and Promulgation of Implementation Plans; Tennessee; Approval of SIP Revision

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: Today, EPA approves as a State Implementation Plan (SIP) revision

for the State of Tennessee Rule 1200–3–19–.06, which requires logs for operating hours for sources that are limited by Chapter 1200–3–19 (Emission Standards and Monitoring Requirements for Particulate and Sulfur Dioxide Nonattainment Areas). This revision which was submitted by Tennessee on February 19, 1980, was inadvertently overlooked by Region IV at the time of the submittal.

DATES: This action will be effective on January 31, 1989, unless notice is received by January 3, 1989, that someone wishes to submit adverse or critical comments.

ADDRESSES: Copies of materials submitted by the State may be examined during normal business hours at the following locations:

Public Information Reference Unit, Library Systems Branch, Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460.
Environmental Protection Agency, Region IV, Air Programs Branch, 345 Courtland Street, NE., Atlanta, Georgia 30365.
Division of Air Pollution Control, Tennessee Department of Health and Environment, Customs House 4th Floor, 701 Broadway, Nashville, Tennessee 37219.

FOR FURTHER INFORMATION CONTACT: Ms. Rosalyn D. Hughes, Air Programs Branch, EPA Region IV, at the above address and telephone number (404) 347–2864 or FTS 257–2864.

SUPPLEMENTARY INFORMATION: On February 19, 1980 the State of Tennessee submitted four rules as SIP revisions. Two of the rules, 1200–3–12–.02 (Procedures for Ambient Sampling and Analysis) and 1200–3–2–.01 (General Definitions) were approved earlier, on June 24, 1982 (47 FR 27267). No action was taken on Rule 1200–3–19–.05 (Operating Permits and Emission Limiting Conditions) since the rule dealt with operating permits. Rule 1200–3–19–.06 (Logs for Operating Hours) should have been approved, but was not. This notice corrects that oversight.

Rule 1200–3–19–.06 states that any air contaminant source with operating hours restricted by a rule of Chapter 1200–3–19 (Emission Standards and Monitoring Requirements for Particulate and Sulfur Dioxide Nonattainment Areas) must keep a running log, showing the hours of operation of each source with the startup and shutdown time indicated. The log must be available for the Technical Secretary of the Tennessee Air Pollution Control Board at all times and copies must be maintained for at least two full calendar years.

Final Action

Since Rule 1200–3–19–.06 is consistent with EPA policy and requirements, it is hereby approved. The public should be advised that this action will be effective 60 days from the date of this **Federal Register** notice. However, if notice is received within 30 days that someone wishes to submit adverse or critical comments, this action will be withdrawn and two subsequent notices will be published before the effective date. One notice will withdraw the final action and another will begin a new rulemaking by announcing a proposal of the action and establishing a comment period.

Under section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by January 31, 1989. This action may not be challenged later in proceedings to enforce requirements. (See 307(b)(2).)

Under 5 U.S.C. section 605(b), I certify that this SIP revision will not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709.)

The Office of Management and Budget has exempted this rule from requirements of section 3 of Executive Order 12291.

List of Subjects in 40 CFR Part 52

Air pollution control, Incorporation by reference, Intergovernmental relations, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides.

Note: Incorporation by reference of the State Implementation Plan for the State of Tennessee was approved by the Director of the Federal Register on July 1, 1982.

Date: November 17, 1988.

Lee M. Thomas,

Administrator.

Part 52 of Chapter I, Title 40, Code of Federal Regulations, is amended as follows:

PART 52—[AMENDED]

1. The authority citation for Part 52 continues to read as follows:

Authority: 42 U.S.C. 7401–7642.

Subpart RR—Tennessee

2. Section 52.2220 is amended by adding paragraph (c)(88) to read as follows:

§ 52.2220 Identification of plan.

* * * * *

(c) * * *

(88) Rule 1200–3–19–.06, Logs for Operating Hours, submitted on February 19, 1980, by the Tennessee Department of Health and Environment.

(i) *Incorporation by reference.* (A) Rule 1200–3–19–.06, Logs for Operating Hours which became State-effective February 14, 1980.

(B) Letter of February 19, 1980, from the Tennessee Department of Public Health.

(ii) Other material—none.

BILLING CODE 6560–50–M

---

40 CFR Part 52

[FRL–3484–3]

Approval and Promulgation of State Implementation Plan; Montana

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: EPA is today approving the State of Montana's revision to its Prevention of Significant Deterioration (PSD) modeling guidelines and revisions to its Particulate Matter, Fuel Burning Equipment Regulation. The modeling guideline revision incorporates regulations promulgated by the Administrator (52 FR 32176) to specify models used to comply with the Clean Air Act's (CAA) requirements for PSD (sections 165 through 169 of the CAA).

DATES: This action will be effective on January 31, 1989, unless notice is received by January 3, 1989, that someone wishes to submit adverse or critical comments.

ADDRESSES: Copies of the revisions are available for public inspection between 8:00 a.m. and 4:00 p.m., Monday through Friday, at the following offices:

Environmental Protection Agency, Region VIII, Air Programs Branch, 999 18th Street, Suite 500, Denver, Colorado 80202–2405.
Environmental Protection Agency, Public Information Reference Unit, Waterside Mall, 401 M Street, SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Laurie Ostrand, Air Programs Branch, Environmental Protection Agency, 999 18th Street, Suite 500, Denver, Colorado 80202–2405, (303) 293–1814, (FTS) 564–1814.

SUPPLEMENTARY INFORMATION: .

Background

On March 9, 1988, the Governor of Montana submitted a request for modification of the Montana State Implementation Plan (SIP). The

modification consisted of revisions to the following rules:

1. Standard of Performance of New Stationary Sources (16.8.1423);
2. Emission Standards for Hazardous Air Pollutants (16.8.1424);
3. Air Quality Models (16.8.937); and
4. Particulate Matter, Fuel Burning Equipment (16.8.1402).

At this time, EPA is only acting on the Air Quality Models Rule (16.8.937) and the Particulate Matter, Fuel Burning Equipment Rule (16.8.1402). The Standards of Performance of New Stationary Sources and Emission Standards for Hazardous Air Pollutants Rules were addressed in a letter of delegation sent to the Governor on June 17, 1988. Such letter shall be published in the **Federal Register** in the near future.

Air Quality Models (16.8.937)

Section 165(e)(3)(D) of the CAA requires the Administrator to promulgate regulations specifying with reasonable particularity models to be used to comply with the CAA's PSD requirements. To carry out these requirements, the 1978 "Guidelines on Air Quality Models" was incorporated by reference in 40 CFR 51.24 (now renumbered 40 CFR 51.166) and 52.21. On September 9, 1986 (51 FR 32176), EPA promulgated amendments to 40 CFR 51.24 (now 40 CFR 51.166) and 52.21 to substitute by reference the "Guidelines on Air Quality Models (Revised)," EPA 450/2–78–027R, in these regulations. This change became effective October 9, 1986. The CAA, however, allows nine months (until July 9, 1987) for affected states to make the necessary changes in their programs.

A review of Montana's rules (16.8.937) categorized the State as one whose rules specifically precluded the use of the federal modeling guideline as amended. Because of this situation the State revised its modeling guidelines and submitted such revisions to EPA with a letter dated March 9, 1988. This submittal constitutes a revision to the State's PSD rule. The PSD program was originally transferred to the State effective June 6, 1983. (see May 5, 1983, 48 FR 20231.)

Subsequent to the State revising its modeling rules (16.8.937), EPA promulgated Supplement A (1987) on January 6, 1988 (53 FR 392). Supplement A (1987) adds four models to the modeling guidelines. Although the State has nine months from the effective date (or by November 5, 1988 in this case) to submit revisions to the rule, in the matter of efficiency, EPA is addressing Supplement A (1987) in this action.

Because the State's recent rule revision precludes the use of Supplement A (1987), the EPA requested, by letter dated June 2, 1988, that the State submit a committal letter stating that it would: (a) Revise its rules in a timely manner to include Supplement A (1987) and (b) limit PSD modeling to analyses which comply with the revised modeling guidelines and Supplement A (1987) or models otherwise approved for use by EPA. Such letter was submitted to EPA by the State Director of Air Quality Bureau, Jeffrey T. Chaffee, on September 9, 1988.

Particulate Matter, Fuel Burning Equipment (16.8.1402)

In revising the Particulate Matter, Fuel Burning Equipment Rule (16.8.1402), the State added an exemption to the Rule for residential solid fuel combustion devices such as fireplaces and wood and coal stoves (16.8.1402(4)). The State revised this Rule in consideration of the potential literal reading of the Rule could extend its applicability to residential wood burning devices. The State believes that this 16.8.1402 was never intended to be applied to residential wood stoves.

EPA interprets this revision to mean that such solid fuel combustion devices are exempted only from 16.8.1402. Such residential fuel combustion devices, however, may be subject to other rules, if applicable.

Final Action

EPA hereby approves the revisions to the Air Quality Modeling rule (16.8.937) based upon the State's commitment to revise 16.8.937 to incorporate Supplement A (1987) and based further upon the State's commitment to follow the Guidelines on Air Quality Models, including Supplement A, for all PSD permits. EPA approves the revision to the Particulate Matter, Fuel Burning Equipment rule (16.8.1402) with the interpretation as stated.

EPA is publishing this action without prior proposal because the Agency views this as a noncontroversial amendment and anticipates no adverse comments. This action will be effective 60 days from the date of the **Federal Register** notice unless, within 30 days of its publication, notice is received that adverse or critical comments will be submitted.

If such notice is received, this action will be withdrawn before the effective date by publishing two subsequent notices. One notice will withdraw the final action and another notice will begin rulemaking by announcing a proposal of the action and establishing a comment period. If no such comments are received, the public is advised that this action will be effective January 31, 1989.

EPA finds good cause for making the action taken in this notice immediately effective because the implementation plan revisions are already in effect under State law or regulation and EPA's approval poses no additional regulatory burden.

Under 5 U.S.C. section 605(b), I certify that this SIP revision will not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709.)

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by January 31, 1989. This action may not be challenged later in proceedings to enforce its requirements (see CAA section 307(b)(2)).

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

List of Subjects in 40 CFR Part 52

Air pollution control, Incorporation by reference, Particulate matter.

Note.—Incorporation by reference of the State Implementation Plan for the State of Montana was approved by the Director of the Federal Register on July 1, 1982.

Date: November 23, 1988.

Lee M. Thomas,

Administrator.

Part 52, Chapter I, Title 40 of the *Code of Federal Regulations* is amended as follows:

PART 52—[AMENDED]

1. The authority citation for Part 52 continues to read as follows:

Authority: 42 U.S.C. 7401–7462.

Subpart BB—Montana

2. Section 52.1370 is amended by adding paragraph (c)(23) to read as follows:

§ 52.1370 Identification of plan.

* * * * *

(c) * * *

(23) On March 9, 1988, the Governor submitted a plan revising the State's Air Quality Modeling Rule (16.8.937) and its Particulate Matter, Fuel Burning Equipment Rule (16.8.1402).

(i) *Incorporation by reference.* (A) Modification to the State of Montana Air Quality Rules, that is the Air Quality Modeling rule (16.8.937) and the Particulate Matter, Fuel Burning Equipment rule (16.8.1402) adopted on January 15, 1988.

3. Section 52.1382 is amended by adding paragraph (c) to read as follows:

§ 52.1382 Prevention of significant deterioration of air quality.

* * * * *

(c) The State of Montana has committed to revise its Air Quality Modeling Rule (16.8.937) to incorporate Supplement A (1987). Until such rule is revised, the State will limit Prevention of Significant Deterioration (PSD) modeling to analyses which comply with the revised modeling guideline and Supplement A (1987) or models otherwise approved by EPA. In a letter to Douglas M. Skie, EPA, dated September 9, 1988, Jeffrey T. Chaffee, Director, Air Quality Bureau stated:

> EPA requested Montana to incorporate by reference into the Montana PSD rule "Supplement A to the Guideline on Air Quality Models" (Revised July, 1987). Montana agrees to submit to EPA a revised SIP containing such changes by April 30, 1989. * * * During the interim, the department will continue to follow the "Guidelines on Air Quality Models" including Supplement A for all PSD permits.

40 CFR Part 799

[OPTS-42088E; FRL-3484-5]

Office of Solid Waste Chemicals; Correction

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule; correction.

SUMMARY: This document corrects a test rule under 40 CFR 799.5055 on hazardous waste constituents, published in the **Federal Register** of June 15, 1988 (53 FR 22300). This action is necessary to remove references to phthalic anhydride testing requirements.

EFFECTIVE DATE: Effective on December 2, 1988.

FOR FURTHER INFORMATION CONTACT: Michael Stahl, Director, TSCA Assistance Office (TS-799), Office of Toxic Substances, Room EB-44, 401 M Street SW., Washington, DC 20460, (202) 554-1404, TDD (202) 554-0551.

SUPPLEMENTARY INFORMATION: EPA is correcting 40 CFR 799.5055 (53 FR 22300) by deleting the hazardous waste constituent phthalic anhydride from the list of chemicals for which testing is required.

In accordance with section 4(a) of the Toxic Substances Control Act (TSCA), a rule was promulgated under 40 CFR 799.5055 (53 FR 22300; June 15, 1988) to require health effects and/or chemical fate testing for 24 chemicals that are hazardous waste constituents. One of these chemicals, phthalic anhydride (CAS No. 85-44-9) was designated for soil adsorption testing.

EPA, in response to a letter received form the Chemical Manufacturers Association (CMA) Phthalate Esters Program Panel finds that phthalic anhydride was erroneously included in the list of 24 chemicals subject to testing under the final test rule for the Office of Solid Waste Chemicals. Comments received from CMA during the comment period for the proposed test rule noted that phthalic anhydride and maleic anhydride, a structurally similar chemical, hydrolyze very rapidly and are both inappropriate candidates for soil sorption and biodegradation testing. These comments were accepted by EPA, and maleic anhydride was removed from the final list of chemicals for which testing was required (53 FR 22300). However, phthalic anhydride was inadvertently left on the final list.

Because EPA already received comment on this issue, EPA finds that further public comment is unnecessary. In addition, EPA finds that making this deletion effective immediately will relieve administrative and testing burdens, and that good cause exists to make the amendment immediately effective.

PART 799—[AMENDED]

§ 799.5055 [Amended]

Accordingly, the table in 40 CFR 799.5055(c) appearing at page 22324, third column, FR Doc. 88-13347, published June 15, 1988, is corrected by removing the entries for "Phthalic anhydride, CAS No. 85-44-9(d)(1)."

Dated: November 23, 1988.

Victor J. Kimm,

Acting Assistant Administrator for Pesticides and Toxic Substances.

BILLING CODE 6560-50-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Public Health Service

Health Care Financing Administration

42 CFR Parts 74, 405, and 441

[HSQ-150-F]

Medicare and Medicaid Programs; Medicare, Medicaid, and Clinical Laboratories Improvement Act (CLIA) Patient Confidentiality Rules

AGENCY: Public Health Service (PHS) and Health Care Financing Administration (HCFA), HHS.

ACTION: Final rule.

SUMMARY: This final rule eliminates the requirement that a laboratory maintain the name and other identification of individuals undergoing testing to determine the presence of the Human Immunodeficiency Virus (HIV) antibody or causative agent, if the laboratory is not seeking Medicare or Medicaid payment for these tests. However, it will not excuse a laboratory from maintaining such information if it is required to do so by State law. Those laboratories or entities seeking payment from the Medicare or Medicaid programs for HIV testing must continue to provide the name and other identification of persons tested to assure proper payment of claims. However, State Medicaid programs may choose to approve the use of alternative identifiers in place of the patient's name for HIV testing of Medicaid recipients. Also, laboratories licensed under CLIA will not be required to maintain the names and other identification of individuals being tested to determine the presence of the HIV antibody or causative agent. The intent of this change is to add further protection of confidentiality of HIV test results and to encourage voluntary testing.

EFFECTIVE DATE: These regulations are effective January 3, 1989.

FOR FURTHER INFORMATION CONTACT: Pam Renner, (301) 966-6818.

SUPPLEMENTARY INFORMATION:

I. Background

Acquired Immune Deficiency Syndrome (AIDS) is a major public health issue. In order to promote the laboratory testing of persons who suspect they may have been exposed to HIV, the virus associated with AIDS, current public health practice is to

VOL 53 ISS 232 DE 2 1988 UMI

protect the privacy of these individuals and to maintain the strictest confidentiality concerning their health records. A number of States have enacted statutes that protect the anonymity of persons tested for the presence of the HIV antibody.

However, most facilities performing HIV testing are approved as hospital or independent laboratories in the Medicare program. The Medicare regulations (42 CFR 405.1316(f)(2) for independent laboratories and 42 CFR 482.27(b) for hospital based facilities) specify that the names and other identification of the individuals whose specimens are being tested must be obtained and maintained by the testing facility, and the regulations at § 405.1316(f) (2) and (3) and § 482.27(b) require laboratories to maintain the name of the licensed physician or other authorized person or clinical laboratory that submitted the specimen and the names of individuals presenting themselves for testing. Also, laboratories that test specimens for Medicaid recipients must meet the Medicare requirements for these facilities (section 1902(a)(9)(C) of the Social Security Act). Laboratories testing specimens under the provisions of the Clinical Laboratories Improvement Act of 1967 (CLIA) must meet similar recordkeeping requirements, as specified at 42 CFR 74.53 (b) and (c).

On March 31, 1988 we published in the **Federal Register** (53 FR 10404) proposed regulations with a 60 day comment period. The changes we proposed were designed to eliminate the personal identification of persons undergoing testing to determine the presence of the HIV antibody or causative agent, if the laboratory is not seeking Medicare or Medicaid payment. The provisions of the proposed regulations, the comments received and our responses, are discussed below.

II. Provisions of the Proposed Regulation

As a result of the growing need to heighten public understanding of AIDS and to encourage voluntary testing for the disease, we proposed—

- To amend the requirement for laboratories to maintain names and identification of individuals undergoing testing to determine the presence of the HIV antibody or the causative agent, provided that Medicare or Medicaid payment for testing is not sought;
- That laboratories or entities seeking payment for HIV testing under the Medicare program would have to continue to provide the name and other identification of persons tested to assure proper payment of claims but as with other testing, would not be required to maintain records linking the results of the test with any patient identifier;
- To allow States the flexibility under their Medicaid programs to approve the use of alternative identifiers in place of the patient's name;
- That CLIA licensed laboratories that do not seek Medicare or Medicaid payments would not be required to maintain the names and other identification of individuals being tested for the presence of the HIV antibody or causative agent;
- To permit individuals who submit their own specimens for testing to maintain their anonymity;
- That all of the confidentiality rules applicable to independent laboratories would apply also to records maintained by hospital-based laboratories and clinical laboratories located in skilled nursing facilities (SNFs), and intermediate care facilities for the mentally retarded (ICF/MRs); and
- That laboratories would not be excused from maintaining records required by State law. Therefore, these regulations would provide flexibility for the State to elect whether or not to require reporting of positive test results.

III. Analysis and Response to Comments

We received 13 timely items of correspondence in response to the proposed rule. Comments were received from laboratory associations, State Medicaid agencies, health care personnel, and health advocate associations. In general, the commenters considered HCFA's efforts to provide anonymity for laboratory testing of high risk individuals a "positive step towards encouraging voluntary testing and protecting the privacy of individuals." Of the 13 comments we received, 3 had concerns that needed to be addressed specifically. A summary of these comments and our responses to them follows:

Comment: Two commenters suggested that the proposed regulation was a step in the right direction but they were concerned about the requirement for maintaining the name and other identification of individuals undergoing HIV testing when Medicare payment is requested by the laboratory. They believed that individuals who do not want their names kept on file may not be able to pay the high out-of-pocket expense, and therefore not seek testing.

Response: While we appreciate the thoughtfulness and sincerity of the commenters, we remain committed to the principles on which we have based the proposal and we have not accepted these comments. The Medicare program requires the name of the beneficiary receiving laboratory testing to assure that the beneficiary is eligible for the service and to assure the proper payment of claims. This kind of information is required for payment of all claims for laboratory tests submitted for Medicare beneficiaries. Even though laboratories must obtain the name of Medicare patients to be assured payment of all Medicare claims, laboratories are allowed to maintain billing records separate from the actual test result records.

Comment: One commenter requested that our proposal be deferred until we clarify or identify the rule that permits Medicare to require laboratories to meet specific requirements for patients who are not seeking Medicare payment or Medicaid reimbursement.

Response: The Medicare statute consistently refers to "all" patients, and not just Medicare beneficiaries, in imposing conditions of participation on entities that want to participate in the Medicare program, and in authorizing the Secretary to impose additional health and safety requirements applicable to such entities.

IV. Provisions of the Final Rule

As explained in section III of this preamble, we did not receive comments that were opposed to the proposed rule; rather, the majority of comments supported the proposed rule. Therefore, we are adopting in final, the rules as proposed on March 31, 1988.

V. Regulatory Impact Statement

Executive Order (E.O.) 12291 requires us to prepare and publish a regulatory impact analysis for any final regulation that meets one of the E.O. criteria for a "major rule." A major rule is defined as any document that is likely to: (1) Have an annual effect on the economy of $100 million or more (2) cause a major increase in costs or prices for consumers, individual industries, government agencies, or geographic regions, or (3) result in significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States based enterprises in domestic or export markets.

We have determined that this final rule neither results in an annual economic impact of $100 million or more nor meets any other criteria of the Executive Order 12291. A regulatory impact analysis is not required.

In addition, we generally prepare a regulatory flexibility analysis that is consistent with the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 through 612) unless the Secretary certifies that a rule will not have a significant economic impact on a substantial number of small entities. For purposes of the RFA, we consider all laboratories to be small entities.

Also, section 1102(b) of the Act requires the Secretary to prepare a regulatory impact analysis for any final rule that may have a significant impact

on the operations of a substantial number of small rural hospitals. Such an analysis must conform to the provisions of section 604 of the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hosptial with fewer than 50 beds located outside a metropolitan statistical area.

This rule will allow affected laboratories to conform their operations to accepted public health practices regarding the confidentiality of HIV testing. It will not impose any burdens or costs on affected entities. Therefore, we have determined, and the Secretary certifies, that this final rule will not have a significant economic impact on a substantial number of small entities and will not have a significant economic impact on the operations of a substantial number of small rural hospitals.

VI. Other Required Information

Paperwork Reduction Act

Sections 74.53, 405.1316, and 441.16 of this rule reduce information collection requirements for laboratories. These changes are currently approved under OMB Control No. 0938–0527.

List of Subjects

42 CFR Part 74

Laboratories, Reporting and recordkeeping requirements.

42 CFR Part 405

Administrative practice and procedure, Health facilities, Health professions, Kidney diseases, Laboratories, Medicare, Nursing homes, Reporting and recordkeeping requirements, Rural areas, X-rays.

42 CFR Part 411

Family planning, Grant programs—health, Infants and children, Medicaid, Penalties, Prescription drugs, Reporting and recordkeeping requirements.

For the reasons set out in the preamble, Title 42 of the Code of Federal Regulations is amended as follows:

A. Part 74 is amended as set forth below:

PART 74—CLINICAL LABORATORIES

1. The authority citation for Part 74 continues to read as follows:

Authority: Sec. 215, 58 Stat. 690; 42 U.S.C. 216.

2. In § 74.53, the introductory language is republished and paragraphs (b) and (c) are revised to read as follows:

§ 74.53 Specimen records.

Daily accession records shall contain the following information:

* * * * *

(b) The name and other identification of the person from whom the specimen was taken, if available. However, the name and other identification is not required of an individual whose specimen is tested for—

(1) The presence of the Human Immunodeficiency Virus (HIV) antibody; or

(2) The isolation and identification of the HIV causative agent.

(c) The name of the licensed physician or other person or clinical laboratory who or which submitted the specimen, except the name of the other person is an individual submitting his or her own specimen to be tested for—

(1) The presence of the HIV antibody; or

(2) The isolation and identification of the HIV causative agent.

* * * * *

B. Part 405 is amended as follows:

PART 405—FEDERAL HEALTH INSURANCE FOR THE AGED AND DISABLED

1. The authority citation for Part 405 Subpart M is revised to read as follows:

Authority: Secs. 1102, 1861(s) (3), (12), and (13), 1864, and 1871 of the Social Security Act as amended (42 U.S.C. 1302, 1395x(s) (3), (11), and (12), 1395aa, and 1395hh).

2. In § 405.1316(f), the introductory language is republished and paragraphs (f) (2) and (3) are revised to read as follows:

§ 405.1316 Condition—clinical laboratory; management.

* * * * *

(f) *Standard; specimens—records.* The laboratory maintains a record indicating the daily accession of specimens, each of which is numbered or otherwise appropriately identified. The factor explaining the standard is as follows: Records contain the following information:

* * * * *

(2) The name and other identification of the person from whom the specimen was taken, except for individuals for whom a request for payment is not being made under the Medicare program and whose specimens are being tested for—

(i) The presence of the Human Immunodeficiency Virus (HIV) antibody; or

(ii) The isolation and identification of the HIV causative agent.

(3) The name of the licensed physician or other authorized person or clinical laboratory who or which submitted the specimen, except that when request for Medicare payment is not being made, the name of the other authorized person is not required, if the other authorized person is an individual submitting his or her own specimen to be tested for—

(i) The presence of the HIV antibody; or

(ii) The isolation and identification of the HIV causative agent.

* * * * *

C. Part 441 as amended as follows:

PART 441—SERVICES: REQUIREMENTS AND LIMITS APPLICABLE TO SPECIFIC SERVICES

1. The authority citation for Part 441 continues to read as follows:

Authority: Sec. 1102 of the Social Security Act (42 U.S.C. 1302).

2. Section 441.16 is added to Subpart A to read as follows:

§ 441.16 Laboratory services.

(a) The plan must provide for payment of laboratory services as defined in § 440.30 of this subchapter if provided by—

(1) An independent laboratory that meets the requirements for participation in the Medicare program found in § 405.1316 of this chapter;

(2) A hospital-based laboratory that meets the requirements for participation in the Medicare program found in § 482.27 of this chapter;

(3) A rural health clinic, as defined in § 491.9 of this chapter; or

(4) A skilled nursing facility—based clinical laboratory, as defined in § 405.1128(a) of this chapter.

(b) Except as provided under paragraph (c), if a laboratory or other entity is requesting payment under Medicaid for testing for the presence of the human immunodeficiency virus (HIV) antibody or for the isolation and identification of the HIV causative agent as described in § 405.1316(f) (2) and (3) of this chapter, the laboratory records must contain the name and other identification of the person from whom the specimen was taken.

(c) An agency may choose to approve the use of alternative identifiers, in place of the requirement for patient's name, in paragraph (b) of this section for HIV antibody or causative agent testing of Medicaid recipients.

(Catalog of Federal Domestic Assistance Program No. 13.714, Medical Assistance Program; No. 13.773, Medicare—Hospital Insurance Program; and No. 13.744, Medicare—Supplementary Medical Insurance)

Dated: October 3, 1988.

William L. Roper,

Administrator, Health Care Financing Administration.

Approved: November 1, 1988.

BILLING CODE 4120-01-M

DEPARTMENT OF THE INTERIOR

Office of Hearings and Appeals

43 CFR Part 4

Department Hearings and Appeals Procedures; Indian Probate Proceedings; Age Requirements

AGENCY: Office of Hearings and Appeals, Interior.

ACTION: Final rule.

SUMMARY: This office amends its regulations governing hearings in Indian probate proceedings to reflect a statutory amendment concerning the age at which an Indian can execute a will devising trust or restricted property.

EFFECTIVE DATE: December 2, 1988.

FOR FURTHER INFORMATION CONTACT: Parlen L. McKenna, Chief Administrative Law Judge, Hearings Division, Office of Hearings and Appeals, 4015 Wilson Boulevard, Arlington, VA 22203, Telephone (703) 235-3800.

SUPPLEMENTARY INFORMATION: This Office amends 43 CFR 4.260 to correct an existing regulation based on the enactment of new legislation. Section 4.260 states that an Indian of the age of 21 years or over can execute a will devising trust or restricted property. The statutory age at which an Indian can execute such a will, codified in 25 U.S.C. 373, was lowered to 18 in the Act of November 5, 1987, Pub. L. 100-153, sec. 2, 101 Stat. 886.

Paperwork Reduction Act

This document does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.*

Compliance With Other Laws

The Department of the Interior has determined this document is not a major rule under Executive Order 12291 and certifies this document will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*).

This rule is categorically excluded from the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321 through 4347), process because it is of an administrative, financial, legal, technical, and procedural nature, and therefore neither an environmental assessment nor an environmental impact statement is required. 40 CFR 1508.4; 516 DM 2.3A.

The Department is publishing this document as a final rule without prior publication of a proposed rule, and effective immediately upon publication. This action is being taken because the Department has determined that the statutory enactment is clear and unambiguous, leaving no room for interpretation. Furthermore, prompt revision of the regulation to effectuate the statutory enactment is in the public interest. Publication of a proposed rule would unnecessarily delay this process and would result in needless additional expense. Therefore the Department concludes for good cause that notice and public comment are unnecessary. The Department also concludes for the above reasons that good cause exists under 5 U.S.C. 553(d)(3) to make this rule effective upon publication.

This document was written by Kathryn Lynn, Chief Administrative Judge, Board of Indian Appeals, Office of Hearings and Appeals.

List of Subjects in 43 CFR Part 4

Administrative practice and procedure, Indians.

Date: November 7, 1988.

Earl E. Gjelde,

Under Secretary.

For the reasons set out in the preamble, Title 43, Part 4, Subpart D, of the *Code of Federal Regulations*, is amended as set forth below;

PART 4—[AMENDED]

1. The authority citation for Part 4, Subpart D, continues to read as follows:

Authority: Secs. 1, 2, 36 Stat. 855, as amended, 856, as amended, sec. 1, 38 Stat. 586, 42 Stat. 1185, as amended, secs. 1, 2, 56 Stat. 1021, 1022; R.S. 463, 465; 5 U.S.C. 301; 25 U.S.C. secs. 2, 9, 372, 373, 374, 373a, 373b.

2. Paragraph (a) of 43 CFR 4.260 is amended by changing "21" to "18" to read as follows:

§ 4.260 Making; review as to form; revocation.

(a) An Indian of the age of 18 years or over * * *.

* * * * * *

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 87-506; RM-5850]

Radio Broadcasting Services; Apache Junction, AZ

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document substitutes Channel 296C2 for Channel 296A at Apache Junction, Arizona, and modifies the Class A license of Beta Communications, Inc. for Station KVVA-FM, as requested, to specify operation on the higher class channel, thereby providing that community with its first wide coverage area FM service. Reference coordinates for Channel 296C2 at Apache Junction are 33-23-49 and 111-27-16. With this action, the proceeding is terminated.

EFFECTIVE DATE: January 13, 1989.

FOR FURTHER INFORMATION CONTACT: Nancy Joyner, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Report and Order, MM Docket No. 87-506, adopted November 4, 1988, November 28, 1988. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857-3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

47 CFR Part 73

[MM Docket No. 88-157; RM-6150 and RM-6437]

Radio Broadcasting Services; Arcadia and Manistee, MI

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document allots FM Channel 300A to Manistee, Michigan, in response to a counterproposal filed by J. Edward Rossel. The original petition in this proceeding was filed by Kenneth J. Burch, requesting the allotment of FM Channel 300A to Arcadia, Michigan. No supporting comments were received for Channel 300A at Arcadia and in accordance with Commission policy, no further consideration will be given to the allotment of a channel at Arcadia due to a lack of interest. Channel 300A can be allotted to Manistee in compliance with the Commission's spacing requirements at coordinates 44-14-48 and 86-19-12. Canadian concurrence has been obtained for the allotment of 300A at Manistee. With this action, this proceeding is terminated.

DATES: *Effective:* January 9, 1989. The window period for filing applications for Channel 300A at Manistee will open on January 10, 1989, and close on February 9, 1989.

FOR FURTHER INFORMATION CONTACT: Kathleen Scheuerle, Mass Media Bureau, (202) 634-6530.

47 CFR Part 80

[PR Docket No. 87-275; DA 88-1723]

Amendment of Part 80 of the Rules to Designate VHF Marine Channel 13 for Bridge-to-Bridge Communication on the Great Lakes

AGENCY: Federal Communications Commission.

ACTION: Order.

SUMMARY: This Order establishes the effective date of February 1, 1989 for rules adopted in PR Docket 87-275.

This action is necessary to inform the public of the final agreement between Canada and the United States on the use of channel 13 for bridge-to-bridge communications on the Great Lakes.

The effect of this action is to specify an effective date for the implementation of channel 13 in lieu of channel 16 as a bridge-to-bridge channel on the Great Lakes.

EFFECTIVE DATE: February 1, 1989.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Jim Shaffer, Special Services Division, Private Radio Bureau, (202) 632-7197.

SUPPLEMENTARY INFORMATION:

List of Subjects in 47 CFR Part 80

Bridge-to-bridge, Canada, Great Lakes, Ship stations, Marine safety.

Order

Adopted: October 27, 1988.
Released: November 14, 1988.
By the Chief, Private Radio Bureau.

1. On March 8, 1988 (published May 13, 1988, 53 FR 17052), Part 80 of the Commission's Rules was amended in PR Docket 87-275 (3 FCC Rcd 1861) to designate VHF marine channel 13 (156.650 MHz), rather than the currently used channel 16 (156.800 MHz), for vessel bridge-to-bridge (navigational) communications on the Great Lakes. The effective date for these rule amendments was deferred until after the conclusion of an agreement with Canada to amend the Technical Regulations annexed to the Agreement between the United States and Canada for Promotion of Safety on the Great Lakes by Means of Radio, as amended (Great Lakes Radio Agreement). On August 10, 1988, an agreement with Canada was reached. Subsequently, a mutually acceptable date to implement the amended Great Lakes Radio Agreement was established as 0001 UTC February 1, 1989.

2. Accordingly, *it is ordered* that under the authority contained in § 0.331 of the Commission's Rules, the effective date for the rule amendments (for §§ 80.308, 80.373, and 80.956) in PR Docket 87-275 is 0001 u.t.c. February 1, 1989.

Federal Communications Commission.

Ralph A. Haller,

Chief, Private Radio Bureau.

Proposed Rules

Federal Register
Vol. 53, No. 232
Friday, December 2, 1988

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Rural Electrification Administration

7 CFR Part 1785

Cushion of Credit Account Computations and Procedures

AGENCY: Rural Electrification Administration, USDA.

ACTION: Proposed rule.

SUMMARY: The Rural Electrification Administration (REA) proposes to amend 7 CFR Part 1785 *Loan Account Computations, Procedures, and Policies,* by adding five new sections: § 1785.66, *General;* § 1785.67, *Definitions;* § 1785.68, *Establishing a Cushion of Credit Payment Program;* § 1785.69, *Cushion of Credit Payment Account Computations;* § 1785.70 *Application of RETRF Cushion of Credit Payments.* These additions incorporate the provisions of section 313 of the Rural Electrification Act of 1936 as amended by the Omnibus Budget Reconciliation Act of 1987. Section 313 requires all voluntary payments made by borrowers after October 1, 1987, to be placed in a cushion of credit account. This part provides that borrowers shall receive 5 percent per annum on all cushion of credit payments received or credited to their account by REA, after October 1, 1987. Borrowers may not maintain balances or establish balances in a cushion of credit account while any payment, or portion thereof, is in default. Payments received in the month in which an installment is due will be applied to the installment due. However, if the regular installment payment is received at a later date in the month, the first payment received will be applied retroactively to a cushion of credit account and the second will be applied to the installment due. This treatment gives the borrower the greatest economic advantage by allowing interest to accrue for the greatest possible time on cushion of credit accounts.

DATE: Public comments must be received by REA no later than January 3, 1989.

ADDRESS: Submit written comments to Robert D. Ruddy, Director, Fiscal Accounting Division, Rural Electrification Administration, Room 2001, South Building, U.S. Department of Agriculture, Washington, DC 20250.

FOR FURTHER INFORMATION CONTACT: Mr. Robert D. Ruddy, Director, Fiscal Accounting Division, above address, telephone number (202) 382–8823. The Draft Impact Analysis describing the options considered in developing this proposed rule and the impact of implementing each option is available on request from the above address.

SUPPLEMENTARY INFORMATION: REA proposes to codify the Rural Electrification regulations related to the REA cushion of credit payments program made by Rural Electrification and Telephone Revolving Fund (RETRF) borrowers. This proposed action has been reviewed in accordance with Executive Order 12291, Federal Regulation. The action will not (1) have an annual effect on the economy of $100 million or more; (2) result in a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies or geographic regions; or (3) result in significant adverse affects on competition, employment, investment or productivity, and therefore has been determined to be "not major." This action does not fall within the scope of the Regulatory Flexibility Act. REA has included that promulgation of this rule would not represent a major Federal action significantly affecting the quality of the human environment under the National Environmental Policy Act of 1969 42 U.S.C. 4321 *et seq.* (1976) and, therefore, does not require an environmental impact statement or an environmental assessment. This regulation contains no information or record keeping requirement which requires approval under the Paperwork Reduction Act of 1980 (44 U.S.C. 3507 *et seq.*). These programs are listed in the Catalog of Federal Domestic Assistance as: 10.850—*Rural Electrification Loans and Loan Guarantees* and 10.851—*Rural Telephone Loans and Loan Guarantees.* For the reasons set forth in the final rule related notice to 7 CFR Part 3015 Subpart V in 50 FR 47034, November 14, 1985, this program is excluded from the scope of Executive Order 12372 which requires intergovernmental consultation with state and local officials.

List of Subjects in 7 CFR Part 1785

Administrative practice and procedure, Electric utilities, Telephone utilities, Loan Programs—energy.

PART 1785—[AMENDED]

In view of the above, REA proposes to amend 7 CFR, Chapter XVII, Part 1785 by designating existing §§ 1785.1 through 1785.17 as Subpart A and adding Subpart B §§ 1785.66 through 1785.70 to read as follows:

Subpart A—Loan Payments and Statements

Sec.
1785.1–1785.16 [Reserved]
1785.17 Basis dates and termination of unadvanced loan fund commitments—electric.

Subpart B—REA Cushion of Credit Account Computations and Procedures

Sec.
1785.66 General.
1785.67 Definitions.
1785.68 Establishing an REA cushion of credit payment account.
1785.69 Cusion of credit payment account computations.
1785.70 Applicaton of RETF cushion of credit payments.

Authority: 7 U.S.C. 901 *et seq.*

Subpart A—Loan Payments and Statements

§§ 1785.1–1785.16 [Reserved]

Subpart B—REA Cushion of Credit Account Computations and Procedures

§ 1785.66 General.

This Subpart B sets forth policies and procedures on the REA cushion of credit payments program. The cushion of credit payments program will be maintained only for insured loans evidenced by obligations of the Fund.

* * * * *

§ 1785.67 Definitions.

"*Accumulated (deferred) interest*" means interest allowed to accumulate up to, and including, the basis date of REA notes covering loans approved before June 5, 1957. The accumulated interest is payable in equal periodic installments over the remaining life of the notes.

"Act" means the Rural Electrification Act of 1936, as amended (7 U.S.C. 901 *et seq.*)

"Advance payment" means a voluntary unscheduled payment on an REA note, made prior to October 2, 1987, credited to the advance payment account of a borrower.

"Cushion of Credit Payment" means a voluntary unscheduled payment on an REA note made after October 1, 1987, credited to the cushion of credit account of a borrower.

"Current interest" means interest payable periodically as it accrues.

"Fund" means the Rural Electrification and Telephone Revolving Fund established pursuant to the Act.

"Interest credit" means interest earned on balances in advance payment or cushion of credit accounts and added to the advance payment accounts prior to October 2, 1987, and cushion of credit accounts since October 2, 1987.

"REA Notes" means those notes, bonds, or other obligations evidencing indebtedness created by loans made pursuant to Titles I, II, or III of the Act.

"Prepayment" means a voluntary unscheduled payment which the borrower instructs REA to apply directly and immediately to the principal of an REA note.

§ 1785.68 Establishing an REA cushion of credit payment account.

A cushion of credit account shall be automatically established by REA for each borrower who makes an unrestricted payment on an REA note after October 1, 1987, which is in excess of the amount then due. Such account will bear interest at a rate of 5 percent per annum. Therefore, all payments on REA notes which are in excess of required payments and not otherwise designated shall be placed in the borrowers' respective cushion of credit accounts.

§ 1785.69 Cushion of credit payment account computations.

(a) Cushion of credit payments are credited to the borrowers' cushion of credit accounts.

(b) The amount of interest credited to cushion of credit accounts will reduce the interest charged on the borrower's REA notes and is separately shown on REA Form 694, "Statement of Interest and Principal Due."

§ 1785.70 Application of RETRF cushion of credit payments.

If a maturing installment on an REA note is not received by its due date, funds will be withdrawn from the respective borrower's cushion of credit account and applied as of the installment due date beginning with the oldest note as follows: First, to current interest then due on all REA notes; second, to the accumulated interest due, if any, on all REA notes; and third, to the principal then due on all REA notes. In those instances where a borrower has prior to October 2, 1987, maintained an advance payment account with REA, its cushion of credit account will be applied in accordance with the provisions of this section prior to using any balance remaining in its advance payment account to pay interest and principal installments on REA notes.

Dated: October 3, 1988.

Jack Van Mark,

Acting Administrator.

[FR Doc. 88-27384 Filed 12-1-88; 8:45 am]

BILLING CODE 3410-15-M

DEPARTMENT OF STATE

Bureau of Consular Affairs

22 CFR Part 41

[DS-222]

Waiver by Secretary of State and Attorney General of Passport and/or Visa Requirements for Certain Categories of Nonimmigrants

AGENCY: Bureau of Consular Affairs, State.

ACTION: Proposed rule.

SUMMARY: This proposed rule adds paragraph (m) to 22 CFR 41.2 in order to implement Chapter 15, Annex 1502.1, Part B of the Free Trade Agreement (FTA) with Canada and the provisions of section 307(a) of Pub. L. 100-449, the "United States-Canada Free Trade Agreement Implementation Act of 1988" signed by the President on September 28, 1988. The FTA was signed by both President Reagan and Prime Minister Mulroney on January 2, 1988. The "United States-Canada Free Trade Agreement Implementation Act of 1988" provides the legislative basis for implementing the Free Trade Agreement. These regulations take effect on the date the FTA enters into force. It is anticipated that the FTA will enter into force on January 1, 1989. The Office of the United States Trade Representative will confirm in a **Federal Register** notice the precise date of the FTA's entry into force. Part B of Annex 1502.1 of Chapter 15 of the FTA and section 307(a) of the "United States-Canada Free Trade Agreement Implementation Act" extend to Canadian citizens the opportunity to apply for visas and seek admission to the United States under section 101(a)(15)(E) of the Immigration and Nationality Act (INA). This regulation constitutes an exception to the visa waiver for Canadian citizens.

DATES: Written comments must be received in duplicate on or before December 16, 1988.

ADDRESS: Stephen K. Fischel, Chief, Legislation and Regulations Division, Visa Office, Department of State, Washington, DC 20520, (202) 663-1204.

SUPPLEMENTARY INFORMATION: Title 22 of the Code of Federal Regulations § 41.2(a) exempts Canadian citizens from seeking visa issuance to enter the United States. Once the FTA is in effect, FTA and the FTA Act will allow Canadian citizens to apply for treaty trader and treaty investor visas under section 101(a)(15)(E) of the INA, a privilege not currently extended to Canadian nationals. Under the terms of the FTA, Canadian nationals must apply for visas from U.S. consular officers abroad in order to gain admission to the United States under section 101(a)(15)(E) of the INA. As Canadian nationals are exempt from the visa requirement pursuant to 22 CFR 41.2(a), the regulations would be amended to impose the visa requirement on Canadians who are seeking admission to the United States as treaty traders or treaty investors under section 101(a)(15)(E) of the INA.

This rule is not considered to be a major rule for purposes of E.O. 12291 nor is it expected to have a significant impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 22 CFR Part 41

Aliens, Foreign officials, Passport and visas, Students.

In view of the foregoing 22 CFR Part 41 would be amended as follows:

PART 41—[AMENDED]

1. The authority citation for Part 41 is revised to read as follows:

Authority: Sec. 104, 66 Stat. 174, 8 U.S.C. 1104; Sec. 109(b)(1), 91 Stat. 847; Sec. 313, 100 Stat. 3435, 8 U.S.C. 1182; Sec. 307, 102 Stat. 1876.

2. A new paragraph (m) would be added at the end of § 41.2 to read:

§ 41.2 Waiver by the Secretary of State and Attorney General of passport and/or visa requirements for certain categories of nonimmigrants.

* * * * *

(m) *Treaty Trader and Treaty Investor.* Notwithstanding the provisions of paragraph (a) of this section, a visa is required of a Canadian

national who is classified, or who seeks classification, under INA 101(a)(15)(E).

Date: November 7, 1988.

Joan M. Clark,

Assistant Secretary for Consular Affairs.

BILLING CODE 4710-06-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 165

[CGD 88-075]

RIN 2115-AD07

Mississippi River; Regulated Navigation Area

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This proposed rulemaking will amend the recordkeeping requirements for barge fleeting facilities on the lower Mississippi River. The Coast Guard proposes to eliminate the requirement to record the identification of each towboat that moves a barge into, within, or out of a facility. The Coast Guard has concluded that this information is unnecessary to its oversight of fleeting facility operations. This action will reduce the information collection burden imposed on the public.

In addition, this proposed rulemaking will correct the Office of Management and Budget approval number shown for these recordkeeping requirements.

DATES: Comments must be received on or before January 17, 1989.

ADDRESSES: Comments should be submitted to Executive Secretary, Marine Safety Council (G-LRA-2/3600) (CGD 88-075), U.S. Coast Guard, 2100 Second Street, SW., Washington, DC 20593-0001. Comments may be delivered to and will be available for inspection and copying in Room 3600, Marine Safety Council, U.S. Coast Guard, 2100 Second Street, SW., Washington, DC 20593-0001, between the hours of 8:00 a.m. and 3:00 p.m., Monday through Friday, except Federal holidays.

Persons desiring to comment on the information collection requirements should submit their comments to: Office of Regulatory Policy, Office of Management and Budget (OMB), 726 Jackson Place, NW., Washington, DC 20503, ATTN: Desk Officer, U.S. Coast Guard.

FOR FURTHER INFORMATION CONTACT: Mr. Harry C. Robertson, Office of Navigation Safety and Waterway Services, telephone (202) 267-0405 between 7:30 a.m. and 3:00 p.m. Monday through Friday, except holidays.

SUPPLEMENTARY INFORMATION:

Drafting Information

The principal persons involved in drafting this proposed rulemaking are: Lieutenant (junior grade) Edward, R. Raynolds, Project Officer, Office of Navigation Safety and Waterway Services, Coast Guard Headquarters; and Christena G. Green, Project Counsel, Office of Chief Counsel, Coast Guard Headquarters.

Background

The regulations for barge fleeting facilities were adopted in 1975 (40 FR 56430) with the establishment of the Regulated Navigation Area between Miles 88 and 127 of the Mississippi River, under the authority of the Ports and Waterways Safety Act of 1972. They were first published in Part 128 of Title 33, CFR. The recordkeeping requirements for barge fleeting facilities were approved by the Office of Management and Budget in 1981 and were reauthorized by OMB in December, 1983 and January, 1987. In 1982 all regulations governing safety zones, security zones, and regulated navigation areas were consolidated in Part 165 of Title 33 (47 FR 29659).

The purpose of the barge fleeting regulations, including the recordkeeping requirements contained in 33 CFR 165.803(i), is to ensure that the operators of barge fleeting facilities follow proper mooring and inspection procedures, in order to prevent barges from breaking away from a fleeting facility and creating a hazard in a very congested area of the Mississippi River. Fleeting facility records provide documentary evidence that inspections are being made and aid in the investigation of any occurrences of runaway barges. However, the Coast Guard had found that recording the name of the tugboat which moves a barge into, within, or out of a facility is no longer necessary to its oversight activities and therefore proposes to eliminate the requirement.

In addition, the note immediately following 33 CFR 165.803(i), containing the OMB approval number for the recordkeeping requirements, will be changed to show the correct number, which is 2115-0092.

Regulatory Evaluation

This regulatory action is considered to be non-major under Executive Order 12291 and non-significant under DOT regulatory policies and procedures (44 FR 11034; February 26, 1979). The economic impact of this proposal has been found to be so minimal that a full regulatory evaluation is unnecessary. This action is part of the continuing effort to reduce the paperwork burden on the public in accordance with the Paperwork Reduction Act of 1981. Persons desiring to comment on the information collection requirements should submit their comments to OMB as indicated under "ADDRESSES". The reduction in recordkeeping requirements should result in lower costs in terms of both time and money to the operators of fleeting facilities. Therefore, the Coast Guard certifies that, if adopted, this proposal will not have a significant economic impact on a substantial number of small entities.

Federalism

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and has been determined to have insufficient federalism implications to warrant the preparation of a Federalism Assessment.

List of Subjects in 33 CFR Part 165

Coast Guard, Harbors, Marine safety, Navigation, Security measures, Vessels, and Waterways.

For the reasons set forth in the Preamble, the Coast Guard proposes to amend Title 33, Part 165 as follows:

PART 165—[AMENDED]

1. The authority citation for Part 165 is revised to read as follows:

Authority: 33 U.S.C. 1225 and 1231; 50 U.S.C. 191; 49 CFR 1.46 and 33 CFR 1.05-1(g), 6.04-1, 6.04-6 and 160.5.

2. Section 165.803 is amended by removing paragraph (i)(4) and by revising the note at the end of paragraph (i) to read as follows:

§ 165.803 Mississippi River—regulated navigation area.

* * * * *

(i) * * *

Note: The requirements in paragraph (i)(3) of this section for the listing of hazardous cargo refer to cargoes regulated by Subchapters D and O of Chapter I, Title 46, Code of Federal Regulations. The recordkeeping requirement for barge fleeting facilities (Regulated Navigation Area) is approved under Office of Management and Budget Control number 2115-0092.

Dated: October 12, 1988.

R.T. Nelson,

Rear Admiral, U.S. Coast Guard, Chief, Office of Navigation Safety and Waterway Services.

BILLING CODE 4910-14-M

POSTAL RATE COMMISSION

39 CFR Part 3001

[Docket No. RM89–1; Order No. 810]

Petition of Warshawsky and Co. for Third-Class Cost Data Rulemaking, 1988

AGENCY: Postal Rate Commission.

ACTION: Petition for rulemaking.

SUMMARY: On November 17, 1988, Warshawsky & Company filed a petition requesting the Commission to initiate a rulemaking to amend the Commission's filing and procedural requirements pertaining to the provision of cost and volume data supporting requests for changes in third-class rates. We have labeled this filing Docket No. RM89–1 for reference. In its filing, Warshawsky proposes rule changes which would require the Postal Service to compile volume data by shape and weight. Warshawsky's proposed rule would require that any rate proposal for third-class mail be accompanied by analysis of third-class costs by ounce increments as well as a study, not more than three years old, showing the "effect of shape and weight on costs in third-class mail."

Warshawsky claims that the third-class rate structure is "without substantial cost justification." Furthermore, Warshawsky states that despite continuing Commission requests for improved costing information relative to third class, there "is no evidence that the Service has even begun to develop systems to produce the necessary data" essential to developing a cost-based third-class rate structure.[1] To ensure the availability of this costing information for the next omnibus rate case, Warshawsky proposes to amend the Commission's rules of practice.

DATES: Any person wishing to comment on the desirability of instituting a rulemaking in response to Warshawsky's November 17, 1988, petition may do so by January 3, 1989, reply comments may be filed by December 19, 1988. The Commission will then determine whether to proceed with a formal rulemaking proceeding with regard to Warshawsky's petition.

ADDRESSES: Warshawsky's filing, including the text of its proposed procedural rule, is available for public inspection at the Commission offices, 1333 H Street, NW., Suite 300, Washington, DC. The Secretary of the Commission is preparing a service list for this filing. Any person wishing to be included on it, should advise, in writing, Charles L. Clapp, Secretary of the Commission, 1333 H Street, NW., Suite 300, Washington, DC 20268.

FOR FURTHER INFORMATION CONTACT: Charles L. Clapp, (202) 789–6840.

SUPPLEMENTARY INFORMATION: .

Commission Notice and Order Concerning Filing of Petition of Warshawsky for Initiation of Rulemaking to Amend Procedural Requirements Concerning Cost and Volume Data Required to Support Proposals for Changes in Third-Class Postal Rates

Issued November 28, 1988.

Before Commissioners: Janet D. Steiger, Chairman; Patti Birge Tyson, Vice-Chairman; John W. Crutcher; Henry R. Folsom; W.H. "Trey" LeBlanc, III.

The Commission orders:

(A) Comments to Warshawsky's petition are due 30 days after the publication of this Notice and Order in the **Federal Register**. Reply comments are due 14 days thereafter.

(B) Persons wishing to have their names on the Commission's service list are to notify in writing the Secretary of the Commission.

(C) The Secretary shall publish this Notice and Order in the **Federal Register**.

By the Commission.

Cyril J. Pittack,

Acting Secretary.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[FRL–3485–6]

Approval and Promulgation of Implementation Plans; Wisconsin

AGENCY: U.S. Environmental Protection Agency (USEPA).

ACTION: Proposed rulemaking.

SUMMARY: USEPA is proposing to approve a submission by the State of Wisconsin as a site-specific revision to the Wisconsin State Implementation Plan (SIP) for ozone. This submission would constitute for the General Motors Corporation's (GM) Janesville, Wisconsin, facility a temporary relaxation from Wisconsin's volatile organic compound (VOC) reasonably available control technology (RACT) regulations. This action is taken in response to a January 13, 1987, submission from the State of Wisconsin.

USEPA today is proposing to approve this as a SIP revision because (1) the GM facility is located in an ozone attainment area (the Clean Air Act does not require RACT level VOC control in areas that have always been designated attainment), and (2) approval of this proposed SIP revision will not increase the historical VOC emission level from this source. Under USEPA existing policy, however, no demonstration of attainment and maintenance was required in the SIP for rural ozone attainment areas.

DATE: Comments on this revision and on the proposed USEPA action must be received by January 3, 1989.

ADDRESSES: Copies of the SIP revision are available at the following addresses for review: (It is recommended that you telephone Uylaine E. McMahan, at (312) 886–6031, before visiting the Region V office.)

U.S. Environmental Protection Agency,
Region V,
Air and Radiation Branch (5AR–26),
230 South Dearborn Street,
Chicago, Illinois 60604.

Wisconsin Department of Natural Resources,
Bureau of Air Management,
101 South Webster,
Madison, Wisconsin 53707.

Comments on this proposed rule should be addressed to: (Please submit an original and three copies, if possible.) Gary Gulezian, Chief, Regulatory Analysis Section, Air and Radiation Branch (5AR–26), U.S. Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinois 60604.

FOR FURTHER INFORMATION CONTACT: Uylaine E. McMahan, Air and Radiation Branch (5AR–26), U.S. Environmental Protection Agency, Region V, Chicago, Illinois 60604, (312) 886–6031.

SUPPLEMENTARY INFORMATION: On January 13, 1987, the Wisconsin Department of Natural Resources (WDNR) submitted a proposed temporary relaxation from its RACT limits until December 2, 1992, for the VOC emissions from GM's topcoat and final repair lines. These operations are located at GM's facility in Janesville, Wisconsin, which has been designated as an attainment/unclassifiable area for ozone, section 107(d) and § 81.350 of the Code of Federal Regulations.

History of the Variance

GM currently operates six coating systems at its B–O–C Group facility in Janesville, Wisconsin, which are subject to Natural Resources (NR) 154.13(4)(g), Wisconsin Administrative Code. Two of these coating systems, topcoating and final repair, currently use coatings which exceed the limits contained in NR 154.13(4)(g). This rule limits the VOC content of topcoats and spray primers to 2.8 pounds per gallon of coating, excluding water, after December 31, 1986, and limits the VOC content of final repair coatings to 4.8 pounds per gallon of coating, excluding water, after December 31, 1986.

In lieu of these limits, the WDNR has issued a variance for the facility, subject to the following conditions:

1. The following limits shall apply through December 1992, or until the J–Car production line is converted to a different automobile type production line, whichever is sooner:

a. 6.2 pounds of VOCs per gallon of coating, excluding water, from a blackout topcoat coating line.

b. 5.2 pounds of VOCs per gallon of coating, excluding water, from any other topcoat coating line.

c. 6.5 pounds of VOCs per gallon of coating, excluding water, from a spot primer coating line.

d. 6.5 pounds of VOCs per gallon of coating, excluding water, from a final repair coating line.

2. The facility shall keep records verifying compliance with the above limitations. These records shall be kept at the facility for a period of 3 years and made available to WDNR officials, upon request.

3. GM shall submit to the WDNR by December 31, 1989, a report detailing the methods to be followed by the facility to achieve compliance with all RACT limitations by December 31, 1992.

These limits would allow GM to continue to use the coatings currently used on these lines.

The variance issued by WDNR extends the compliance date to December 31, 1992. As discussed further below, USEPA's policy provides that where a source in an attainment area is subject to RACT under an accommodative SIP, and that source seeks a compliance date extension, the source must either meet the RACT requirements of USEPA's August 7, 1986, compliance date extension policy or the area will lose the accommodative SIP for the duration of the variance.[1]

[1] An accommodative ozone SIP for areas classified as attainment/unclassifiable requires RACT-level controls on existing sources, in lieu of requiring new major sources of VOC to do preconstruction monitoring. This monitoring would normally be required on new major sources in attainment/unclassifiable areas under USEPA's Prevention of Significant Deterioration (PSD) regulations. The rationale behind this tradeoff is that the "extra" emission reductions obtained from these additional RACT controls would be able to accommodate new source growth in these attainment/unclassifiable areas.

Compliance Date Extension

In order for an area to retain its accommodative SIP, the State must demonstrate that it is implementing RACT as expeditiously as practicable. The current guidance available for evaluting whether or not a compliance schedule is expeditious is contained in an August 7, 1986, memorandum on compliance date extensions in nonattainment areas. Therefore, although this source is not strictly subject to the requirements of the August 7, 1986, policy, USEPA is using the criteria contained in that policy to determine whether this compliance schedule is expeditious.

However, GM has not demonstrated that its compliance schedule is as expeditious as practicable. WDNR has maintained that an extension is justified because it is economically infeasible for GM to meet the SIP limits. However, GM is only proposing to delay the cost until the J–Car production line is converted to a different type or until December 2, 1992, whichever is sooner.

Therefore the variance will simply allow GM to delay these costs for control, rather than to reduce or eliminate them. Thus, the State has not demonstrated that GM's compliance is expeditious.

This rulemaking relaxes a stationary source RACT emission limitation in an area that has been designated as attainment/unclassified for ozone. Originally, this RACT limitation was imposed by the State, not to satisfy an ozone nonattainment SIP planning requirement, but rather to allow the State to have an accommodative SIP. This action, when promulgated, will remove the accommodative SIP for Rock County for as long as the relaxation is in place. This means that all new major VOC sources and major modifications in this county must comply with all PSD monitoring requirements. Because this portion of the State's accommodative SIP never had any effect relative to any designated ozone nonattainment area SIP, the RACT relaxation in this notice will also have no effect on nonattainment areas—all sources wishing to locate in nonattainment areas must continue to comply with the State's federally approved Part D new source review program. USEPA assumes that the State would prefer to have this revision approved and cancel the accommodative SIP for the duration of the variance. If the State does not wish to have the variance approved on this basis, it should so indicate during the public comment period for this notice.

Under 5 U.S.C. 605(b), the Administrator has certified that SIP approvals do not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709).

USEPA is providing a 30-day comment period on this notice of proposed rulemaking. Public comments received on or before January 3, 1989 will be considered in USEPA's final rulemaking. All comments will be available for inspection during normal business hours at the Region V office address provided at the front of this notice.

List of Subjects in 40 CFR Part 52

Air pollution control, Hydrocarbon, Intergovernmental relations, Ozone.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Authority: 42 U.S.C. 7401–7642.

Dated: June 18, 1987.

Valdas V. Adamkus,

Regional Administrator.

BILLING CODE 6560–50–M

---

40 CFR Part 261

[SW–FRL–3485–2]

Hazardous Waste Management System; Identification and Listing of Hazardous Waste; Proposed Exclusion

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule and request for comment.

SUMMARY: The Environmental Protection Agency (EPA or Agency) today is proposing to grant a petition submitted by Boeing Commerical Airplane Company, Auburn, Washington, to exclude certain solid wastes at its facility from the lists of hazardous wastes contained in 40 CFR 261.31 and 261.32. This action responds to a delisting petition submitted under 40 CFR 260.20, which allows any person to petition the Administrator to modify or revoke any provision of Parts 260 through 268, 124, 270, and 271 of Title 40 of the Code of Federal Regulations, and under 40 CFR 260.22, which specifically provides generators the opportunity to petition the Administrator to exclude a

VOL 53 ISS 232 DE 2 1988 UMI

waste on a "generator-specific" basis from the hazardous waste lists. Today's proposed decision is based on an evaluation of waste-specific information provided by the petitioner.

The Agency is also proposing the use of an organic leachate and a fate and transport model and their application in evaluating the waste-specific information provided by the petitioner. These models have been used in evaluating the petition to predict the concentation of harzardous constituents released from the petitioned waste, once it is disposed.

DATE: EPA is requesting public comments on today's proposed decision and on the applicability of the organic leachate and fate and transport models used to evaluate the petition. Comments will be accepted until January 17, 1989. Comments postmarked after the close of the comment period will be stamped "late".

Any person may request a hearing on this proposed decision and/or the models used in the petition evaluation by filing a request with Bruce Weddle, whose address appears below, by November 19, 1988. The request must contain the information prescribed in 40 CFR 260.2(d).

ADDRESS: Send three copies of your comments to EPA. Two copies should be sent to the Docket Clerk, Office of Solid Waste (OS-305), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460. A third copy should be sent to Jim Kent, Variances Section, Assistance Branch, PSPD/OSW (OS-343), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460. Identify your comments at the top with this regulatory docket number: "F-88-BAEP-FFFFF".

Requests for a hearing should be addressed to Joe Carra, Director, Permits and State Programs Division, Office of Solid Waste (OS-340), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460.

The RCRA regulatory docket for this proposed rule is located at the Environmental Protection Agency, 401 M Street, SW., (sub-basement), Washington, DC 20460, and is available for viewing from 9:00 a.m. to 4:00 p.m., Monday through Friday, excluding Federal holidays. Call (202) 475-9327 for appointments. The public may copy material from any regulatory docket at a cost of $0.15 per page.

FOR FURTHER INFORMATION CONTACT: For general information, contact the RCRA Hotline, toll free at (800) 424-9346, or at (202) 382-3000. For technical information concerning this notice, contact Scott Maid, Office of Solid Waste (OS-343), Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460, (202) 382-4783.

SUPPLEMENTARY INFORMATION:

I. Background

A. Authority

On January 16, 1981, as part of its fiscal and interim final regulations implementing Section 3001 of RCRA, EPA published an amended list of hazardous wastes from non-specific and specific sources. This list has been amended several times, and is published in 40 CFR 261.31 and 261.32. These wastes are listed as hazardous because they typically and frequently exhibit one or more of the characteristics of hazardous wastes identified in Subpart C of Part 261 (*i.e.*, ignitiability, corrosivity, reactivity, and extraction procedure (EP) toxicity) or meet the criteria for listing contained in 40 CFR 261.11 (a)(2) or (a)(3).

Individual waste streams may vary, however, depending on raw materials, industrial processes, and other factors. Thus, while a waste that is described in these regulations generally is hazardous, a specific waste from an individual facility meeting the listing description may not be. For this reason, 40 CFR 260.20 and 260.22 provide an exclusion procedure, allowing persons to demonstrate that a specific waste from a particular generating facility should not be regulated as a harardous waste.

To have their wastes excluded, petitioners must show that wastes generated at their facilities do not meet any of the criteria for which the wastes were listed. See 40 CFR 260.22(a) and the background documents for the listed wastes. In addition, the Hazardous and Solid Waste Amendments (HSWA) of 1984 require the Agency to consider any factors (including additional constituents) other than those for which the waste was listed, if there is a reasonable basis to believe that such additional factors could cause the waste to be hazardous. Accordingly, a petitioner also must demonstrate that the waste does not exhibit any of the hazardous characteristics (*i.e.*, ignitiability, reactivity, corrosivity, and EP toxicity), and must present sufficient information for the Agency to determine whether the waste contains any other toxicants at hazardous levels. See 40 CFR 260.22(a), 42 U.S.C. 6921(f), and the background documents for the listed wastes. Although wastes which are "delisted" (*i.e.*, excluded) have been evaluated to determine whether or not they exhibit any of the characteristics of hazardous waste, generators remain obligated to determine whether or not their waste remains non-hazardous based on the hazardous waste characteristics.

In addition to wastes listed as hazardous in 40 CFR 261.31 and 261.32, residues from the treatment, storage, or disposal of listed hazardous wastes and mixtures containing hazardous wastes also are eligible for exclusion and remain hazardous wastes until excluded. See 40 CFR 261.3 (c) and (d)(2). The substantive standard for "delisting" a treatment residue or a mixture is the same as previously described for listed wastes.

B. Approach Used To Evaluate This Petition

In making a delisting determination, the Agency evaluates each petitioned waste against the listing criteria and factors cited in 40 CFR 261.11 (a)(2) and (a)(3). If the Agency believes that the waste remains hazardous based on the factors for which the waste was originally listed, EPA will propose to deny the petition. If, however, the Agency agrees with the petitioner that the waste is non-hazardous with respect to the original listing criteria, EPA then will evaluate the waste with respect to other factors or criteria, if there is a reasonable basis to believe that such additional factors could cause the waste to be hazardous. The Agency considers whether the waste is acutely toxic, and considers the toxicity of the constituents, the concentration of the constituents in the waste, their tendency to migrate and to bioaccumulate, their persistence in the environment once released from the waste, plausible and specific types of management of the petitioned waste, the quantities of waste generated, and any other additional factors which may characterize the petitioned waste.

The Agency is proposed to use such information to identify plausible exposure routes for hazardous constituents present in the waste, and is proposing to use an organic leachate and a fate and transport model to predict the concentration of hazardous constituents that may be released from the petitioned waste after disposal and to determine the potential impact of the unregulated disposal of Boeing's petitioned waste on human health and the environment. Specifically, the models will be used to predict compliance-point concentrations which will be compared directly to the levels of regulatory concern for particular hazardous constituents.

EPA believes that these models represent a reasonable worst-case waste disposal scenario for the

petitioned waste, and that a reasonable worst-case scenario is appropriate when evaluating whether a waste should be relieved of the protective management constraints of RCRA Subtitle C. Because a delisted waste is no longer subject to hazardous waste control, the Agency is generally unable to predict and does not control how a waste will be managed after delisting. Therefore, EPA currently believes that it is inappropriate for the Delisting Program to consider extensive site-specific factors. For example, a generator may petition the Agency for delisting of a metal hydroxide sludge which is currently being managed in an on-site landfill and provide data on the nearest drinking water well, permeability of the aquifer, dispersivities, etc. If the Agency were to base its evaluation solely on these site-specific factors, the Agency might conclude that the waste, at that specific location, cannot affect the closest well, and the Agency might grant the petition. Upon promulgation of the exclusion, however, the generator is under no obligation to continue to manage the waste at the on-site landfill. In fact, it is likely that the generator will either choose to send the delisted waste off site immediately, or will eventually reach the capacity of the on-site facility and subsequently send the waste off site to a facility which may have very different hydrogeological and exposure conditions.

The Agency also considers the applicability of ground-water monitoring data to its evaluation of delisting petitions. In this case, the Agency determined that, because Boeing is seeking a delisting for waste managed on site, ground-water monitoring data collected from the area where the petitioned waste is contained are necessary to determine whether hazardous constituents have migrated to the underlying ground water. Ground-water data collected from Boeing's monitoring wells are compared directly to the levels of regulatory concern for particular hazardous constituents detected in the ground water and will help characterize the potential impact (if any) of the unregulated disposal of Boeing's waste on human health and the environment.

Finally, the Hazardous and Solid Waste Amendments of 1984 specifically require the Agency to provide notice and an opportunity for comment before granting or denying a final exclusion. Thus, a final decision will not be made until all public comments (including those at requested hearings, if any) on today's proposal are addressed.

II. Disposition of Delisting Petition

A. Boeing Commercial Airplane Company, Auburn, Washington

1. Petition for Exclusion

The Boeing Commercial Airplane Company (Boeing), at its Fabrication Division in Auburn, Washington, manufactures metal parts and subassemblies for commercial aircraft. Boeing petitioned the Agency to exclude residually contaminated soils, listed as hazardous pursuant to 40 CFR 261.3(c)(2)(i), remaining after the excavation of a sludge pile and underlying soils containing EPA Hazardous Waste No. F006—"Wastewater treatment sludges from electroplating operations except from the following processes: (1) Sulfuric acid anodizing of aluminum; (2) tin plating on carbon steel; (3) zinc plating (segregated basis) on carbon steel; (4) aluminum or zinc-aluminum plating on carbon steel; (5) cleaning/stripping associated with tin, zinc and aluminum plating on carbon steel; and (6) chemical etching and milling of aluminum." The listed constituents for EPA Hazardous Waste No. F006 are cadmium, hexavalent chromium, nickel, and cyanide (complexed).

Boeing petitioned to exclude its waste because it does not believe that the waste meets the criteria of the listing. Boeing believes that the previous management of F006 wastes at this site did not leave significant quantities of contaminants in the underlying soils, and if present, these constituents are in an essentially immoble form. Boeing further claims that these soils are not hazardous for any other reason (*i.e.*, there are no additional hazardous constituents or factors that could cause the waste to be hazardous). Review of this petition included consideration of the original listing criteria, as well as the additional factors required by the Hazardous and Solid Waste Amendments of 1984. See Section 222 of the Amendments, 42 U.S.C. 6921(f), and 40 CFR 260.22(d)(2) through (4). Today's proposal to grant this petition for delisting is the result of the Agency's evaluation of Boeing's petition.

2. Background

Boeing originally submitted its petition on November 13, 1985. Additional information was requested from Boeing, and this information was submitted to the Agency on April 8, 1986. In support of its petition, Boeing submitted (1) detailed descriptions, including schematic diagrams, of the manufacturing and treatment processes which contributed to the waste originally present in the sludge pile; (2) total constitutent and EP leachate analyses of the residually contaminated soils for the EP toxic metals and nickel; (3) total constitutent and distilled water extract test results of the soils for total cyanide; (4) total oil and grease analyses of the soils; (5) total constituent analyses for formaldehyde (expected to be present from process descriptions); (6) test data on the hazardous waste characteristics of the soils; (7) a list of raw materials used in the manufacturing and treatment processes which contributed to the sludge from which the contaminated soils were derived; (8) ground-water monitoring data from the facility's monitoring system; and (9) quality control/quality assurance data for the chemical analyses. Although not required to do so, Boeing also voluntarily provided the results of a priority pollutant [1] scan of the petitioned soils to substantiate its claim that no other hazardous constituents, bssides those tested for, were present in the soils.

Boeing's manufacturing process uses some thirty separate subprocesses. These include a variety of processes for cleaning and etching (using solvents, alkaline solutions, and other cleaning agents); anodizing and alodizing; phosphating and pickling; plating with aluminum, cooper, chromium, nickel, and titanium; degreasing and stripping; and painting. The rinse waters and batch dumps from each of the metal cleaning, coating, and inspection steps are influent to Boeing's rinse water treatment plant. Cyanide-bearing wastewaters from the electroplating processes are treated in the wastewater treatment plant with chlorine and lime slurry to destroy cyanide, then are precipitated to remove heavy metal hydroxides (the metal-bearing cyanide sludges are put in barrels and disposed off-site). The effluent from the cyanide destruction step is sent to a surge tank and subsequently to a lagoon where it is combined with dye penetrant wastes containing no cyanide (from the inspection of metal parts) and overflow from a chrome rinse surge tank. In the lagoon, hexavalent chromium in the effluent is reduced to trivalent chromium with sulfur dioxide and sulfuric acid. Lime is then added to raise the pH from 2.5 to 9.0. The treated effluent is then sent to a clarifier, where a polyelectrolyte is added to aid coagulation. The clarifier solids are sent

[1] A set of constituents which include the volatile, semi-volatile acid extractable compounds and base/neutral extractable compounds listed in 40 CFR Part 261, Appendix VIII.

to two storage tanks, which also receive sludges from the seperation of oil/water emulsions (waste coolants). The combined sludges flow by gravity to a centrifuge, where another polyelectrolyte is added, and the resulting sludge paste is collected in a hopper.

During the period from 1976 to 1985, the sludge produced by the rinse water treatment plant was carted daily to the sludge pile containment area. In early 1985, Boeing began closure of this sludge pile in accordance with a closure plan submitted with its revised Part B permit application. Boeing removed approximately 9,000 cubic yards of sludge and underlying soil to a permitted hazardous waste disposal facility. The sludge and soil were excavated down to the ground-water table, which is sometimes visible on the bottom of the containment area. The residually contaminated soils remaining after removal of the sludge are the subject of this petition. Since removal of the sludge pile, all newly generated waste has been disposed off-site as a hazardous waste by Boeing. The facility's existing permit has been conditioned, so that if the delisting petition for the contaminated soils remaining at the waste pile site is denied, the facility will have to close the contaminated soils in the containment area as a hazardous waste landfill. Delisting the residually contaminated soils in the sludge pile containment area is necessary to allow reclamation and future development of the site. If the soil is delisted by EPA, Boeing has stated in its petition that it intends to leave the soil in place on-site and cover it with 10 to 12 feet of clean fill dirt. A preliminary soil evaluation was done in 1985 as part of the closure requirements, but all further data generated by Boeing were collected for the purpose of obtaining a delisting for the residual soils.

The sludge pile containment area is configured in a crescent shape, approximately 180 feet by 80 feet. For sampling, the containment area was divided into eight sections, and sample locations in each were chosen randomly, in accordance with guidance provided by the Agency in its guidance document, *Petitions to Delist Hazardous Wastes—A Guidance Manual*, U.S. EPA Office of Solid Waste, (EPA/530–SW–85–003), April 1985.

Soil samples were collected from the empty containment area with the help of a backhoe. Stainless steel split-barrel samplers were driven by the backhoe into the underlying soils (to a depth of about three feet) to collect a core sample of the soil. (Previous analyses had indicated that the water table was usually located approximately three feet beneath the excavated containment area, and that this depth would, therefore, be conservative with respect to the assessment of any deep residual contamination.) In certain case where a backhoe could not drive the sampler to sufficient depth (*e.g.*, because of the presence of extensive cobble layers), the backhoe excavated a section of soil down to a three-foot depth and samples were composited from the material in the backhoe bucket. Six samples were collected in this way. In all, a total of 188 one-quart samples were taken from 61 locations: Five each from seven of the eight quadrants on the containment area floor; six from the other, larger floor quadrant; and five each from the berms and two sections of access road surrounding the containment area.

Road and berm soil data were collected by Boeing because those soils will be used as fill dirt for the former sludge pile containment area; the berm soils represent the soils remaining after removal of the original waste from the sidewalls of the containment area, and the road soils represnt clean imported fill dirt in the road constructed around the site during waste excavation. These soils also serve as a basis for comparison to background contaminant levels in the bottom soils.

The samples were composed into two groups in the laboratory to form 12 samples for analysis. As a quality control procedure, six samples were taken of the wash water used to decontaminate the sampling equipment between samples (those wash waters were containerized in 55-gallon drums for disposal).

3. Agency Analysis

Boeing used test methods from *Test Methods for Evaluating Solid Wastes: Physical/Chemical Methods*, U.S. EPA, Office of Solid Waste and Emergency Response, Publication SW–846, to evaluate the soil samples. SW–846 Methods 7040 through 7951 were used to quantify the total constituent concentrations (*i.e.*, mg of a particular constituent per every kg of waste) of metals in the soils. Method 9010 was used to quantify the total cyanide content of the soils. In addition to these methods, Method 1310 was used to determine the extraction procedure (EP) leachable concentrations (*i.e.*, mg of a particular constituent per liter of extract) of the EP toxic metals, nickel, and cyanide in the soil. Maximum total constituent and EP leachate analyses for the inorganic constituents in the floor bottom soils are presented in Table 1, and for the road and berm soils in Table 2.

The detection limits in Table 1 (and Table 2 which follows) represent the lowest concentrations quantifiable by Boeing, when using the appropriate SW–846 analytical methods to analyze its waste. (Detection limits may vary according to the waste and waste matrix being analyzed, *i.e.*, the "cleanliness" of waste matrices vary and "dirty" waste matrices may cause interference, thus raising the detection limits.)

TABLE 1.—MAXIMUM TOTAL AND EP LEACHATE CONCENTRATIONS BOTTOM SOILS

Constituents	Total constituent *analyses* (*mg/kg*)	EP Leachate *Analyses* (*mg/l*)
Arsenic	2.6	ND
Barium	43	0.1
Cadmium	0.8	ND
Chromium	37.	ND
Lead	2.5	ND
Mercury	0.2	ND
Selenium	1.5	ND
Silver	0.3	ND
Nickel	11	ND
Cyanide	ND	ND
Beryllium	0.4	[1] 0.02
Antimony	ND	< [1] 0.125

ND: Non Detected. Denotes total concentration below the following detection limits: Cyanide—0.5; and antimony—2.5 mg/kg. Denotes leachable concentrations below the following detection limits: Arsenic—0.2; cadmium—0.01; chromium, lead, silver, and nickel—0.1; and mercury, selenium, and cyanide—0.005 mg/l.

[1] Calculated by assuming a dilution factor of twenty times (based on 100 grams of sample and dilution with 2 liters of water) and a theoretical worst-case leaching of 100 percent.

Table 2.—Maximum Total and EP Leachate Concentrations Road and Berm Soils

Constituents	Total constituent analyses (mg/kg)		EP leachate analyses (mg/1)	
	Road	*Berm*	*Road*	*Berm*
Arsenic	3.8	6.1	ND	ND
Banum	61	48	0.2	0.1
Cadmium	4.1	1.0	0.01	ND
Chromium	560	80	ND	ND
Lead	8.5	6.5	ND	ND
Mercury	0.3	0.3	ND	ND
Selenium	1.5	1.5	ND	ND
Silver	0.3	0.3	ND	ND
Nickel	19	15	ND	ND
Cyanide	0.5	0.5	0.005	ND
Beryllium	0.4	0.5	[1] 0.02	[1] 0.025
Antimony	ND	ND	[1] 0.125	[1] 0.125

ND: Non Detected. Denotes total concentration below the following detection limit: Antimony—2.5 mg/kg. Denotes leachable concentrations below the following detection limits: Arsenic—0.2; cadmium—0.01; Chromium, lead, silver, and nickel—0.1; and mercury, selenium, and cyanide—0.005 mg/l.

[1] See footnote 1 to table 1.

Using SW–846 Method 3540, Boeing determined that its soil had a maximum oil and grease content of 0.19 percent; therefore, the EP analyses did not have to be modified in accordance with the Oily Waste EP methodology (*i.e.*, wastes having more than one percent total oil and grease may have significant concentrations of constituents of concern in the oil phase, and thus, their presence would not be assessed using the standard EP leachate procedure). See SW–846 Method 1330. None of the samples analyzed exhibited the characteristics of ignitability, corrosivity, or reactivity. See 40 CFR 261.21, 261.22, and 261.23, respectively.

Ground-water monitoring data submitted by Boeing for this site do not indicate that contamination of the underlying aquifer by the sludge pile has occurred. Table 3 presents the maximum metal concentration of inorganic constituents at each monitoring well from which Boeing obtained ground-water samples.

TABLE 3.—MAXIMUM GROUND-WATER CONCENTRATIONS SLUDGE PILE AREA (MG/L)

	Well No.				
	SP-1 [1]	SP-2	SP-3	SP-4	SP-5
Arsenic	ND	ND	ND	ND	ND
Barium	ND	ND	ND	ND	ND
Cadmium	ND	ND	ND	ND	ND
Chromium	ND	ND	ND	ND	ND [2]
Lead	ND	ND	ND	ND	ND

Silver	ND	ND	ND	ND	ND
Mercury	ND	ND	ND	ND	ND
Cyanide	ND	ND	ND	ND	ND
Nickel	ND [3]	ND	ND	ND	ND

ND: Not Detected. Denotes concentrations below the following detection limits: Arsenic, chromium, selenium, and cyanide—0.005; barium—0.02; cadmium and silver—0.002; lead—0.01; mercury—0.001; and nickel 0.01 mg/l.

[1] Denotes upgradient monitoring well.

[2] Detection limit for chromium at SP–5 was 0.027 mg/l. Detection limits may vary between samples due to matrix effects, small sample size, etc.

[3] Detection limit for nickel at SP–1 was 0.02 mg/l. Detection limits may vary between samples due to matrix effects, small sample size, etc.

Boeing provided the Agency with a complete list of all raw materials used in the process contributing to the production of the sludge previously stored at the containment area. In addition, Boeing voluntarily provided the Agency with results from an evaluation of the soils for the EPA priority pollutants. The soil samples were analyzed with SW–846 Method 8240 to quantify volatile organics in the soil, Method 8080 for pesticides/PCBs, and Method 8270 for base/acid/neutral organics. The maximum concentrations reported for the detected priority pollutants are given in Table 4.

TABLE 4.—MAXIMUM TOTAL ORGANICS CONCENTRATIONS IN SOILS (PPM)

Constituents	Concentrations	Number of samples in which detected
Methylene chloride	0.41	12
Acetone	0.81	12
Di-butyl phthalate	0.074	1
Bis(2-ethylhexyl)-phthalate	3.1	6
Di-n-octyl phthalate	0.19	1

Separate analyses of the soil samples for the presence of formaldehyde showed non-detectable levels at a detection limit of 3 mg/kg.

Based on an evaluation of the site dimensions, Boeing submitted a signed certification stating that approximately 1,000 cubic yards of soil could be considered to be residually contaminated by the former presence of the F006 sludges. Boeing believes that soils at greater depths than they sampled need not be sampled since the bottom of the excavated area already lies at or below the water table, and that inclusion of these deeper soils may tend to dilute the surface soil samples with non-contaminated material. The Agency reviews a petitioner's estimates and, on occasion, has requested a petitioner to re-evaluate estimated waste volume. After a review of the site dimensions for the facility, the Agency believes that Boeing's figure of 1,000 cubic yards may underestimate the volume of contaminated soil by 300–500 cubic yards. The Agency, therefore, used a value of 1,500 cubic yards as a conservative alternative to Boeing's estimate in the evaluation of the soil.

EPA does not generally verify submitted test data before proposing delisting decisions, and has not verified the data upon which it proposes to grant Boeing's exclusion. The sworn affidavit submitted with this petition binds the petitioner to present truthful and accurate results. The Agency, however, has previously conducted a spot-check sampling and analysis program to verify the representative nature of the data for some percentage of the submitted petitions, and may select to visit this facility in the future for spot-check sampling.

4. Agency Evaluation

The Agency considered the appropriateness of alternative disposal scenarios for the residually contaminated soils and decided that a landfill scenario is the most reasonable, worst-case scenario for this waste. Under a landfill disposal scenario, the major exposure route of concern for any hazardous constituents would be ingestion of contaminated ground water. The Agency, therefore, evaluated the petitioned waste using its vertical and horizontal spread (VHS) landfill model which predicts the potential for ground-water contamination from wastes that are landfilled. See 50 *FR* 7882 (February 26, 1985), 50 *FR* 48896 (November 27, 1985), and the RCRA public docket for these notices for a detailed description of the VHS model and its parameters. This modeling approach, which includes a ground-water transport scenario, was used with conservative, generic parameters to predict reasonable worst-case contaminant levels in ground water at a hypothetical receptor well (*i.e.*, the model estimates the ability of an aquifer to dilute the toxicant from a specific volume of waste). In addition, the Agency used its Organic Leachate Model (OLM) to estimate the leachable portion of the organic constituents in the petitioned wastes. See 50 *FR* 48953 (November 27, 1985), 51 *FR* 41084 (November 13, 1986), and the RCRA public docket for these notices for a detailed description of the OLM and its parameters. The results of the OLM analysis were used in conjunction with the VHS model to estimate the potential for organic constituents to leach into the ground water. The Agency requests comments on the use of the VHS and OLM models as applied to the valuation of Boeing's waste.

Specifically, the Agency used the VHS model to evaluate the the mobility of the hazardous inorganic constituents (except arsenic, chromium, lead, mercury, nickel, selenium, and silver—see explanation below) in Boeing's contaminated soils. The Agency's evaluation of the 1,500 total cubic yards of potentially contaminated soils and the maximum reported EP leachate concentrations for the inorganic constituents in the soil samples using the VHS model generated the predicted compliance-point concentrations given in Table 5.

TABLE 5.—VHS MODEL: COMPLIANCE-POINT CONCENTRATIONS (PPM) RESIDUAL SOIL

Constituents	Compliance-point concentrations	Regulatory levels [1]
Barium	0.02	1.0
Cadmium	0.0009	0.01
Cyanide	0.0005	0.7

TABLE 5.—VHS MODEL: COMPLIANCE-POINT CONCENTRATIONS (PPM) RESIDUAL SOIL—Continued

Constituents	Compliance-point concentrations	Regulatory levels[1]
Beryllium	[2] < 0.002	0.2
Antimony	[2] < 0.01	0.01

[1] See "Docket Report on Health-Based Regulatory Levels and Solubilities Used in the Evaluation of Delisting Petitions," June 8, 1988, located in the RCRA public docket.
[2] Calculated from worst-case leachate concentrations which were derived from total constituent concentrations (see Tables 1 and 2).

EPA conservatively used, in this evaluation, the maximum EP leachate concentrations for each constituent that were detected in any soil sample (bottom, berm, or road soils). The Agency did not evaluate the mobility of the remaining inorganic constituents (*i.e.*, arsenic, chromium, lead, mercury, nickel, selenium, and silver) from Boeing's soil because they were not detected in the EP extract using the appropriate analytical methods (see Tables 1 and 2). The Agency believes that it is inappropriate to evaluate non-detectable concentrations of a constituent of concern in its modeling efforts if the non-detectable value was obtained using the appropriate analytical method. Specifically, if a constituent cannot be detected (when using the appropriate analytical method) the Agency assumes that the constituent is not present and therefore does not present a threat to either human health or the environment.

The waste exhibited barium and cadmium levels at the compliance point below the levels prescribed by the National Primary Drinking Water Regulations (NPDWR). Beryllium, antimony, and cyanide also do not exceed their respective regulatory levels. See Verified Reference Doses (RfDs) of the U.S. EPA, Office of Health and Environmental Assessment (OHEA), Environmental Criteria and Assessment Office, Cincinnati, Ohio, 1988.

The Agency also evaluated the mobility of the organic constituents which were tested in the residual soils of the sludge pile containment area using the VHS model. The Agency used the organic leachate model (OLM) to predict leachable concentrations of the organic compound data submitted for the residual soils (see Table 4).

The resulting leachable concentrations and the estimated volume of potentially contaminated soils (*i.e.*, 1,500 cubic yards) were then used as inputs in the VHS model in order to assess the potential impacts of these constituents upon the ground water. The calculated compliance-point concentrations for these organic constituents are given in Table 6.

TABLE 6.—VHS MODEL: COMPLIANCE-POINT CONCENTRATIONS RESIDUAL SOILS (PPM)

Constituents	Compliance-point concentrations	Regulatory levels [1]
Methylene chloride	0.0042	0.0047
Acetone	0.028	4
Di-butyl phthalate	0.00008	4
Bis(2-ethylhexyl) phthalate	0.00029	0.0042
Di-n-octyl phthalate	0.00009	[2] 0.6

[1] See "Docket Report on Health-Based Regulatory Levels and Solubilities Used in the Evaluation of Delisting Petitions," June 8, 1988, located in the RCRA public docket.
[2] Calculated from Health and Environmental Effects-Profile for Phthalic Acid Alkyl, Aryl, and Alkyl/Aryl Esters (Draft), U.S. EPA. July 1986.

Methylene chloride, acetone, di-butyl phthalate, bis(2-ethylhexyl) phthalate, and di-n-octyl phthalate do not exceed their respective regulatory levels. These organic compounds, therefore, are not of regulatory concern.

Evaluation of the raw materials in use at the facility indicates that cyanides and sulfides may be present in the soil. Because the maximum reported concentration of total cyanide in the soils was 0.5 ppm, the Agency believes that the concentration of reactive cyanide will be below the Agency's interim standard of 250 ppm. See "Interim Agency Thresholds for Toxic Gas Generation," July 12, 1985, Internal Agency Memorandum in the RCRA public docket. Testing for reactive sulfide, however, could not be accomplished. The Agency's existing method in SW–846 for reactive sulfide (see section 7.3.4.1) could not be used, due to the positive interference of sulfides in this waste resulting from the use of sulfuric acid and sulfur dioxide for chromium reduction in Boeing's wastewater treatment system. Sulfuric acid is used in the test method to release the reactive sulfide, so it can be trapped and detected by the appropriate instrumentation; it is thus expected that any reactive sulfide initially present in Boeing's wastewaters prior to the chromium reduction step would have either escaped or oxidized, and so would not be expected to be present at significant concentrations in the soils. In addition, the Agency does not believe that Boeing's soils exhibit any of the characteristics of ignitability, corrosivity, or reactivity. See 40 CFR 261.21, 261.22, and 261.23, respectively. Since the soils do not demonstrate the characteristic of reactivity, which considers, among other things, the possibility of release of toxic gases, vapors, or fumes from a waste, the Agency believes that sulfides in the soils, if present, do not exceed 500 ppm, the Agency's interim threshold for total sulfides. See "Interim Agency Thresholds for Toxic Gas Generation," *supra*. The Agency, therefore, does not believe reactive sulfides are of concern in this soil.

The Agency concluded after reviewing Boeing's processes and raw materials list, that no other hazardous constituents of concern are being used by Boeing, and that no other factors of concern appear in the processes which contributed to the originally stored F006 waste.

The Agency reviewed the groundwater monitoring data submitted by Boeing for the containment area. The data, which encompass one year of quarterly data collected in compliance with monitoring requirements in Boeing's RCRA permit, show no exceedances of the health-based regulatory levels for the contaminants monitored by the program, including the EP toxic metals. These data do not present a reason for denying exclusion to the soils.

5. Conclusion

The Agency believes that Boeing has successfully demonstrated that the soils remaining at the former sludge pile containment area are non-hazardous. The Agency believes that the true concentrations of these constituents in the soils were correctly assessed by the detailed sampling plan. The sampling plan incorporated core samples of soil to a depth of approximately three feet. Studies of the site indicated that this depth would be sufficient to evaluate all soil strata above the local water table; these studies are available for inspection in the docket for this proposal. Sampling to a greater depth would be expected to dilute the constituent concentrations of the surface soils with soils from within the water table. The soil samples, therefore, are representative of the existing soils within the sludge pile containment area at the Auburn facility.

The Agency believes that the 12 composited soil samples taken from the site were analyzed for the full spectrum of constituents which were reasonably expected to be present at the site. Boeing demonstrated that the underlying soils remaining after the removal of its hazardous waste pile and all associated surface soils were not contaminated

with sufficient hazardous levels of the F006 wastes previously stored in that pile to be the subject of regulatory concern. Based upon the constituents and factors evaluated, the Agency is proposing that the soils remaining at Boeing's sludge pile containment area are non-hazardous, as they should not present a hazard to either human health or the environment. The Agency, therefore, is proposing to grant a one-time exclusion to Boeing Commercial Airplane Company, located in Auburn, Washington, for the residual soils within its sludge pile containment area described in its petition as EPA Hazardous Waste No. F006. If the proposed rule becomes effective, Boeing's waste would no longer be subject to regulation under 40 CFR Parts 262 through 268 and the permitting standards of 40 CFR Part 270.

If made final, the exclusion will apply only to the wastes covered by the original demonstration. This proposed exclusion has no impact on the lagoon used in Boeing's treatment system; that is, the lagoon is still considered a hazardous waste unit. Because this is a one-time exclusion for the volume of soil evaluated by the Agency, Boeing may modify its manufacturing and treatment processes in the future without altering the regulatory status of the excluded soils, so long as the soils are not combined with hazardous wastes.

Although management of the waste covered by this petition would be relieved from Subtitle C jurisdiction upon final promulgation of an exclusion, the generator of a delisted waste must either treat, store, or dispose of the waste in an on-site facility, or ensure that the waste is delivered to an off-site storage, treatment, or disposal facility, either of which is permitted, licensed, or registered by a State to manage municipal or industrial solid waste. Alternatively, the delisted waste may be delivered to a facility that beneficially uses or reuses, or legitimately recycles or reclaims the waste, or treats the waste prior to such beneficial use, reuse, recycling, or reclamation.

III. Effective Date

This rule, if promulgated, will become effective immediately. The Hazardous and Solid Waste Amendments of 1984 amended section 3010 of RCRA to allow rules to become effective in less than six months when the regulated community does not need the six-month period to come into compliance. That is the case here, because this rule, if promulgated, would reduce the existing requirements for persons generating hazardous wastes. In light of the unnecessary hardship and expense that would be imposed on this petitioner by an effective date six months after promulgation and the fact that a six-month deadline is not necessary to achieve the purpose of section 3010, EPA believes that this exclusion should be effective immediately upon promulgation. These reasons also provide a basis for making this rule effective immediately, upon promulgation, under the Administration Procedures Act, pursuant to 5 U.S.C. 553(d).

IV. Regulatory Impact

Under Executive Order 12291, EPA must judge whether a regulation is "major" and therefore subject to the requirement of a Regulatory Impact Analysis. This proposal to grant an exclusion is not major, since its effect, if promulgated, would be to reduce the overall costs and economic impact of EPA's hazardous waste management regulations. This reduction would be achieved by excluding waste generated at a specific facility from EPA's lists of hazardous wastes, thereby enabling this facility to treat its waste as non-hazardous. There is no additional impact, therefore, due to today's rule. This proposal is not a major regulation, therefore, no Regulatory Impact Analysis is required.

V. Regulatory Flexibility Act

Pursuant to the Regulatory Flexibility Act, 5 U.S.C. 601 through 612, whenever an Agency is required to publish a general notice of rulemaking for any proposed or final rule, it must prepare and make available for public comment a regulatory flexibility analysis which describes the impact of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). The Administrator may certify, however, that the rule will not have a significant economic impact on a substantial number of small entities.

This amendment, if promulgated, will not have an adverse economic impact on small entities since its effect would be to reduce the overall costs of EPA's hazardous waste regulations and would be limited to one facility. Accordingly, I hereby certify that this proposed regulation, if promulgated, will not have a significant economic impact on a substantial number of small entities. This regulation, therefore, does not require a regulatory flexibility analysis.

List of Subjects in 40 CFR Part 261

Hazardous materials, Waste treatment and disposal, Recycling.

Date: November 22, 1988.

Jeffery D. Denit,

Deputy Director, Office of Solid Waste.

For the reasons set out in the preamble, 40 CFR Part 261 is proposed to be amended as follows:

PART 261—IDENTIFICATION AND LISTING OF HAZARDOUS WASTE

1. The authority citation for Part 261 continues to read as follows:

Authority: Secs. 1006, 2002(a), 3001, and 3002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976, as amended (42 U.S.C. 6905, 6912(a), 6921, and 6922).

2. In Table 1 of Appendix IX, add the following wastestreams in alphabetical order:

Appendix IX—Wastes Excluded Under §§ 260.20 and 260.22

TABLE 1.—WASTES EXCLUDED FROM NON-SPECIFIC SOURCES

Facility	Address	Waste description
•	•	•
Boeing Commercial Airplane Co.	Auburn, WA	Residually contaminated soils in an inactive sludge pile containment area on [insert date of final rule's publication] previously used to store wastewater treatment sludges generated from electroplating operations (EPA Hazardous F006).

[FRL-3485-5]

National Priorities List for Uncontrolled Hazardous Waste Sites; Deletion of a Site

AGENCY: Environmental Protection Agency.

ACTION: Notice of intent to delete sites from the National Priorities List; request for comments.

SUMMARY: The Environmental Protection Agency (EPA) announces its intent to Delete the Wade (ABM) Site from the National Priorities List (NPL) and requests public comment. The NPL is Appendix B to the National Oil and Hazardous Substances Contingency Plan (NCP), which the EPA promulgated pursuant to section 105 of the

BEST COPY AVAILABLE

1988
UMI

Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA). This action is being taken by EPA because it has been determined that all Fund-financed responses under CERCLA have been implemented and EPA, in consultation with the Commonwealth of Pennsylvania, has determined that no further cleanup is appropriate. The intention of this notice is to request public comment on the intent of EPA to delete the Wade (ABM) Site.

DATE: Comments may be submitted on or before January 3, 1989.

ADDRESS: Comments may be mailed to Richard Watman, Remedial Project Manager, Superfund Branch, (3HW21), Environmental Protection Agency, 841 Chestnut Street, Philadelphia, PA 19107. For background information on the site contact Richard Watman at the above address or (215) 597–3155.

The Deletion Docket is available for inspection Monday through Friday at the following locations and times:

—U.S. EPA Region 3, Hazardous Waste Management Division, 841 Chestnut Street, Philadelphia, PA 19107 from 9:00 am to 5:00 pm.

—City Health Dept., Chester City Hall, Chester, PA 19103 from 9:00 am to 4:00 pm.

FOR FURTHER INFORMATION CONTACT: Richard Watman (215) 597–3155.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction
II. NPL Deletion Criteria
III. Deletion Procedures
IV. Basis for Intended Site Deletion

I. Introduction

The Environmental Protection Agency (EPA) announces its intent to delete a site from the National Priorities List (NPL), Appendix B, of the National Oil and Hazardous Substances Contingency Plan (NCP), and requests comments on this deletion. The EPA identifies sites that appear to present a significant risk to human health or the environment and maintains the NPL as the list of those sites. Sites on the NPL may be the subject of Hazardous Substances Response Fund (Trust Fund) financed remedial actions. Any sites deleted from the NPL remain eligible for Fund-financed remedial actions in the unlikely event that conditions at the site warrant such action.

EPA plans to delete the Wade (ABM) Site in Delaware County, Pennsylvania from the NPL.

The EPA will accept comments on this site for thirty days after publication of this notice in the **Federal Register**.

Section II of this notice explains the criteria for deleting sites from the NPL. Section III discusses procedures that the EPA is using for this action. Section IV discusses the Wade Site and explains how the site meets the deletion criteria.

II. NPL Deletion Criteria

Amendments to the NCP published in the **Federal Register** on November 20, 1985 (50 FR 47912) establish the criteria the Agency uses to delete sites from the NPL. Section 300.66(c)(7) of the NCP provides that:

> * * * sites may be deleted from or recategorized on the NPL where no further response is appropriate. In making this determination, EPA will consider whether any of the following criteria have been met:
>
> (i) EPA in consultation with the State, has determined that responsible or other parties have implemented all appropriate response actions required;
>
> (ii) All appropriate Fund-financed response under CERCLA has been implemented, and EPA, in consultation with the State, has determined that no further cleanup by responsible parties is appropriate; or
>
> (iii) Based on a Remedial Investigation, EPA, in consultation with the State has determined that the release poses no significant threat to public health or the environment and, therefore, taking of remedial measures is not appropriate.

Before deciding to delete a site, EPA will make a determination that the remedy or decision that no remedy is necessary is protective of human health and environment, consistent with section 121(d) of the Superfund Amendments and Reauthorization Act (SARA) of 1986.

Deletion of a site from the NPL does not preclude eligibility for subsequent Fund-financed actions if future conditions warrant such action. Section 300.68(c)(8) of the NCP states that Fund-financed actions may be taken at sites that have been deleted from the NPL.

III. Deletion Procedures

Deletion of sites from the NPL does not itself create, alter, or revoke any individual rights or obligations. The NPL is designed primarily for informational purposes and to assist Agency management. As mentioned in section II of this notice, § 300.66(c)(8) of the NCP states that deletion of a site from the NPL does not preclude eligibility for future Fund-financed response actions.

For deletion of this site EPA's Regional Office will accept and evaluate public comments before making the final decision to delete.

A deletion occurs when the Assistant Administrator for Solid Waste and Emergency Response places a notice in the **Federal Register**, and the NPL will reflect those deletions in the next final update. Public notices and copies of the responsiveness summary will be made available to local residents by the Regional Office.

IV. Basis for Intended Site Deletions

The following site summary provides the Agency's rationale for intending to delete this site from the NPL:

Wade (ABM) Site, Delaware County, PA

The Wade (ABM) Site is a 3 acre parcel located in Chester, Delaware County, Pennsylvania. The site previously housed the Eastern Rubber Recycling Co., a firm engaged in shredding tires, rubber and other post-consumer goods. Contamination of the site occurred when, during 1976 and after, drums of waste were emptied either directly onto the surface or into trenches. An estimated 10,000 drums of waste were either disposed of or stored at this site. In 1982, the Wade Site was placed on the NPL with a Hazard Ranking System Score of 36.63.

A site characterization was completed in 1983 for the Pennsylvania Department of Environmental Resources (PADER) and a Feasibility Study was completed in March 1984 under contract to EPA's Office of Waste Programs Enforcement. As a result of the site characterization approximately 20,000 gallons of drummed wastes were shipped off-site for disposal. Surface and sub-surface sampling found large areas of site soils to be contaminated with volatile organics and base-neutral-acid extractable compounds to depths of up to 5 feet. Ground water in the area is not used for drinking. Sampling indicated that release of contaminants via the ground water to the nearby Delaware River were extremely small and concentrations of chemicals in the river resulting from such discharge were estimated to be negligible. The contaminated soils, debris and wastes were removed from the site under a State-lead, Fund-financed Remedial Action, and were disposed of in a permitted hazardous waste facility. The site was capped and seeded to complete the cleanup process. The remedial actions at the site were completed in July 1987.

The operation and maintenance plan for the site calls for a yearly inspection as well as yearly ground water monitoring to assure that impact on the Delaware River remains negligible. Maintenance to the topsoil cap and security fence will be performed, as necessary, based on this yearly inspection.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 87-543; RM-5817]

Radio Broadcasting Services; Arizona City, AZ

AGENCY: Federal Communications Commission.

ACTION: Proposed rule; dismissal of proposal.

SUMMARY: This document dismisses a petition filed on behalf of the Alpha Group, Inc., licensee of Station KXMK(FM), Channel 292A, Arizona City, Arizona, which requested the substitution of Channel 293C2, or alternatively, Channel 293A, for Channel 292A at Arizona City, and modification of its license accordingly, for failure to establish that the alternative channel substitutions would serve the public interest. With this action, the proceeding is terminated.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Nancy Joyner, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Report and Order, MM Docket No. 87-543, adopted November 4, 1988, and released November 28, 1988. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may alo be purchased from the Commission's copy contractors, International Transcription Service, (202) 857-3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

Radio Broadcasting Services; Groundwave Propagation

AGENCY: Federal Communications Commission.

ACTION: Notice of proposed rule making.

SUMMARY: The Commission adopted this Notice of Proposed Rule Making in order to develop a record with respect to use of new groundwave propagation curves. Use of these curves would result in greater accuracy in the determination of service and interference in the AM broacast band.

DATES: Comments may be filed with the Secretary of the Commission no later than January 3, 1989; and reply comments may be filed no later than January 18, 1989.

ADDRESS: Federal Communications Commission, Washington, DC 20554

FOR FURTHER INFORMATION CONTACT: Larry W. Olson, Policy and Rules Division, Mass Media Bureau (202) 632-6955.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Notice of Proposed Rule Making in MM Docket No. 88-510, FCC 88-326, adopted October 13, 1988, and released November 10, 1988. The full text of this Commission document is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this Notice of Proposed Rule Making may also be purchased from the Commission's copy contractor, International Transcription Services, (202) 857-3800, 2100 M Street, NW., Washington, DC 20037.

Summary of the Notice of Proposed Rule Making

1. As one step in the process to improve the AM broadcast service, the Commission issued a Notice of Inquiry in MM Docket No. 87-267, 52 FR 31795, August 24, 1987, (Inquiry) which provided a comprehensive review of the Commission's AM broadcast assignment criteria and related matters. Its goal was to identify any needed changes to the Commission's Rules which would permit AM stations to improve their service to the public and enhance their ability to compete in the market place.

2. This Notice of Proposed Rule Making considers changes to the procedures for calculating groundwave field strength. Groundwave field strength calculations are performed in accordance with § 73.183 of the FCC Rules. These procedures make use of the groundwave propagation curves contained in § 73.184 of the FCC Rules.

3. There is a significant range of distances for the present FCC groundwave propagation curves over which precise field strength calculations were not performed during their development. As a consequence, it was necessary to use graphical techniques to achieve smooth curves which result in inaccuracies. Their use in certain instances results in an inaccurate portrayal of service and interference for AM broadcast stations. In February 1986, the Commission released a report, FCC/OET R86-1, which described a new computer program incorporating solutions to the previous mathematical deficiencies. Use of that computer program now permits precise field strength calculations to be performed at all distances. New groundwave curves have been developed through the use of this program.

4. In view of the improved accuracy that would be derived from adoption of improved groundwave propagation curves, we are proposing to amend the Rules to incorporate the new groundwave propagation curves based upon the report, FCC/OET86-1. A complete set of full-scale curves is being placed in the record of this proceeding. In addition, we propose to convert Graph 20 of § 73.184 of the FCC Rules to metric units in order to facilitate its use. Comments are invited on these proposed changes, and, in addition, the Commission will consider alternative proposals which may provide potential improvements related to calculating groundwave field strength in the AM broadcast service.

5. Section 73.183(e) of the FCC Rules prescribes the procedure for calculating groundwave field strength over paths containing more than one conductivity value. Use of the current FCC method may result in imperfect predictions and we explored alternative procedures in the Inquiry. Most commenters suggested the continued use of the method in the FCC Rules finding it acceptable and not foreseeing that a change in methodology would result in a substantial increase in accuracy in the prediction of groundwave field strength contours. After considering the comments, we have concluded that it would not be useful to attempt to improve on the current FCC method at this time. Commenters in this proceeding who have specific proposals of offer or definitive studies on this subject are invited to submit such material for our further consideration.

6. Recognizing the relationship between the groundwave propagation curves which we are considering in this Notice and other assignment criteria that may be considered in future rule making proceedings, we note that there may be practical reasons for considering a delay in implementing new groundwave propagation curves, if adopted, until consideration of other possible changes to interrelated technical assignment criteria is concluded. Rather than implementing various changes to the technical assignment criteria in a "piece meal" fashion, we believe that there is merit in considering implementing simultaneously all the interrelated changes that may ultimately be adopted. We seek comment on the advisability of such an approach.

7. It would not be our intent to require any modifications of existing AM broadcast facilities as a result of the changes proposed in this Notice; nor would we intend to require parties whose applications are pending at the time any proposed rule changes are implemented to amend their application.

8. This is a nonrestricted notice and comment rule making proceeding. *See* §§ 1.1201(b), 1.1202(f), 1.1203 and 1.1206(a) of the Commission's Rules, 47 CFR 1.1201(b), 1.1202(f), 1.1203 and 1.1206(a) for rules governing permissible *ex parte* contacts.

9. Pursuant to the Regulatory Flexibility Act of 1980, 5 U.S.C. 605, it is certified that the proposed rule will not, if promulgated, have a significant economic impact on a substantial number of small entities because none of the approximately 5000 AM broadcast stations in the United States should be affected directly by this proposal. The changes proposed only relate to the standards (curves) used to calculate groundwave field strength and actual interference is not expected to increase as a result of the specific changes proposed in this Notice.

10. The proposal contained herein has been analyzed with respect to the Paperwork Reduction Act of 1980 and found to contain no new or modified form, information collection and/or record keeping, labeling, disclosure, or record retention requirements, and will not increase or decrease burden hours imposed on the public.

11. Pursuant to applicable procedures set forth in §§ 1.415 and 1.419 of the Commission's Rules, 47 CFR 1.415 and 1.419, interested parties may file

comments on or before January 3, 1989, and reply comments on or before January 18, 1989. All relevant and timely comments will be considered by the Commission before final action is taken in this proceeding.

12. Authority for the action taken is contained in sections 4(i), 303 and 307 of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), 303 and 307.

COMMISSION ON CIVIL RIGHTS

Agenda and Notice of Regional Forum

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights that the United States Commission on Civil Rights will convene a regional forum at 9:00 a.m. on December 8, 1988, and adjourn at 1:30 p.m. on December 9, 1988, in rooms 108 and 109 of the Nashville Convention Center, 601 Commerce Street, Nashville, Tennessee 37203–3724. The purpose of the forum is to discuss changing perspectives on civil rights.

Persons desiring additional information, or planning a presentation to the Commission, should contact Melvin Jenkins, Acting Staff Director, (202) 523–5571. Hearing impaired persons who will attend the meeting and require the services of a sign language interpreter, should contact the Staff Director's office at least three (3) days before the scheduled date of the meeting.

The meeting will be conducted pursuant to the provisions of the rules and regulations of the Commission.

Dated at Washington, DC, November 30, 1988.

Melvin L. Jenkins,
Acting Staff Director

BILLING CODE 6335–01–M

Pennsylvania Advisory Committee; Postponement of Public Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a meeting of the Pennsylvania Advisory Committee to the Commission, which was to have been convened at 1:00 p.m. and adjourned at 4:00 p.m. on December 1, 1988, in Room 317 of the U.S. Custom House, 2 Chestnut Street, Philadelphia, Pennsylvania, is postponed until January 12, 1989

The original plans for the December 1, 1988 meeting had appeared on page 45312 of Volume 53, Number 217, of the **Federal Register** on November 9, 1988. The new date for the meeting is January 12, 1989; however, the exact time and location are yet to be determined and will be announced in the near future

Persons desiring additional information on this matter should contact Committee Chairperson Susan M. Wachter (215/898–6355) or John I Binkley, Director of the Eastern Regional Division (202/523–5264; TDD 202/376–8117)

Dated at Washington, DC, November 29, 1988

DEPARTMENT OF COMMERCE

Agency Information Collection Under Review by the Office of Management and Budget (OMB)

DOC has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: Bureau of Export Administration.
Title: Short Supply Regulations on Petroleum Products.
Form Number: Agency—EAR 371.16 and 377.6; OMB—0694–0024.
Type of Request: Extension of the expiration date of a currently approved collection.
Burden: 3,750 respondents; 1,875 recordkeeping/reporting hours. Average hours per respondent is ½ hour.
Needs and Uses: The Naval Petroleum Reserves Production Act restricts the export of any petroleum product produced from crude oil derived from the Naval Petroleum Reserves. Before shipment can be made of petroleum products, the exporter must assemble and retain documents to prove compliance with the Act.
Affected Public: Businesses or other for-profit institutions; small businesses or organizations.
Frequency: On occasion.
Respondent's Obligation: Required to obtain or retain a benefit.
OMB Desk Officer: Francine Picoult, 395–7340.

Copies of the above information collection proposal can be obtained by calling or writing DOC Clearance Officer, Edward Michals, (202) 377–3271, Department of Commerce, Room 6622, 14th and Constitution Avenue, NW., Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent to Francine Picoult, OMB Desk Officer, Room 3208, New Executive Office Building, Washington, DC 20503.

Dated: November 22, 1988

Edward Michals,
Departmental Clearance Officer, Office of Management and Organization

BILLING CODE 3510–CW–M

Bureau of Export Administration

[Docket Nos. 8105–01, et al.]

Actions Affecting Export Privileges; Robert Behar et al.

Summary

In the Matter of: Robert Behar, individually and doing business as AB Electronics International and Hero Communications of Florida, Inc., Respondents; Docket No. 8501–01, Docket No. 8105–02, Docket No. 8105–03

Pursuant to the October 28, 1988 recommended Decision and Order of the Administrative Law Judge (ALJ), which Decision and Order is attached hereto and affirmed in principle part by me, Robert Behar, individually and doing business as AB Electronics International and Hero Communications of Florida, Inc., all with an address of 2470 W. 8th Avenue, Hialeah, Florida 33012, is, and the Respondents are collectively, assessed a civil penalty in the amount of $20,000; provided, however, that upon payment of the first $10,000 as provided in the Order, the remaining $10,000 shall be suspended for a period of one year and thereafter remitted, waived and/or forgiven provided that Respondents, either individually or collectively, have committed no further violations of the Act, the Regulations, or this final Order during the one year period of suspension.

Discussion

The ALJ's decision in this case is based on a consent agreement between parties. Both Respondents and the Department have taken issue with the ALJ's recommended Decision and Order in the following two respects:

1. The parties object to the fact that the ALJ found that Respondents had committed 20 violations of the Act and Regulations when, in the consent agreement, the Respondents, while admitting the facts alleged in the charging letter which form the basis of the ALJ's finding, specifically refrained from admitting that the facts constituted any violation of the Act or the Regulations; and

2. The parties object to the ALJ's use to the word "remit" in describing the disposition of the suspended $10,000 portion of the $20,000 fine following a one year suspension period in which no violations of the Act, the Regulations or this Order are committed by any of the respondents.

The issue of whether or not admission of facts underlying a charging letter also constitute admission of violation of the Act or Regulation has been the subject of substantial discussion between the ALJ and Departmental counsel for some time. At one point, ALJ Dolan had indicated that he would no longer accept consent agreements which did not expressly admit violation of the Act or the Regulations if the agreement was to be dispositive of a particular case. Such a position is clearly untenable. The plea of *nolo contendere* is well established in our jurisprudential system. It allows a party to accept the imposition of a penalty in a particular proceeding while reserving to the party the right to contest the facts or the imposition of liability in another proceeding. Thus, in the imposition of civil penalties under the Export Administration Act and Regulations, a respondent may admit to certain facts for the purposes of accepting the imposition of a penalty which will bring the matter to a close, while maintaining that the admitted facts do not necessarily constitute violation of the act of the regulations. However, the ALJ, as in the case of a plea of *nolo contendere,* is free to find that the facts thus admitted constitute violations of the Export Administration Act or Regulations. Indeed, the Under Secretary's authority for imposing civil penalties in such cases is based on the finding of a violation.

Export Administration Act cases are not akin to civil litigation between two private citizens. Private litigants are almost always free to reach settlement agreements which may call for the alleged tortfeasor to neither admit nor deny liability but to pay a stipulated sum to avoid the costs of litigations. If suit has been commenced, it is normal in such cases for the docket to be marked "Neither party, no costs, no further action for the same cause." Such is not the case in punitive administrative proceedings. For Export Administration Act cases in which there will be the imposition of a penalty, whether a denial period with respect to export privileges, a fine, or both, there must be some finding by the Under Secretary of a violation to support the imposition of the penalty. Thus the ALJ is correct in making a finding with respect to the violation, but incorrect insofar as his decision may indicate that respondents have actually admitted the violations.

The use of the word "remit" is correct. Used in the context in which the ALJ has used it, the word "remit" has the same legal meaning, or approximate meaning, as the word "forgive" or "waive." Any of the words will produce the same result when modified by the operative qualifier "provided Respondents have committed no further violations of the Act, the Regulations or the final Order entered in this proceeding during the one year suspension period."

Order

On October 28, 1988, the ALJ entered his recommended Decision and Order in the captioned matter. That Decision and Order, a copy of which is attached hereto and made a part hereof, has been referred to me for final action. The basis of the ALJ's recommended decision and order is an agreement of the parties, which the ALJ approved. Subject to the discussion above, I hereby affirm both that approval and the recommended Decision and Order of the ALJ. This constitutes final agency action in this matter.

Dated: November 28, 1988.

Paul Freedenberg,

Under Secretary for Export Administration.

Preliminary Statement

Appearance for Respondents: Frederick W. Finn, Esq., Brown, Finn & Nietert, Chartered, 1920 N Street NW., Suite 510, Washington, DC 20036.

Appearance for Agency: Margo Jackson, Esq., Louis K. Rothberg, Esq., Office of Chief Counsel for Export Enforcement, Room 3329, U.S. Department of Commerce, 14th & Constitution Avenue NW., Washington, DC 20230.

The Office of Export Enforcement, Bureau of Export Administration, United States Department of Commerce ("Agency") initiated administrative proceedings against Robert Behar, individually and doing business as AB Electronics International and Hero Communications of Florida, Inc. ("Respondents") by issuing a charging letter, dated March 10, 1988. The letter was issued pursuant to section 13(c) of the Export Administration Act of 1979 (50 U.S.C. App. 2401 through 2420), as amended, (the "Act"), and the Export Administration Regulations (the "Regulations").[1]

Findings and Discussion

The charging letter alleges that on ten separate occasions Respondents violated former §§ 387.4 and 387.6 of the Regulations by exporting U.S.-origin satellite communication equipment from the United States to Saudi Arabia, Argentina, Trinidad, Peru, South Africa, France, Aruba and Singapore, without obtaining the validated export licenses which Respondents knew, or had reason to know, were required by former § 372.1(b) of the Regulations, for a total of twenty violations. Former § 387.6 prohibited the export, diversion, reexport or transshipment of commodities or technical data in violation of, or contrary to, any provision of the Act or any regulation, order, or license issued under the Act. Former § 387.4 prohibited the export of any commodity or technical data which is subject to the Regulations with knowledge or reason to know that a violation of the Act or any regulation, order, or license has occurred, is about to occur, or is intended to occur with respect to any transaction.

It is asserted that, on ten separate occasions between May 27, 1983 and July 16, 1985, Respondents exported U.S.-origin satellite communication equipment, controlled under section 5 of the Act for national security reasons, from the United States to the destinations listed previously without obtaining from the Agency the required validated export licenses. Respondents exported this equipment to Saudi Arabia on May 27, 1983, to Argentina on July 20, 1983, to Trinidad on August 3, 1983, to Peru on August 18, 1983, to South Africa on November 3, 1983, to France on June 20, 1984 and again on June 28, 1984, to Aruba on January 18, 1985 and to Singapore on July 16, 1985.

By failing to obtain the validated export license on each of these ten

[1] The Act was reauthorized and amended by the Export Administration Amendments Act of 1985, Pub. L. 99–64, 99 Stat. 120 (July 12, 1985), and amended by the Omnibus Trade and Competitiveness Act of 1988, Pub. L. 100–418, 102 Stat. 1107 (Aug. 23, 1988).

The Regulations, formerly codified at 15 CFR Parts 368 through 399, were redesignated as 15 CFR Parts 768 through 799, effective October 1, 1988 (53 FR 37751, September 28, 1988).

occasions, Respondents violated § 387.6 of the Regulations. It is also asserted that Respondents knew, or had reason to know, that licenses were required for each of these shipments by § 372.1(b) of the regulations. Respondents thus violated § 387.4 on each occasion. Respondents admit that these facts are ture. Thus Respondents committed the twenty aforementioned violations.

Conclusion

The Agency and Respondents settled this matter by entering into a consent agreement, as authorized by former § 388.17 of the Regulations, whereby the Respondents agreed to pay to the Agency a civil penalty in the amount of $20,000, of which $10,000 is to be suspended for one year and then remitted, providing Respondents commit no further violations of the Act, the Regulations or the final Agency Order in this proceeding.

The undersigned approves the terms of the consent agreement. Pursuant to the authority delegated to me by Part 388 of the Regulations, *It Is Ordered That*:

Order

I. Respondents are assessed a civil penalty in the amount of $20,000. Respondent is to make three installment payments to the Agency. The first payment of $4,000 is to be paid within thirty days from the date of the final Agency action. The second payment of $3,000 is to be paid within sixty days from the date of that date. The third payment of $3,000 is to be paid within ninety days from that date.

II. The payment of the remainder of the civil penalty, $10,000, is hereby suspended for a period of one year from the date of the final Agency action in this proceeding in accordance with § 388.16 of the Regulations and will be remitted without further action at the end of that period provided Respondents have committed no further violations of the Act, the Regulations or the final Order entered in this proceeding during the one year suspension period.

III. This Order as affirmed or modified shall become effective upon entry of the Secretary's final action in this proceeding pursuant to the Act (50 U.S.C. App. 2412(c)(1)).

Date: October 28, 1988.

Hugh J. Dolan,

Administrative Law Judge.

To be considered in the 30 day statutory review process which is mandated by section 13(C) of the Act, submissions must be received in the Office of the Under Secretary for Export Administration, U.S. Department of Commerce, 14th and Constitution Ave., NW., Room 3898B, Washington, DC, 20230, within 12 days. Replies to the other party's submission are to be made within the following 8 days. 15 CFR 388.23(b), 50 FR 53134 (1985).

Instruction for Payment of Civil Penalty

1. The civil penalty check should be made payable to: U.S. Department of Commerce.

2. The check should be mailed to: U.S. Department of Commerce, Office of the Assistant General Counsel for Export Administration, Room H–3845, 14th Street and Constitution Avenue, NW., Washington, DC 20230, *Attn:* Pamela P. Breed, *Esq.*

Industrial Nitrocellulose From France; Preliminary Results of Countervailing Duty Administrative Review and Intent to Revoke Countervailing Duty Order

AGENCY: International Trade Administration/Import Administration, Commerce.

ACTION: Notice of preliminary results of countervailing duty administrative review and intent to revoke countervailing duty order.

SUMMARY: The Department of Commerce has conducted an administrative review of the countervailing duty order on industrial nitrocellulose from France. We preliminarily determine the net subsidy to be 0.12 percent *ad valorem* for the period January 1, 1986 through December 31, 1986, 0.09 percent *ad valorem* for the period January 1, 1987 through December 31, 1987 and 0.06 percent *ad valorem* for the period January 1, 1988 through March 10, 1988, rates we consider *de minimis*. As a result of the review, we intend to revoke the countervailing duty order. We invite interested parties to comment on these preliminary results.

EFFECTIVE DATE: December 2, 1988.

FOR FURTHER INFORMATION CONTACT: Lorenza Olivas or Bernard Carreau, Office of Countervailing Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377–2786.

SUPPLEMENTARY INFORMATION: .

Background

On March 10, 1988, the Department of Commerce ("the Department") published in the **Federal Register** (53 FR 7776) the preliminary results of administrative review and tentative determination to revoke the countervailing duty order on industrial nitrocellulose from France (48 FR 28521, June 22, 1983). On April 28, 1988, the Department published in the **Federal Register** (53 FR 15267) the final results of its administrative review of the countervailing duty order. In accordance with 19 CFR 355.42, the revocation will be effective as of the date of publication of the notice of tentative determination to revoke. Therefore, in accordance with 19 CFR 355.42(f), we have conducted a review of the period January 1, 1986 through March 10, 1988—the period between the end of the minimum two-year period of no net subsidy and the tentative determination to revoke, since the dispositive date for establishing a two-year period of no net subsidy is the date of publication of the order.

Scope of Review

The United States has developed a system of tariff classification based on the international harmonized system of Customs nomenclature. On January 1, 1989, the U.S. tariff schedules will be fully converted to the *Harmonized Tariff Schedule* (HTS). All merchandise entered, or withdrawn from warehouse, for consumption on or after this date will be classified solely according to the appropriate HTS item number(s). Until that time, however, the Department will be providing both the appropriate *Tariff Schedules of the United States Annotated* (TSUSA) item number(s) and the appropriate HTS item number(s) with our product descriptions. As with the TSUSA, the HTS item number(s) are provided for convenience and Customs purposes. The written description remains dispositive.

We are requesting petitioners to include the appropriate HTS item number(s) as well as the TSUSA item number(s) in all new petitions filed with the Department. A reference copy of the HTS schedule is available for consultation at the Central Records Unit, Room B–099, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230. Additionally, all Customs offices have reference copies, and petitioners may contact the Import Specialist at their local Customs office to consult the schedule.

Imports covered by this review are shipments of French industrial nitrocellulose containing between 10.8 percent and 12.2 percent nitrogen, not explosive grade nitrocellulose which contains over 12.2 per cent nitrogen.

Industrial nitrocellulose is a dry, white, amorphous, synthetic chemical produced by the action of nitric acid on cellulose. Industrial nitrocellulose comes in several viscosities and is used to form films in lacquers, coatings, furniture finishes and printing ink. Such merchandise is currently classifiable as cellulosic plastic materials, other than cellulose acetate, under item 445.2500 of the TSUSA and item 3912.20.00 of the HTS.

The review covers the period January 1, 1986 through March 10, 1988, and nine programs: (1) A grant from DATAR; (2) the assumption of labor costs for civil servants; (3) research and development assistance; (4) financing from the Fonds de Developpement Economique et Social; (5) loans from Credit National; (6) financing from the Caisse des Depots et Consignations; (7) loans from the Ministry of Research and Industry; (8) a grant from the Ministry of Defense; and (9) government equity infusions. Societe Nationale des Poudres et Explosifs ("SNPE") is the only known French producer and exporter of this merchandise to the United States.

(1) DATAR Grant

The Delegation a 1'Amenagement du Territoire et a 1'Action Regionale ("DATAR") coordinates the programs of various government agencies that provide incentives to establish or expand businesses in certain regions of France. SNPE received a grant from DATAR in 1979 to improve the production facilities and general infrastructure of the Bergerac plant, where industrial nitrocellulose is produced. Because grants received from DATAR provide benefits to specific regions, we preliminarily determine that this program constitutes a subsidy.

To calculate the benefit, we applied a declining balance methodology and allocated the grant over 10 years, the average useful life of assets in the nitrocellulose industry, according to the Asset Guideline Classes of the Internal Revenue Service. We used as the discount rate the 1979 national average corporate bond rate in France (as reported in Morgan Guaranty Trust Company's *World Financial Markets*) because we have no information on SNPE's weighted cost of capital for that year. On this basis, we preliminarily determine the benefit from this program to be 0.03 percent *ad valorem* for the period January 1, 1986 through December 31, 1986, 0.03 percent *ad valorem* for the period January 1, 1987 through December 31, 1987, and 0.03 percent *ad valorem* for the period January 1, 1988 through March 10, 1988.

(2) Assmption of Labor Costs for Civil Servants

Some employees of SNPE retain government civil service status ("status employees") as a result of the company's change from a government agency to a government-owned private corporation in 1971. SNPE is responsible for paying the wages and benefits of all its employees. In general, SNPE's contribution for certain nonwage benefits, such as health insurance, pensions, and unemployment insurance, is lower for its status employees than for other employees. Because the French government assumes part of SNPE's contributions for status employees, we preliminarily determine that this program constitutes a subsidy.

To calculate the benefit, we took the average annual difference between SNPE's nonwage benefits for status employees and those for other employees and multiplied that amount by the number of status employees involved in industrial nitrocellulose production. We allocated the result over total sales of industrial nitrocellulose during the period of review. On this basis, we preliminarily determine the benefit from this program to be 0.09 percent *ad valorem* for the period January 1, 1986 through December 31, 1986, 0.06 percent *ad valorem* for the period January 1, 1987 through December 31, 1987, and 0.03 percent *ad valorem* for the period January through March 10, 1988.

(3) Other Programs

We also examined the following programs and preliminarily determine that SNPE did not use them during the period of review:

(a) Research and development assistance;

(b) Financing from the Fonds de Developpement Economique et Social;

(c) Preferential loans from Credit National;

(d) Financing from the Caisse des Depots et Consignations;

(e) Loans from the Ministry of Research and Industry;

(f) Grants from the Ministry of Defense; and,

(g) Government equity infusions.

Preliminary Results of Review and Intent to Revoke

As a result of our review, we preliminarily determine the net subsidy to be 0.12 percent *ad valorem* for the period January 1, 1986 through December 31, 1986, 0.09 percent *ad valorem* for the period January 1, 1987 through December 31, 1987, and 0.06 percent *ad valorem* for the period January 1, 1988 through March 10, 1988. The Department considers any rate less than 0.50 percent *ad valorem* to be *de minimis*.

The Department therefore intends to instruct the Customs Service to liquidate, without regard to countervailing duties, all entries of this merchandise exported on or after January 1, 1986 and entered, or withdrawn from warehouse, for consumption on or before March 9, 1988. If the revocation is made final, the Department intends to instruct the Customs Service to terminate the suspension of liquidation requirement and to refund any cash deposits made on merchandise entered, or withdrawn from warehouse, for consumption on or after March 10, 1988.

SNPE has requested that the Department revoke the countervailing duty order based on the absence of a net subsidy for at least two years, as provided in 19 CFR 355.42(b). In our last review (53 FR 15267, April 28,1988), we determined that SNPE received *de minimis* benefits for at least a two-year period. According to 19 CFR 355.42(f), a revocation will be effective with respect to all merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication of the notice of tentative determination to revoke, provided that the firm involved provides information showing no receipt of a net subsidy up to the date of the notice of tentative determination to revoke.

Because we have found *de minimis* benefits for the current review period, which extends through March 10, 1988, the date of publication of the tentative determination to revoke, we intend to revoke the countervailing duty order. If the revocation is made final, it will apply to all unliquidated entries of this merchandise entered, or withdrawn from warehouse, for consumption on or after March 10, 1988.

Interested parties may submit written comments on these preliminary results and intent to revoke within 30 days of the date of publication of this notice and may request disclosure and/or a hearing within 10 days of the date of publication. Any hearing, if requested, will be held 30 days from the date of publication, or the first workday afterwards. Any request for an administrative protective order must be made no later than five days after the date of publication. The Department will publish the final results of this administrative review and its decision on revocation, including the results of its analysis of issues raised in any such written comments or at a hearing.

Preliminary Affirmative Countervailing Duty Determination; Industrial Belts and Components and Parts Thereof, Whether Cured or Uncured, from Israel

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: We preliminarily determine that benefits which constitute subsidies within the meaning of the countervailing duty law are being provided to manufacturers, producers, or exporters in Israel of industrial belts and components and parts thereof, whether cured or uncured (industrial belts), as described in the "Scope of Investigation" section of the notice. The estimated net subsidy is 15.11 percent *ad valorem.* In addition, we preliminarily determine that critical circumstances do not exist in this case.

We have notified the United States International Trade Commission (ITC) of our determination. We are directing the U.S. Customs Service to suspend liquidation of all entries of industrial belts from Israel that are entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice, and to require a cash deposit or bond on entries of these products in an amount equal to the duty deposit rate. If this investigation proceeds normally, we will make a final determination on or before February 13, 1989.

EFFECTIVE DATE: December 2, 1988.

FOR FURTHER INFORMATION CONTACT: Roy Malmrose or Barbara Tillman, Office of Countervailing Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377-5414 or 377-2438.

Preliminary Determination

Based on our investigation, we preliminarily determine that benefits which constitute subsidies within the meaning of section 701 of the Tariff Act of 1930, as amended (the Act), are being provided to manufacturers, producers, or exporters in Israel of industrial belts. For purposes of this investigation, the following programs are preliminarily found to confer subsidies:

- Encouragement of Capital Investment Law Grants.
- Exchange Rate Risk Insurance.
- Long-term Industrial Development Loans.
- Encouragesment of Research and Development Law Grants.

We preliminarily determine the estimated net subsidy to be 15.11 percent *ad valorem* for all manufacturers, producers, or exporters in Israel of industrial belts.

Case History

Since the publication of the Notice of Intitation in the **Federal Register** (53 FR 28042, July 26, 1988), the following events have occurred. On August 1, 1988, we issued a questionnaire to the Government of Israel in Washington, DC, concerning petitioner's allegations. On August 26, 1988, petitioner filed a request that the preliminary determination be postponed for 65 days. Pursuant to section 703(c)(1)(A) of the Act, on September 7, 1988, we postponed the preliminary determination to no later than November 28, 1988 (53 FR 34570). On October 6, 1988, we received responses from the Government of Israel (GOI) and Magam United Rubber Industries Ltd. (Magam). On October 21, 1988, we issued deficiency questionnaires to the Government of Israel and Magam.

On October 28, 1988, we received a letter from counsel for Magam stating that a response to the deficiency questionnaires would not be submitted and that the company could no longer participate in the investigation. On November 16, 1988, we received a letter from the GOI stating that it had decided not to actively participate in the investigation and requesting that the GOI questionnaire response be returned. On November 22, 1988, we received a letter from counsel for Magam requesting that the company questionnaire response be returned. The Department has granted the requests of the GOI and Magam, and will return their respective responses.

Scope of Investigation

The United States has developed a system of tariff classification based on the international harmonized system of customs nomenclature. On January 1, 1989, the U.S. tariff schedules will be fully converted to the *Harmonized Tariff Schedule* (HTS) and all merchandise entered or withdrawn from warehouse for consumption on or after this date will be classified solely according to the appropriate HTS item numbers. Until that time, however, the Department will be providing both the appropriate *Tariff Schedules of the United States Annotated* (TSUSA) item number(s) and the appropriate HTS item number(s) with its product descriptions. As with the TSUSA, the HTS item numbers are provided for convenience and customs purposes. The written description remains dispositive as to the scope of the product coverage.

We are requesting petitioners to include the appropriate HTS item number(s) as well as the TSUSA item number(s) in all petitions filed with the Department through the end of this year. A reference copy the HTS is available for consultation in the Central Records Unit, Room B-099, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230. Additionally, all U.S. Customs offices have reference copies, and petitioners may contact the import specialist at their local customs office to consult the schedule.

The products covered by this investigation are industrial belts and components and parts thereof, whether cured or uncured, currently provided for under TSUSA item numbers 358.0210, 358.0290, 358.0610, 358.0690, 358.0800, 358.0900, 358.1100, 358.1400, 358.1600, 657.2520, 773.3510, and 773.3520 and currently classifiable under HTS item numbers 5910.00.10, 5910.00.90, 4010.10.10 and 4010.10.50.

The merchandise covered by this investigation includes certain industrial belts for power transmission. These include V-belts, synchronous belts, round belts and flat belts, in part or wholly of rubber or plastic, and containing textile fiber (including glass fiber) or steel wire, cord or strand, and whether in endless (i.e., closed loop) belts, or in belting in lengths or links. This investigation excludes conveyor belts and automotive belts as well as front engine drive belts found on equipment powered by internal combustion engines, including trucks, tractors, buses, and lift trucks.

Analysis of Programs

Because the GOI and Magam have withdrawn their questionnaire responses, this determination is based on the best information available. For

each program upon which we initiated an investigation, we used as the best information available the highest rate ever found for the program in previous Israeli cases. Based upon our analysis of the petition and prior Israeli cases, we preliminarily determine the following:

I. Programs Preliminarily Determined to Confer Subsidies

We preliminarily determine that subsidies are being provided to manufacturers, producers, or exporters of industrial belts in Israel under the following programs:

A. The Encouragement of Capital Investment Law (ECIL) Grants

The purpose of the ECIL is to attract capital investment to Israel. In order to be eligible to receive various benefits under the ECIL, including investment grants, interest subsidy payments, accelerated depreciation, and reduced tax rates, the applicant must obtain "approved enterprise" status. (We discuss ECIL interest subsidy payments and tax programs below under "Programs Preliminarily Determined Not to be Used".) Approved enterprise status is obtained after review of information submitted to the Israel Ministry of Industry and Trade, Investment Center Division.

Using our *Final Affirmative Countervailing Duty Determination: Potassium Chloride from Israel* (49 FR 36122, September 14, 1984) as the best information available, we preliminarily determine that the provision of investment grants under this program confers a subsidy on exports of industrial belts from Israel and that the estimated net subsidy for all producers and exporters of industrial belts in Israel is 1.18 percent *ad valorem*.

B. Exchange Rate Risk Insurance

The Exchange Rate Risk Insurance Scheme (EIS), operated by the Israel Foreign Trade Risk Insurance Corporation Ltd. (IFTRIC), is aimed at insuring exporters against losses which result when the rate of inflation exceeds the rate of devaluation and the New Israeli Shekel (NIS) value of an exporter's foreign currency receivables does not rise enough to cover increases in local costs.

The EIS scheme is optional and open to any exporter willing to pay premiums to IFTRIC. Compensation is based on a comparison of the change in the rate of devaluation of the NIS against a basket of foreign currencies with the change in the consumer price index. If the rate of inflation is greater than the rate of devaluation, the exporter is compensated by an amount equal to the difference between these two rates multiplied by the value-added of the exports. If the rate of devaluation is higher than the change in the domestic price index, however, the exporter must compensate IFTRIC. The premium is calculated for all participants as a percentage of the value-added sales value of exports. IFTRIC changes this percentage rate periodically; but at any given time, it is the same for all exporters.

In determining whether an export, insurance program provides a countervailable benefit, we examine whether the premiums and other changes are adequate to cover the program's long-term operating costs and losses. In the last Israeli investigation, *Final Affirmative Countervailing Duty Determination: Industrial Phosphoric Acid from Israel* (52 FR 25447, July 7, 1987) (*Phosphoric Acid*), we found that this program conferred a countervailable benefit. Using our determination in *Phosphoric Acid* as the best information available, we preliminarily determine that this program confers an export subsidy on exports of industrial belts from Israel.

Using the rate calculated in *Final Affirmative Countervailing Duty Determination: Certain Fresh Cut Flowers from Israel* (52 FR 3316, February 3, 1987) (*Flowers*) as the best information available with respect to the amount of the subsidy, we preliminarily determine that the estimated net subsidy for all producers and exporters of industrial belts in Israel is 8.87 percent *ad valorem*.

C. Long-term Industrial Development Loans

Prior to July 1985, approved enterprises were eligible to receive long-term industrial development loans funded by the GOI. In *Phosphoric Acid*, we determined that loans under this program are provided to a diverse number of industries. However, the interest rates charged on these loans vary depending on the development zone location of the borrower. The interest rates on loans to borrowers in Development Zone A are lowest, while those on loans to borrowers in the Central Zone are highest.

In the absence of government and company questionnaire responses, we assume, as the best information available, that the producers and exporters of industrial belts in Israel are not located in the Central Zone. Therefore, we preliminarily determine that this program confers a regional subsidy on exports of industrial belts from Israel. Using the rate calculated in *Final Affirmative Countervailing Duty Determination: Oil Country Tubular Goods from Israel* (52 FR 1651, July 7, 1987) as the best information available, we preliminarily determine that the estimated net subsidy for all producers and exporters of industrial belts in Israel is 5.02 percent *ad valorem*.

D. Encouragement of Research and Development Law (ERDL) Grants

Petitioner alleges that research and development grants equal to 50 percent of approved project costs are available under ERDL where such activity is directed at export expansion. Using as the best information available our determination in *Phosphoric Acid*, we preliminarily determine that this program confers a subsidy on exports of industrial belts from Israel and that the estimated net subsidy for all producers and exporters of industrial belts in Israel is 0.04 percent *ad valorem*.

II. Programs Preliminarily Determined Not to be Used

Using as the best information available the non-use of the following programs in previous investigations, we preliminarily determine that the programs described below were not used by manufacturers, producers, or exporters in Israel of industrial belts:

A. Benefits Under the Encouragement of Capital Investment Law (ECIL)

1. *Accelerated Depreciation Under Section 42.* Section 42 provides that approved enterprises, located in development zones established by the ECIL, are entitled to twice the usual rate of depreciation on machinery and equipment and four times the usual rate of buildings.

2. *Direct Reduction of Corporate Tax Under Section 47.* Under section 47 of the ECIL, a company which has obtained approved enterprise status is eligible for a special corporate tax rate of 30 to 40 percent rather than the usual rate of 61 percent and income from approved investments is subject to a minimum rate of 25 percent. In addition to the regionally-based qualifying criteria, these tax benefits have been conditioned on export performance since 1978.

3. *Interest Subsidy Payments.* The Government of Israel rebates in the form of grants interest paid on loans from commercial banks. The amount of the

grants depends on the development zone in which a company is located.

B. Labor Training Grants from the Ministry of Labor

Petitioner alleges that manufacturers, producers or exporters in Israel of industrial belts benefit from refunds for worker training costs for periods of up to six months and up to 80 percent of trainee wages.

C. Special Export Marketing Financing from the Bank of Israel

Petitioner alleges that loans under this program are provided for specific marketing expenses such as penetrating new markets, special marketing drives and establishing sales offices abroad.

Critical Circumstances

Petitioner alleges that "critical circumstances" exist within the meaning of section 703(e)(1) of the Act, with respect to imports of industrial belts from Israel. In determining whether critical circumstances exist, we must examine whether there is a reasonable basis to believe or suspect that: (1) The alleged sudsidy is inconsistent with the Agreement, and (2) there have been massive imports of the subject merchandise over a relatively short period.

In determining whether imports have been massive over a relatively short period of time, we consider the following factors: (1) The volume and value of the imports; (2) seasonal trends; and (3) the share of domestic consumption accounted for by the imports. Examination of the import statistics with respect to industrial belts from Israel indicates that the value and volume of imports from Israel are small and declining. Therefore, we preliminarily determine that critical circumstances do not exist.

Suspension of Liquidation

In accordance with section 703(d) of the Act, we are directing the U.S. Customs Service to suspend liquidation of all entries of industrial belts from Israel which are entered, or writhdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**, and to require a cash deposit or bond for each entry of this merchandise equal to 15.11 percent *ad valorem*. This suspension will remain in effect until further notice.

Verification

In accordance with section 776(b) of the Act, we will verify the information used in making our final determination.

ITC Notification

In accordance with section 703(f) of the Act, we will notify the ITC of our determination. In addition, we are making available to the ITC all nonprivileged and nonproprietary information relating to this investigation. We will allow the ITC access to all privileged and business proprietary information in our files, provided the ITC confirms that it will not disclose such information, either publicly or under an administrative protective order, without the written consent of the Assistant Secretary for Import Administration.

If our final determination is affirmative, the ITC will determine whether these imports materially injure, or threaten material injury to, a U.S. industry within 45 days after the Department makes its final determination.

Public Comment

In accordance with 19 CFR 355.35, we will hold a public hearing, if requested, to afford interested parties an opportunity to comment on this preliminary determination. Individuals who wish to participate in the hearing must submit a request within ten days of the publication of this notice in the **Federal Register** to the Assistant Secretary for Import Administration, U.S. Department of Commerce, Room B–099, 14th Street and Constitution Avenue, NW., Washington, DC 20230.

Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; (3) the reason for attending; and (4) a list of the issues to be discussed. In addition, ten copies of the business proprietary version and seven copies of the nonproprietary version of the pre-hearing briefs must be submitted to the Assistant Secretary at least seven days prior to the scheduled date of the public hearing. Oral presentations will be limited to issues raised in the briefs. Written views should be submitted in accordance with 19 CFR 355.33(d) and 355.34, and will be considered if received not less than 30 days before the final determinations are due or, if a hearing is held, within ten days after the hearing transcript is available.

This determination is published pursuant to section 703(f) of the Act (19 U.S.C. 1671b(f)).

November 28, 1988.

Jan W. Mares,

Assistant Secretary for Import Administration.

BILLING CODE 3510–DS–M

[C–580–802]

Preliminary Affirmative Countervailing Duty Determination; Industrial Belts and Components and Parts Thereof, Whether Cured or Uncured, from the Republic of Korea

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: We preliminarily determine that certain benefits which constitute subsidies within the meaning of the countervailing duty law are being provided to manufacturers, producers or exporters in Korea of industrial belts and components and parts thereof, whether cured or uncured (industrial belts), as described in the "Scope of Investigation" section of this notice. The estimated net subsidy is 0.51 percent *ad valorem* for all manufacturers, producers or exporters in Korea of industrial belts, except for Hankook Belt Industry (Hankook). The estimated net subsidy for Hankook is 24.52 percent *ad valorem*. We have calculated a separate estimated net subsidy for Hankook because its rate differs significantly from the country-wide rate. (See "Suspension of Liquidation" section of this notice.) In addition, we preliminarily determine that critical circumstances do exist in this case. If this investigation proceeds normally, we will make a final determination on or before February 13, 1989.

EFFECTIVE DATE: December 2, 1988.

FOR FURTHER INFORMATION CONTACT: Timothy Nelson or Roy Malmrose, Office of Countervailing Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377–3174 and 377–5414.

SUPPLEMENTARY INFORMATION:

Preliminary Determination

Based on our investigation, we preliminarily determine that certain benefits which constitute subsidies within the meaning of section 701 of the Tariff Act of 1930, as amended (the Act), are being provided to manufacturers, producers or exporters in Korea of industrial belts. For purposes of this investigation, the following programs are preliminarily found to confer subsidies.

- Short-Term Export Financing.
- Export Tax Reserves.
- Duty Drawback on Non-physically Incorporated Items and Allowances

for Excessive Loss and Wastage Rates.

We preliminarily determine the estimated net subsidy to be 0.51 percent *ad valorem* for all manufacturers, producers or exporters in Korea of industrial belts except for Hankook Belt Industry. The estimated net subsidy for Hankook is 24.52 percent *ad valorem*. We have calculated a separate estimated net subsidy for Hankook because its rate differs significantly from the country-wide rate.

Case History

Since the publication of the Notice of Initiation in the **Federal Register** (53 FR 28044, July 26, 1988), the following events have occurred. On August 1, 1988, we presented a questionnaire to the Government of Korea in Washington, DC, concerning petitioner's allegations. On August 26, 1988, petitioner filed a request that the preliminary determination be postponed for 65 days. Pursuant to section 703(c)(1)(A) of the Act, on September 7, 1988, we postponed the preliminary determination to no later than November 28, 1988 (53 FR 34570).

On September 14, 1988, we received responses from the Government of Korea (GOK) Dongil Rubber Belt Co., Ltd. (Dongil), and Taelim Moolsan Co., Ltd (Taelim Moolsan), a trading company whose exports to the United States are purchased from Dongil. The response of the GOK listed another producer of industrial belts which exports to the United States, Hankook Belt Industry (Hankook). On October 26, 1988, we sent a letter to the GOK requesting that Hankook also respond to our questionnaire. However, this company did not respond to the Department's countervailing duty questionnaire. On October 21, 1988, we delivered supplemental/deficiency questionnaires to the Government and Dongil. On November 8, 1988, we received responses from the GOK and Dongil to these questionnaires.

Scope of Investigation

The United States has developed a system of tariff classification based on the international harmonized system of customs nomenclature. On January 1, 1989, the U.S. tariff schedules will be fully converted to the *Harmonized Tariff Schedule* (HTS) and all merchandise entered or withdrawn from warehouse for consumption on or after this date will be classified solely according to the appropriate HTS item numbers. Until that time, however, the Department will be providing both the appropriate *Tariff Schedules of the United States Annotated* (TSUSA) item number(s) and the appropriate HTS item number(s) with its product descriptions. As with the TSUSA, the HTS item numbers are provided for convenience and customs purposes. The written description remains dispositive as to the scope of the product coverage.

We are requesting petitioners to include the appropriate HTS item number(s) as well as the TSUSA item number(s) in all petitions filed with the Department through the end of this year. A reference copy of the HTS is available for consultation in the Central Records Unit, Room B-099, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230. Additionally, all U.S. Customs offices have reference copies, and petitioners may contact the import specialist at their local customs office to consult the schedule.

The products covered by this investigation are industrial belts and components and parts thereof, whether cured or uncured, currently provided for under TSUSA item numbers 358.0210, 358.0290, 358.0610, 358.0690, 358.0800, 358.0900, 358.1100, 358.1400, 358.1600, 657.2520, 773.3510, and 773.3520 and currently classifiable under HTS item numbers 5910.00.10, 5910.00.90, 4010.10.10 and 4010.10.50.

The merchandise covered by this investigation includes certain industrial belts for power transmission. These include V-belts, synchronous belts, round belts and flat belts, in part or wholly of rubber or plastic, and containing textile fiber (including glass fiber) or steel wire, cord or strand, and whether in endless (i.e., closed loop) belts, or in belting in lengths or links. This investigation excludes conveyor belts and automotive belts as well as front engine drive belts found on equipment powered by internal combustion engines, including trucks, tractors, buses, and lift trucks.

Analysis of Programs

Consistent with our practice in preliminary determinations, when a response to an allegation denies the existence of a program, receipt of benefits under a program, or eligibility of a company or industry under a program, and the Department has no persuasive evidence showing that the response is incorrect, we accept the response for purposes of the preliminary determination. All such responses, however, are subject to verification. If the response cannot be supported at verification, and a program is otherwise countervailable, the program will be considered a subsidy in the final determination.

When we do not receive a response from a company that the government has indicated is a potential respondent, we generally use in our preliminary determination the best information available. In this investigation, the response of the GOK contains information regarding the non-respondent company, Hankook. Where the government response provides complete information on both usage and the amount of benefits received by Hankook, we have used this information, as the best information available, for purposes of our preliminary determination. All such information provided by the GOK with respect to Hankook is subject to verification at the government. As described below, when the government response did not provide complete information for certain programs used by Hankook, we have also used other sources for the best information available. For these programs, we used, as the best information available, the highest rate found in previous Korean investigations, or the rate found for Dongil in this investigation, whichever was higher.

For purposes of this preliminary determination, the period for which we are measuring subsidies ("the review period") is calendar year 1987. Based upon our analysis of the petition and the responses to our questionaires, we preliminarily determine the following:

I. Programs Preliminarily Determined To Confer Subsidies

We preliminarily determine that subsidies are being provided to manufacturers, producers or exporters in Korea of industrial belts under the following programs:

A. Short-Term Export Financing

Petitioner alleges that producers and exporters in Korea of industrial belts receive preferential short-term export financing under the Short-term Export Financing Regulations.

The Short-term Export Financing Regulations provide the guidelines for short-term export financing. Export financing takes the form of loans on bills related to export sales transactions. Eligibility is based upon presentation of export documents or upon past export performance. Export loans based on past performance cannot exceed 90 days, while loans based on specific export documents cannot exceed 180 days and are limited to the terms of the applicable letter of credit. During our review period, the rate of interest charged on short-term export financing remained constant at ten percent, the

ceiling established by the Bank of Korea.

The Bank of Korea also establishes rediscount ratios that set the proportion of a short-term loan which the commercial bank may rediscount through the central bank. During the period of investigation, the rediscount ratio for short-term export financing was lowered from 60 percent to 40 percent for large-sized firms, and from 90 percent ot 60 percent for small- and medium-sized firms. The rediscount ratio on domestic commercial financing remained at 60 percent for small- and medium-sized companies and 30 percent for large-sized companies. Small- and medium-sized firms are defined as companies with fewer than 300 employees. According to the response of the GOK, both Dongil and Hankook are large companies.

Because only exporters are eligible to use the short-term export financing, we preliminarily find these loans to be countervailable to the extent that they are provided on preferential terms. Moreover, we preliminarily determine that the different rediscount ratios applied to financing for the large firms (currently 40 percent for export transactions, 30 percent for domestic transactions) results in the provision of export financing on preferential terms for large firms. This is because in lending to large firms, commercial banks have an incentive to channel more funds to finance those firms' export transactions and fewer funds to finance their domestic transactions.

To determine if these loans are at preferential rates, we used information provided by the GOK to construct a weighted-average interest rate to represent what large firms pay to finance domestic transactions. Becasue commercial banks have an incentive to direct their loans for large firms to financing export transactions rather than domestic transactions, large firms must seek alternative sources for financing domestic sales.

The weighted-average interest rate we have computed is a best estimate measure of the preference created by the different rediscount ratios. It includes the interest rates on commercial bank loans for domestic transactions; the issuance of commercial paper; and financing from investment and finance companies, mutual credit cooperatives, and mutual savings and finance companies. If, at verification, we discover other sources of short-term financing for large companies, we will take these into account in our final determination.

Although the response of the GOK states that the highest interest rate offered by commercial banks for short-term non-export financing is 11.5 percent, a source of information available to the Department indicates that for such financing companies have been charged interest rates above that rate. Information submitted by the GOK also indicates that local commercial banks charge interest rates higher than national commercial banks. Therefore, as our interest rate for commercial bank financing, we have taken the average of the highest rates offered by national and local commercial banks, 12.0 percent.

The weights assigned to each of the sources of short-term domestic credit were based on the *Monthly Bulletin* of the Bank of Korea. From this source, we determined the amount of, and interest rates charged on, short-term financing from each of the financial entities.

Using the data from these sources, we calculated a weighted-average interest rate of 12.70 percent. We compared this rate to the 10 percent interest rate on export loans received by Dongil and Hankook. (According to the response of Taelim Moolsan, it did not receive any export loans during the period of review.) To determine the benefit of the preferential interest rate, we subtracted the interest paid on the export loans at 10 percent from the interest the companies would have paid if the loans had been contracted at the benchmark.

According to the responses of Dongil and the government, it was not possible to segregate the loans received as to product or destination. Therefore, we divided the benefit by both companies' total exports during the review period. We did not receive information regarding Hankook's total exports, but we were able to determine Hankook's exports of the subject merchandise to the United States from information in the GOK response. We are, therefore, using as best information available, the amount of Hankook's total exports of the subject merchandise to the United States to represent its total exports of all goods to all markets. On this basis, we calculated an estimated net subsidy of 0.24 percent *ad valorem* for Dongil and 24.05 percent *ad valorem* for Hankook.

B. Export Tax Reserves

Petitioner alleges that manufacturers, producers, and exporters of the subject merchandise receive tax benefits under Articles 22, 23, and 24 of the Act Concerning the Regulation of Tax Reduction and Exemption. These articles provide for deductions from taxable income by exporting firms for a number of different reserves covering export losses, overseas market development, and price fluctuation losses.

Under Article 22, a corporation may establish a reserve amounting to the lesser of one percent of foreign exchange earnings, or 50 percent of the foreign exchange earnings component of net income. If certain export losses occur, they may be offset from the reserve fund. Following the tax year to which the reserve amount applies there is a one-year grace period. After the grace period, amounts remaining in the reserve that have not been offset by actual losses are returned to the taxable income account in three equal annual installments.

Article 23, which governs overseas market development funds, allows a corporation to establish a reserve fund amounting to one percent of its foreign exchange earnings in the respective tax year. Expenses incurred in developing overseas markets may be offset from the reserve fund. Funds remaining in the reserve after the tax year are treated as under Article 22.

A price fluctuation reserve fund may be established under Article 24. A corporation may establish reserves equivalent to five percent of the book value of the products and works in progress which will be exported by the close of the business year. This reserve may be used to offset losses resulting from the fluctuation of prices for export goods by returning an amount equivalent to the losses to the income account. If not so utilized, the reserve is returned to the income account the following year.

The balance in all three reserve funds is not subject to corporate tax, although all moneys in the reserve fund are eventually reported as income and subject to corporate tax either when they offset export losses or when the one-year grace period expires.

We determine that these export reserve programs confer benefits which constitute export subsidies because they provide a deferment, contingent upon exports, of direct taxes.

To measure the benefit conferred by the deferments for Dongil, we followed the same methodology previously used in *Certain Stainless Steel Cooking Ware from the Republic of Korea: Final Affirmative Countervailing Duty Determination* (51 FR 42687, November 26, 1986) (*Cooking Ware*) and calculated an amount of tax savings by multiplying the amount maintained in the reserves by Dongil's effective tax rate. We treated the tax savings on these funds as short-term interest-free loans. Accordingly, to determine the benefit, the amount of Dongil's tax savings was multiplied by the average of the highest short-term national and local

commercial bank interest rates (12.0%) which we discussed under the Short-Term Export Financing program.

According to the response of Taelim Moolsan, it did not claim any reserves during the period of investigation. For Hankook, although the GOK provided us with information regarding the amount of reserves claimed by Hankook under this program, we were unable to use this information to derive a benefit because we lacked Hankook's effective tax rate. Therefore, as best information available, we applied to Hankook the same subsidy rate as that found for Dongil. Using this information, we calculated an estimated net subsidy of 0.27 percent *ad valorem* for Dongil and for Hankook.

C. Duty Drawback on Non-physically Incorporated Items and Allowances for Excessive Loss and Wastage Rates

Petitioner alleges that producers of industrial belts in Korea receive countervailable benefits from the Korean duty drawback system. These benefits allegedly stem from the allowance of duty drawback on non-physically incorporated items and from excessive remission of customs duties due to the inclusion of recoverable scrap in the loss and wastage rates set by the Korean government.

According to the response of the GOK, input usage rates are determined every four years for producers of exported products. The survey upon which the GOK based its input usage rates was based on a survey solely of Dongil's production process. Tables of these rates are used by Korean Customs for duty drawback purposes. The response of the GOK states that recoverable scrap is factored into the usage rates and that, therefore, the loss and waste rates built into the input usage tables are not excessive.

In its response, Dongil claims that it has not received any duty drawback on non-physically incorporated items. Furthermore, it claims that it does not have recoverable scrap from its production process. In its response, Taelim Moolsan claims that it does not receive duty drawback.

Since Dongil claims that it has no recoverable scrap and that it has not received any duty drawback on non-physically incorporated items, we preliminarily determine that Dongil receives no subsidy under this program. According to the response of the GOK, all inputs into the manufacture of industrial belts are physically incorporated. Thus, with respect to this issue, we find no subsidy for Hankook. However, with respect to the issue of recoverable scrap, since the GOK's claim that there is no excessive remission of customs duties because recoverable scrap is included in the loss and wastage rates is based on information solely from Dongil, we preliminarily determine that this does not apply to Hankook. Therefore, as best information available, we applied to Hankook the rate found for this program in *Cooking Ware*. Using this information, we calculated an estimated net subsidy of 0.20 percent *ad valorem* for Hankook.

II. Programs Preliminarily Determined Not to be Used

We preliminarily determine that the following programs were not used by manufacturers, producers or exporters in Korea of industrial belts during the review period:

A. Accelerated Depreciation Under Article 25 of the Act Concerning the Regulation of Tax Reduction and Exemption

Petitioner alleges that producers of industrial belts receive accelerated depreciation benefits. Article 25 of the Act Concerning the Regulation of Tax Reduction and Exemption permits a firm earning more than 50 percent of its total proceeds in a business year from foreign exchange to increase its normal depreciation by 30 percent. If the corporation has received less than 50 percent of its total proceeds from foreign exchange, it can still claim some accelerated depreciation, determined by a formula based on the firm's foreign exchange earnings and total business earnings. According to the questionnaire responses, neither producers nor exporters of industrial belts claimed accelerated depreciation on the tax return filed during the review period.

B. Unlimited Deduction of Overseas Entertainment Expenses

Petitioner alleges that producers and exporters of the subject merchandise receive tax benefits in the form of entertainment expense deductions.

Under Article 18–2 of the Corporation Tax Act and supporting legislation, domestic and overseas entertainment expenses are eligible to be deducted from taxable income. The amount which can be deducted for domestic entertainment expenses is subject to a ceiling according to an established formula. This ceiling is lowered if overseas entertainment expenses are claimed. There is no cap on overseas entertainment expenses. If a company's overseas entertainment expense deductions exceed its domestic ceiling, the amount by which the domestic ceiling is exceeded constitutes a countervailable tax benefit. According to Dongil's response, in the tax return filed in the review period, Dongil's overseas entertainment expenses did not exceed its domestic ceiling. According to the response of the GOK, Hankook did not claim a deduction on the tax return filed during the review period for overseas entertainment expenses.

C. Loans to Promising Small- and Medium-sized Enterprises

Petitioner alleges that manufacturers, producers, and exporters of industrial belts in Korea benefit from a program under which the Bank of Korea directs commercial banks to provide long-term loans to select "promising" small- and medium-sized companies. According to the response of the GOK, the Bank of Korea does not direct commercial banks to provide loans under this program. The response states that commercial banks which provide more than 35 percent of new loans to small- and medium-sized companies obtain from the Bank of Korea a 50 percent rediscount ratio on loans to such enterprises in excess of the 35 percent level. The response further states that none of the companies under investigation qualifies as a small- or medium-sized enterprise because Dongil and Hankook have more than 300 regular employees and Taelim Moolsan is not an industrial company.

D. Exemption from the Acquisition Tax

Petitioner alleges that producers of industrial belts in Korea benefit under the Law for the Promotion of Income Sources in Rural Areas. Under this law companies which establish factories in rural areas may be exempted from paying the two percent acquisition tax on purchases of land, buildings, and capital equipment. According to the response of the GOK, neither producers nor exporters of industrial belts received exemption from the Acquisition Tax during the review period.

E. Tax Incentives for Businesses Moving to a Provincial Area

Petitioner alleges that manufacturers, producers, and exporters of industrial belts in Korea benefit from a program whereby companies moving out of metropolitan areas into rural areas received income and corporate tax deductions based on the cost of the move. According to the response of the GOK, neither producers nor exporters of industrial belts received this tax benefit during the review period.

F. Free Export Zone Program

Petitioner alleges that manufacturers, producers, and exporters of industrial

VOL
53
ISS
232
DE
2
1988
UMI

belts in Korea benefit from a program whereby companies located in free export zones receive certain tax exemptions. According to the response of the GOK, no producer or exporter of industrial belts is located in a free export zone.

G. Tariff Reductions on Plant and Equipment under Article 28 of the Customs Law

Petitioner alleges that manufacturers, producers, and exporters of industrial belts in Korea benefit under Article 28 of the Customs Law which allow for import duty reductions on certain items for certain industries. According to the response of the GOK, neither producers nor exporters of industrial belts are eligible for this program.

H. Export Credit Financing from the Export-Import Bank of Korea (KXMB)

Petitioner alleges that manufacturers, producers, and exporters of industrial belts in Korea may receive preferential export financing through the KXMB. According to the response of the GOK, this program is not available to producers or exporters of industrial belts.

I. Export Guarantees from the KXMB

Petitioner alleges that manufacturers, producers, and exporters of industrial belts in Korea may receive export guarantees on exports of Korea goods. According to the response of the GOK, this program is not available to producers or exporters of industrial belts.

III. Programs Preliminarily Determined To Have Been Terminated

We preliminarily determine that the following programs have been terminated:

A. Special Depreciation under Article 11 of the Act Concerning the Regulation of Tax Reduction and Exemption

According to the response of the GOK, special depreciation was abolished effective December 26, 1986.

B. Tax Credit for Investment for Key Industries

According to the response of the GOK, this program was abolished effective December 26, 1986.

IV. Program Preliminarily Determined Not To Exist

We preliminarily determine that the following program does not exist:

Loans for Expansion or Construction of Maufacturing Facilities

According to the response of the GOK, this program does not exist.

Critical Circumstances

Petitioner alleges that "critical circumstances" exist within the meaning of section 703(e)(1) of the Act with respect to imports of industrial belts from Korea. In determining whether critical circumstances exist, we must examine whether there is a reasonable basis to believe or suspect that: (1) The alleged subsidy is inconsistent with the Agreement, and (2) there have been massive imports of the subject merchandise over a relatively short period.

Section 355.29(a) of the Commerce Regulations or critical circumstances provides, inter alia, that we will determine "whether the alleged subsidy is an export subsidy inconsistent with the Agreement." We have preliminarily determined that the Export Tax Reserves and the Duty Drawback on Non-physically Incorporated Items and Allowances for Excessive Loss and Wastage Rates programs constitute export subsidies which are inconsistent with the Agreement.

In determining whether imports have been massive over a relatively short period of time, we consider the following factors: (1) The volume and value of the imports; (2) seasonal trends; and (3) the share of domestic consumption accounted for by the imports. A review of this information indicates that imports from Korea have been massive over a relatively short period of time.

For the reasons described above, we determine that there is a reasonable basis to believe or suspect that "critical circumstances" exist with respect to imports of industrial belts from Korea.

Verification

In accordance with section 776(b) of the Act, we will verify the information used in making our final determination.

Suspension of Liquidation

In accordance with section 703(e) of the Act, we are directing the U.S. Customs Service to suspend liquidation of all unliquidated entries of industrial belts from Korea entered, or withdrawn from warehouse, for consumption, on or after the date which is 90 days before the date of publication of this notice in the **Federal Register**, and to require a cash deposit or bond for each such entry of this merchandise, except for entries from Hankook Belt Industry, equal to 0.51 percent *ad valorem*. Entries of this merchandise from Hankook Belt Industry require a cash deposit or bond equal to 24.52 percent *ad valorem*. This suspension will remain in effect until further notice.

ITC Notification

In accordance with section 703(f) of the Act, we will notify the ITC of our determination. In addition, we are making available to the ITC all nonprivileged and nonproprietary information relating to this investigation. We will allow the ITC access to all privileged and business proprietary information in our files, provided the ITC confirms that it will not disclose such information, either publicly or under an administrative protective order, without the written consent of the Assistant Secretary for Import Administration.

If our final determination is affirmative, the ITC will make its final determination within 120 days after this preliminary affirmative determination, or 45 days after the Department makes its final determination, whichever is later.

Public Comment

In accordance with 19 CFR 355.35, we will hold a public hearing, if requested, to afford interested parties an opportunity to comment on this preliminary determination. Individuals who wish to request or to participate in the hearing must submit a request within ten days of the publication of this notice in the **Federal Register** to the Assistant Secretary for Import Administration, U.S. Department of Commerce, Room B–099, 14th Street and Constitution Avenue NW., Washington, DC 20230.

Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; (3) the reason for attending; and (4) a list of the issues to be discussed. In addition, ten copies of the business properietary version and seven copies of the nonproprietary version of the pre-hearing briefs must be submitted to the Assistant Secretary at least seven days prior to the scheduled date of the public hearing. Oral presentations will be limited to issues raised in the briefs. Written views should be submitted in accordance with 19 CFR 355.33(d) and 355.34, and will be considered if received not less than 30 days before the final determination is due or, if a hearing is held, within seven days after the hearing transcript is available.

This determination is published pursuant to section 703(f) of the Act (19 U.S.C. 1671b(f)).

November 28, 1988.

Jan W. Mares,

Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

[C-559-803]

Preliminary Negative Countervailing Duty Determination: Industrial Belts and Components and Parts Thereof, Whether Cured or Uncured, from Singapore

AGENCY: Import Administration, International Trade Administration, commerce.

ACTION: Notice.

SUMMARY: We preliminarily determine that *de minimis* countervailable benefits are being provided to manufacturers, producers, or exporters in Singapore of industrial belts and components and parts thereof, whether cured or uncured ("industrial belts"), as described in the "Scope of Investigation" section of this notice. The estimated net bounty or grant is 0.001 percent *ad valorem*. Since this rate is *de minimis*, our preliminary countervailing duty determination is negative. If this investigation proceeds normally, we will make a final determination on or before February 13, 1989.

EFFECTIVE DATE: December 2, 1988.

FOR FURTHER INFORMATION CONTACT: Roy Malmrose, or Barbara Tillman, Office of Countervailing Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377-2815, or 377-2438.

Preliminary Determination

Based on our investigation, we preliminarily determine that *de minimis* countervailable benefits are being provided to manufacturers, producers, or exporters in Singapore of industrial belts. For purposes of this investigation, the following program is preliminarily found to confer bounties or grants:

- Short-term loans provided under the Monetary Authority of Singapore.

We preliminarily determine the estimated net bounty or grant to be 0.001 percent *ad valorem*. Although we have determined this program to be countervailable, the respondent received *de minimis* benefits during the review period, the respondent company's fiscal year 1987 (April 1, 1987 through March 31, 1988). Since the countervailable benefits are *de minimis*, we preliminarily determine that no benefits which constitute bounties or grants within the meaning of section 303 of the Tariff Act of 1930, as amended (the Act) are being provided to manufacturers, producers or exporters in Singapore of industrial belts.

Case History

Since the publication of the Notice of Initiation in the **Federal Register** (53 FR 28045, July 26, 1988), the following events have occurred. On August 1, 1988, we issued a questionnaire to the Government of Singapore in Washington, DC concerning petitioner's allegations. On October 6, 1988, we received responses from the Government of Singapore (GOS) and Mitsuboshi Belts (Singapore) Pte. Ltd. (MBS). On October 21, 1988 we issued a supplemental/deficiency questionnaire to the GOS and the respondent company. On August 26, 1988, petitioner filed a request that the preliminary determination be postponed for 65 days. Pursuant to section 703(c)(1)(A) of the Act, on September 7, 1988, we postponed the preliminary determination to no later than November 28, 1988 (53 FR 34570). On November 8, 1988, we received responses to our October 21, 1988 supplemental/deficiency questionnaire from the GOS and MBS.

Scope of Investigation

The United States has developed a system of tariff classification based on the international harmonized system of customs nomenclature. On January 1, 1989, the U.S. tariff schedules will be fully converted to the *Harmonized Tariff Schedule* (HTS) and all merchandise entered or withdrawn from warehouse for consumption on or after this date will be classified soley according to the appropriate HTS item numbers. Until that time, however, the Department will be providing both the appropriate *Tariff Schedules of the United States Annotated* (TSUSA) item number(s) and the appropriate HTS item number(s) with its product descriptions. As with the TSUSA, the HTS item numbers are provided for convenience and customs purposes. The written description remains dispositive as to the scope of the product coverage.

We are requesting petitioner to include the appropriate HTS item number(s) as well as the TSUSA item number(s) in all petitions filed with the Department through the end of this year. A reference copy of the HTS is available for consultation in the Central Records Unit, Room B-099, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230. Additionally, all U.S. Customs offices have reference copies, and petitioners may contact the import specialist at their local customs office to consult the schedule.

The products covered by this investigation are industrial belts and components and parts thereof, whether cured or uncured, currently provided for under TSUSA item numbers 358.0210, 358.0290, 358.0610, 358.0690, 358.0800, 358.0900, 358.1100, 358.1400, 358.1600, 657.2520, 773.3510, and 773.3520 and currently classifiable under HTS item numbers 5910.00.10, 5910.00.90, 4010.10.10 and 4010.10.50.

The merchandise covered by this investigation includes certain industrial belts for power transmission. These include V-belts, synchronous belts, round belts and flat belts, in part or wholly of rubber or plastic, and containing textile fiber (including glass fiber) or steel wire, cord or strand, and whether in endless (i.e., closed loop) belts, or in belting in lengths or links. this investigation excludes conveyor belts and automotive belts as well as front engine drive belts found on equipment powered by internal combustion engines, including trucks, tractors, buses, and lift trucks.

Analysis of Programs

Consistent with our practice in preliminary determinations, when a response to an allegation denies the existence of a program, receipt of benefits under a program, or eligibility of a company or industry under a program, and the Department has no persuasive evidence showing that the response is incorrect, we accept the response for purposes of the preliminary determination. All such responses, however, are subject to verification. If the response cannot be supported at verification, and the program is otherwise countervailable, the program will be considered a bounty or grant in the final determination.

For purposes of this preliminary determination, the period for which we are measuring bounties or grants (the review period) is April 1, 1987 to March 31, 1988 (MBS's fiscal year). Based upon our analysis of the petition and the responses to our questionnaries, we preliminarily determine the following:

I. Programs Preliminarily Determined to Confer Bounties or Grants

We preliminarily determine that bounties or grants are being provided to manufacturers, producers, or exporters in Singapore of industrial belts under the following program:

Monetary Authority of Singapore (MAS) Rediscount Facility

Under the MAS Rediscounting Scheme, the MAS rediscounts pre-export and export bills of exchange. According to the responses, a qualifying exporter applies for financing from an approved bank, which then discounts the exporter's bills at a MAS-established rediscount rate plus a maximum spread of 1.5 percent. The bank subsequently rediscounts the bills at the MAS rediscount rate. The usual period for financing under this program is three months.

Because this program is available only to exporters, we preliminarily determine that it is countervailable to the extent that it is offered at preferential rates.

To determine whether financing under this program was made at preferential rates, we compared the interest rates charged on these loans to our short-term benchmark. For our benchmark, we are using the three-month rate on commercial bills in Singapore, as published in the *MAS Statistical Bulletin*, for the same period. This is the rate that we applied in the *Preliminary Affirmative Countervailing Duty Determinations: Antifriction Bearings (Other Than Tapered Roller Bearings) and Parts Thereof from Singapore* (53 FR 34329, September 6, 1988) (*AFB's*) and in the *Final Negative Countervailing Duty Determinations: Certain Textile Mill Products and Apparel from Singapore* (50 FR 9840, May 6, 1985) (*Textiles*), the previous investigations in which this program was used. As in *AFB's* and *Textiles*, we have added 0.5 percent to the benchmark to reflect bank commissions in Singapore. Based on this comparison, the rates on MAS financing through its rediscounting facility are below the benchmark; therefore, we preliminarily determine this program to be countervailable.

Petitioner has alleged that the commercial bill rate is not the appropriate benchmark for determining whether loans through the MAS Rediscounting Facility are preferential because they account for a small portion of short-term loans in Singapore. We will continue to examine this issue for the final determination.

To calculate the benefit arising from this program, we followed our short-term loan methodology, which has been applied consistently in our past determinations and which is described in more detail in the *Subsidies Appendix* attached to the notice of *Cold-Rolled Carbon Steel Flat-Rolled Products from Argentina: Final Affirmative Countervailing Duty Determination and Countervailing Duty Order* (49 FR 18006, April 26, 1984).

According to MAS's response, the company used both pre-shipment and export loans during the period of investigation. Export loans (those based on specific shipments) were segregated according to exports of the subject merchandise to the United States. According to MAS's response, pre-shipment loans cannot be segregated by either product or destination. Therefore, we calculated the rate for pre-shipment loans by dividing the benefit by all exports sales to all markets. We calculated the rate for export loans by dividing the benefit over exports of the subject merchandise to the United States. We added the resulting rates and on this basis calculated an estimated net bounty or grant under this program of 0.001 percent *ad valorem*.

II. Programs Preliminarily Determined Not to be Used

We preliminarily determine that the following programs were not used by manufacturers, producers, or exporters in Singapore of industrial belts during the review period:

A. Economic Expansion Incentives Act of 1985 (EEIA)

The EEIA offers tax incentives under the following provisions:

- Part II: Pioneer Industries.
- Part IV: Expansion of Established Enterprises.
- Part VI: Production for Export.
- Part VII: International Trade Incentives.
- Part VIII: Foreign Loans for Productive Equipment.
- Part IX: Royalties, Fees and Development Contributions.
- Part X: Research and Development Incentives.
- Part XI: Warehousing and Servicing Incentives.

According to the response, the respondent company did not claim benefits under any of these provisions on the tax return filed during the review period.

B. Double Deduction of Export Promotion Expenses under the Income Tax Act (ITA)

Sections 14B and 14C of the ITA provide a double deduction for (a) approved overseas and domestic market trade fair expenses, (b) overseas trade office maintenance, (c) approved publications and advertising, and (d) foreign market development and trade missions. According to the response, the respondent company did not claim benefits under this program on the tax return filed during the review period.

C. Research and Development (R&D) Incentives

Section 14E of the ITA offers a double deduction for R&D expenses incurred by qualifying firms. According to the response, the respondent company did not claim benefits under this program on the tax return filed during the review period.

D. Section 19B of the ITA

This section of the ITA confers a writing down allowance of expenditures relating to know-how and patent rights for a company's R&D expenditures. According to the response, the respondent company did not claim benefits under this program on the tax return filed during the review period.

E. Research and Development Assistance Scheme (RDAS)

Government funding is available for R&D projects under the RDAS, administered by the Singapore Science Council. The purpose of the program is to encourage R&D. Both public institutions and private companies are eligible to apply. According to the response, the respondent company has not participated in this program.

F. Singapore Economic Development Board (EDB)

The EBD administers four programs available for approved company activities. The Capital Assistance Scheme provides long-term, fixed-rate loans and loan guarantees to companies investing in new production activities. The Production Development Assistance Scheme supplies matching grants for technical improvements in products or processes to companies with at least 30 percent Singaporean ownership. The Initiatives in New Technology Program provides grants to cover employee training and manpower development costs in fields of new technology. The additional R&D Incentives from EDB Program provide companies which conduct research and development with additional years of pioneer status beyond those normally allowed, investment allowances of up to 50 percent of capital investment in R&D (not including building costs), double deductions for R&D expenditures (not

including building and equipment), capitalization and writing off of lump sum payments for manufacturing licenses over a five-year period. According to the responses, the respondent company has not participated in these programs.

Critical Circumstances

Petitioner alleges that "critical circumstances" exist within the meaning of section 703(e)(1) of the Act, with respect to imports of industrial belts from Singapore. In determining whether critical circumstances exist, we must examine whether there is a reasonable basis to believe or suspect that: (1) The alleged subsidy is inconsistent with the Subsidy Agreement, and (2) there have been massive imports of the subject merchandise over a relatively short period.

Because we have preliminarily determined that the benefit provided to manufacturers, producers, or exporters of industrial belts in Singapore is *de minimis*, the preliminary determination is negative. Therefore, the issue as to whether critical circumstances exist is moot. If our final determination is affirmative we will reexamine the critical circumstances allegation at that time.

Verification

In accordance with section 776(b) of the Act, we will verify the information used in making our final determination.

ITC Notification

Since Singapore is not a "country under the Agreement" within the meaning of section 701(b) of the Act, section 303 of the Act applies to this investigation. However, Singapore is a signatory to the General Agreement on Tariffs and Trade, and certain products included in the scope of this investigation (*i.e.*, those classified under items 358.0610, 358.0690, 358.1400, 657.2520, 773.3510, and 773.3520 of the *Tariff Schedules of the United States Annotated*) are nondutiable. Therefore, in accordance with section 303(a)(2), the U.S. International Trade Commission (ITC) is required to determine whether imports of these nondutiable products from Singapore materially injure, or threaten material injury to, a U.S. industry.

If our final determination is affirmative, the ITC will determine whether these imports materially injure, or threaten material injury to, a U.S. industry within 75 days after the Department makes its final determination.

In accordance with section 703(f) of the Act, we will notify the ITC of our determination. In addition, we are making available to the ITC all nonprivileged and nonproprietary information relating to this investigation. We will allow the ITC access to all privileged and business proprietary information in our files, provided the ITC confirms that it will not disclose such information, either publicly or under an administrative protective order, without the written consent of the Assistant Secretary for Import Administration.

Public Comment

In accordance with 19 CFR 355.35, we will hold a public hearing, if requested, to afford interested parties an opportunity to comment on this preliminary determination. Individuals who wish to participate in the hearing must submit a request within ten days of the publication of this notice in the **Federal Register** to the Assistant Secretary for Import Administration, U.S. Department of Commerce, Room B-099, 14th Street and Constitution Avenue NW., Washington, DC 20230.

Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; (3) the reason for attending; and (4) a list of the issues to be discussed. In addition, ten copies of the business proprietary version and seven copies of the nonproprietary version of the pre-hearing briefs must be submitted to the Assistant Secretary at least seven days prior to the scheduled date of the public hearing. Oral presentations will be limited to issues raised in the briefs. Written views should be submitted in accordance with 19 CFR 355.33(d) and 355.34, and will be considered if received not less than 30 days before the final determination is due or, if a hearing is held, within seven days after the hearing transcript is available.

This determination is published pursuant to section 703(f) of the Act (19 U.S.C. 1671b(f)).

Jan W. Mares,

Assistant Secretary for Import Administration.

November 28, 1988.

[FR Doc. 88-27816 Filed 12-1-88; 8:45 am]

BILLING CODE 3510-DS-M

National Oceanic and Atmospheric Administration

Endangered Species; Application for Permit; Connecticut Department of Environmental Protection (P430)

Notice is hereby given that an Applicant has applied in due form for a Permit to take endangered species as authorized by the Endangered Species Act of 1973 (16 U.S.C. 1531 through 1543), the National Marine Fisheries Service regulations governing endangered fish and wildlife permits (50 CFR Parts 217 through 222).

1. Applicant: Connecticut Department of Environmental Protection, Fisheries Bureau, Marine Fisheries Office, P.O. Box 248, Waterford, Connecticut 06385.

2. Type of Permit: Scientific Research.

3. Name of Animals: Shortnose sturgeon (*Acipenser brevirostrum*).

4. Type of Take and Number: Up to 2,000 sturgeon will be captured using gill nets for a tag release study. An unspecified number of tagged sturgeon may be recaptured at least once to estimate population size. Al sturgeon captured will be measured, weighed, sexed if possible, and tagged with carlin dangler tags. In addition to the carlin tags a maximum of 25 sturgeon per year will also be sonic tagged.

5. Location of Activity: Connecticut River, South of the Holyoke Dam, and the Thames and Housatonic Rivers.

6. *Period of Activity:* 3 years.

Written data or views or requests for a public hearing on this application should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, U.S. Department of Commerce, 1335 East West Highway, Silver Spring, Maryland 20910, within 30 days of the publication of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries.

All statements and opinions contained in this application are summaries of those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Documents submitted in connection with the above application are available for review in the following offices:

Office of Protected Resources and Habitat Programs, National Marine Fisheries Service, 1335 East West Highway, Silver Spring, Maryland 20910; and Director, Northeast Region, National Marine Fisheries Service, 14 Elm Street, Gloucester, Massachusetts 01930.

Date: November 22, 1988.

Nancy Foster,

Director, Office of Protected Resources and Habitat Programs, National Marine Fisheries Service.

BILLING CODE 3510-22-M

Permits; Foreign Fishing

This document publishes for public review a summary of applications received by the Secretary of State requesting permits for foreign vessels to fish in the exclusive economic zone under the Magnuson Fishery Conservation and Management Act (Magnuson Act, 16 U.S.C. 1801 *et seq.*) Send comments on applications to: Office of Fisheries Conservation and Management (F/CM), National Marine Fisheries Service, Department of Commerce, 1335 East West Highway, Silver Spring, Maryland 20910, or, send comments to the Fishery Management Council(s) which review the application(s), as specified below:

Douglas G. Marshall, Executive Director, New England Fishery Management Council, 5 Broadway (Route 1), Saugus, MA 01906, 617/231–0422.

John C. Bryson, Executive Director, Mid-Atlantic Fishery Management Council, Federal Building Room 2115, 320 South New Street, Dover, DE 19901, 302/674–2331.

Robert K. Mahood, Executive Director, South Atlantic Fishery Management Council, Southpark Building, Suite 306, 1 Southpark Circle, Charleston, SC 29407, 803/571–4366.

Omar Munoz-Roure, Executive Director, Caribbean Fishery Management Council, Banco De Ponce Building, Suite 1108, Hato Rey, PR 00981, 809/753–4926.

Wayne E. Swingle, Executive Director, Gulf of Mexico Fishery Management Council, Lincoln Center, Suite 881, 5401 West Kennedy Blvd., Tampa, FL 33609, 813/228–2815.

Lawrence D. Six, Executive Director, Pacific Fishery Management Council, Metro Building, Suite 420, 2000 S.W. First Avenue, Portland, OR 97201, 503/221–6352.

Clarence Pautzske, Executive Director, North Pacific Fishery Management Council, P.O. Box 103136, Anchorage AK 99501, 907/274–4563.

Kitty M. Simonds, Executive Director, Western Pacific Fishery Management Council, 1164 Bishop Street, Room 1405, Honolulu, HI 96813, 808/523–1368.

For further information contact John D. Kelly or Robert A. Dickinson (Office of Fisheries Conservation and Management, 301–427–2339).

The Magnuson Act requires the Secretary of State to publish a notice of receipt of all applications for such permits summarizing the contents of the applications in the **Federal Register**. The National Marine Fisheries Service, under the authority granted in a memorandum of understanding with the Department of State effective November 29, 1983, issues the notice on behalf of the Secretary of State.

Individual vessel applications of fishing in 1989 have been received from the Governments shown below.

Dated: November 30, 1988.

Joe P. Clem,

Acting Director of Office Fisheries Conservation and Management, National Marine Fisheries Service.

Fishery codes and designation of Regional Fishery Management Councils which review applications for individual fisheries are as follows:

Code/Fishery	Regional fishery management councils
ABS/Atlantic Billfish and Sharks.	New England, Mid-Atlantic, South Atlantic, Gulf of Mexico, Caribbean.
BSA/Bering Sea and Aleutian Islands Groundfish.	North Pacific.
GOA/Gulf of Alaska Groundfish.	Do.
NWA/Northwest Atlantic Ocean.	New England, Mid-Atlantic.
SNA/Snail (Bering Sea)...	North Pacific.
WOC/Pacific Coast Groundfish (Washington, Oregon and California).	Pacific.
PBS/Pacific Billfishes, Oceanic Sharks, Wahoo, and Mahimahi.	Western Pacific.

Activity codes which specify categories of fishing operations applied for are as follows:

	Fishing operations
Activity code:	
1	Catching, processing and other support.
2	Processing and other support only.
3	Other support only.
*	Vessel(s) supporting U.S. vessels (joint venture).
(**)	Cargo transport vessels with fish finding equipment on board receive an activity code 2 to enable them to perform both scouting as well as support activities.
Pending	Number to be assigned at a later date.

The respective amounts requested by each government for joint ventures are listed below. These are followed by the list of vessels for which permit applications have been received for the fisheries and activities noted. Joint venture Mackerel requests in the Northwest Atlantic Fishery made by the Government of the Netherlands, the Government of the German Democratic Republic, the Government of the Union of Soviet Socialist Republics, Her Majesty's Government of the United Kingdom, and the Government of the Polish People's Republic were published at 53 FR 48006, November 29, 1988. Vessels published at 53 FR 48006 for the ABS and the NWA fisheries are republished for the convenience of the reviewers.

Japan (JA)

The Government of Japan submitted 1989 applications to receive from U.S. fishermen a total of 595,688 metric tons (mt) of joint venture groundfish species in the Bering Sea and Aleutian Islands (BSA) fishery. The groundfish requested are:

Pollock
Arrowtooth flounder
Pacific cod
Sablefish
Other groundfish
Yellowfin sole
Rock sole
Pacific Ocean Perch
Atka mackerel
Greenland Turbot
Other flatfish
Other rockfish
Squid

Poland (PL)

The Government of the Polish People's Republic submitted applications to receive from U.S. fishermen a total of 30,000 mt of joint venture groundfish species in the BSA and the GOA fisheries and 43,000 mt of Pacific whiting in the Pacific Coast Groundfish fisheries.

Korea (KS)

The Government of the Republic of Korea submitted applications to receive from U.S. fishermen a total of 602,396 mt of joint venture groundfish species in the BSA fishery, 15,400 mt in the GOA fishery and 29,000 mt of Pacific whiting. The BSA and GOA joint venture groundfish requested are:

Pollock
Other flatfish
Pacific cod
Atka mackerel
Yellowfin sole
Other groundfish

China (CH)

The Government of the People's Republic of China submitted applications to receive from U.S. fishermen a total of 76,000 mt of joint venture groundfish species in the BSA fishery, a total of 2,000 mt of Pollock in the GOA fishery and a total of 20,000 mt of Pacific whiting. The BSA groundfish requested are:

Pollock
Atka mackerel

Yellowfin sole
Other flounder
Pacific cod
Other groundfish

Spain (SP)

The Government of Spain submitted applications to receive from U.S. fishermen a total of 20,000 mt of joint venture groundfish species in the BSA and GOA fisheries.

Soviet Union (UR)

The Government of the Soviet Socialist Republics submitted applications to receive from U.S. fishermen a total of 172,000 mt of joint venture groundfish species in the BSA fisheries.

COMMISSION ON MERCHANT MARINE AND DEFENSE

Notice of Meeting

SUMMARY: The Commission on Merchant Marine and Defense was established by Pub. L. 98–525 (as amended), and the Commission was constituted in December 1986. The Commission's mandate is to study and report on problems relating to transportation of cargo and personnel for national defense purposes in time of war or national emergency, the capability of the Merchant Marine to meet the need for such transportation, and the adequacy of the shipbuilding mobilization base to support naval and merchant ship construction. In accordance with the Federal Advisory Committee Act, Pub. L. 92–463, as amended, the Commission announces the following meeting:

Dates and Times: Monday, December 12, 1988, Beginning 9:00 a.m.; Tuesday, December 13, 1988, Beginning 9:00 a.m.

Place: Suite 520, 4401 Ford Avenue, Alexandria, Virginia 22302–0268.

Type of Meeting: Closed.

Contact Person: Allan W. Cameron, Executive Director, Commission on Merchant Marine and Defense, Suite 520, 4401 Ford Avenue, Alexandria, Virginia 22302–0268, Telephone (202) 756–0411.

Purpose of Meeting: To receive additional information pertaining to the needs of the national defense for the Merchant Marine and the shipbuilding industry, and to discuss and to deliberate facts and opinions obtained from briefings and public hearings.

SUPPLEMENTARY INFORMATION: The executive meetings of the Commission will be closed to the public pursuant to 5 U.S.C. 552b(c)(1) and 552b(c)(4) in the interests of national security and to protect proprietary information provided to the Commission in confidence.

Allan W. Cameron,

Executive Director, Commission on Merchant Marine and Defense.

BILLING CODE 3820–01–M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Announcement of Import Limits and Guaranteed Access Levels for Certain Cotton, Wool, Man-Made Fiber and Other Vegetable Fiber Textiles and Textile Products From Jamaica

November 29, 1988.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs establishing limits and guaranteed access levels for the new agreement year.

EFFECTIVE DATE: January 1, 1989.

Authority: E.O. 11651 of March 3, 1972, as amended; Sec. 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); President's February 20, 1986 announcement of a Special Access Program.

FOR FURTHER INFORMATION CONTACT: Naomi Freeman, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port. For information on embargoes and quota re-openings, call (202) 377–3715.

SUPPLEMENTARY INFORMATION: A copy of the current bilateral agreement between the Governments of the United States and Jamaica is available from Textiles Division, Bureau of Economic and Business Affairs, U.S. Department of State, (202) 647–1998.

A description of the textile and apparel categories in terms of HTS numbers is available in the *Correlation:* Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States Annotated (see **Federal Register** notice 53 FR 44937, published on November 7, 1988). Also see 51 FR 21208, published on June 11, 1986; 52 FR 26057, published on July 10, 1987; and 53 FR 22202, published on June 14, 1988.

James H. Babb,

Chairman, Committee for the Implementation of Textile agreements.

Committee For The Implementation of Textile Agreements

November 29, 1988.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229

Dear Mr. Commissioner: Under the terms of Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as further extended on July 31, 1986; pursuant to the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of August 27, 1986, as amended, between the Governments of the United States and Jamaica; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on January 1, 1989, entry into the United States of consumption or withdrawal from warehouse for consumption of cotton, wool, man-made fiber and other vegetable fiber textiles and textile products in the following categories, produced or manufactured in Jamaica and exported during the twelve-month period which begins on January 1, 1989 and extends through December 31, 1989, in excess of the following designated levels:

Category	12 Mo. restraint level
331/631	350,000 dozen pairs.
336/636	98,000 dozen.
338/339/638/639	736,700 dozen.
340/640	344,500 dozen of which not more than 291,500 dozen shall be in shirts made from fabrics with two or more colors in the warp and/or the filling Categories 340-Y/640-Y— (only tariff numbers 6205.20.20.15, 6205.20.20.20, 6205.20.20.46, 6205.20.20.50, 6205.20.20.60, 6205.30.20.10, 6205.30.20.20, 6205.30.20.50 and 6205.30.20.60).
341/641	432,586 dozen.
342/642	175,000 dozen.
345/845	106,742 dozen.
347/348/647/648	795,175 dozen.
349/649	500,000 dozen.
352/652	300,000 dozen.
445/446	47,945 dozen.
447	10,000 dozen.
632	100,000 dozen pairs.

Imports charged to these category limits for the periods beginning on January 1, 1988 and July 1, 1988 and extending through December 31, 1988 shall be charged against the levels of restraint to the extent of any unfilled balances. In the event the limits established for those periods have been exhausted by previous entries, such goods shall be subject to the levels set forth in this directive.

The limits set forth above are subject to adjustment in the future according to the provisions of the current bilateral agreement between the Governments of the United States and Jamaica.

The conversion factors for Categories 338/339/638/639 and 352/652 are 12.0 and 13.5, respectively.

In accordance with the provisions of the Special Access Program, as set forth in 51 FR 21208 (June 11, 1986) and 52 FR 26057 (July 10, 1987), you are directed to establish guaranteed access levels for properly certified cotton, man-made fiber and other vegetable fiber textile products in the categories listed below. These products shall be assembled in Jamaica from fabric formed and cut in the United States and exported to

the United States from Jamaica during the twelve-month period which begins on January 1, 1989 and extends through December 31, 1989.

Category	Guaranteed access level
331/631	1,320,000 dozen pairs.
336/636	125,000 dozen.
336/339/638/639	1,500,000 dozen.
340/640	300,000 dozen.
341/641	375,000 dozen.
342/642	200,000 dozen.
345/845	50,000 dozen.
347/348/647/648	2,000,000 dozen.
349/649	2,200,000 dozen.
352/652	1,550,000 dozen.
447	30,000 dozen.
632	3,000,000 dozen pairs.

Any shipment for entry tariff number 9802.00.80.10 which is not accompanied by a valid and correct certification and CBI Export Declaration in accordance with the provisions of the certification requirements established in the directive of February 19, 1987 shall be denied entry unless the Government of Jamaica authorizes the entry and any charges to the appropriate designated consultation levels or specific limits. Any shipment which is declared as tariff number 9802.00.80.10 but found not to qualify for the Special Access Program shall be denied entry into the United States.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

Establishment and Adjustment of Import Limits for Certain Cotton, Wool and Man-Made Fiber Textile Products Produced or Manufactured in the Republic of Korea

November 29, 1988.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs establishing and increasing limits.

EFFECTIVE DATE: December 6, 1988.

Authority: E. O. 11651 of March 3, 1972, as amended; sec. 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854)

FOR FURTHER INFORMATION CONTACT: Kimbang Pham, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 566-8041. For information on embargoes and quota re-openings, call (202) 377-3715.

SUPPLEMENTARY INFORMATION: The Governments of the United States and the Republic of Korea agreed to establish a specific limit for Category 200 for the period January 1, 1988 through December 31, 1988. The current Group I limit is being increased to include tents in Category 669-T which were reclassified from sporting goods to textiles.

A description of the textile and apparel categories in terms of T.S.U.S.A. numbers is available in the *Correlation:* Textile and Apparel Categories with Tariff Schedules of the United States Annotated (see **Federal Register** notice 52 FR 47745, published on December 16, 1987.) Also see 53 FR 161, published on December 30, 1987.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

Committee For The Implementation of Textile Agreements

November 29, 1988

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive issued to you on December 30, 1987 by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports of certain cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products, produced or manufactured in the Republic of Korea and exported during the period which began on January 1, 1988 and extends through December 31, 1988.

Effective on December 6, 1988, the directive of December 30, 1987 is being amended to establish a limit for Category 200 and to increase the current limit for Group I, as provided by the current bilateral agreement between the Governments of the United States and the Republic of Korea. Category 200 shall remain subject to the Group I limit.

Category	12-month restraint limit [1]
GROUP I	
200, 201, 218-220, 222-229, 300-326, 360-363, 369-O [2], 400, 410, 414, 464-469, 600-607, 611-622, 624-629, 665-669 and 670-O [3], as a group.	452,692,605 square yards equivalent.
SUBLEVEL IN GROUP I	
200	754,201 pounds.

[1] The limit for Group I has not been adjusted to account for any imports exported after December 31, 1987.

[2] In Category 369-O, all TSUSA numbers except 706.3210, 706.3650 and 706.4111.

[3] In Category 670-O, all TSUSA numbers except 706.3415, 706.4130 and 706.4135.

Import charges already made to Category 200 in Group I are to be retained and applied to the sublevel established in this directive for Category 200.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 88-27786 Filed 12-1-88; 8:45 am]

BILLING CODE 3510-DR-M

Announcement of Import Limits and Guaranteed Access Levels for Certain Cotton and Man-Made Fiber Textile Products Produced or Manufactured in Trinidad and Tobago

November 29, 1988.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs establishing limits and GAL's for the new agreement year.

EFFECTIVE DATE: January 1, 1989.

Authority: E.O. 11651 of March 3, 1972, as amended; sec. 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); President's February 20, 1986 Announcement of a Special Access Program.

FOR FURTHER INFORMATION CONTACT: Naomi Freeman, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port. For information on embargoes and quota re-openings, call (202) 377-3715.

SUPPLEMENTARY INFORMATION: A copy of the current bilateral textile agreement between the Governments of the United

States and Trinidad and Tobago is available from the Textiles Division, Bureau of Economic and Business Affairs, U.S. Department of State, (202) 647–1998.

A description of the textile and apparel categories in terms of HTS numbers is available in the *Correlation:* Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States Annotated (see **Federal Register** notice 53 FR 44937, published on November 7, 1988).

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are desinged to assist only in the implementation of certain of its provisions.

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

November 29, 1988

Commissioner of Customs,
Department of the Treasury, Washington, D.C. 20229

Dear Mr. Commissioner: Under the terms of Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); pursuant to the Bilateral Cotton and Man-Made Fiber Textile Agreement, effected by exchange of notes dated October 23, 1986 between the Governments of the United States and Trinidad and Tobago; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on January 1, 1989, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton and man-made fiber textile products in the following categories, produced or manufactured in Trinidad and Tobago and exported during the twelve-month period which begins on January 1, 1989 and extends through December 31, 1989, in excess of the following designated levels:

Category	12-month restraint level
336/636	65,000 dozen.
338/339	105,000 dozen.
340/640	50,000 dozen of which not more than 25,000 dozen shall be in shirts made from yarn dyed fabric of two or more colors in the warp and/or filling (Categories 340pt./640pt.—only tariff numbers 6205.20.20.15, 6205.20.20.20, 6205.20.20.46, 6205.20.20.50 and 6205.20.20.60 in Category 340pt.; and 6205.30.20.10, 6205.30.20.20, 6205.30.20.50 and 6205.30.20.60 in Category 640pt.
347/348/647/648	100,000 dozen.
352/652	100,000 dozen.

—Continued

Imports charged to the category limits for the period January 1, 1988 through December 31, 1988 shall be charged against those levels of restraint to the extent of any unfilled balances. In the event the limits established for that period have been exhausted by previous entries, such goods shall be subject to the level set forth in this directive.

The conversion factors for Categories 340/640 and 352/652 are 20.1 and 11.3, respectively.

In accordance with the provisions of the Special Access Program, as set forth in 51 FR 21208 (June 11, 1986) and 52 FR 26057 (July 10, 1987), you are directed to establish guaranteed access levels for properly certified cotton and man-made fiber textile products in the following categories which are assembled in Trinidad and Tobago from fabric formed and cut in the United States and exported to the United States from Trinidad and Tobago during the twelve-month period which begins on January 1, 1989 and extends through December 31, 1989.

Category	Guaranteed access level
336/636	300,000 dozen.
338/339	225,000 dozen.
340/640	100,000 dozen.
347/348/647/648	300,000 dozen.
352/652	300,000 dozen.

Any shipment for entry under tariff number 9802.00.8010 which is not accompanied by a valid and correct certification and CBI Export Declaration in accordance with the provisions of the certification requirements established in the directive of July 28, 1987 shall be denied entry unless the Government of Trinidad and Tobago authorizes the entry and any charges to the appropriate designated consultation levels. Any shipment which is declared as tariff number 9802.00.8010 but found not to qualify for the Special Access Program shall be denied entry into the United States.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 6820–33–M

Procurement List 1989; Proposed Addition

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Proposed addition to Procurement List.

SUMMARY: The Committee has received a proposal to add to Procurement List 1989 a commodity to be produced by workshops for the blind and other severely handicapped.

COMMENTS MUST BE RECEIVED ON OR BEFORE: January 2, 1989.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202–3509.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman (703) 557–1145.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2) and 41 CFR 51–2.6. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed action.

If the Committee approves the proposed addition, all entities of the Federal Government will be required to procure the commodity listed below from workshops for the blind or other severely handicapped.

It is proposed to add the following commodity to Procurement List 1989, November 15, 1988 (53 FR 46018).

Stand, Canteen Cup
8465–01–250–3632

(All DLA Depots except Mechanicsburg, Pennsylvania)

BILLING CODE 3810-01-M

Defense Science Board Task Force on Advanced Naval Warfare Concepts; Advisory Committee Meetings

ACTION: Notice of Advisory Committee Meetings.

SUMMARY: The Defense Science Board Task Force on Advanced Naval Warfare Concepts will meet in closed session on January 19-20, March 14-15, and April 24-25, 1989 at the Center for Naval Analyses, Alexandria, Virginia.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Acquisition on scientific and technical matters as they affect the perceived needs of the Department of Defense. At these meetings the Task Force will examine advanced naval warfare concepts and assess relevant technology, equipment, and modernization plans.

In accordance with section 10(d) of the Federal Advisory Committee Act, Pub. L. 92-463, as amended (5 U.S.C. App. II, (1982)), it has been determined that these DSB Task Force meetings, concern matters listed in 5 U.S.C. 552b(c) (1) (1982), and that accordingly these meetings will be closed to the public.

November 23, 1988.

S160.50 DLA-1

System Name:

Criminal Incidents/Investigations File. (53 FR 32091 August 23, 1988)

Changes:

The system number should read "S160.50 DLA-1".

Categories of Individuals Covered by the System is revised and Categories of Records in the System is added to read as follows:

Categories of Individuals Covered by the System:

Civilian and military personnel of DLA, contractor employees, and other persons who committed or are suspected of having committed a felony or misdemeanor on DLA controlled activities or facilities; or outside of those areas in cases where DLA is or may be a party of interest.

Categories of Records in the System:

Reports of investigation, messages, statements of witnesses, subjects and victims, photographs, laboratory reports, data collection reports, and other related papers.

Retention and Disposal:

Delete: (on line 12) "(DCIL)".
Add: (on line 12) "(DCII)".

Record Source Categories:

Delete: (on line 2) "Security Officer".
Add: (on line 2) "Security Officers".
As corrected, the system of records reads as follows:

S160.50 DLA-I

SYSTEM NAME:

Criminal Incidents/Investigations File.

SYSTEM LOCATION:

Primary System—case files on all incidents of known or suspected criminal activity or other serious incidents: Office of Command Security and Office of General Counsel, Headquarters Defense Logistics Agency (HQ DLA) and field extension offices. Decentralized segments—above described files and files of minor nature: DLA Primary Level Field Activities (PLFAs) and six Secondary Level Field Activities (SLFAs).

CATEGORY OF INDIVIDUALS COVERED BY THE SYSTEM:

Civilian and military personnel of DLA, contractor employees, and other persons who committed or are suspected of having committed a felony or misdemeanor on DLA controlled activities or facilities, or outside of those areas in cases where DLA is or may be a party of interest.

CATEGORIES OF RECORDS IN THE SYSTEM:

Reports of investigation, messages, statements of witnesses, subjects and victims, photographs, laboratory reports, data collection reports, and other related papers.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Section 21, Internal Security of 1950 (Pub. L. 831, 81st Congress). DoD Directive 5102.22 Defense Logistics Agency, DoD Instruction 5240.4, Reporting of Counterintelligence and Criminal Violations, DoD Directive 5105.42, Defense Investigative Service, and DoD Instruction 5505.2, Criminal Investigations of Fraud Offenses.

PURPOSE(S):

Information is maintained for the purpose of monitoring the progress of investigations, identification of crime conducive conditions, crime and loss prevention, and preparation of statistical data required by higher authority. Information is used by: DLA Security and General Counsel personnel—to monitor progress of cases, develop non-personal statistical data on crime and crime investigative support for the future. DLA General Counsel review of all available remedies. DLA supervisors and managers—to determine appropriate action against DLA employees in cases of their involvement.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Information may be referred to local, state, or Federal law enforcement agencies when the information indicates a violation of local, state or federal law. See also blanket routine uses set forth at the beginning of this agency's listing of records system.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records maintained in combination of paper and automated files.

RETRIEVABILITY:

Hardcopy records filed chronologically by DLA case number and cross indexed to a card index file. Indexed by name of the individual or firm involved. Automated records are retrievable by name of the individual or firm, DLA case number, PLFA number of activity code.

SAFEGUARDS:

Records, as well as computer terminals, are maintained in areas accessible only to DLA Security and Office of General Counsel personnel. In addition, access to a retrieval from computerized files is limited to authorized users and is password protected.

RETENTION AND DISPOSAL:

Paper records from external law enforcement and investigative organizations are destroyed 5 years after the receipt of a final report in each case, or when no longer needed, whichever is later. Criminal investigative reports generated by DLA investigators/detectives are retained for 25 years, either in hard copy or microfiche, as recommended by the DIS Defense Central Investigation Index

(DCII). Automated records are retained for 10 years in the on-line mode and then transfered to magnetic tape with retention of 25 years.

SYSTEM MANAGER(S) AND ADDRESS:

Staff Director, Office of Command Security, DLA: Heads of PLFAs and SLFAs.

NOTIFICATION PROCEDURE:

Written or personal requests for information may be directed to the SYSMANAGER.

RECORD ACCESS PROCEDURE:

Official mailing addresses of the SYSMANAGERS are in the Department of Defense Directory in the appendix to the DLA systems notice. Written requests for information should contain the full name, current address and telephone numbers of the individual. For personal visits, the individual should be able to provide some acceptable identification, that is, driver's license, employing office identification card, and give some verbal information that could be verified with the file.

CONTESTING RECORD PROCEDURES:

DLA's rules for contesting contents as well as appealing initial determinations by individual concerned may be obtained from the SYSMANAGERS.

RECORD SOURCE CATEGORIES:

Reports of investigations by DLA investigators, Security Officers, Federal, State, and local law enforcement and investigative agencies.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

Parts of this system may be exempt under Title 5 U.S.C. 552a(k)(2) as applicable. Agency rules pertaining to this exemption are set forth both in Appendix C of 32 CFR Part 1286 and DLA Regulation 6400.21. For additional information, contact the System Manager.

BILLING CODE 3810-01-M

DEPARTMENT OF ENERGY

Economic Regulatory Administration

Proposed Consent Order With Tesoro Petroleum Corp.

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of proposed consent order and opportunity for public comment.

SUMMARY: The Economic Regulatory Administration (ERA) announces a proposed Consent Order between the Department of Energy (DOE) and Tesoro Petroleum Corporation (Tesoro). The agreement proposes to resolve matters relating to Tesoro's compliance with the federal petroleum price and allocation regulations for the period January 1, 1973 through January 27, 1981. If this Consent Order is approved, Tesoro shall pay a total of $48,500,000, plus interest on any unpaid balance over a period of six years. Within thirty days of the effective date of the Consent Order, Tesoro will pay an initial payment of $25,000,000. Thereafter, beginning one year after the initial payment, Tesoro will make six equal annual payments of $5,177,650.95 each, including interest at the rate of 8.61% per annum on the unpaid balance.

DOE's Office of Hearings and Appeals (OHA) will be petitioned to implement Special Refund Procedures pursuant to 10 CFR Part 205, Subpart V, in which proceedings any persons who claim to have suffered injury from Tesoro's alleged overcharges would have the opportunity to submit claims for payment.

Pursuant to 10 CFR 205.199J, ERA will receive written comments on the proposed Consent Order for thirty (30) days following publication of this Notice. Following this comment period, ERA will conduct a public hearing on January 4, 1989, to provide interested persons an additional opportunity to present comments. ERA will consider all comments received from the public in determining whether to accept the settlement and issue a final Order, renegotiate the agreement and issue a modified agreement as a final Order, or reject the settlement. DOE's final decision will be published in the **Federal Register**, along with an analysis of and response to the significant written and oral comments, as well as any other considerations that were relevant to the final decision.

FOR FURTHER INFORMATION CONTACT: Dorothy Hamid, Economic Regulatory Administration, Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-4167.

SUPPLEMENTARY INFORMATION:

I. Resolution of Regulatory Issues
II. Determination of Reasonable Settlement Amount
III. Terms and Conditions of the Consent Order

I. Resolution of Regulatory Issues

Tesoro is a petroleum refiner subject to the audit jurisdiction of ERA to determine compliance with the Federal Petroleum Price and Allocation Regulations. During the period covered by this proposed Order (January 1, 1973 through January 27, 1981), Tesoro engaged in, among other things, the production, importation, refining, and sale of crude oil; and the sale of residual fuel oil, motor gasoline, middle distillates, aviation fuel, propane and other refined petroleum products.

ERA conducted an audit of Tesoro's compliance for the period beginning in 1973 to the date when Federal price and allocation controls were ended by the President (January 27, 1981, Executive Order 12287). During this audit, ERA identified certain areas in the pricing, refining, and sales of crude oil and pricing and sales of refined petroleum products in which it believed that Tesoro had failed to comply with the requirements of the Federal price and allocation regulations.

A. The crude oil overcharge allegations resolved by this settlement involve proceedings pending before the DOE's Office of Hearings and Appeals and an appeal pending at the Federal Energy Regulatory Commission. The proceedings are discussed below.

1. Entitlements

In March 1988, ERA issued to Tesoro a Proposed Remedial Order (PRO), as amended May 25, 1988, alleging violations of 10 CFR 211.66(b) and (h) and 205.202 as a result of Tesoro's significant understatement on its entitlements reports of its receipts of controlled tier crude oil at its refinery located in Kenai, Alaska, during the period January 1978 through December 1980. Specifically, ERA alleged that during this period Tesoro failed to correctly report the volumes of controlled tier certification associated with substantial volumes of its crude oil receipts at the Kenai, Alaska refinery. Instead, Tesoro reported such volumes as uncontrolled crude oil. ERA alleges that Tesoro's actions circumvented and contravened, or resulted in the circumvention and contravention of, the requirements of the Entitlements Program. As a remedy for these alleged violations, the Proposed Remedial Order seeks to recover approximately $37.5 million, which is the amount of Tesoro's reduced post-entitlement crude costs. Tesoro subsequently submitted documentation to demonstrate that corrections to the crude oil purchases and sales identified in the PRO reduce DOE's principal claim to approximately $36.2 million. With interest, Tesoro's maximum legal liability in this case would be approximately $101 million.

2. Processing Agreement Disputes

In three enforcement cases, ERA alleges Tesoro was liable for the improper use of processing agreements

with small and exempt refiners to avoid entitlements obligations. A PRO issued in December 1986 names Tesoro and another firm as jointly liable for alleged violations in the amount of approximately $2 million, plus interest of $4.4 million. A PRO issued in November 1986, names Tesoro and another firm as jointly liable for $1.4 million in violations, plus interest amounting to approximately $3 million. The third processing agreement is the subject of a Remedial Order issued in September 1986, and now pending appeal at FERC, which finds Tesoro liable for violations in the amount of $2.9 million plus interest in the amount of $6 million. Pursuant to the terms of the proposed Consent Order, 50% of DOE's claim will remain against the parties other than Tesoro in the two cases where joint liability is alleged. Therefore, the total maximum refund liability being settled in the three processing cases is approximately $14.3 million, including interest.

3. Crude Production

In September 1983, ERA issued to Tesoro a PRO alleging violations of 10 CFR Part 212, Subpart D, in its first sales of domestically produced crude oil in the amount of approximately $1.5 million, plus interest. Subsequent responses by Tesoro have reduced the amount of the overcharge dispute to less than $700,000. With interest, the current total in dispute is approximately $2 million. The allegations involved Tesoro's use of an incorrect posted price; improper aggregation of two properties as a single property and improper certifications as to exempt stripper wells based on erroneous average daily production calculations.

4. Crude Oil Resales

In a PRO issued to Tesoro in September 1988, ERA alleged that Tesoro resold crude oil in excess of its maximum lawful selling price in certain months between 1973 and 1976, in violation of 10 CFR, Subpart F. ERA estimated Tesoro's potential overcharge liability in these sales to approximately $5.2 million plus interest in the amount of $10 million. Tesoro's position is that factual errors in DOE's data base would reduce Tesoro's maximum overcharge liability to approximately $700,000. ERA has not yet made a determination as to the correctness of Tesoro's submissions, but has reason to believe that potential liability would be reduced to some extent.

In the negotiation process which led to this proposed settlement, ERA analyzed the results of the audit and the nature of the alleged regulatory violations. With regard to the entitlements of PRO issued in March 1988, ERA took into consideration the evidence Tesoro provided that $10.8 million of Tesoro's reduced post-entitlements cost were, by specific contractual provisions, directly passed through to a large utility, San Diego Gas & Electric (SDG&E). Under the contract, the price of SDG&E's residual fuel oil was directly affected by Tesoro's post-entitlements crude costs. Thus, nearly 30% of the alleged liability in this case was directly passed through by Tesoro to the utility.

B. *Refinery Product Pricing.* In April 1988, ERA issued a PRO to Tesoro regarding certain cost issues relating to its refined product sales during the period May 1973 and August 1973 through December 1980. The PRO alleges that in determining its maximum legal selling prices, Tesoro overstated its available increased costs by approximately $85 million.

ERA estimated the maximum amount of refined product overcharges for which Tesoro might be liable as a result of the cost issues with Tesoro by comparing Tesoro's available costs with costs actually recovered by Tesoro in sales of its products during the period of price controls. This comparison yielded the information necessary to estimate Tesoro's maximum potential overcharge liability for refined products.

Under the relevant regulations, a refiner was permitted to "bank" any increased costs in a given month that it was permitted to recover in its product prices but did not. Costs could be "banked" and used, subject to certain limitations, in later months in pricing products.

In the PRO, ERA indicated that success on all of the cost disputes would result in estimated overcharges of $4 to $6 million. Tesoro subsequently submitted documentation to demonstrate that the maximum resulting overcharges in the case would amount to $1.3 million. With interest on that amount, Tesoro's maximum potential liability would be approximately $4 million.

II. Determination of Reasonable Settlement Amount

The settlement calls for Tesoro to pay $48.5 million, plus interest, to discharge in full the potential liability for its obligations under the price and allocation regulations. Under the terms of the proposed Consent Order, the ERA would petition the OHA to implement Special Refund Procedures for disposition of these funds pursuant to 10 CFR Part 205, Subpart V. ERA has preliminarily agreed to the settlement amount after considering the factual aspects related to the various issues, assessing the litigation risks associated with establishing the alleged overcharges, and considering the benefit to the public from a substantial settlement of numerous issues which would take years of continued litigation to resolve.

In determining a reasonable settlement amount for the $137 million of refund claims being settled in this case, as discussed above, ERA reviewed submissions of certain factual data by Tesoro which reduced the entitlements PRO allegation to $36.2 million from $37.5 million, and in the crude production PRO, to less than $700,000 from $1.5 million. Also, the crude oil resale alleged violations may require reduction upon further review and development. Moreover, ERA took into consideration the contractual evidence that a substantial portion of the violations alleged in one case was actually passed through to a utility.

The inherent risks in litigation make success on all of the issues problematic, and the necessity for the government to prevail on all of the issues in order to maximize overcharge and interest recovery was an important consideration in ERA's preliminary determination that Tesoro's agreement to pay $48.5 million in settlement is in the public interest.[1]

In evaluating the total settlement amount for Tesoro's regulatory violations, in addition to the analysis of litigation risks, ERA took into account such factors as the number and complexity of the legal and factual issues and the time and expense required for the government to fully litigate every issue in order to obtain and recovery. Based on all of these considerations, ERA has tentatively concluded that the resolution of these matters for $48.5 million plus interest, is an appropriate settlement and in the public interest.[2]

---

[1] Although ERA and Tesoro did not come to any specific agreement as to the portions of the $48.5 million settlement amount attributable to crude oil and refined product violations, in ERA's view, approximately $2 million is attributable to the refined product issues and the remainder to the crude oil issues.

[2] ERA has also concluded that it is appropriate for Tesoro to satisfy its total obligation by means of seven payments over a period of six years. Over 50% of the total settlement amount will be paid within thirty days of the effective date of the Consent Order. Further, Tesoro will pay interest on the unpaid principal balances. (See note 3, *infra*.).

III. Terms and Conditions of the Consent Order

If the settlement is not made final by the one hundered fiftieth day following execution, Tesoro may withdraw from the proposed agreement. If the Consent Order is made final, Tesoro will pay DOE $48.5 million plus interest. Within thirty days of the effective date of the Consent Order, Tesoro will make its first payment to the DOE in the amount of $25,000,000. Thereafter, Tesoro will make six annual payments to DOE, each for $5,177,850.95, inclusive of interest,[3] beginning 12 months from the date the initial payment of twenty-five million dollars is due and payable.

ERA will petition OHA to implement Special Refund Procedures under the provisions of Subpart V of the regulations. In these proceedings, OHA would develop procedures for the receipt and evaluation of applications for refund in order to distribute the settlement monies. To ensure that OHA has sufficient information to evaluate the claims, the proposed Consent Order requires that Tesoro provide customer identification and purchase volume information to OHA upon request.

Tesoro and DOE mutually release each other from claims and actions arising under the subject matters covered by the proposed Consent Order. The proposed Order does not affect the right of any other party to take action against Tesoro, or of Tesoro or the DOE to take action against any other party.

Submission of Written Comments

The proposed Consent Order cannot be made effective until the conclusion of the public review process, of which this Notice is a part.

Interested parties are invited to submit written comments concerning this proposed Consent Order to: Tesoro Consent Order Comments, RG–30, Economic Regulatory Administration, 1000 Independence Avenue, SW., Washington, DC 20585, and to appear at a public hearing, beginning at 10:00 a.m. on January 4, 1989, at the Department of Energy Auditorium, Room GE–086, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC. All comments received by the thirtieth day following publication of this Notice in the **Federal Register**, and all statements made at the hearing, will be considered before determining whether to adopt the proposed Consent Order as a final Order. Any modifications of the proposed Consent Order which significantly alter its terms or impact will be published for additional comments. If, after considering the comments it has received and the comments at the hearing, ERA determines to issue the proposed Consent Order as a final Order, the proposed Order will be made final and effective by publication of a Notice in the **Federal Register.**

Any information or data considered confidential by the person submitting it must be identified as such in accordance with the provisions of 10 CFR 205.9(f).

Issued in Washington, DC, on November 23, 1988.

Milton C. Lorenz,

Chief Counsel for Enforcement Litigation, Economic Regulatory Administration.

Consent Order With Tesoro Petroleum Corporation

I. Introduction

101. This Consent Order is entered into between Tesoro Petroleum Corporation ("Tesoro") and the United States Department of Energy ("DOE"). Except as othewise provided herein, this Consent Order settles and finally resovles all civil and administrative claims and disputes, whether or not heretofore asserted, between the DOE, as hereinafter defined, and Tesoro, as hereinafter defined, relating to Tesoro's compliance with the federal petroleum price and allocation regulations, as hereinafter defined, during the period January 1, 1973, through January 27, 1981 (all the matters settled and resolved by this Consent Order are referred to hereinafter as "the matters covered by this Consent Order").

II. Jurisdiction, Regulatory Authority and Definitions

201. This Consent Order is entered into by the DOE pursuant to the authority conferred upon it by sections 301 and 503 of the Department of Energy Organization Act ("DOE Act"), 42 U.S.C. 7151 and 7193, Executive Order No. 12009, 42 FR 46267 (1977); Executive Order 12038, 43 FR 4957 (1978); and 10 CFR 205.199J.

202. The Economic Regulatory Administration ("ERA") was created by section 206 of the DOE Act, 42 U.S.C. 7136. In Delegation No. 0204–4, the Secretary of Energy delegated responsibility for the administration of the federal petroleum price and allocation regulations to the Administrator of the ERA. In Delegation No. 0204–4A, the Administrator delegated to the Special Counsel authority to audit the compliance of refiners, including Tesoro, with the federal petroleum price and allocation regulations and to take appropriate enforcement actions based upon such audits.

203. For purposes of this Consent Order, the phrase "federal petroleum price and allocation regulations" means all statutory requirements and administrative regulations and orders regarding the pricing and allocation of crude oil, refined petroleum products, natural gas liquids, and natural gas liquid products, including the entitlements and mandatory oil imports programs, administered by the DOE. The Federal petroleum price and allocation regulations include (without limitation) the pricing, allocation, reporting, certification, and recordkeeping requirements imposed by or under the Economic Stabilization Act of 1970, the Emergency Petroleum Allocation Act of 1973, the Federal Energy Administration Act of 1974, Presidential Proclamation 3279, all applicable DOE regulations codified in 6 CFR Parts 130 and 150 and 10 CFR Parts 205, 210, 211, 212, and 213, and all rules, rulings, guidelines, interpretations, clarifications, manuals, decisions, orders notices, forms, and subpoenas relating to the pricing and allocation of petroleum products. The provisions of 10 CFR 205.199J and the definitions under the federal petroleum price and allocation regulations shall apply to this Consent Order except to the extent inconsistent herewith. Reference herein to "DOE" includes, besides the Department of Energy, the Cost of Living Council, the Federal Energy Office, the Federal Energy Administration, the Office of Special Counsel (OSC), the Economic Regulatory Administration and all predecessor and successor agencies. References in this Consent Order to "Tesoro" shall include: (1) Tesoro Petroleum Corporation and all of its subsidiaries and affiliates, (2) all of Tesoro's petroleum-related activities as refiner, producer, operator, working interest or royalty interest owner, reseller, retailer, natural gas processor, or otherwise and, except for purposes of Article IV, *infra*, (3) Tesoro's directors, officers, and employees.

III. Facts

The stipulated facts upon which this Consent Order is based are as follows:

301. During the period covered by this Consent Order, Tesoro was a "refiner," "producer," and "reseller" as those terms are defined in the federal petroleum price and allocation regulations and was subject to the jurisdiction of the DOE. Tesoro engaged in, among other things, the production, importation, sale, and refining of crude

[3] Tesoro's total payments on the $23.5 million balance will exceed $31 million. Interest at the stated rate is included in each of the installments.

oil, the sale of residual fuel oil, motor gasoline, middle distillates, aviation fuel, propane, and other refined petroleum products.

302. DOE conducted an audit to determine Tesoro's compliance with the federal petroleum price and allocation regulations. During the course of the DOE's audit, the enforcement proceedings instituted by the DOE and the negotiations that led to this Consent Order, the DOE raised certain issues with respect to Tesoro's application of the federal petroleum price and allocation regulations. The DOE has taken various administrative enforcement actions against Tesoro, including the issuance of Notices of Probable Violation, Proposed Remedial Orders, and Remedial Orders. Tesoro maintained, however, that it has calculated its costs, determined its prices, sold its crude oil and petroleum products, and operated in all other respects in accordance with the federal petroleum price and allocation regulations. The DOE and Tesoro have disagreed in several respects concerning the proper application of the federal petroleum price and allocation regulations to Tesoro's activities with respect to the matters covered by this Consent Order, and each has asserted its belief that its respective legal and factual positions on the matters resolved by this Consent Order are meritorious. These positions were emphasized in the intensive review and exchange of information conducted during the audit and subsequent settlement negotiation process. However, in order to avoid the expense of protracted and complex litigation and the disruption of its orderly business functions, Tesoro has agreed to enter into this Consent Order. The DOE believes this Consent Order constitutes a satisfactory resolution of the matters covered herein and is in the public interest.

IV. Remedial Provisions

401. In full and final settlement of all matters covered by this Consent Order and in lieu of all other remedies which have been or might be sought by the DOE against Tesoro for such matters under 10 CFR 205.199I or otherwise, Tesoro shall pay a total principal amount of forty-eight million five hundred thousand dollars ($48,500,000), plus interest, to the DOE in the manner specified in paragraphs 402 and 403.

402. Within thirty (30) days of the effective date of this Consent Order, Tesoro shall make an initial payment to the DOE of twenty-five million dollars ($25,000,000).

403. Beginning one year after the date the initial payment prescribed by paragraph 402 becomes due and payable, Tesoro shall make six equal annual installments to the DOE of five million one hundred seventy-seven thousand eight hundred fifty dollars and ninety-five cents ($5,177,850.95), constituting an additional principal sum of twenty-three million five hundred thousand dollars ($23,500,000) plus interest calculated at the rate of 8.61 percent per annum.

404. The payments pursuant to paragraphs 402 and 403 shall be made by wire transfer in accordance with instructions furnished to Tesoro by the DOE in a timely manner. Late payments will bear interest at the rate of 17.22 percent per annum from the day following the due date through the date of payment, with interest deemed earned each day as of 2:00 p.m. Eastern Time.

405. Payments made by Tesoro pursuant to this Consent Order shall be distributed by the DOE pursuant to the special refund procedures prescribed by 10 CFR Part 205, Subpart V.

V. Issues Resolved

501. All pending and potential civil and administrative claims, whether or not known, demands, liabilities, causes of action or other proceedings by the DOE against Tesoro regarding Tesoro's compliance with and obligations under the Federal petroleum price and allocation regulations during the period covered by this Consent Order, whether or not heretofore raised by an issue letter, Notice of Probable Violation, Notice of Proposed Disallowance, Proposed Remedial Order, Remedial Order, action in court or otherwise, are resolved and extinguished as to Tesoro by this Consent Order. This Consent Order, however, does not resolve, extinguish, or otherwise affect DOE's claims against any other party, except that the DOE agrees to reduce by fifty percent all claims that it has asserted against other parties before the Office of Hearings and Appeals (OHA) in OHA Case Nos. KRO–0630, and KRO–0540 now pending.

502. (a) Except as otherwise provided herein, compliance by Tesoro with this Consent Order shall be deemed by the DOE to constitute full compliance for administrative and civil purposes with all federal petroleum price and allocation regulations for matters covered by this Consent Order. In consideration for performance as required under this Consent Order by Tesoro, the DOE hereby releases Tesoro completely and for all purposes from all administrative and civil judicial claims, demands, liabilities or causes of action, including without limitation claims for civil penalties, that the DOE has asserted or might otherwise be able to assert against Tesoro before or after the date of this Consent Order for alleged violations of the Federal petroleum price and allocation regulations with respect to matters covered by this Consent Order. The DOE will not initiate or prosecute any such administrative or civil judicial matter against Tesoro or cause or refer any such matter to be initiated or prosecuted, nor will the DOE or its successors directly or indirectly aid in the initiation of any such administrative or civil judicial matter against Tesoro or participate voluntarily in the prosecution of such actions. The DOE will not assert voluntarily in any administrative or civil judicial proceeding that Tesoro has violated the federal petroleum price and allocation regulations with respect to the matters covered by this Consent Order or otherwise take any action with respect to Tesoro in derogation of this Consent Order. However, nothing contained herein shall preclude the DOE from defending the validity of the federal petroleum price and allocation regulations.

(b) This Consent Order settles and finally resolves all aspects of Tesoro's potential liability to the DOE under the federal petroleum price and allocation regulations, including but not limited to its capacity as an operator or working interest or royalty interest owner of a crude oil producing property. In addition, if Tesoro was the operator of a property that produced crude oil for all or part of the period covered by this Consent Order, the DOE shall not initiate or prosecute any enforcement action against any person for noncompliance with the Federal petroleum price and allocation regulations during such period relative to such property. Otherwise, the DOE reserves the right to initiate and prosecute enforcement actions against any person other than Tesoro for noncompliance with the Federal petroleum price and allocation regulations, including suits against operators for overcharges for crude oil when Tesoro is a working interest or royalty interest owner in such crude oil production. In that connection, Tesoro and the DOE agree that the amount paid to the DOE pursuant to this Consent Order is not attributable to Tesoro's activities as a working interest or royalty interest owner on properties on which it is not the operator. Furthermore, Tesoro and the DOE agree that the Consent Order and the payments hereunder do not resolve, reduce or release the liability of any

other person for violations on properties of which (but only for the times during which) Tesoro is or was a working interest or royalty interest owner (and not the operator) or affect any rights or obligations between Tesoro and the operator or any other working interest or royalty interest owner.

(c) The DOE will not seek or recommend any criminal fines or penalties based on information or evidence presently in its possession for the matters covered by this Consent Order, provided, however, that nothing in this Consent Order precludes the DOE from (1) seeking or recommending such criminal fines or penalties if information subsequently coming to its attention indicates, either by itself or in combination with information or evidence presently known to DOE, that a criminal violation may have occurred, or (2) otherwise complying with its obligations under law with regard to forwarding information of possible criminal violations of law to appropriate authorities. Nothing contained herein may be construed as a bar, estoppel or defense against any criminal or civil action brought by an agency of the United States other than the DOE under (i) section 210 of the Economic Stabilization Act of 1970 or (ii) any statute or regulation other than the federal petroleum price and allocation regulations. Finally, this Consent Order does not prejudice the rights of any third party or Tesoro in any private action, including an action for contribution by or against Tesoro.

(d) Tesoro releases the DOE completely and for all purposes from all administrative and civil judicial claims, liabilities, or causes of action that Tesoro has asserted or may otherwise be able to assert against the DOE relating to the DOE's administration of the Federal petroleum price and allocation regulations. This release, however, does not preclude Tesoro from asserting any factual or legal position or argument as a defense to any action, claim, or proceeding brought by the DOE, the United States, or any agency of the United States. Nor does it preclude Tesoro from asserting a defense, counter-claim or offset to any action, claim or proceeding brought by any other person.

503. (a) Within thirty (30) days after the Effective Date of this Consent Order, Tesoro and the DOE will file or cause to be filed appropriate pleadings and will take all other steps necessary to withdraw all claims and dismiss with prejudice all proceedings covered by this Consent Order then pending or subsequently filed before the DOE's Office of Hearings and Appeals or the Federal Energy Regulatory Commission and to dismiss with prejudice any court proceeding then pending or subsequently filed involving an appeal from or seeking review of a decision by the OHA or the FERC in any such proceeding.

(b) Within fifteen (15) days after the execution of the Consent Order by both parties, DOE agrees to join with Tesoro in written notification to DOE's Office of Hearings and Appeals, the Federal Energy Regulatory Commission and any appropriate court of the fact of such execution, which notice shall request that said administrative or judicial tribunal stay all further action in the proceedings covered by this Consent Order until such time as DOE provides notice to said tribunals that the Consent Order has become effective or has been withdrawn purusant to Article IX of this Consent Order.

504. Execution of this Consent Order constitutes neither an admission by Tesoro nor a finding by the DOE of any violation by Tesoro of any statute or regualtion. The DOE has determined that it is not appropriate to seek to impose civil penalties for the matters covered by this Consent Order, and the DOE will not seek any such civil penalties. None of the payments or expenditures made by Tesoro pursuant to this Consent Order are to be considered for any purpose as penalties, fines, or forfeitures or as settlement of any potential liability for penalties, fines or forfeitures.

505. Notwithstanding any other provision herein, with respect to the matters covered by this Consent Order, the DOE reserves the right to initiate an enforcement proceeding or to seek appropriate penalties for any newly discovered regulatory violations committed by Tesoro, but only if Tesoro has knowingly concealed facts relating to such violations. The DOE also reserves the right to seek appropriate judicial remedies, other than full rescission of this Consent Order, for any knowing misrepresentation of fact material to this Consent Order during the course of the audit or the negotiations that preceded this Consent Order.

VI. Recordkeeping, Reporting and Confidentiality

601. Tesoro shall maintain such records as are necessary to demonstrate compliance with the terms of this Consent Order and records related to Tesoro's crude oil purchases, sales, exchanges or transfers during the period January 1, 1978 through January 27, 1981. To assist DOE in the distribution of the monies paid pursuant to this Consent Order, Tesoro shall also retain sales volume data and customers' names and addresses regarding its sales of crude oil and refined petroleum products for the transactions covered by this Consent Order until thirty (30) days after final distribution by DOE of such monies. If requested, Tesoro shall make such information available to DOE. Except as otherwise provided in this paragraph, upon timely payment to DOE of the amount required to be paid under paragraph 402 of this Consent Order, Tesoro is relieved of its obligation to comply with the recordkeeping requirements of the federal petroleum price and allocation regulations relating to the matters settled by this Consent Order.

602. Except for formal requests for information regarding other firms subject to the DOE's information gathering and reporting authority, Tesoro will not be subject to any audit requests, report orders, subpoenas, or other administrative discovery by DOE relating to Tesoro's compliance with the federal petroleum price and allocation regulations relating to the matters settled by this Consent Order.

603. The DOE will treat the sensitive commercial and financial information provided by Tesoro pursuant to negotiations which were conducted with respect to this Consent Order or obtained by the DOE in its audit of Tesoro and related to matters covered by this Consent Order as confidential and proprietary and will not disclose such information unless required to do so by law, including a request by a duly authorized committee or subcommittee of Congress. If a request or demand for release of any such information is made pursuant to law, the DOE will claim any privilege or exemption reasonably available to it. The DOE will provide Tesoro with ten (10) days actual notice, if possible, of any pending disclosure of such information, unless prohibited or precluded from doing so by law or request of Congress. The DOE will retain the audit information which it has acquired during its review of Tesoro's compliance with the federal petroleum price and allocation regulations in accordance with the DOE's established records retention procedures. Notwithstanding the otherwise confidential treatment afforded such information by the terms of this Copnsent Order, the DOE will make such information available to the Department of Justice ("DOJ") in response to a request pursuant to the DOJ's statutory authority by a duly authorized representative of the DOJ. If

VOL 53 ISS 232 DE 2 1988 UMI

requested by the DOJ, the DOE shall not disclose that such a request has been made. Nothing in this paragraph shall be deemed to waive or prejudice any right Tesoro may have independent of this Consent Order regarding the disclosure of sensitive commercial and financial information.

VII. Contractual Undertaking

701. It is the understanding and express intention of Tesoro and the DOE that this Consent Order constitutes a legally enforceable contractual undertaking that is binding on the parties and their successors and assigns. Notwithstanding any other provision herein, Tesoro (and its successors and assigns) and the DOE each reserves the right to institute a civil action in an appropriate United States district court, if necessary, to secure enforcement of the terms of this Consent Order, and the DOE also reserves the right to seek appropriate penalties and interest for any failure to comply with the terms of this Consent Order. The DOE will undertake the defense of the Consent Order, as made effective, in response to any litigation challenging the Consent Order's validity in which the DOE is named a party. Tesoro agrees to cooperate with the DOE in the defense of any such challenge.

VIII. Final Order

801. Upon becoming effective, this Consent Order shall be a final order of DOE having the same force and effect as a remedial order issued pursuant to section 503 of the DOE Act, 42 U.S.C. 7193, and 10 CFR 205.199B. Tesoro hereby waives its right to administrative or judicial review of this Order, but Tesoro reserves the right to participate in any such review initiated by a third party.

IX. Effective Date

901. This Consent order shall become effective as a final order of the DOE upon notice to this effect being published in the **Federal Register**. Prior to that date, the DOE will publish notice in the Federal Register that it proposes to make this Consent Order final and, in that notice, will provide not less than thirty (30) days for members of the public to submit written comments and to appear at a public hearing conducted by ERA. The DOE will consider all written comments and the statements made at the hearing to determine whether to adopt the Consent Order as a final order, to withdraw agreement to the Consent Order, or to attempt to renegotiate the terms of the Consent Order.

902. Until the Effective Date, the DOE reserves the right to withdraw consent to this Consent Order by written notice to Tesoro, in which event this Consent Order shall be null and void. If this Consent Order is not made effective on or before the one hundred fiftieth (150th) day following execution by Tesoro, Tesoro may, at any time thereafter until the Effective Date, withdraw its agreement to this Consent Order by written notice to the DOE, in which event this Consent Order shall be null and void.

I, the undersigned, a duly authorized representative of Tesoro, hereby agree to and accept on behalf of Tesoro the foregoing Consent Order.

Dennis F. Juren,

President and Chief Executive Office, Tesoro Petroleum Corporation.

Dated: October 31, 1988.

I, the undersigned, a duly authorized representative of Tesoro, hereby agree to and accept on behalf of Tesoro the foregoing Consent Order.

Milton C. Lorenz,

Chief Counsel Economic Regulatory Administration.

Dated: October 21, 1988.

BILLING CODE 6450-01-M

[ERA Docket No. 88-66-NG]

CanadianOxy Marketing Inc.; Application to Extend Blanket Authorization to Import Natural Gas from Canada

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of application for extension of blanket authorization to import natural gas.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) gives notice of receipt on October 25, 1988, of an application filed by CanadianOxy Marketing Inc. (CanadianOxy) requesting that the blanket authorization previously granted in DOE/ERA Opinion and Order No. 161 (Order No. 161), issued December 29, 1986 (ERA Dkt. No. 86-58-NG), be amended to extend its term for two years commencing on the date of first delivery under the extended import authorization. CanadianOxy's current authorization expires February 21, 1989. CanadianOxy's existing blanket import authorization allows it to import up to a maximum of 100 Bcf of Canadian natural gas. Under the extension requested, CanadianOxy would import volumes not to exceed in the aggregate 100 Bcf of Canadian natural gas over a two-year period.

The application is filed with the ERA pursuant to section 3 of the Natural Gas Act and DOE Delegation Order No. 0204-111. Protests, motions to intervene, notices of intervention and written comments are invited.

DATE: Protests, motions to intervene or notices of intervention, as applicable, requests for additional procedures and written comments are to be filed no later than January 3, 1989.

FOR FURTHER INFORMATION CONTACT:

Larine A. Moore, Natural Gas Division, Economic Regulatory Administration, U.S. Department of Energy, Forrestal Building, Room 3F-056, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586-9578.

Diane Stubbs, Natural Gas and Mineral Leasing, Office of General Counsel, U.S. Department of Energy, Forrestal Building, Room 6E-042, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-6667.

SUPPLEMENTARY INFORMATION:

CanadianOxy, a Delaware corporation with its principal place of business in Calgary, Alberta, requests authority to continue to import Canadian gas from its Canadian parent, Canadian Occidental Petroleum Ltd., and a variety of other suppliers located in Canada, for sale on short-term or spot basis to a wide range of markets in the United States, including pipelines, local distribution companies, and industrial and commercial end-users. The specific terms of each import and sale would continue to be negotiated on an individual basis, and no transaction would be for a period longer than two years. CanadianOxy intends to use existing pipeline facilities to transport its gas supplies. CanadianOxy states also that it would continue to comply with the ERA's quarterly reporting requirements. Quarterly reports filed with the ERA indicate that CanadianOxy's first delivery began on February 22, 1987 and has imported 543 MMcf of natural gas under its current import authorization as of September 31, 1988.

In support of its application, CanadianOxy asserts that the proposed extension of its existing blanket import authorization is not inconsistent with the public interest since the extension requested would assure gas consumers expanded access to competitively-priced Canadian gas.

The decision on this application will be made consistent with the DOE's gas import policy guidelines, under which the competitiveness of an import

arrangement in the markets served is the primary consideration in determining whether it is in the public interest (49 FR 6684, February 22, 1984). Parties that may oppose this application should comment in their responses on the issue of competitiveness as set forth in the policy guidelines. The applicant asserts that this import arrangement is competitive. Parties opposing the arrangement bear the burden of overcoming this assertion.

Further, ERA may determine to start the two-year extension of CanadianOxy's authorization upon the end of its existing authorization rather than upon the date of first delivery under the extension as requested by CanadianOxy.

NEPA Compliance

On August 9, 1988, the DOE published in the **Federal Register** (53 FR 29934) a notice of proposed amendments to its guidelines for compliance with the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. 4321 *et seq.*, effective on an interim basis upon publication. In that notice, the DOE proposed to amend the agency's NEPA guidelines to add to its list of categorical exclusions the approval or disapproval of an import/export authorization for natural gas in cases not involving new construction. Application of the categorical exclusion in any particular case raises a rebuttable presumption that the ERA's action is not a major Federal action under NEPA. Unless the ERA receives comments indicating the presumption does not or should not apply in this case, no further NEPA review will be conducted by the DOE.

Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have the written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate action to be taken on the application. All protests, motions to intervene, notices of intervention, and written comments must meet the requirements that are specified by the regulations in 10 CFR Part 590.

Protests, motions to intervene, notices of intervention, requests for additional procedures, and written comments should be filed with the Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration, Room 3F–056, RG–23, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–9478. They must be filed no later than 4:30 p.m. e.s.t., January 3, 1989.

The Administrator intends to develop a decisional record on the application through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or trial-type hearing. Any request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law, or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trail-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, the ERA will provide notice to all parties. If no party requests additional procedures, a final opinion and order may be issued based on the offical record, including the application and responses filed by parties pursuant to this notice, in accordance with 10 CFR 590.316.

A copy of CanadianOxy's application is available for inspection and copying in the Natural Gas Division Docket Room, 3F–056 at the above address. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, November 25, 1988.

Constance L. Buckley,

Acting Director, Office of Fuels Programs, Economic Regulatory Administration.

[FR Doc. 88–27837 Filed 12–1–88; 8:45 am]

BILLING CODE 6450–01–M

[ERA Docket No.88–67–NG]

Kerr-McGee Chemical Corp.; Application to Extend Authorization to Import Natural Gas from Canada

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of application for extension of authorization to import natural gas.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) gives notice of receipt on October 28,1988, of an application filed by Kerr-McGee Chemical Corporation (Kerr-McGee Chemical) requesting that the authorization previously granted in DOE/ERA Opinion and Order No. 155 (Order 155), issued November 15,1986 (ERA Dkt. No. 86–51–NG), be amended to extend its term for two years commencing on the date of first delivery under the extended import authorization.

Annual reports filed with the Energy Information Administration (EIA) indicate that Kerr-McGee Chemical imported 1.2 Bcf of Canadian gas as of December 31, 1987.

The application is filed with the ERA pursuant to section 3 of the Natural Gas Act and DOE Delegation Order No. 0.204–111. Protests, motions to intervene, notices of intervention and written comments are invited.

DATE: Protests, motions to intervene or notices of intervention, as applicable, requests for additional procedures and written comments are to be filed no later than January 3, 1989.

FOR FURTHER INFORMATION:

Tom Dukes, Natural Gas Division, Economic Regulatory Administration, U.S. Department of Energy, Forrestal Building, Room 3F–077, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586–9590.

Diane Stubbs, Natural Gas and Mineral Leasing, Office of General Counsel, U.S. Department of Energy, Forrestal Building, Room 6E–042, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–6667.

SUPPLEMENTARY INFORMATION:

Kerr-McGee Chemical is a Delaware corporation with its principal place of business in Oklahoma City, Oklahoma. Kerr-McGee Chemical's previous import authorization that expired October 31, 1988, allowed it to import up to a maximum of 18,000 Mcf per day of Canadian natural gas. Under the extension requested, Kerr-McGee Chemical seeks authority to continue to import the same maximum daily quantities or a maximum of 14 Bcf over

the two-year extension under the terms and conditions approved in Order 155. The extension would cover Canadian natural gas imported on a short-term basis by Kerr-McGee Chemical for use in the operation of equipment and space heating at its inorganic chemical manufacturing plants located near Trona and Argus, California. Kerr-McGee Chemical purchases the gas at Kingsgate, British Columbia, in accordance with an underlying sales contract with KM Gas, which, like the applicant, is a wholly-owned subsidiary of Kerr-McGee Corporation, also a Delaware corporation. Kerr-McGee Chemical incurs no take-or-pay or minimum purchase obligations under the contract. The contract provides for periodic price adjustment based on provisions that give both Kerr-McGee Chemical and KM Gas the right to nonimate a new price and absent agreement on a new price, the right to terminate the supply contract.

According to its application, Kerr-McGee Chemical would continue to use Pacific Gas Transmission Company's (PGT) existing pipeline facilities to transport the gas from the international border at Kingsgate to norther California where it would then be delivered to Kerr-McGee Chemical's plants by Pacific Gas and Electric Company's (PG&E) existing transmission facilities.

In support of its application, Kerr-McGee Chemical asserts that the proposed extension of the short-term import authorization approved in Order 155 is not inconsistent with the public interest since the extension requested would ensure continued access to a reliable source of competitively priced natural gas that has helped Kerr-McGee Chemical to maintain consistent and efficient operations. The applicant also states that PGT's transportation of this imported supply would benefit other U.S. consumers by lowering per unit transportation costs.

The decision on this application will be made consistent with the DOE's gas import policy guidelines, under which the competitiveness of an import arrangement in the markets served is the primary consideration in determining whether it is in the public interest (49 FR 6684, February 22, 1984). Parties that may oppose this application should comment in their responses on the issue of competitiveness as set forth in the policy guidelines. The applicant asserts that this import arrangement is competitive. Parties opposing the arrangement bear the burden of overcoming this assertion.

The ERA will condition any authorization issued in this proceeding on the filing of quarterly reports to facilitate ERA monitoring of its natural gas import and export program. Further, the ERA may decide if it grants the application, to authorize the two-year extension requested by Kerr-McGee Chemical's effective October 31, 1988, rather than upon the date of first delivery.

Kerr-McGee Chemical requests that extension of the short-term import authority approved in Order No. 155 be granted on an expedited basis. An ERA decision on Kerr-McGee Chemical's request for expedited treatment will not be made until all responses to this notice have been received and evaluated.

NEPA Compliance

On August 9, 1988, the DOE published in the **Federal Register** (53 FR 29934) a notice of proposed amendments to its guidelines for compliance with the National Environmental Polcy Act of 1969 (NEPA), 42 U.S.C. 4321 *et seq.*, effective on an interim basis upon publication. In that notice, the DOE proposed to amend the agency's NEPA guidelines to add to its list of categorical exclusions the approval or disapproval of an import/export authorization for natural gas in cases not involving new construction. Application of the categorical exclusion in any particular case raises a rebuttable presumption that the ERA's action is not a major Federal action under NEPA. Unless the ERA receives comments indicating the presumption does not or should not apply in this case, no further NEPA review will be conducted by the DOE.

Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have the written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are parties will be considered in determining the appropriate action to be taken on the application. All protests, motions to intervene, notices of intervention, requests for additional procedures, and written comments should be filed with the Natural Gas Division, Office of Fuels Programs, Economic Regulatory Adminstration, Room 3F-056, RG-23, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-9478. They must be filed no later than 4:30 p.m. e.s.t., January 3, 1989.

The Administrator intends to develop a decisional record on the application through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or trial-type hearing. Any request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law, or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trail-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, the ERA will provide notice to all parties. If no party requests additional procedures, a final opinion and order may be issued based on the official record, including the application and responses filed by parties pursuant to this notice, in accordance with 10 CFR 590.316.

A copy of Kerr-McGee Chemical's application is available for inspection and copying in the Natural Gas Division Docket Room, 3F-056 at the above address. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, November 25, 1988.

Federal Energy Regulatory Commission

[Docket No. G-3912-002, et al.]

Tenneco Oil Co., et al.; Applications for Certificates, Abandonment of Service and Amendment of Certificates [1]

November 29, 1988.

Take notice that each of the Applicants listed herein has filed an application pursuant to section 7 of the Natural Gas Act for authorization to sell natural gas in interstate commerce, to abandon service or to amend certificates as described herein, all as more fully described in the respective applications which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before December 15, 1988, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in any proceeding herein must file a petition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

Lois D. Cashell,

Secretary.

[1] This notice does not provide for consolidation for hearing of the several matters covered herein.

[1] By respective assignments effective June 1, 1986, and December 1, 1987, Applicant assigned its interests in certain acreage to Frank Collins and Maple Properties Corporation.

[2] Effective July 1, 1987, Applicant acquired certain interests from Cox Family Trust No. 8. Applicant proposes to add this interest to its FERC Gas Rate Schedule No. 126 and related certificate.

[3] Applicant states that effective July 27, 1981, the Easterwood #1-28 was plugged and abandoned. By assignments effective December 1, 1987, and December 1, 1986, Applicant assigned its interests in certain acreage to Maple Properties Corporation, Foran Oil Company and PNG Operating Company. By assignment dated August 19, 1981, Applicant assigned its interests in certain acreage to Old Dominion Oil Corporation.

[4] Applicant states that effective December 22, 1987, the M. H. Wheelock #1 & 2 wells were plugged and abandoned. By assignment effective December 1, 1987, Applicant assigned its interest in certain acreage to Maple Properties Corporation.

[5] Applicant states that the lease expired by its own terms and the last well was plugged and abandoned.

[6] Applicant states that the only well drilled on the land subject to this rate schedule ceased producing in August 1978, there is no longer any production subject to this rate schedule and the leases involved have expired.

[7] Applicant states that the last remaining well on the lease, the Sealy Smith #1, was plugged and abandoned on October 26, 1984, and the lease was surrendered to the landowner on December 6, 1984.

[8] Applicant states that the last remaining well was plugged and abandoned in April 1969 and the acreage has been released.
[9] Applicant states that the only lease dedicated to the contract expired after the last producing well, the Fleming Gas Unit #1, was plugged on January 1, 1981
[10] Effective May 1, 1988, Applicant assigned certain acreage to H.K.E., Inc.
[11] Applicant states that the well was plugged and abandoned on November 30, 1976.
[12] By assignment dated April 4, 1988, and effective November 1, 1987, Applicant acquired certain interests from Tenneco Oil Company.
[13] By assignments effective December 1, 1986, Applicant assigned its interests in certain acreage to Foran Oil Company, Mesa Operating Limited Partnership, Oklahoma Exploration Company, Andrea Singer Pollack, Trustee of the Andrea Singer Pollack Revocable Trust, Martha Diss Sundby, Trustee of the Singer Trusts Josaline Control Account and Atlantic Richfield Company.
[14] Applicant states that the Sealey "D" well was plugged and abandoned. By respective assignments effective December 1, 1987, and December 1, 1986, Applicant assigned certain acreage to Maple Properties Corporation and Spess Oil Company.
[15] Applicant states that production ceased in 1971 and the wells were plugged and abandoned.
[16] Applicant states that all the wells have been plugged and abandoned and the leases have been surrendered.
[17] By assignment executed November 26, 1986, Applicant assigned its interest in certain acreage to Bell and Kinley Company, effective December 1, 1986.
[18] Effective June 1, 1987, Applicant acquired certain interests from Texaco Producing Inc.
[19] Effective November 1, 1986, Applicant acquired certain interests from Northern Pump Company, *et al.*
[20] Applicant states that the well was plugged and abandoned on November 1, 1984.

Filing Code: A—Initial Service; B—Abandonment; C—Amendment to add acreage; D—Amendment to delete acreage; E—Total Succession; F—Partial Succession.

[Docket No. RP87–7–043]

Transcontinental Gas Pipe Line Corp.; Report of Refunds

November 29, 1988.

Take notice that on November 14, 1988, Transcontinental Gas Pipeline Corporation (Transco) filed a report of refunds. Transco states that on October 21, October 27, and November 4, 1988, Transco refunded amounts to its sales, storage and transportation customers. Transco alleges that such refunds resulted from the Commission's approval, by order issued July 22, 1988, of its cost of service settlement in Docket No. RP87–7–030. Transco states that the refund period covered April 1, 1987 through September 30, 1987.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211 (1988)). All such motions or protests should be filed on or before December 6, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,
Secretary.

BILLING CODE 6717-01-M

[Docket No. CP89–258–000]

United Gas Pipe Line Co.; Request Under Blanket Authorization

November 25, 1988.

Take notice that on November 21, 1988, United Gas Pipeline Company (United), P.O. Box 1478, Houston, Texas 77251–1478, filed in Docket No. CP89–258–000, a request pursuant to § 157.205 of the Commission's Regulations under the National Gas Act (18 CFR 157.205) for authorization to transport natural gas on behalf of Fina Oil and Chemical Company (Fina), a producer of natural gas, under United's blanket certificate issued in Docket No. CP88–6–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

United proposes to transport, on a firm basis, up to 41,200 MMBtu per day for Fina from thirty three (33) points of receipt, thirty (30) in Goliad, Smith and Rusk Counties, Texas and three (3) in Terrebonne and Vermilion Parishes, Louisiana to one (1) delivery point in Pike County, Mississippi. United States that construction of facilities would not be required to provide the proposed service.

United further states that the estimated daily and annual quantities would be 41,200 MMBtu and 15,038,000 MMBtu respectively, and that service under § 284.223(a) commenced October 24, 1988, as reported in Docket No. ST89–297.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the National Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest if filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

Western Area Power Administration

Colorado Office of Energy Conservation Mutual Assistance Program Notice of Cooperative Agreement

AGENCY: Western Area Power Administration, DOE.

ACTION: The Western Area Power Administration (Western)/Colorado Office of Energy Conservation Mutual Assistance Program (Program) notice of proposed Cooperative Agreement.

SUMMARY: Western announces that, pursuant to 10 CFR 600.7(b), eligibility for a cooperative agreement to develop and implement cofunded conservation and renewable energy (C&RE) activities for the State of Colorado (State) has been restricted to the Colorado Office of Energy Conservation (OEC) as the State energy office in support of electrical utilities and other Western customers. OEC has the resources, technical capability, and statewide credibility to manage and promote this cooperative program. Moreover, OEC is dedicated to promoting energy efficiency and renewable energy development in Colorado and is the only energy office in the service territory with the requisite staff and expertise. The program calls for assistance to customers in the ongoing effort to improve the efficiency of their electrical power utilities as well as assist Western in meeting the C&RE firm power contract provisions.

FOR FURTHER INFORMATION CONTACT: Ms. Peggy Plate, Conservation Specialist, Loveland Area Office, Western Area Power Administration, P.O. Box 3700, Loveland, CO 80539, (303) 490–7227.

SUPPLEMENTARY INFORMATION: Western's C&RE Program is designed to ensure wise stewardship of the Federal hydropower resources and to encourage energy conservation and the development of renewable energy resources. This program is conducted as part of Western's operation and maintenance program. It is funded as provided in relevant appropriations acts, as a function of "Conservation and Renewable Resources." See Energy and Water Development Appropriations Act, FY 1989 (Act of July 19, 1988; Pub. L. 100–371). To meet these ends, Western offers a number of C&RE Program activities to its customers, including educational workshops and seminars, equipment loan programs, and cost sharing of C&RE projects. Joint program sponsorship with State energy offices is one of the methods that Western uses to effectively deliver its C&RE support activities to customers within its 15-State marketing area.

Solicitaion Number: DE–RP65–89WJ07753.

Scope of Project: The Western/OEC C&RE Mutual Assistance Program is designed to allow joint sponsorship of C&RE activities within the State of Colorado by Western and OEC. The Program will provide cost-shared funding for the development and implementation of C&RE activities in three general categories: (1) Technology development and transfer, (2) public information, and (3) economic analysis of C&RE projects. Activities funded under this Program may include, but are not limited to: educational workshops and seminars on energy efficiency and renewable energy; State, regional, and national C&RE conferences; energy efficiency tests and monitoring; C&RE publication development; energy efficiency demonstration and evaluation projects; economic analysis of C&RE projects; and community energy management activities.

Issued at Golden, Colorado, November 17, 1988.

William H. Clagett,

Administrator.

BILLING CODE 6450–01–M

ENVIRONMENTAL PROTECTION AGENCY

[ER–FRL–3485–9]

Environmental Impact Statements and Regulations, Availability of EPA Comments Prepared November 14 through 18, 1988

Availability of EPA comments prepared November 14, 1988 through November 18, 1988 pursuant to the Environmental Review Process (ERP), under section 309 of the Clean Air Act and Section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at (202) 382–5074.

An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated April 22, 1988 (53 FR 13318).

Final EISs

ERP No. F–AFS–K61092–CA,

Mt. Shasta Ski Area Development, Special Use Permit, Shasta-Trinity National Forests, Mt. Shasta Ranger District, Siskiyou County, CA.

Summary: EPA expressed environmental concerns on the feasibility and environmental consequences of building a tertiary wastewater treatment plant. EPA requested that no permits related to the proposed ski area be issued until the wastewater treatment question is adequately resolved with the California Regional Water Quality Control Board.

ERP No. F–BPA–L09801–00

New Energy-Efficient Homes Programs, Accessing Indoor Air Quality Options, Implementation and Construction, OR, WA, ID and MT.

Summary: The radon model was not redone as EPA requested in its comments on the draft EIS and there is insufficient information in the final EIS for EPA to agree or disagree with the mitigation measures selected for minimizing health effects. There are also effective radon resistant construction techniques DRR available that were not included in the mitigation measures.

ERP No. F–NAS–E12002–00,

Galileo Mission Project, Jovian System Investigation Program and Ulysses Mission Project, Heliosphere Exploration Program, Modifications and Implementation.

Summary: EPA has no objection to the proposed project.

Regulations

ERP No. R-NRC-A22116-00,

10 CFR Part 20; Disposal of Waste Oil by Incineration (53 FR 32914).

Summary: EPA requested clarification of two issues: The responsibility of NRC's licensees complying with the approval requirements of the Clean Air Act and the potential need for licensees obtaining state or federal hazardous waste permits.

Dated: November 29, 1988.

William D. Dickerson,

Deputy Director, Office of Federal Activities.

[FRL-3485-4]

Clean Water Act Class II; Proposed Administrative Penalty Assessment and Opportunity to Comment regarding ConAgra Turkey Co., Carthage, MO

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed administrative penalty assessment and opportunity to comment regarding ConAgra Turkey Company, Carthage, Missouri.

SUMMARY: EPA is providing notice of a proposed administrative penalty assessment for alleged violations of the Clean Water Act. EPA is also providing notice of opportunity to comment on the proposed assessment. Under 33 U.S.C. 1319(g), EPA is authorized to issue orders assessing civil penalties for various violations of the Act. EPA may issue such orders after filing a Complaint commencing either a Class I or Class II penalty proceeding. EPA provides public notice of the proposed assessment pursuant to 33 U.S.C. 1319(g)(4)(a).

Class II proceedings are conducted under EPA's Consolidated Rules of Practice Governing the Administrative Assessment of Civil Penalties and the Revocation and Suspension of Permits, 40 CFR Part 22. The procedures by which the public may submit written comments on a proposed Class II order or participate in a Class II proceeding, and the procedures by which a respondent may request a hearing, are set forth in the Consolidated Rules. The deadline for submitting public comment on a proposed Class II order is thirty days after issuance of this public notice.

On November 15, 1988, EPA commenced the following Class II proceeding for the assessment of penalties by filing with the Regional Hearing Clerk, U.S. Environmental Protection Agency, Region VII, 726 Minnesota Avenue, Kansas City, Kansas 66101, (913)236-2811, the following Complaint: In the Matter of the ConAgra Turkey Company, 411 N. Main, Carthage, Missouri; EPA Docket No. VII 89-W-0002.

The Complaint proposes a penalty of $125,000, for effluents discharged from ConAgra Turkey Company's processing plant to the City of Carthage Water and Electric Plant wastewater treatment facilities in excess of pretreatment effluent limitations contained in Industrial Discharge Permit No. 8701 issued to ConAgra Turkey Company by the City.

FOR FURTHER INFORMATION: Persons wishing to receive a copy of EPA's Consolidated Rules, review the Complaint or other documents filed in this proceeding, comment upon the proposed penalty assessment, or otherwise participate in the proceeding should contact the Regional Hearing Clerk identified above.

The administrative record for the proceeding is located in the EPA Regional Office at the address stated above, and the file will be open for public inspection during normal business hours. All information submitted by the ConAgra Turkey Company is available as part of the administrative record, subject to provisions of law restricting public disclosure of confidential information. In order to provide opportunity for public comment, EPA will issue no final order assessing a penalty in this proceeding the thirty days from the date of this Notice.

Date: November 9, 1988.

Morris Kay,

Regional Administrator.

FEDERAL EMERGENCY MANAGEMENT AGENCY

[FEMA-817-DR]

Declaration; Major Disaster And Related Determinations; Arkansas

AGENCY: Federal Emergency Management Agency.

ACTION: Notice.

SUMMARY: This is a notice of the Presidential declaration of a major disaster for the State of Arkansas (FEMA-817-DR), dated November 23, 1988, and related determinations.

DATE: November 23, 1988.

FOR FURTHER INFORMATION CONTACT: Neva K. Elliott, Disaster Assistance Programs, Federal Emergency Management Agency, Washington, DC 20472 (202) 646-3614.

NOTICE: Notice is hereby given that, in a letter dated November 23, 1988, the President declared a major disaster under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 *et seq.*, Pub. L. 93-288, as amended), as follows:

I have determined that the damage in certain areas of the State of Arkansas, resulting from tornadoes and severe storms beginning on November 15, 1988, is of sufficient severity and magnitude to warrant a major disaster declaration under Public Law 93-288, as amended by "The Disaster Relief and Emergency Assistance Amendments of 1988." I, therefore declare that such a major disaster exists in the State of Arkansas.

In order to provide Federal assistance, you are hereby authorized to allocate from funds available for these purposes, such amounts as you find necessary for Federal disaster assistance and administrative expenses.

You are authorized to provide Individual Assistance in the affected areas. You are also authorized to provide Public Assistance in the affected areas, if required and necessary, and an acceptable State commitment for these purposes is provided. Consistent with the requirement that Federal assistance be supplemented, any Federal funds provided under PL 93-288, as amended, for Public Assistance will be limited to 75 percent of total eligible costs in the designated area.

The time period prescribed for the implementation of section 313(a), priority to certain applications for public facility and public housing assistance,

BEST COPY AVAILABLE

shall be for a period not to exceed six months after the date of this declaration.

Notice is hereby given that pursuant to the authority vested in the Director of the Federal Emergency management Agency under Executive Order 12148, I hereby appoint Robert D. Broussard of the Federal Emergency Management Agency to act as the Federal Coordinating Officer for this declared disaster.

I do hereby determine the following areas of the State of Arkansas to have been affected adversely by this declared major disaster:

Hot Spring, Johnson, Lonoke, Pulaski, and Van Buren Counties for Individual Assistance.

(Catalog of Federal Domestic Assistance No. 83.516, Disaster Assistance)

Julius W. Becton, Jr.,

Director, Federal Emergency Management Agency.

BILLING CODE 6718-02-M

FEDERAL MARITIME COMMISSION

Agreement(s) Filed; Rare Properties Inc., et al

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 224-200182

Title: Maryland Port Administration Terminal Agreement.

Parties: Maryland Port Administration, Rare Properties, Inc. (Rare).

Synopsis: The agreement provides Rare with a five-year lease of land and a building at the Dundalk Marine Terminal to be used for new vehicle processing and storage.

Agreement No.: 224-200181

Title: Tampa Port Authority Lease Agreement.

Parties: Tampa Port Authority (Authority), Maersk Container Service Company, Inc. d/b/a, Bridge Terminal Transport (Lessee).

Synopsis: The agreement provides that Lessee will lease from the Authority certain lots and parcels of land in Hillsborough County, Florida, consisting of approximately 7 acres of bare land on a month-to-month basis. The term of the lease commences December 1, 1988 and may be cancelled by either party on 30 days advance written notice to the other party.

Agreement No.: 224-200117-001

Title: Port Authority of New York and New Jersey Terminal Agreement.

Parties: The Port Authority of New York and New Jersey.

Synopsis: The agreement provides for ACL's lease of Paceco Container Crane No. 282 at the Port Elizabeth Marine Terminal facility covered by the basic agreement. The agreement also allows for improvement and modifications to the subject crane.

By Order of the Federal Maritime Commission.

Joseph C. Polking,

Secretary.

Dated: November 29, 1988.

BILLING CODE 6730-01-M

Agreement(s) Filed; Tacoma Terminals, Inc. et al

The Federal Maritime Commission hereby gives notice that the following agreement(s) has been filed with the Commission pursuant to section 15 of the Shipping Act, 1916, and section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10325. Interested parties may submit protests or comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments and protests are found in § 560.7 and/or § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Any person filing a comment or protest with the Commission shall, at the same time, deliver a copy of that document to the person filing the agreement at the address shown below.

Agreement No.: 224-004129-001.

Title: Port of Tacoma Terminal Agreement.

Parties: Port of Tacoma, Tacoma Terminals Inc. (TTI).

Filing Party: Susan Flood, Traffic Manager, Port of Tacoma, P.O. Box 1837, Tacoma, WA 98401.

Synopsis: The agreement evidences TTI's exercise of a basic agreement option to lease additional area at the Port of Tacoma. The agreement also suspends the payment of user fees for certain preferential berthing areas pending construction of a pier extension.

By Order of the Federal Maritime Commission.

Joseph C. Polking

Secretary.

Dated: November 29, 1988.

[FR Doc. 88-27779 Filed 12-1-88; 8:45 am]

BILLING CODE 6730-01-M

Agreement(s) Filed; Wilhelmsen Limited, et al

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 207-011142-001

Title: NOSAC Agreement.

Parties: K/S NOSAC A/S & Co., Wilh. Wilhelmsen Limited A/S, K/S Benargus A/S & Co.

Synopsis: The proposed modification designates Den norske Amerikalinje A/S as general manager of the Norwegian Specialized Autocarriers (NOSAC). The parties have requested a shortened review period.

Agreement No.: 203-011170-001

Title: Ro-Ro Chartering Agreement.

Parties: Barber Blue Sea (Wilhelmsen Lines A/S), NOSAC.

Synopsis: The proposed amendment would reflect the termination of the joint service status of Barber Blue Sea due to the withdrawal of two of the three current parties to the joint service. Barber Blue Sea will remain a party to the Agreement as a service of Wilhelmsen Lines A/S. The parties have requested a shortened review period.

Agreement No.: 203–011170–002

Title: Ro-Ro Chartering Agreement.

Parties: Barber Blue Sea, NOSAC.

Synopsis: The proposed amendment would permit the parties to discuss and agree upon rates in the Agreement trade. Adherence to any agreement reached would be voluntary. It would also permit any party to give notice of withdrawal beginning on January 1, 1990, instead of January 1, 1991. It would include authority to agree on deadfreight liability and would designate Den norske Amerikalinje A/S as manager of NOSAC in place of Oivind Lorentzen A/S. The parties have requested a shortened review period.

By Order of the Federal Maritime Commission.

Joseph C. Polking,

Secretary.

Dated: November 29, 1988.

BILLING CODE 6730–01–M

FEDERAL RESERVE SYSTEM

Canaan National Bancorp, Inc., et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank of to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than December 19, 1988.

A. **Federal Reserve Bank of Boston** (Robert M. Brady, Vice President) 600 Atlantic Avenue, Boston, Massachusetts 02106:

1. *Canaan National Bancorp, Inc.*, Canaan, Connecticut; to become a bank holding company by acquiring 100 percent of the voting shares of The Canaan National Bank, Canaan, Connecticut.

B. **Federal Reserve Bank of Cleveland** (John J. Wixted, Jr., Vice President) 1455 East Sixth Street, Cleveland, Ohio 44101:

1. *Fifth Third Bancorp*, Cincinnati, Ohio; to merge with New Palestine Bancorp, New Palestine, Indiana, and thereby indirectly acquire New Palestine Bank, New Palestine, Indiana.

C. **Federal Reserve Bank of Richmond** (Lloyd W. Bostian, Jr., Vice President) 701 East Byrd Street, Richmond, Virginia 23261:

1. *First Banc Securities, Inc.*, Morgantown, West Virginia; to acquire 100 percent of the voting shares of First Bank, National Association, Uniontown, Pennsylvania, a *de novo* bank.

D. **Federal Reserve Bank of St. Louis** (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. *Citizens National Bancshares, Inc.*, Springfield, Missouri; to become a bank holding company by acquiring 100 percent of the voting shares of Citizens National Bank of Springfield, Springfield, Missouri, a *de novo* bank. Comments on this application must be received by December 23, 1988.

E. **Federal Reserve Bank of Kansas City** (Thomas M. Hoenig, Senior Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *Conway BanCorp, Inc.*, Conway Springs, Kansas; to become a bank holding company by acquiring 72 percent of the voting shares of The State Bank of Conway Springs, Conway Springs, Kansas.

Board of Governors of the Federal Reserve System, November 28, 1988.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210–01–M

Citizens Capital Corp., et al.; Applications To Engage de Novo in Permissible Nonbanking Activities

The companies listed in this notice have filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than December 21, 1988.

A. **Federal Reserve Bank of Atlanta** (Robert E. Heck, Vice President) 104 Marietta Street, NW., Atlanta, Georgia 30303:

1. *Citizens Capital Corporation*, Morton, Mississippi; to engage *de novo* in insurance activities, specifically acting as principal, agent, or broker, including credit insurance related to extensions of credit by Applicant and any of its subsidiaries and affiliates pursuant to § 225.25(b)(8)(i) of the Board's Regulation Y. These activities will be conducted throughout Scott and Ranking Counties in Mississippi.

B. **Federal Reserve Bank of St. Louis** (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. *Mercantile Bancorporation, Inc.*, St. Louis, Missouri; to engage *de novo* through its subsidiary, Mercantile Financial, Inc., St. Louis, Missouri, in making, acquiring, and servicing loans or other extensions of credit for Company's account or for the account of others pursuant to § 225.25(b)(1) of the Board's Regulation Y. These activities will be conducted in Missouri, Kansas, and Illinois.

C. **Federal Reserve Bank of Kansas City** (Thomas M. Hoenig, Senior Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *Affiliated Bankshares of Colorado, Inc.*, Denver, Colorado; to engage *de novo* through a subsidiary to be known as Affiliated Bankshares Insurance Agency in the sale of credit related life, accident and health insurance sold in connection with credit extensions by credit granting subsidiaries of the bank holding company pursant to § 225.25(b)(8)(i) of the Board's Regulation Y. In addition, Applicant has applied to engage in general insurance agency activities from the following communities, each with a population of less than 5,000 persons: Ault, Colorado; Center, Colorado; Fruita, Colorado; and within a 10 mile radius of each; Salida, Colorado, and within a 4 mile radius; and Manitou Springs, Colorado, within the city limits.

Board of Governors of the Federal Reserve System, November 28, 1988.

James McAfee,

Associate Secretary of the Board.

First Fidelity Bancorp., et al.; Acquisitions of Companies Engaged in Permissible Nonbanking Activities

The organizations listed in this notice have applied under § 225.23(a)(2) or (f) of the Board's Regulation Y (12 CFR 225.23(a)(2) or (f)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreases or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated for the application or the offices of the Board of Governors not later than December 16, 1988.

A. **Federal Reserve Bank of Philadelphia** (Thomas K. Desch, Vice President) 100 North 6th Street, Philadelphia, Pennsylvania 19105:

1. *First Fidelity Bancorporation*, Newark, New Jersey, and Philadelphia, Pennsylvania; to acquire First Fidelity Community Development Corporation, Newark, New Jersey, and thereby engage in certain community development activities pursuant to § 225.25(b)(6) of the Board's Regulation Y. Applicant proposes to expand its geographical service area to a nationwide basis.

B. **Federal Reserve Bank of Minneapolis** (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *First Bancorp, Inc.*, Huron, South Dakota; to acquire Custer County Insurance Agency, Custer, South Dakota, through its subsidiary, First Western Agency, Inc., and thereby engage in general insurance agency activities in various communities with populations not exceeding 5,000 pursuant to § 225.25(b)(8)(iii) of the Board's Regulation Y. These activities will be conducted in the communities of Custer, Hot Springs, Edgemont, and Buffalo Gap, South Dakota.

2. *Norwest Corporation*, Minneapolis, Minnesota; to acquire Adam D. Kohl Insurance, Inc., Hastings, Nebraska, through its subsidiary, Norwest Insurance, Inc., and thereby engage in general insurance agency activities pursuant to § 225.25(b)(8)(iii) of the Board's Regulation Y. These activities will be conducted in Hastings, Nebraska, and other nearby communities.

Board of Governors of the Federal Reserve System, November 28, 1988.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Change in Bank Control Notices; Acquisitions of Shares of Banks or Bank Holding Companies; Gulledge, Robert L, et al.

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. Once the notices have been accepted for processing, they will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than December 16, 1988.

A. **Federal Reserve Bank of Atlanta** (Robert E. Heck, Vice President) 104 Marietta Street, NW., Atlanta, Georgia 30303:

1. *Robert I. Gulledge* and Linda W. Gulledge, both of Robertsdale, Alabama; to retain 1.42 percent and acquire an additional 11.38 percent of the voting shares of Citizens' Capital Corporation, Robertsdale, Alabama, and thereby indirectly acquire Citizens' Bank, Inc., Robertsdale, Alabama.

2. *Robert Eason Leake*, and Wirt A. Yerger, Jr., both of Jackson, Mississippi; to acquire an additional 14.1 percent of the voting shares of Citizens Capital Corporation, Morton, Mississippi, and thereby indirectly acquire Citizens Bank & Trust Company, Morton, Mississippi, and State Bank & Trust Company, Collins, Mississippi.

3. *Robert Eason Leake*, and Wirt A. Yerger, Jr., both of Jackson, Mississippi; to acquire an additional 18.5 percent of the voting shares of Magnolia State Capital Corporation, Magee, Mississippi, and thereby indirectly acquire Bank of Simpson County, Magee, Mississippi.

B. Federal Reserve Bank of Kansas City (Thomas M. Hoenig, Senior Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *Charles C. Smith,* Omaha, Nebraska, to acquire 20 percent; Jack G. Lengemann, Omaha, Nebraska, to acquire 5.0 percent; Anne M. Anderson, as Custodian for Gordon Anderson, under the Uniform Gift to Minor Act, Thedford, Nebraska, to acquire 16.67 percent; Anne M. Anderson, Thedford, Nebraska, to acquire 16.67 perecent; Lawrence F. Chandler Trust, Lawrence F. Chandler, Jr., Trustee, Bellevue, Nebraska, to acquire 8.33 percent; and Reeva Chandler Trust, Lawrence F. Chandler and Lawrence F. Chandler, Jr., Trustees, Bellevue, Nebraska, to acquire 16.67 percent of the voting shares of North Fork Corporation, Paonia, Colorado, and thereby indirectly acquire First National Bank of Paonia, Paonia, Colorado.

Board of Governors of the Federal Reserve System, November 28, 1988.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Agency Forms Submitted to the Office of Management and Budget for Clearance

Each Friday the Department of Health and Human Services (HHS) publishes a list of information collection packages it has submitted to the Office of Management and Budget (OMB) for clearance in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). The following are those packages submitted to OMB since the last list was published on November 4, 1988.

Public Health Service

(Call Reports Clearance Officer on 202-245-2100 for copies of package)

1. A Case-Control Study of Cancer and Drinking Water Contaminants—0925-0283—Contaminates in drinking water as a cause of cancer are a major public health issue. This continuation of a population-based case-control study will evaluate the role that such factors may play in the etiology of bladder cancer. Respondents: Individuals or households; Number of Respondents: 1,943; Number of Responses per Respondent: 1.58; Average Burden Per Response: .31; Estimated Annual Burden: 934 hours.

OMB Desk Officer: Shannah Koss-McCallum.

Health Care Financing Administration

(Call Reports Clearance Officer on 301-594-1238 for copies of package)

1. Independent Rule Health Clinic Cost Reporting Form—0938-0107—The HCFA-222 is used by independent rural health clinics participating in the Medicare program to effect cost settlement for providing services to Medicare beneficiaries. Respondents: Businesses or other for-profit; Number of Respondents: 438; Frequency of Response: 1; Average Burden per response: 10; Estimated Annual Burden: 4,380 hours.

2. Health Insurance Common Claims Form "Medicare and Medicaid"—This form will become a standardized form for use in the Medicare/Medicaid programs to apply for reimbursement for covered services. In addition, it will reduce costs and administrative burdens associated with claims since only one coding system would be used and maintained. Respondents: State or local governments, Businesses or other for-profit, Small businesses or organizations; Estimated Annual Burden: Not Applicable—since this will become a Standard Form and GSA will be responsible for printing and distribution.

3. Physicians Practice Costs and Incomes Survey—0938-0284—This survey will collect data from 6,000 physicians in the United States in order to update the Medicare Economic Index, to refine the Geographic Practice Cost Index, to study out of pocket expenses of beneficiaries, and to study issues related to volume and intensity. Respondents: Individuals or households, Small businesses or organizations; Number of Respondents: 6,000: Frequency of Response: 1; Average Burden per response: ½ hour; Estimated Annual Burden: 3,000 hours.

4. Medicare Therapeutic Shoes for Diabetic Foot Disease Demonstration Prescription Form—NEW—This form is proposed for use by demonstration providers which will verify that the Medicare beneficiary meets the demonstration eligibility criteria. The form will be used by the demonstration contractor to check Medicare eligibility randomize applicants, and provide baseline information for the evaluation. Respondents: Small Businesses or organizations; Number of Respondents: 27,488; Frequency of Response: 1; Average Burden per response: 5 minutes; Estimated Annual Burden: 2,291 hours.

OMB Desk Officer: Allison Herron.

As mentioned above, copies of the information collection clearance packages can be obtained by calling the Reports Clearance Officer, one of the following numbers:

PHS: (202) 245-2100
HCFA: (301) 966-2088
SSA: (301) 965-4149
OS: (202) 472-4415

Written comments and recommendations for the proposed information collections should be sent directly to the appropriate OMB Desk Officer designated above at the following address: OMB Reports Management Branch, New Executive Office Building, Room 3208, Washington, DC 20503.

Dated: November 21, 1988.

James V. Oberthaler,

Deputy Assistant Secretary for Information Resources Management.

[FR Doc. 88-27300 Filed 12-1-88; 8:45 am]

BILLING CODE 4150-05-M

Food and Drug Administration

Carson Chemicals, Inc.; Withdrawal of Approval of New Animal Drug Application

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is withdrawing approval of a new animal drug application (NADA) held by Carson Chemicals, Inc. The NADA provides for the use of piperazine adipate in capsules as a canine and feline wormer. The firm requested the withdrawal of approval. Elsewhere in this issue of the **Federal Register**, FDA is removing that portion of the regulations reflecting approval of the NADA.

EFFECTIVE DATE: December 12, 1988.

FOR FURTHER INFORMATION CONTACT: Mohammad I. Sharar, Center for Veterinary Medicine (HFV-216), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3183.

SUPPLEMENTARY INFORMATION: Carson Chemicals, Inc., P.O. Box 466, New Castle, IN 47362-0466, is the sponsor of NADA 118-508 which provides for the 1-day use of piperazine adipate in capsules as a canine and feline wormer. The NADA was originally approved July 1, 1980 (45 FR 44264).

By letter of February 18, 1988, the sponsor requested voluntary withdrawal

of approval on the ground that the new animal drug is no longer being marketed.

Therefore under the Federal Food, Drug, and Cosmetic Act (sec. 512(e), 82 Stat. 345–347 (21 U.S.C. 360b(e))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Center for Veterinary Medicine (21 CFR 5.84), and in accordance with § 514.115 *Withdrawal of approval of applications* (21 CFR 514.115), notice is given that approval of NADA 118–508 and all supplements thereto are hereby withdrawn effective December 12, 1988.

In a final rule published elsewhere in this issue of the **Federal Register**, FDA is removing that portion of the regulations reflecting approval of the NADA.

Dated: November 28, 1988.

Gerald B. Guest,

Director, Center for Veterinary Medicine.

[FR Doc. 88–27757 Filed 12–1–88; 8:45 am]

BILLING CODE 4160–01–M

[Docket No. 85D–0480]

Revised Draft Guideline For The Design of Clinical Trials For Evaluation of the Safety and Efficacy of Allergenic Products For Therapeutic Uses; Availability of Revised Draft Guideline

AGENCY: Food and Drug Administration.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of a revised draft guideline to assist manufacturers in designing clinical studies to assess the safety and efficacy of allergenic products for therapeutic use. FDA is making the revised draft guideline available for public comment to assist the agency in developing a final guideline. The guideline, when issued in final form, may be relied on by allergenic manufacturers and sponsors in designing clinical studies. The draft guideline was prepared by FDA's Center for Biologics Evaluation and Research.

DATE: Written comments by April 3, 1989.

ADDRESSES: Written comments regarding the draft guideline to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857. Requests for a copy of the revised draft guideline to the Biologics Information Staff (HFB–205), Building 29, Room B–16, 8800 Rockville Pike, Bethesda, MD 20892, 301–496–9508.

FOR FURTHER INFORMATION CONTACT: Joann M. Minor, Center for Biologics Evaluation and Research (HFB–130), Food and Drug Administration, 8800 Rockville Pike, Bethesda, MD 20892, 301–295–8188.

SUPPLEMENTARY INFORMATION: FDA is announcing the availability of a revised draft guideline to assist allergenic biological product manufacturers and investigational sponsors in designing clinical studies to assess the safety and efficacy of allergenic products for therapeutic use. The revised draft guideline does not address the design of clinical studies for allergenic products for diagnostic uses.

In the **Federal Register** of October 22, 1985 (50 FR 42777), FDA announced the availability of the draft guideline and invited public comment. FDA has revised the draft guideline after review of comments and discussion at a public meeting of the Allergenic Products Advisory Committee of June 26, 1986. The revised guideline replaces the guideline announced on October 22, 1985, and dated September 1985.

FDA is making this draft guideline available for public comment before making it the formal position of the agency. If, following the receipt of comments, the agency concludes that the draft guideline, as revised, reflects acceptable criteria for use in designing clinical studies to assess the safety and efficacy of allergenic products for therapeutic uses, the guideline will be made final, and FDA will announce its availability under 21 CFR 10.90(b).

Section 10.90(b) provides for use of guidelines to establish procedures of general applicability that are not legal requirements but are acceptable to the agency. A person who follows a guideline can be assured that his or her conduct will be acceptable to the agency. A person may also choose to use alternative procedures even though they are not provided for in the guideline. A person who chooses to do so may discuss the matter further with the agency to prevent an expenditure of money and effort for work that the agency may later determine to be unacceptable. Therefore, interested persons are encouraged to use this opportunity to submit comments on the revised draft guideline if they have suggestions for its revision.

Interested persons may, on or before April 3, 1989 submit written comments on the draft guideline to the Dockets Management Branch (address above). These comments will be considered in determining whether amendments to, or revision of, the draft guideline are warranted. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. The draft guideline and received comments may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday. Requests for a single copy of the draft guideline should be sent to the Biologics Information Staff (address above).

Dated: November 21, 1988.

John M. Taylor,

Associate Commissioner for Regulatory Affairs.

[FR Doc. 88–27807 Filed 12–1–88; 8:45 am]

BILLING CODE 4160–01–M

[Docket Nos. 88E–0342 and 88E–0346]

Determination of Regulatory Review Period for Purposes of Patent Extension; Acesulfame Potassium

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) has determined the regulatory review period for acesulfame potassium and is publishing this notice of that determination as required by law. FDA has made the determination because of the submission of an application to the Commissioner of Patents and Trademarks, Department of Commerce, for the extension of two patents which claim acesulfame potassium.

ADDRESS: Written comments and petitions should be directed to the Dockets Management Branch (HFA–305), Food and Drug Administration, Room 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: I. David Wolfson, Office of Health Affairs (HFY–20), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–1382.

SUPPLEMENTARY INFORMATION: The Drug Price Competition and Patent Term Restoration Act of 1984 (Pub. L. 98–417) generally provides that a patent may be extended for a period of up to 5 years so long as the patented item (human drug product, medical device, food additive, or color additive) was subject to regulatory review by FDA before the item was marketed. Under that act, a product's regulatory review period forms the basis for determining the amount of extension an applicant may receive.

A regulatory review period consists of two periods of time: a testing phase and an approval phase. For food and color additives: (1) The testing phase begins on the date a major health or environmental effects test is begun and ends on the date a petition relying on the test and requesting the issuance of a regulation for use of the additive under sections 409 (21 U.S.C. 348) or 706 (21 U.S.C. 376) of the Federal Food, Drug, and Cosmetic Act (the act) is initially submitted to FDA. An "environmental effects" test may be any test which: (a) Is reasonably related to the evaluation of the product's health effects, environmental effects, or both; (b) produces data necessary for marketing approval; and (c) is conducted over a period of not less than a 6-month duration, excluding time required to analyze or evaluate test results. (2) The approval phase begins on the date a petition requesting the issuance of a regulation for use of the additive under sections 409 or 706 of the act is initially submitted to FDA and ends upon whichever of the following occurs last: (a) The regulation for the additive becomes final; or (b) objections filed against the regulation that result in a stay of effectiveness are resolved and commercial marketing is permitted; or (c) proceedings resulting from objections to the regulation, after commercial marketing has been permitted and later stayed pending resolution of the proceedings, are finally resolved and commercial marketing is permitted. Although only a portion of a regulatory review period may count toward the actual amount of extension that the Commissioner of Patents and Trademarks may award (for example, half the testing phase must be subtracted as well as any time that may have occurred before the patent was issued), FDA's determination of the length of a regulatory review period for a color or food additive will include all of the testing phase and approval phase as specified in 35 U.S.C. 156(g)(2)(B).

FDA recently issued a regulation listing acesulfame potassium (the potassium salt of 6-methyl-1,2,3-oxathiazin-4(3H)-one-2,2-dioxide) as a food additive. Acesulfame potassium is used as a nonnutritive sweetener.

Subsequent to this listing, the Patent and Trademark Office received patent term restoration applications for acesulfame potassium (U.S. Patent Nos. 3,926,981 and 4,158,068) from Hoechst, and requested FDA's assistance in determining the product's eligibility for patent term extension. In a letter dated October 18, 1988, FDA advised the Patent and Trademark Office that the product had undergone a regulatory review period and that the food additive's active ingredient, the potassium salt of 6-methyl-1,2,3-oxathiazin-4(3H)-one-2,2-dioxide, represented the first commercial marketing or use. The **Federal Register** notice now represents FDA's determination of the product's regulatory review period.

FDA has determined the applicable regulatory review period for acesulfame potassium is 5,311 days. Of this time, 3,139 days occurred during the testing phase of the regulatory review period, while 2,172 days occurred during the approval phase. These periods were derived from the following dates:

1. *The date a major health or environmental effects test was begun: January 14, 1974.* FDA has verified the applicant's claim that a major health or environmental effects test was begun on January 14, 1974.

2. *The date a petition requesting the issuance of a regulation for use of the food additive under section 409 of the act was initially submitted: August 18, 1982.* FDA has verified the applicant's claim that a petition requesting the issuance of a regulation for the use of the food additive under section 409 of the act was submitted on August 18, 1982.

3. *The date the regulation for the food additive became effective: July 28, 1988.*

This determination of the regulatory review period establishes the maximum potential length of a patent extension. However, the U.S. Patent and Trademark Office applies several statutory limitations in its calculations of the actual period for patent extension. In its application for patent extension, this applicant seeks 730 days of patent term extension.

Anyone with knowledge that any of the dates as published is incorrect may, on or before January 31, 1989, submit to the Dockets Management Branch (address above) written comments and ask for a redetermination. Furthermore, any interested person may petition FDA, on or before May 30, 1989, for a determination regarding whether the applicant for extension acted with due diligence during the regulatory review period. To meet its burden, the petition must contain sufficient facts to merit an FDA investigation. (See H. Rept. 857, Part 1, 98th Cong., 2d Sess., pp. 41–42, 1984.) Petitions should be in the format specified in 21 CFR 60.30.

Comments and petitions should be submitted to the Dockets Management Branch (address above) in three copies (except that individuals may submit single copies) identified with the docket numbers found in brackets in the heading of this document. Comments and petitions may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 28, 1988.

Stuart L. Nightingale,

Associate Commissioner for Health Affairs.

[FR Doc. 88-27806 Filed 12-1-88; 8:45 am]

BILLING CODE 4160-01-M

[Docket No. 78P-0173 et al.]

Approved Variances for Laser Light Shows; Availability

AGENCY: Food and Drug Administration.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA) is announcing that variances from the performance standard for laser products have been approved by FDA's Center for Devices and Radiological Health (CDRH) for 13 organizations that manufacture and produce laser light shows, light show projectors, or both. The projectors provide a laser light display to produce a variety of special lighting effects. The principal use of these products is to provide entertainment to general audiences.

DATES: The effective dates and termination dates of the variances are listed in the table below under "**SUPPLEMENTARY INFORMATION.**"

ADDRESS: The applications and all correspondence on the applications have been placed on display in the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Sally Friedman, Center for Devices and Radiological Health (HFZ-84), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-4874.

SUPPLEMENTARY INFORMATION: Under 21 CFR 1010.4 of the regulations governing establishment of performance standards under section 358 of the Radiation Control for Health and Safety Act of 1968 (42 U.S.C. 263f), FDA has granted each of the 13 organizations listed in the table below a variance from the requirements of 21 CFR 1040.11(c) of the performance standards for laser products.

Each variance permits the listed manufacturer to introduce into commerce a demonstration laser product assembled and produced by the manufacturer which is its particular variety of laser light show, laser light

show projector, or both. Each laser product involves levels of accessible laser radiation in excess of class II levels but not exceeding those required to perform the intended function of the product.

CDRH has determined that suitable means of radiation safety and protection are provided by constraints on the physical and optical designs and by warnings in the user manuals and on the products. Therefore, on the effective dates specified in the table below, FDA approved the requested variances by a letter to each manufacturer from the Acting Deputy Director of CDRH.

So that each product may show evidence of the variance approved for the manufacturer of the product, each product shall bear on the certification label required by 21 CFR 1010.2(a) a variance number, which is the FDA docket number, and the effective date of the variance as specified in the table below.

Docket No.	Organization granted the variance	Demonstration laser product	Effective date/termination date
78P-0173 (renewal)	Laser Images, Inc., 6911 Hayvenhurst Ave., Van Nuys, CA 91406.	Laserium (krypton) and Concert System (CS) Series of Class III and IV laser projectors manufactured by Laser Images, Inc., and for laser light shows assembled and produced by Laser Images, Inc. incorporating these projectors or the Foursight Visual Systems, Inc. Model 4 projectors. The Laserium (krypton) projectors are Class IIIb products incorporating a Class IV krypton laser system. The Concert System series projectors may contain Class IV argon, krypton, or mixed-gas ion.	Oct. 7, 1988/Aug. 22, 1990.
79P-0462 (amendment)	Laser Systems Development Corp., P.O. Box 639, 6960 Lake St., Green Mountain Falls, CO 80819.	Laser Systems Development Corp. Class IIIb or Class IV laser projection systems, Model R-2 and the C-3 and C-4 Model Series, and laser light shows assembled and produced by Laser Systems Development Corp. incorporating these projection systems. These projectors may contain HeNe, Ar, Kr, or Ar/Kr lasers.	Oct. 12, 1988/Aug. 20, 1990.
81P-0194 (reinstatement).	That's Entertainment, Inc., d/b/a CITI, 15 Lansdowne St., Boston, MA 02215.	CITI laser light show produced by That's Entertainment, Inc., d/b/a CITI by means of the incorporated Class IV Science Faction SFC-2000-SFX-LR projector and Lexel 95-4 argon laser.	Sept. 16, 1988/July 8, 1990.
81P-0278 (extension)	Raytel, 137 Second St., Troy, NY 12180.	Raytel laser light shows incorporating projectors manufactured by Raytel which may use HeNe, Ar/Kr, HeCd, Nd:YAG, copper vapor, or mercury vapor lasers with a maximum peak power of 20 watts.	Sept. 15, 1988/July 12, 1990.
81P-0389 (renewal)	Laser Affiliates/Cherry Optical Co., c/o Nancy Gorglione, 2047 Blucher Valley Rd., Sebastopol, CA 95472.	Nancy Gorglione dba Laser Affiliates/Cherry Optical Co. laser light shows incorporating Class II, III, or IV helium neon, argon, helium cadmium, and/or krypton laser projectors.	Sept. 20, 1988/Dec. 8, 1990.
84V-0160 (renewal)	Advanced Dimensional Displays, Inc., Apt. 102, 16742 Stagg Street, Van Nuys, CA 91406.	Advanced Dimensional Displays, Inc., laser light shows and the large format holographic displays and display devices incorporated into these laser light shows.	Sept. 16, 1988/June 8, 1990.
86V-0194 (renewal)	Lasertainment, 428 B West County Road D, New Brighton, MN 55112.	Lasertainment laser light show using the Laser Fantasy Class IIIb or IV Rainbow Model Series Ar/HeNe laser projections systems.	Oct. 14, 1988/Oct. 16, 1990.
86V-0271 (renewal)	Laser Design, P.O. Box 40006, Long Beach, CA 90804.	Laser Design laser light show incorporating the Laser Media LMS Series laser projector with Class IV argon, krypton, or helium-neon laser systems.	Sept. 14, 1988/July 3, 1990.
86V-0283 (renewal)	Entertainment Technology Industries, 8932 Coral Circle, Huntington Beach, CA 92646.	ETI Arena Master (aka Beam Master or Chorus Master) Series Class IV laser projectors with argon and helium-neon laser systems and the laser light shows assembled and produced by ETI incorporating these projectors or the Laserdream Productions Model 0002 projector.	Sept. 6, 1988/Sept. 19, 1990.
86V-0379 (renewal)	Laservisions Productions, Inc., 25 Midland Ave., Budd Lake, NJ 07828.	Laservisions Productions, Inc., laser light show incorporating the Coherent Innovations' Rainbow Class IV helium-neon/argon laser projection system.	Sept. 16, 1988/Nov. 24, 1990.
87V-0048 (renewal)	Roctronics Lighting, 100-FDA Roctronics Park, Pembroke, MA 02359.	Roctronics Lasergraph laser projectors and the laser light shows incorporating these projectors assembled and produced by Roctronics Lighting. The projection systems will incorporate up to Class IV argon, krypton, argon/krypton, or helium-neon ion lasers.	Sept. 15, 1988/Feb. 20, 1991.
88V-0259 (amendment)	Twilight Theatrical Lighting, 538 Clifton Ave., Clifton, NJ 07011.	Twilight Theatrical Lighting laser light show incorporating the Laser Media LMS or Holo-Spectra HST-1 projectors.	Oct. 12, 1988/Aug. 5, 1990.
88V-0313	Lazer Light and Sound, 210 Lantana Street, Panama City Beach, FL 32407.	Lazer Light and Sound laser light shows incorporating Class IV Roctronics Lasergraph laser projectors.	Sept. 30, 1988/Sept. 30, 1990.

In accordance with § 1010.4, the applications and all correspondence on the applications have been placed on public display under the designated docket number in the Dockets Management Branch (address above) and may be seen in that office between 9 a.m. and 4 p.m., Monday through Friday.

This notice is issued under the Public Health Service Act as amended by the Radiation Control for Health and Safety Act of 1968 (sec. 358, 82 Stat. 1177-1179 (42 U.S.C. 263f)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Director, Center for Devices and Radiological Health (21 CFR 5.86).

Dated: November 23, 1988.

Walter E. Gundaker,

Acting Deputy Director, Center for Devices and Radiological Health.

BILLING CODE 4160-01-M

[Docket No. 88M-0352]

Abbott Laboratories; Premarket Approval of Abbott ER-ICA Monoclonal

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing its approval of the application by Abbott Laboratories, Abbott Park, IL, for premarket approval, under the Medical Device Amendments of 1976, of the Abbott ER-ICA Monoclonal. After reviewing the recommendation of the Clinical Chemistry and Clinical Toxicology Devices Panel, FDA's Center for Devices and Radiological Health (CDRH) notified the applicant, by letter of September 30, 1988, of the approval of the application.

DATE: Petitions for administrative review by January 3, 1989.

ADDRESS: Written requests for copies of the summary of safety and effectiveness data and petitions for administrative review to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Kaiser Aziz, Center for Devices and Radiological Health (HFZ-440), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7550.

SUPPLEMENTARY INFORMATION: On April 4, 1988, Abbott Laboratories, Abbott Park, IL 60064, submitted to CDRH an application for premarket approval of the Abbott ER-ICA Monoclonal. The device is an immunocytochemical assay for the detection of the human estrogen receptor as an aid in the management of breast cancer. Its intended use is as an aid in predicting patient response to hormonal therapy, and in the prognosis and management of breast cancer patients. This assay should be interpreted by a specialist in breast cancer morphology and/or pathology. Assay results should be used in conjunction with other clinical and laboratory data to assist the clinician in making individualized patient management decisions.

On August 16, 1988, the Clinical Chemistry and Clinical Toxicology Devices Panel, an FDA advisory committee, reviewed and recommended approval of the application. On September 30, 1988, CDRH approved the application by a letter to the applicant from the Acting Director of the Office of Device Evaluation, CDRH.

A summary of the safety and effectiveness data on which CDRH based its approval is on file in the Dockets Management Branch (address above) and is available from that office upon written request. Requests should be identified with the name of the device and the docket number found in brackets in the heading of this document.

A copy of all approved labeling is available for public inspection at CDRH—contact Kaiser Aziz (HFZ-440), address above.

Opportunity For Administrative Review

Section 515(d)(3) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 306e(d)(3)) authorizes any interested person to petition, under section 515(g) of the act (21 U.S.C. 360e(g)), for administrative review of CDRH's decision to approve this application. A petitioner may request either a formal hearing under Part 12 (21 CFR Part 12) of FDA's administrative practices and procedures regulations or a review of the application and CDRH's action by an independent advisory committee of experts. A petition is to be in the form of a petition for reconsideration under § 10.33(b) (21 CFR 10.33(b)). A petitioner shall identify the form of review requested (hearing or independent advisory committee) and shall submit with the petition supporting data and informationi showing that there is a genuine and substantial issue of material fact for resolution through administrative review. After reviewing the petition, FDA will decide whether to grant or deny the petition and will publish a notice of its decision in the **Federal Register**. If FDA grants the petition, the notice will state the issue to be reviewed, the form of review to be used, the persons who may participate in the review, the time and place where the review will occur, and other details.

Petitioners may, at any time on or before January 3, 1989, file with the Dockets Management Branch (address above) two copies of each petition and supporting data and information, identified with the name of the device and the docket number found in brackets in the heading of this document. Received petitions may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 515(d), 520(h), 90 Stat. 554-555, 571 (21 U.S.C. 360e(d), 360j(h))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Director, Center for Devices and Radiological Health (21 CFR 5.53).

Dated: November 16, 1988.

Walter E. Gundaker,

Acting Deputy Director, Center for Devices and Radiological Health.

BILLING CODE 4160-01-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Secretary

[Docket No. D-88-889; FR-2570]

Consolidated Delegations of Authority for Policy Development and Research

AGENCY: Office of the Secretary, HUD.

ACTION: Notice of consolidated delegations of authority.

SUMMARY: This notice consolidates all delegations of authority to the Assistant Secretary for Policy Development and Research and General Deputy Assistant Secretary for Policy Development and Research. No substantive change in current delegations is intended, but obsolete material has been eliminated and changes have been made to standardize language and format.

EFFECTIVE DATE: November 28, 1988.

FOR FURTHER INFORMATION CONTACT: David D. White, Senior Attorney, Office of the Assistant General Counsel for Administrative Law, Department of Housing and Urban Development, Room 10244, Washington, DC 20410, phone (202) 755-7205. This is not a toll free number.

The Assistant Secretary for Policy Development and Research and the General Deputy Assistant Secretary for Policy Development and Research each are delegated in the power and authority of the Secretary of Housing and Urban Development with respect to all Policy Development and Research programs and functions, including but not limited to those set forth below, with authority to delegate to employees of the Department, unless otherwise specified. Each of them may issue rules or regulations in order to carry out Policy Development and Research programs but they may not redelegate the authority to issue rules and regulations.

1. Research, management and evaluation of programs of research, studies, testing, and demonstration relating to the mission and programs of the Department as deemed necessary and appropriate by the Secretary. Title V of the Housing and Urban Development Act of 1970 (12 U.S.C. 1701z-1).

2. Technological aspects of experimental housing, including determination of the technological acceptability of proposals, evaluation and dissemination of results.

Section 233 of the National Housing Act (12 U.S.C. 1715x).

3. Technical studies concerning problems in the development of standards for property financed with mortgages or loans insured under the National Housing Act (12 U.S.C. 1702 *et seq.*), and research to enable the Assistant Secretary for Housing to determine the acceptability of materials or products as suitable for use in structures approved for mortgages or loans insured under section 521 of that Act. (12 U.S.C. 1735e).

4. Lead-based paint poisoning and prevention. Lead-Based Paint Poisoning and Prevention Demonstration and Research Program (42 U.S.C. 4821).

5. Conduct of housing and urban development studies. Section 3(b) of the Housing and Urban Development Act (42 U.S.C. 3532(b)).

6. Urban mass transportation. Sections 6 (a) and (u) of the Urban Mass Transportation Act of 1964 (49 U.S.C. 1605(a) and 1607(c)).

7. Issuance of rules and regulations. Section 7(d) of the Housing and Urban Development Act (42 U.S.C. 3535(d)).

8. Preparation of the President's annual message to Congress on National Housing Production. Title XVI of the Housing and Urban Development Act of 1968 (42 U.S.C. 1441).

9. Collection and reporting of data on manufactured homes for the nation, each Census region, each State on an annual basis, and selected Standard Metropolitan Statistical Areas having sufficient activity on an annual basis. Section 308(e) of the Housing and Community Development Act of 1980 (12 U.S.C. 1703).

10. Promulgation of implementation of energy conservation performance standards for new buildings. Title III of the Energy Conservation and Production Act of 1976 (42 U.S.C. 6831 through 6840).

11. Preparation of the President's National Urban Policy Report. Section 703(a) of the Housing and Urban Development Act of 1970, as amended.

12. Supplemental assistance for facilities to assist the homeless, including the authority to issue or waive rules, regulations or guidelines under the Program but not the authority to redelegate the power to issue or waive rules, regulations or guidelines. Title IV, Subtitle D of the Stewart B. McKinney Homeless Assistance Act (Pub. L. 100–77, approved July 22, 1987).

13. Study of mortgage credit in rural areas. Section 312 of the Housing and Community Development Act of 1987 (Pub. L. 100–242, Approved February 5, 1988).

14. Home Equity Conversion Mortgage Insurance Demonstration. Section 417 of the Housing and Community Development Act of 1987 (Pub. L. 100–242, Approved February 5, 1988).

15. Study of interest rates and discount points. Section 419(c) of the Housing and Community Development Act of 1987 (Pub. L. 100–242, Approved February 5, 1988).

16. Development of a Comprehensive Grant Formula and Completion of Modernization Needs Study. Section 119 of the Housing and Community Development Act of 1987 (Pub. L. 100–242, Approved February 5, 1988).

17. Lead-based paint demonstration. Section 566 of the Housing and Community Development Act of 1987 (Pub. L. 100–242, Approved February 5, 1988).

18. Preparation of a report on a study of alternative delivery systems in the States for the elderly at risk of institutionalization. Section 163(c) of the Housing and Community Development Act of 1987 (Pub. L. 100–242, Approved February 5, 1988).

19. Annual report on the characteristics of families in assisted housing. Section 166 of the Housing and Community Development Act of 1987 (Pub. L. 100–242, Approved February 5, 1988).

20. Study of voluntary standards for modular housing, to be conducted by NIBS and funded up to $50,000 from the research and technology appropriation. Section 572 of the Housing and Community Development Act of 1987 (Pub. L. 100–242, Approved February 5, 1988).

Authority Excepted

Authority excepted from this delegation of authority from the Secretary of Housing and Urban Development to the Assistant Secretary for Policy Development and Research and the General Deputy Assistant Secretary for Policy Development and Research:

1. To sue or be sued.

Delegations Revoked

1. 36 FR 8012 (March 27, 1973) [Docket No. D–73–223]
2. 36 FR 5007–5008 (March 16, 1971) [FR Doc. 71–3645]
3. 48 FR 36341 (August 10, 1983) [Docket No. D–83–702]
4. 52 FR 38898 (October 19, 1987) [Docket No. D–87–866; FR 2389], as amended by 52 FR 44492 (November 19, 1987) [Docket No. D–87–1746; FR 2389]

Any redelegations issued, or action taken, under any delegation revoked herein shall remain in effect until expressly modified or revoked.

Authority: Sec. 7(d), Department of HUD Act 42 U.S. 3535(d)).

Dated: November 28, 1988.

Samuel R. Pierce, Jr.,

Secretary U.S. Department of Housing and Urban Development.

[FR Doc. 88–27833 Filed 12–1–88; 8:45 am]

BILLING CODE 4210–32–M

Office of the Assistant Secretary for Housing—Federal Housing Commissioner

[Docket No. N–88–1884; FR–2579]

Section 8 Certificate and Housing Voucher Programs; Administrative Fees

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Notice.

SUMMARY: This notice sets out the administrative fees for the Certificate and Housing Voucher Programs, in accordance with HUD's fiscal year 1989 appropriations Act.

EFFECTIVE DATE: December 2, 1988.

FOR FURTHER INFORMATION CONTACT: With respect to the Housing Voucher Program, Gerald Benoit, Director, Housing Voucher Division, Room 6122, telephone (202) 755–6477 and with respect to the Certificate Program, Madeline Hastings, Director, Existing Housing Division, Room 6126, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410, telephone (202) 755–6887. (These are not toll-free telephone numbers.)

SUPPLEMENTARY INFORMATION:

Certificate Program and Housing Voucher Program Administrative Fees

The administrative fees for the Certificate Program and the Housing Voucher Program are:

Description	Ongoing fee (percent)	Maximum preliminary fee	Hard-to-house fee
FY1989 Incremental Housing Vouchers and Certificates	8.2	$275	$45
Pre-FY1989 Housing Vouchers	6.5	215	45
Pre-FY1989 Certificates	7.65	250	45

The administrative fees for the Certificate Program and the Housing Voucher Program are subject to the requirements of section 8(q) of the United States Housing Act of 1937, as added by section 144 of the Housing and Community Development Act of 1987. Sections 8(q) (1) and (2) set the ongoing administrative fee at 8.2% of the two-bedroom Fair Market Rent and the maximum preliminary fee at $275 for both the Certificate Program and the Housing Voucher Program. Section 8(q)(2)(B)(3), however, provides that these fees may be established or increased "only to such extent or in such amounts as are provided in appropriations Acts." The fourth proviso in title I of the HUD-Independent Agencies Fiscal Year 1989 Appropriations Act, Pub. L. 100–404, approved August 19, 1988, states:

> That those portions of the fees for the costs incurred in administering incremental units assisted in the certificate and housing voucher programs under sections 8(b) and

8(o), respectively, shall be established or increased in accordance with the authorization for such fees in section 8(q) of the Act * * *

The administrative fees listed in the above table for "Pre-FY 1989 Housing Vouchers" and for "Pre-FY 1989 Certificates" are the administrative fees that were in effect in fiscal year 1988. They remain in effect for pre-FY 1989 housing vouchers and for pre-FY 1989 certificates, respectively, because the above-quoted appropriations Act proviso applies only to "incremental units," namely, the additional certificates and housing vouchers that can be funded from the amounts appropriated in HUD's FY 1989 appropriations Act.

The Department will provide, in the near future, administrative guidance to PHAs on the procedures for calculating the fee for pre-FY 1989 and FY 1989 units.

Findings

An environmental finding under the National Environmental Policy Act (42 U.S.C. 4321 through 4347) is unnecessary since the Certificate Progam and the Housing Voucher Program are part of the Section 8 Existing Housing Program, which is categorically excluded under HUD regulations at 24 CFR 50.20(d).

HUD has determined, in accordance with E.O. 12612, *Federalism*, that this notice does not have a substantial, direct effect on the States or on the relationship between the Federal government and the States, or on the distribution of power or responsibilities among the various levels of government because this notice merely specifies the amount of the administrative fees for the Certificate and Housing Voucher Programs, as they have been established in HUD's FY 1989 appropriations Act.

For the same reason, HUD has determined that this notice is not likely to have a significant impact on family formation, maintenance, and general well-being within the meaning of E.O. 12606, *The Family*.

Authority: Secs. 8(b) and 8(o) of the United States Housing Act of 1937 (42 U.S.C. 143f (b) and (o)); sec. 1(f) of Pub. L. 100-120, December 22, 1987; title I of Pub. L. 100-404, April 19, 1988.

Date: November 28, 1988.

James E. Schoenberger,

General Deputy Assistant Secretary for Housing—Federal Housing Commissioner.

[FR Doc. 88-27834 Filed 12-1-88; 8:45 am]

BILLING CODE 4210-27-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Revised Draft Policy for Cabin Management on National Wildlife Refuges in Alaska

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice.

SUMMARY: This notice advises the public that the U.S. Fish and Wildlife Service revised draft policy concerning cabin management on National Wildlife Refuges in Alaska is now available for review. Comments and suggestions are solicited.

DATE: Comments must be received on or before February 9, 1989, to be considered in the development of the final policy.

ADDRESS: Comments should be directed to: Regional Director, U.S. Fish and Wildlife Service, 1011 E. Tudor Road, Anchorage, Alaska 99503-6199, Attention: William Knauer.

FOR FURTHER INFORMATION CONTACT: William Knauer at the above address or telephone (907) 786-3399.

SUPPLEMENTARY INFORMATION: The original cabin policy for the U.S. Fish and Wildlife Service (Service) was developed in 1981 and revised in 1984. This policy was the basis for regulations printed in the Code of Federal Regulations Title 50. In September 1987, the Service, believing revisions of the existing cabin policy and regulations were needed, published a Draft Cabin Management Policy for cabins on National Wildlife Refuges in Alaska. Comments and suggestions on the draft policy were solicited during a 60-day public review period.

Because of the number and nature of comments received during the public review of the draft policy, the Service made such extension revisions that a revised draft of the cabin management policy is being published to give the public another opportunity to comment before the policy is made final.

The revised draft has been completely reorganized, more clearly describes the objectives of the policy, and sets forth the guidelines needed to comply with the Alaska National Interest Lands Conservation Act of 1980 and the National Wildlife Refuge system Administration Act of 1966.

The purpose of the draft policy and guidelines is to provide uniform guidance to both the public and refuge managers on human use and occupancy of cabins located on National Wildlife Refuges in Alaska. The draft policy further serves to define under what conditions use and occupancy of a cabin may be compatible with purposes for which the refuge was established.

Compatibility with refuge purposes is implicit in all cabin management decisions.

Copies of the revised draft policy are available from any national wildlife refuge in Alaska, from the Regional Office (address above), or by calling Ms. Gina Mullen in the Alaska Regional Office at (907) 786-3390.

Once the policy is finalized the Service will develop draft regulations for the public's consideration and subsequent incorporation into the Code of Federal Regulations.

Dated: November 18 1988.

Walter O. Stieglitz,

Regional Director.

BILLING CODE 4310-55-M

Bureau of Land Management

[ES-970-09-4120-14-2410; WVES 39061]

Request for Public Comment on Fair Market Value, Maximum Economic Recovery and the Environmental Assessment; Emergency Coal Lease Application WVES 39061

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of public comment.

SUMMARY: The Bureau of Land Management requests public comment on the fair market value, maximum economic recovery and the environmental assessment of certain coal resources it proposes to offer for competitive lease sale. The land included in Emergency Coal Lease Application WVES 39061 are located in Mingo County, West Virginia and are described as follows:

Kermit Poe Tract

Part of Tract 201 (Metes and Bounds)
Containing 20 acres, more or less

The range of quality of the coal of the tract is as follows:

1. 200,000 tons of recoverable coal.
2. 12,400 BTU's per pound.
3. 9.2% Ash.
4. 9.0% Moisture.
5. 0.67% Sulphur.

The public is invited to submit written comments on the fair market value and the maximum economic recovery of the tract.

In addition, notice is also given that a public hearing will be held on January 5, 1989 on the environmental assessment, the proposed sale, the fair market value,

and the maximum economic recovery of the proposed lease tracts.

DATE: Comments must be received on or before January 3, 1989.

ADDRESS: The public hearing will be held on January 5, 1989 at 5:00 p.m. in the Gilbert High School Auditorium, Gilbert, West Virginia 25621.

FOR FURTHER INFORMATION CONTACT: For more complete data on this tract, please contact Pearl Flaver Tillman at (703) 461–1468, at the Eastern States Office, Bureau of Land Management, 350 South Pickett Street, Alexandria, Virginia 22304.

SUPPLEMENTARY INFORMATION: In accordance with the Federal coal management regulations 43 CFR Parts 3422 and 3425, not less than 30 days prior to the publication of a notice of sale, the Secretary shal solicit public comments on fair market value appraisal and maximum economic recovery and on factors that may affect these two determinations. Proprietary data marked as confidential may be submitted to the Bureau of Land Management, Eastern States Office, at the above address, in response to this solicitation of public comments. Data so marked shall be treated in accordance with the laws and regulations governing the confidentiality of such information. A copy of the comments submitted by the public on fair market value and maximum economic recovery, except those portions identified as proprietary by the author and meeting exemptions stated in the Freedom of Information Act, will be available for public inspection at the Bureau of Land Management, Eastern States Office, at the above address, during regular business hours (7:30 a.m. to 4:00 p.m.) Monday through Friday, except Federal holidays. Comments should be sent to the Bureau of Land Management, Eastern States Office, at the above address, and should address, but not necessarily be limited to, the following information:

1. The method of mining to be employed in order to obtain maximum economic recovery of the coal;
2. The impact that mining the coal in the proposed leasehold may have on the area, including, but not limited to, impacts of the environment; and
3. Methods of determining the fair market value of the coal to be offered.

The coal characteristics given above may or may not change as a result of comments received from the public and changes in market conditions that occur between now and the time at which final economic evaluations are completed.

G. Curtis Jones, Jr.,
State Director.

Advisory Council Nomination Period and Opening; Vernal District, UT

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Advisory Council Nomination Period and Opening.

SUMMARY: The Vernal District of the Bureau of Land Management located in Vernal, Utah is seeking nominations to fill a vacancy in it's Advisory Council.

A District Advisory Council is a ten-person body of folks who are nominated by their peers and who are qualified by experience, knowledge, training, or interest to offer informed advice to the District Manager concerning land management matters. They are nominated to serve in one of eight categories, including "Elected Official", the category in which Vernal District will have an opening. A person nominated to fill a vacancy in "Elected Official" category must, by regulation, be " * * * an official of general purpose government serving the people of the District."

Nomination letters must be received by December 31, 1988, and should be sent to the: Vernal District Office—BLM, 170 South 500 East, Vernal, Utah 84078.

Letters of nomination for an elected official should include the following information:

1. Full name of nominee (no nicknames, please).
2. Nominees mailing address.
3. Nominees home and work phone numbers.
4. Current public office held.
5. Nominees occupation.
6. Nominator's name and phone number.

Questions may be directed to R. Ray Tate, Advisory Council Coordinator, (801) 789–1362.

Date: November 28, 1988.

David E. Little,
District Manager.

[No. 40193]

Kerrville Tours, Inc.; Exemption From Tariff Filing Requirements

AGENCY: Interstate Commerce Commission.

ACTION: Notice of proposed exemption.

SUMMARY: Kerrville Tours, Inc., a passenger motor contract carrier, seeks exemption from the tariff filing requirements of 49 U.S.C. 10702, 10761, and 10762. The Commission has issued a decision proposing to grant an exemption for existing and future contracts. The petition for exemption from the tariff filing requirements may be inspected at the Public Docket Room (Room 1227) of the Commission in Washington, DC. Any interested party may file a comment in this proceeding.

DATE: Comments are due on or before December 19, 1988; the sought relief will automatically become effective at the close of the comment period. If opposition comments are filed, the comments will be considered, and, within 20 days of the close of the comment period, the Commission will issue a final decision.

ADDRESSES: Send an original and 10 copies of comments referring to No. 40193 to: Office of the Secretary, Case Control Branch, Room 1324, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT:
Jasneth C. Metz, (202) 275–7974.
or
Richard Felder, (202) 275–7691.
(TDD for hearing impaired: (202) 275–1721)

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To obtain a copy of the full decision, write to, call, or pick up in person from: Office of the Secretary, Room 2215, Interstate Commerce Commission, Washington, DC 20423. Telephone: (202) 275–7428. (Assistance for the hearing impaired is available through TDD services (202) 275–1721.)

Decided: November 22, 1988.

By the Commission, Chairman Gradison, Vice Chairman Andre, Commissioners Simmons, Lamboley, and Phillips.

Noreta R. McGee,
Secretary.

[Finance Docket No. 31337]

Norfolk and Western Railway Co.; Acquisition and Operation Exemption; The Toledo Terminal Railroad Co.

AGENCY: Interstate Commerce Commission.

ACTION: Notice of exemption.

SUMMARY: The Interstate Commerce Commission exempts under 49 U.S.C. 10505 from the requirements of 49 U.S.C. 11343, the acquisition by Norfolk and Western Railway Company of 7.73 miles of rail line in Toledo, Lucas County, OH, from The Toledo Terminal Railroad Company, a subsidiary of CSX Transportation, Inc., subject to standard labor protective conditions.

DATES: The exemption will be effective on January 2, 1989. Petitions for stay must be filed by December 19, 1988, and petitions for reconsideration must be filed by December 27, 1988.

ADDRESSES: Send pleadings referring to Finance Docket No. 31337 to:

(1) Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

(2) Petitioners' representatives:

Angelica D. Lloyd, Norfolk Southern Corporation, 8 North Jefferson Street, Roanoke, VA 24042–0041.

Lawrence H. Richmond, CSX Transportation, Inc., 100 North Charles Street, Baltimore, MD 21201.

FOR FURTHER INFORMATION CONTACT: Joseph H. Dettmar, (202) 275–7245. (TDD for hearing impaired: (202) 275–1721)

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to, call, or pick up in person from Dynamic Concepts, Inc., Room 2229, Interstate Commerce Commission Building, Washington, DC 20423. Telephone: (202) 289–4357/4359. (Assistance for the hearing impaired is available through TDD services (202) 275–1721.)

Decided: November 23, 1988.

By the Commission, Chairman Gradison, Vice Chairman Andre, Commissioners Simmons, Lamboley, Phillips.

Noreta R. McGee,

Secretary.

BILLING CODE 7035–01–M

[Finance Docket No. 31347]

Southern Railway Co. and Transylvania Railroad Co.; Merger Exemption

Southern Railway Company (Southern) and Transylvania Railroad Company (TR) have filed a notice of exemption for the merger of TR into Southern with Southern as the surviving corporation. The merger was expected to be consummated on November 15, 1988.

Southern, a wholly owned subsidiary of Norfolk Southern Corporation, is a class I rail common carrier. TR, a class II railroad, is a wholly owned subsidiary of Southern.

This is a transaction within a corporate family of the type specifically exempted from prior review and approval under 49 CFR 1180.2(d)(3). The transaction will not result in adverse changes in service levels, significant operational changes, or a change in the competitive balance with carriers outside the corporate family.

To ensure that all employees who may be affected by the transaction are given the minimum protection afforded under 49 U.S.C. 10505(g)(2) and 49 U.S.C. 11347, the labor conditions set forth in *New York Dock Ry.—Control—Brooklyn Eastern Dist.*, 360 I.C.C. 60 (1979), are imposed.

Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not stay the transaction. Pleadings must be filed with the Commission and served on: William A. Noell, Jr., Norfolk Southern Corporation, One Commercial Place, Norfolk, VA 23510–2191.

Decided: November 21, 1988.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

Noreta R. McGee,

Secretary.

BILLING CODE 7035–01–M

JOINT BOARD FOR THE ENROLLMENT OF ACTUARIES

Advisory Committee on Actuarial Examinations; Meeting

Notice is hereby given that the Advisory Committee on Actuarial Examinations will meet in Room 3313, Internal Revenue Service Building, 1111 Constitution Avenue, NW., in Washington, DC on January 4, 1989, beginning at 8:30 a.m.

The purpose of the meeting is to discuss topics and questions which may be recommended for inclusion on future Joint Board examinations in actuarial mathematics and methodology referred to in Title 29 U.S. Code, section 1242(a)(1)(B) and to review the November 1988 Joint Board examination in order to make recommendations relative thereto, including the minimum acceptable pass score.

A determination as required by section 10(d) of the Federal Advisory Committee Act (Pub. L. 92–463) has been made that the subject of the meeting falls within the exceptions to the open meeting requirement set forth in Title 5 U.S. Code, section 552b(c)(9)(B), and that the public interest requires that such meeting be closed to public participation.

Date: November 25, 1988.

Leslie S. Shapiro,

Advisory Committee Management Officer, Joint Board for the Enrollment of Actuaries.

BILLING CODE 4810–25–M

DEPARTMENT OF JUSTICE

Pollution Control; Lodging a Final Judgment by Consent Pursuant to the Clean Air Act; Robert W. Skinner

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that on November 17, 1988 a proposed Consent Decree in *United States* v. *Robert W. Skinner*, Civil Action No. 87–494–B, was lodged with the United States District Court for the Southern District of Iowa.

The complaint filed by the United States alleged that Robert W. Skinner failed to follow certain work practices for handling asbestos during renovation and demolition operations as required by the National Emission Standard for Hazardous Air Pollutants ("NESHAP"), 40 CFR 61.147(c) and 61.152 (a) and (c), promulgated pursuant to the Clean Air Act, 42 U.S.C. 7412 (c) and (e). The complaint sought civil penalties of up to $25,000 per day of violation. Pursuant to the Consent Decree, Mr. Skinner has agreed to pay a civil penalty of $500.00 and not to engage in any future asbestos renovation or demolition operations.

The Department of Justice will receive comments relating to the proposed Consent Decree for a period of thirty days from the date of publication of this notice. Comments should be addressed to the Assistant Attorney General, Land and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *Robert W. Skinner*, Civil Action No. 87–494–B, DOJ Ref. No. 90–5–2–1–1001.

The proposed Consent Decree may be examined at the office of the United States Attorney, Southern District of Iowa, East First and Walnut Streets, Des Moines, Iowa 50009. Copies of the Consent Decree may also be examined and obtained in person at the Environmental Enforcement Section, Land and Natural Resources Division, Department of Justice, Room 6314, Tenth and Pennsylvania Avenue NW., Washington, DC. A copy of the proposed Consent Decree may be obtained by mail from the Environmental Enforcement Section, Land and Natural Resources Division, Department of Justice, Box 7611, Ben Franklin Station, Washington, DC 20044.

Roger J. Marzulla,

Assistant Attorney General Land and Natural Resources Division.

BILLING CODE 4410-01-M

Antitrust Division

Competitive Impact Statement and Proposed Consent Judement; United States v. TRW Inc.

Notice is hereby given pursuant to the Antitrust Procedures and Penalties Act, 15 U.S.C. 16(b) through (h), that a proposed Final Judgment, Stipulation, and Competitive Impact Statement have been filed with the United States District Court for the Northern District of Ohio in *United States v. TRW Inc.*, Civil Action No. C-88-4253.

The Complaint in this case alleges that the effect of the proposed acquisition of Chilton by TRW will be substantially to lessen competition in the market for consumer credit reports in violation of section 7 of the Clayton Act, 15 U.S.C. 18, in all or portions of the states of Arizona, Colorado, Connecticut, Hawaii, Massachusetts, Michigan, New Hampshire, New Mexico, New York, Rhode Island, and Texas.

The proposed Final Judgment orders and directs TRW to: (a) Terminate affiliation agreements with specified credit bureaus affiliated with TRW or Chilton; and (b) consummate contracts to sell a copy of TRW's or Chilton's consumer credit files in specified areas within four months of the entry of the proposed Final Judgment. If TRW is unable to transfer a copy of its consumer credit files to a person with whom it currently has a contract for sale of a copy of consumer credit files, TRW shall transfer a copy of the consumer credit files for that area to some other person acceptable to the Department of Justice. Under the Final Judgment, TRW must report to the Department the fact and manner of compliance with the Final Judgment.

Public comment is invited within the statutory 60-day comment period. Such comments, and responses thereto, will be published in the **Federal Register** and filed with the Court. Comments should be directed to Barry Grossman, Chief, Communications and Finance Section, Antitrust Division, U.S. Department of Justice, Judiciary Center Building, 555 4th Street, NW., Room 8104, Washington, DC 20001, (202) 272-4247.

Joseph H. Widmar,

Director of Operations, Antitrust Division.

BILLING CODE 4410-01-M

National Cooperative Research Act of 1984; Development of a High-Temperature Resistant Diesel Particulate Trap; Southwest Research Institute

Notice is hereby given that, on November 2, 1988, pursuant to section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C. 4301 *et seq.* ("the Act"), Southwest Research Institute ("SwRI") filed a written notification simultaneously with the Attorney General and the Federal Trade Commission disclosing the addition of parties to its group research project regarding "Development of a High-Temperature Resistant Diesel Particulate Trap." The notification was filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Specifically, the SwRI advised that Volvo Truck Corporation (effective September 14, 1988); General Motors Corporation, Chevrolet-Pontiac-Canada Group (CPC Romulus Engineering Center) (effective September 19, 1988); and The Riken-Duriron Joint Venture (effective September 23, 1988) have become parties to the group research project.

No other changes have been made in either the membership or planned activity of the group research project.

On August 31, 1988, SwRI filed its original notification pursuant to section 6(a) of the Act. The Department of Justice published a notice in the **Federal Register** pursuant to section 6(b) of the Act on September 27, 1988, 53 FR 37654.

Joseph H. Widmar,

Director of Operations, Antitrust Division.

BILLING CODE 4410-01-M

DEPARTMENT OF LABOR

Office of the Secretary

Agency Recordkeeping/Reporting Requirements Under Review by the Office of Management and Budget (OMB)

Background

The Department of Labor, in carrying out its responsibilities under the Paperwork Reduction Act (44 U.S.C. Chapter 35), considers comments on the reporting and recordkeeping requirements that will affect the public.

List of Recordkeeping/Reporting Requirements Under Review

As necessary, the Department of Labor will publish a list of the Agency recordkeeping/reporting requirements under review by the Office of Management and Budget (OMB) since the last list was published. The list will have all entries grouped into new collections, revisions, extensions, or reinstatements. The Departmental Clearance Officer will, upon request, be able to advise members of the public of the nature of the particular submission they are interested in.

Each entry may contain the following information:

The Agency of the Department issuing this recordkeeping/reporting requirement.

The title of the recordkeeping/reporting requirement. The OMB and Agency identification numbers, if applicable. How often the recordkeeping/reporting requirement is needed. Who will be required to or asked to report or keep records. Whether small businesses or organizations are affected.

An estimate of the total number of hours needed to comply with the recordkeeping/reporting requirements and the average hours per respondent.

The number of forms in the request for approval, if applicable.

An abstract describing the need for and uses of the information collection.

Comments and Questions

Copies of the recordkeeping/reporting requirements may be obtained by calling the Departmental Clearance Officer, Paul E. Larson, telephone (202) 523-6331. Comments and questions about the items on this list should be directed to Mr. Larson, Office of Information Management, U.S. Department of Labor, 200 Constitution Avenue NW., Room N-1301, Washington, DC 20210. Comments should also be sent to the Office of Information and Regulatory Affairs.

Attn: OMB Desk Officer for (BLS/DM/ESA/ETA/OLMS/MSHA/OSHA/PWBA/VETS), Office of Management and Budget, Room 3208, Washington, DC 20503 (Telephone (202) 395-6880).

Any member of the public who wants to comment on a recordkeeping/reporting requirement which has been submitted to OMB should advise Mr. Larson of this intent at the earliest possible date.

BILLING CODE 4510–27–M

Employment and Training Administration

[Training and Employment Guidance Letter No. 4–88]

Job Training Partnership Act; Reallotment and Reallocation of Funds Under Title III of the Job Training Partnership Act, as Amended

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice of Training and Employment Guidance Letter No. 4–88; request for comments.

SUMMARY: The Employment and Training Administration is issuing Training and Employment Guidance Letter (TEGL) No. 4–88 to provide information to States on its policy and procedures for reallotment and reallocation of funds under Title III of the Job Training Partnership Act, as revised by the Economic Dislocation and Worker Adjustment Assistance Act (Title VI, Subtitle D, of the Omnibus Trade and Competitiveness Act of 1988). A revised TEGL may be published in the **Federal Register** following a review of comments.

DATES: *Effective Date*: Training and Employment Guidance Letter No. 4–88 became effective on November 25, 1988.

Comments: Written comments are invited from interested parties. Comments must be received by January 3, 1989.

ADDRESS: Comments shall be addressed to the Assistant Secretary for Employment and Training, U.S. Department of Labor, Room N–4703, 200 Constitution Avenue, NW., Washington, DC. 20210, Attention: Mr. Robert N. Colombo, Director, Office of Employment and Training Programs.

FOR FURTHER INFORMATION CONTACT: Mr. Robert N. Colombo. Telephone: (202) 535–0577 (this is not a toll-free number).

SUPPLEMENTARY INFORMATION: Title III of the Job Training Partnership Act, establishing employment and training programs for dislocated workers, was revised recently by the Economic Dislocation and Worker Adjustment Assistance (EDWAA) Act (Title VI, Subtitle D, of the Omnibus Trade and Competitiveness Act of 1988). Among other things, EDWAA provides for the reallotment of unexpended funds from underutilizing States to States that are effectively using available funds. It is necessary to establish and promulgate policies and procedures to inform States of the means by which reallotment will be effected. This information has been issued in a Training and Employment Guidance Letter (TEGL). Information on plans and procedures are set forth in the attached TEGL No. 4–88, for which written comments are being invited. After review of the comments, revised instructions may be issued in a TEGL, which would be published in the **Federal Register**. It is likely that no further revision of this TEGL may be effected, however.

Signed at Washington, DC this 23rd day of November, 1988.

Roberts T. Jones,

Assistant Secretary for Employment and Training.

Department of Labor, Employment and Administration; Training and Employment Guidance Letter No. 4–88

November 25, 1988.

From: Robert T. Jones, Assistant Secretary of Labor

Subject: Reallotment and reallocation of funds under Title III of the Job Training Partnership Act (JTPA), as amended.

Expiration Date: Continuing.

1. *Purpose.* To provide information to the JTPA and worker adjustment delivery system on plans and procedures for reallotment of funds by the Secretary under the Economic Dislocation and Worker Adjustment Assistance (EDWAA) program, and to discuss briefly substate reallocation procedures.

2. *References.* Sections 302 and 303 of the Job Training Partnership Act, as amended.

3. *Background.* In January of 1989, as in previous years, the allotments for the upcoming program year will be published.

The allotment formula for Program Year (PY) 1989 will be the same as the formula used for PY 1988 and earlier. This formula distributes funds among the States based on three equally weighted factors, including the relative numbers of unemployed individuals, the relative numbers of unemployed individuals over 4.5 percent of the labor force, and the relative numbers of individuals who have been unemployed for 15 weeks or more.

Pursuant to section 302(b)(2) of EDWAA, the formula eventually will be expanded to four equally weighted factors. The relative numbers of dislocated workers will be the fourth factor along with the existing three factors, but it will be some time before the Bureau of Labor Statistics is able to collect satisfactory data. When BLS and the Department of Agriculture develop a report giving the number of displaced farmers and ranchers, that information will be included with the dislocated workers' data to become a combined fourth factor in the allotment formula.

Beginning in PY 1989 the Secretary must initiate reallotment of formula-allotted funds, as provided for in section 303 of EDWAA. The reallotment process will be based on expenditure reports that will be due 30 days after the end of the program year (i.e. due by July 31, 1989). Reallotments will be finalized and implemented on or about September 1, 1989, two months into the program year.

All 50 States plus Puerto Rico and the District of Columbia will be involved in the reallotment process at the end of PY 1988:

a. States that have no unexpended formula-allotted funds from PY 1987, and have expended 70 percent or more of PY 1988 formula funds, will be eligible to receive reallotted funds.

b. States that have any unexpended formula-allotted funds from PY 1987, or have not expended 70 percent of PY 1988 formula funds, will have their new obligational authority for PY 1989 reduced.

4. *Special Report.* For the PY 1988/89 reallotment process only, a special report will be required to identify the total amount of unexpended formula-allotted funds in each State. Only

formula-allotted funds are subject to this reallotment process. At present, expenditure reports do not distinguish the specific year of allotment against which expenditures are recorded in State accounting records.

5. *Notice of Obligation.* PY 1989 allotments will be obligated through a Notice of Obligation on July 1, 1989. After the expenditure reports have been received and the reallotments have been calculated, each State will receive a second Notice of Obligation that will adjust the total funds available for the State for the program year, according to the amount of reallotted funds the State gains or loses.

6. *Process.* There will be a multi-step process for computing the amount of funds that will be reallotted to "eligible States" (i.e., those States that expended an amount equal to 70 percent of the formula allotment for PY 1988 *and* had no unexpended PY 1987 formula-allotted funds). An example of how this process will work is attached.

a. The total amount of funds to be reallotted will be equal to the total excess unexpended funds, defined as all unexpended formula funds in a State at the end of PY 1988 that were in excess of 30 percent of that year's formula allotment plus all unexpended formula-allotted funds from PY 1987.

Pursuant to section 161(b) of JTPA, funds may be expended during the program year in which they were allotted and the 2 succeeding program years. Therefore, formula funds from PY 1986 and earlier that remain unexpended at the end of PY 1988 are no longer available for expenditure and are subject to deobligation, but they will not be included in the reallotment process.

b. The available funds from Step "a" will be divided among all eligible States by applying the regular Title III formula to those eligible States. The most recent 12 months for which satisfactory data are available will be used for this calculation.

c. Eligible States that experienced an average unemployment rate greater than the national average according to the most recent 12 months for which satisfactory data are available will receive an amount equal to their share of Step "b".

d. The share of the available funds under Step "b" for eligible States with unemployment rates less than or equal to the national average will be added together and that new (smaller) amount will be divided among all eligible States, also using the regular Title III allotment formula.

Therefore, eligible States with unemployment rates higher than the national average will receive a total reallotment amount based on Steps "c" and "d," while eligible States with unemployment rates equal to or less than the national average will receive a reallotment amount based only on Step "d."

On or about September 1, a second Notice of Obligation will be issued to each State in an amount equal to the State's share of the reallotted funds, or in the case of those States with excess carryforward, a Negative Adjustment to PY 1989 New Obligational Authority.

7. *Within State Procedures.* EDWAA requires Governors to:

a. Prescribe uniform procedures for the expenditure of funds by substate grantees in order to avoid the requirement that funds be made available for reallotment; and

b. Prescribe equitable procedures for making funds available from the State and substate grantees in the event that the State is required to make funds available for reallotment (section 303(d)).

Federal requirements do not define allowable carryforward at the within State level. State policies may include within State reallocation procedures even when the State maintains a high overall level of expenditure if an individual State or substate grantee is experiencing significant underexpenditure of funds.

States that gain funds through the reallotment process will be required to distribute those funds in the same manner as the rest of the formula allotment (i.e., 60 percent to substate areas).

8. *New Allotment Levels.* The reallotted funds will increase the allotment level of formula funds for States that receive the additional funds. Therefore unexpended reallotted funds at the end of the year will be subject to the 20 percent limitation of allowable carryforward of formula-allotted funds into PY 1990. States that lose funds through the reallotment process, however, will calculate allowable carryforward into PY 1990 by using the initial formula allotment level the State received before reallotment.

9. *Action.* States should make this information available to appropriate staff.

10. *Contact.* Inquires regarding the reallotment process should be directed to Robert N. Colombo on (202) 535–C577 or Jack Rapport on (202) 535–8765.

11. *Allotment.* Program Year 1989 Reallotment Process.

			PY 1986 allotment	PY 1987 allotment	PY 1988 allotment	
A	$100	$30	$0	$4	$10	6.0
B	200	60	0	0	60	6.1
C	300	90	2	5	104	5.4
D	200	60	0	0	62	7.2
E	100	30	5	10	45	3.5
F	300	90	0	0	10	6.0
National	1,200	360	7	19	291	6.0

Given the PY 1988 experience in the example above, and assuming straight line funding for the two year period in this scenario, as well as no change in the unemployment factors used in the allotment formula, the following reallotment steps will be taken:

State	Total carryforward (Note 1)	Excess carryforward (Note 1)	Reallotment step "c" (Note 2)	Reallotment step "d" (Note 2)	PY 1989 allotment	PY 1989 obligation (Note 3)	Total availability (Note 4)
A	$14	$4			$100	$96	$110
B	60	0	$20	$12	200	232	292
C	109	19			300	281	390
D	62	2			200	198	260
E	55	25			100	75	130
F	10	0		18	300	318	328
National	310	50	20	30	1,200	1,200	1,510

Note 1—Excess Carryforward is the amount of PY 1988 unexpended funds over 30 percent plus all PY 1987 unexpended funds. In this example, States C, D, and E have excess PY 1988 carryforward, and States A, C, and E have carryforward from PY 1987. Expenditure authority for PY 1986 funds will have expired, and those funds will not be subject to reallotment.

Note 2—Steps "c" and "d" refer to the multi-step process described in the TEGL on Reallotment. Step "c" allots funds to eligible States with unemployment above the National average, and Step "d" is the allotment of the balance of the reallotted funds to all States eligible to receive reallotted funds. In this example, only States B and F are eligible, and only B is a high unemployment State.

Note 3—The PY 1989 Obligational Authority will be adjusted on or about September 1 to reflect the amount of reallotted funds added to a State's Obligational Authority or the remainder after the Obligational Authority has been reduced by the amount of excess carryforward.

Note 4—Total Availability includes both the PY 1989 Obligational and the total unexpended funds from PY 1987 and PY 1988 carried forward into PY 1989.

BILLING CODE 4510-30-M

[Training and Employment Guidance Letter No. 3-88]

Job Training Partnership Act: Transition to Economic Dislocation and Worker Adjustment Assistance Act Program

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice of Training and Employment Guidance Letter No. 3–88; request for comments.

SUMMARY: The Employment and Training Administration is issuing Training and Employment Guidance Letter (TEGL) No. 3–88 to issue instructions to States for the transition to dislocated worker programs under Title III of the Job Training Partnership Act, as revised by the Economic Dislocation and Worker Adjustment Assistance Act (Title VI, Subtitle D, of the Omnibus Trade and Competitiveness Act of 1988). A revised TEGL may be published in the **Federal Register** following a review of comments.

DATES: *Effective Date:* Training and Employment Guidance Letter No. 3–88 became effective on November 25, 1988.

Comments: Written comments are invited from interested parties. Comments must be received by January 3, 1989.

ADDRESS: Comments shall be addressed to the Assistant Secretary for Employment and Training, U.S. Department of Labor, Room N–4703, 200 Constitution Avenue, NW., Washington, DC 20210, Attention: Mr. Robert N. Colombo, Director, Office of Employment and Training Programs.

FOR FURTHER INFORMATION CONTACT: Mr. Robert N. Colombo, Telephone: (202) 535–0577 (this is not a toll-free number).

SUPPLEMENTARY INFORMATION: Title III of the Job Training Partnership Act, establishing employment and training programs for dislocated workers, was revised recently by the Economic Dislocation and Worker Adjustment Assistance (EDWAA) Act (Title VI, Subtitle D, of the Omnibus Trade and Competitiveness Act of 1988). It is necessary to issue instructions to the States regarding transition between the dislocated worker programs under Title III before EDWAA and the dislocated worker programs under Title III as revised by EDWAA. These instructions have been issued in the attached Training and Employment Guidance Letter (TEGL) No. 3–88. Instructions are set forth in the attached TEGL, for which written comments are being invited. After review of the comments, revised instructions may be issued in a TEGL, which would be published in the **Federal Register**. It is likely that no further revision of this TEGL may be effected, however.

Signed at Washington, DC, this 23rd day of November 1988.

Roberts T. Jones,

Assistant Secretary for Employment and Training.

Department of Labor, Employment and Training Administration; Training and Employment Guidance Letter No. 3–88

Date: November 25, 1988.

From: Roberts T. Jones, Assistant Secretary of Labor.

Subject: Transition policy for implementation of the New Worker Adjustment Assistance Program Under Amendments to Title III of the Job Training Partnership Act (JTPA).

Expiration Date: Continuing.

1. *Purpose.* To provide States with guidance regarding the transition from programs operating under existing provisions of Title III of JTPA, to programs operated under provisions of Title III as amended by the Economic Dislocation and Worker Adjustment Assistance (EDWWA) Act.

2. *References.* Subtitle D of Title VI of Pub. L. 100–418; interim final regulations published in the **Federal Register** on October 24, 1988, pps. 41572 *et seq.*

3. *Background.* Title VI, Subtitle D of the recently enacted Omnibus Trade and Competitiveness Act of 1988 essentially replaces the old Title III of JTPA with an entirely new dislocated worker program—EDWAA. Program Year (PY) 1988 will serve as the transition period for planning and implementation of the new program so that EDWAA can be fully operational beginning in PY 1989.

4. *Statutory and Regulatory Citations.* The "transition provisions" included in the Omnibus Trade and Competitiveness Act of 1988 at section 6305 state:

(a) General Rule.—Except as otherwise provided in this section, the amendments made by sections 6302 and 6304 shall be effective for program years beginning on or after July 1, 1989.

(b) Program Year 1988–1989.—The Secretary of Labor and Governors shall, during the program year beginning July 1, 1988, continue to administer title III of the Job Training Partnership Act in the same manner as such title was administered during prior program years, except to the extent necessary to provide for an orderly transition to and implementation of the amendments made by this subtitle. The Secretary and Governors may, for such purposes, use funds appropriated for fiscal year 1989 or any preceding fiscal year to carry out appropriate transition and

implementation activities. Such activities may include—

(1) Activities to prevent disruption in the delivery of services to program participants; and

(2) Planning for and implementation of such amendments. (Section 6305.)

Section 631.1(b) of the interim final regulations published in the **Federal Register** on October 24, 1988 states:

These regulations apply to JTPA programs funded by Fiscal Year 1989 and later appropriations for use in programs in Program Year 1989 and later. For JTPA Title III programs operated with funds appropriated for fiscal years before Fiscal Year 1989, the regulations which had been published in 20 CFR Part 631 (1988 ed.) continue to apply.

In addition, § 631.70(a) of the interim final regulations states:

In order to provide for the transition from Title III activities as administered thorugh PY 1988, the Governor may use a limited amount of funds allotted for PY 1988 to assist in implementing new provisions through June 30, 1989, under the following conditions:

(1) Funds are expended to cover only the one-time costs associated with the transition such as: Reconstitution of the SJTCC; establishment of substate areas and substate grantees; establishment of the State dislocated worker unit; establishment of management systems; development of the State plan; and development of substate plans;

(2) Funds so expended will not be taken into account when computing compliance with the cost limitations at 20 CFR 631.13, 53 FR 4277 (February 12, 1988) or the matching requirements at 20 CFR 731.14, 53 FR 4277 (February 12, 1988); and

(3) Allowable costs are limited to salaries and benefits of staff for the time spent on implementing new systems and linkage arrangements and other direct costs associated with the transition;

(4) No funds included paragraph (a)(2) of this section may be used for the purchase of equipment or computer hardware. (Section 6305(b).)

5. *Discussion of Limitation on Use of Funds Appropriated for Fiscal Years Before Fiscal Year (FY) 1989.*

As currently written, § 631.1 of the interim final regulations requires that funds appropriated prior to FY 1989 be used to fund current Title III program activities during the entire period of availability of those funds, except for transition costs incurred in PY 1988 in accordance with § 631.70.

The effect of this provision would be that in most States existing Title III programs and new EDWAA programs would be running simultaneously until all pre-PY 1989 formula-allotted funds were no longer available. Under the reallotment process, the amount of "new" formula-allotted funds available in a State for PY 1989 will be reduced by the amount of excess unexpended funds remaining available at the end of PY 1988. For some States, then, a significant proportion of the activity during PY 1989 would continue under the existing provisions, since those States would have limited PY 1989 formula-allotted funds for the new EDWAA program.

Based on comments received to date and further analysis of the potential adverse effect of this provision, the Employment and Training Administration intends ot revise the final regulations to ensure full implementation of the EDWAA program on July 1, 1989.

6. *Transition Policy.* The interim final regulations at § 631.1 are likely to be revised to reflect the following policy:

a. *Use of Funds.* The regulations published in the February 12, 1988 **Federal Register** apply to activity during PY 1988 (other than transition activities per § 631.70), and to any activities thereafter that are funded with carryforward funds into PY 1989 that are not subject to reallotment (up to 30 percent of the PY 1988 allotment).

All funds subject to reallotment (an amount equal to funds in excess of 30 percent of the PY 1988 allotment, plus the unexpended balance of the PY 1987 allotment) will be considered to be "new funds" and are subject to the provisions of the EDWAA Act and regulations in PY 1989.

b. *Transition Activities in PY 1988.* Planning for implementation of the EDWAA provisions will be primarily an administrative cost. Although the transition provisions in EDWAA provide for the use of funds for transition activities, the February 12 regulations at 20 CFR 629.39, and at 20 CFR 631.13 and 631.14, regarding cost limitations and matching requirements, could limit the availability of funds for this purpose.

In order to avoid potential problems regarding compliance with cost limitations and matching requirements, the transition provisions included in the interim final regulations at § 631.70(a) provide flexibility, as outlined above in section 4 of this Training and Employment Guidance Letter.

(1) A limited amount of funds may be used for one-time costs for transition to EDWAA. Allowable transition costs are costs directly related to activities such as the following:

(A) Establishment or modification of management systems to meet the requirements of section 311(b)(3)(C), as amended;

(B) Development of State policies and procedures; and

(C) Development of required linkages with other agencies.

(2) To be considered allowable transition costs, and thus excluded from the cost limitations and matching requirements, such costs must be accounted for separately.

(3) Allowable transition costs are limited to salaries and benefits of staff for time spent on transition activities and other direct costs of transition.

(4) Purchases of equipment and computer hardware are not allowable transition costs.

These provisions will allow and encourage the transition effort, while providing flexibility for States to meet current obligations.

c. *Existing Subagreements.* Each State will have at least a full-share allotment (as determined by the funding formula, and which will be announced in January 1989) for implementation of the new EDWAA activities in PY 1989. Because of the potential impact of reallotment on unexpended funds from prior and previous years, States should begin now to look at the status of these funds since:

(1) An amount equal to unexpended PY 1988 formula funds in excess of 30 percent of the allotment, plus all unexpended PY 1987 formula funds, must be used according to the new EDWAA provisions; and

(2) Only carryforward not subject to reallotment will be available to meet obligations under subagreements based on existing Title III provisions.

d. *Phase-out of Existing Title III in PY 1989.* Program activity under Title III will continue through June 30, 1989 according to the existing regulations published in the **Federal Register** on February 12, with the exception of transition activities discussed above. After June 30, 1989, phase-out of existing programs will be subject to the following provisions:

(1) Only carryforward not subject to reallotment (i.e., unexpended funds up to 30 percent of the PY 1988 formula allotment) will be available for existing programs and activities.

(A) Programs and activities funded with such carryforward will continue to be subject to the provisions in the February 12 regulations.

(B) Phase-out may continue until all such carryforward funds have been expended or until such funds are no longer available for expenditure (i.e., 3 years from the date funds were obligated to the State as permitted under section 161(b) of JTPA).

(C) Expenditures and participant activity under the existing programs should be separately identified on current reporting forms under existing requirements.

(2) All eligible participants in Title III programs on June 30, 1989 will be considered eligible for transfer to programs operated under the new provisions at any time beginning on July 1, 1989. Participants transferred are not to be counted in either the numerator or the denominator when computing the entered employment rate for the existing programs.

7. *Closure.* A process for closure of the current Title III program is being developed by the Department. Further information on this subject will be provided to the States by June 30, 1989.

8. *Action.* States should ensure that transition activities under Title III of JTPA are consistent with this policy guidance. In addition, it is suggested that States take the following specific actions during the remainder of PY 1988:

a. Estimate total accrued expenditures through the end of PY 1988 and the amount of prior and previous year funds that will be carried forward into PY 1989; and

b. If estimated carryforward is in excess of allowable carryforward, examine existing subagreements and activities to determine (1) if activities and expenditures can be accelerated during the remainder of PY 1988, or (2) if subagreements can be modified, terminated or funds otherwise recovered to reduce existing Title III obligations in PY 1989 to a level at or below the amount of allowable carryforward.

9. *Inquiries.* Questions regarding transition may be addressed to Robert N. Colombo on 202–535–0577 or Lance Grubb on 202–535–0719.

BILLING CODE 4510–30–M

Employment Standards Administration, Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor are issued in accordance with applicable law and are based on the information obtained by the Department of Labor from its study of local wage conditions and data made available from other sources. They specify the basic hourly wage rates and fringe benefits which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of a similar character and in the localities specified therein.

The determinations in these decisions of prevailing rates and fringe benefits have been made in accordance with 29 CFR Part 1, by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR Part 1, Appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the payment of wages determined to be prevailing by the Secretary of Labor in accordance with the Davis-Bacon Act. The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public comment procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in the effective date as prescribed in that section, because the necessity to issue current construction industry wage determinations frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions, and modifications and supersedeas decisions thereto, contain no expiration dates and are effective from their date of notice in the **Federal Register**, or on the date written notice is received by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision, together with any modifications issued, must be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR Part 5. The wage rates and fringe benefits, notice of which is published herein, and which are contained in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under the Davis-Bacon and Related Acts," shall be the minimum paid by contractors and subcontractors to laborers and mechanics.

Any person, organization, or governmental agency having an interest in the rates determined as prevailing is encouraged to submit wage rate and fringe benefit information for consideration by the Department. Further informaton and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of Wage Determinations, 200 Constitution Avenue, NW., Room S–3504, Washington, DC 20210.

Modifications to General Wage Determination Decisions

The numbers of the decisions listed in the Government Printing Office document entitled "General Wage Determinations Issued Under the Davis-Bacon and Related Acts" being modified are listed by Volume, State, and page number(s). Dates of publication in the **Federal Register** are in parentheses following the decisions being modified.

General Wage Determination Publication.

General wage determinations issued under the Davis-Bacon and related Acts, including those noted above, may be found in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts". This publication is available at each of the 50 Regional Government Depository Libraries and many of the 1,400 Government Depository Libraries across the country. Subscriptions may be purchased from: Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, (202) 783–3238.

When ordering subscriptions(s), be sure to specify the State(s) of interest, since subscriptions may be ordered for any or all of the three separate volumes, arranged by State. Subscriptions include an annual edition (issued on or about January 1) which includes all current general wage determinations for the States covered by each volume. Throughout the remainder of the year, regular weekly updates will be distributed to subscribers.

Signed at Washington, DC this 25th day of November 1988.

Robert V. Setera,

Acting Director, Division of Wage Determinations.

BILLING CODE 4510–27–M

Mine Safety and Health Administration

[Docket No. M–88–214–C]

Snyder Coal Co.; Petition for Modification of Application of Mandatory Safety Standard

Snyder Coal Company, R.D. No. 2, Box 93, Hegins, Pennsylvania 17938 has filed a petition to modify the application of 30 CFR 75.1400 (hoisting equipment; general) to its Rothermel Slope (I.D. No. 36–07588) located in Schuylkill County, Pennsylvania. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

1. The petition concerns the requirement that cages, platforms or other devices which are used to transport persons in shafts and slopes be equipped with safety catches or other approved devices that act quickly and effectively in an emergency.

2. Petitioner states that no such safety catch or device is available for the steeply pitching and undulating slopes with numerous curves and knuckles present in the main haulage slopes of this anthracite mine.

3. Petitioner further believes that if "makeshift" safety devices were installed they would be activated on knuckles and curves when no emergency existed and cause a tumbling effect on the conveyance.

4. As an alternate method, petitioner proposes to operate the man cage or steel gunboat with secondary safety connections securely fastened around the gunboat and to the hoisting rope, above the main connecting device. The hoisting ropes would have a factor of safety in excess of the design factor as determined by the formula specified in the American National Standard for Wire Rope for Mines.

5. Petitioner states that the proposed alternate method will provide the same degree of safety for the miners affected as that afforded by the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before January 3, 1989. Copies of the petition are available for inspection at that address.

Date: November 23, 1988.

Patricia W. Silvey,

Director, Office of Standards, Regulations and Variances.

BILLING CODE 4510–43–M

Office of Workers' Compensation Programs

Report of Computer Matching Project Involving Certain Beneficiaries Under the Federal Employees' Compensation Act and Certain Subscribers in the Federal Employee Program of the Blue Cross and Blue Shield Association

SUMMARY: The Department of Labor, Employment Standards Administration, Office of Workers' Compensation Programs (OWCP), announces that the Federal Employee Program (FEP) of the Blue Cross and Blue Shield Association (BCBSA) will participate as a Source agency in a series of computer matches conducted by the OWCP of the names, Social Security Numbers (SSN's), dates of birth, etc. of certain beneficiaries who are both beneficiaries under the Federal Employees' Compensation Act (FECA) and subscribers in the FEP, in order to identify those beneficiaries receiving FECA medical benefits for medical bills the BCBSA has paid. Most such concurrent payments to the same beneficiary would entitle BCBSA to payment or reimbursement from OWCP.

a. Authority

The Federal Employees' Compensation Act (FECA) 5 U.S.C. 8101, *et seq.*

b. Description of the Match

Among its responsibilities in the administration of the FECA, the OWCP must ensure that benefit payments are proper and that fraud and abuse are prevented. Computer matching is an efficient and unobtrusive method of determining whether beneficiaries are receiving medical benefits from both BCBSA and OWCP, for work-related injury.

The matching effort will compare the OWCP automated data records, including the name and Social Security Number (SSN), of recipients of benefits under the FECA with the BCBSA automated data records of FEP subscribers who have bills (i.e., claims), in order to determine whether the same

person is receiving benefits from both programs for the same bills.

The purpose of the matches is to detect, identify and follow-up on dual medical bill payments. BCBSA will provide a computer tape containing the selected beneficiaries' name, SSN, date of birth, sex code, and modified FEP I.D. number to OWCP. OWCP will match this data against similar automated records it maintains.

Following this, BCBSA will follow-up on the matches in order to determine whether BCBSA has paid bills which are attributable to the work-related injury upon which the FECA claim with the OWCP is based; to initiate action to assure the proper party is paying the bills; and, to assure no double payments have taken place.

c. Description of the Federal Records to be Matched

The OWCP system of records to be matched has been published as DOL/ESA–13, 47 FR 30382–30383, July 13, 1982, as amended in 48 FR 27, pages 5826, February 8, 1983, and as amended in 50 FR 5144–5145, February 6, 1985. The disclosure of information from the system of records for this matching program is authorized by routine use "b."

d. Period of the Match

The anticipated starting date of the first match pursuant to the Notice is on or about January 1, 1989, and recurring every six months thereafter.

e. Security

The personal privacy of individuals identified on the tapes will be protected by strict compliance with the Privacy Act (Pub. L. 93–579) and OMB Circular A–108. Information from the match will be used only for official purposes, and will not be released to the public. All automated source and match data will be password protected while resident on BCBSA's computers and only those with a need to know will be given access to the data sets or passwords; all tape and paper listings of the source and match information will be stored in a locked file, cabinet or room when not in use.

f. Disposition of the Records

The source data will be returned by OWCP to the BCBSA, whose property it remains. BCBSA may make a copy of the data provided on the OWCP tape(s) for creation of its own on-line database. The sole purpose of this database is to allow BCBSA to bill OWCP on approved cases for treatment related to the approved claim. After BCBSA has screened the data on all matched cases, and billed OWCP for reimbursement in the appropriate cases, all the data copied from the OWCP will be erased, or otherwise destroyed. BCBSA will not maintain any data provided by OWCP on any media after the above specified processing has been completed, except it may keep hard copies of such data to the extent that it is required, in order to justify its billing actions, by the terms of its contract with the Office of Personnel Management.

Signed at Washington, DC this 15th day of November 1988.

Lawrence W. Rogers,

Director, Office of Workers' Compensation Programs.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

National Endowment for the Arts, Public Partnership Advisory Panel; Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), as amended, notice is hereby given that a meeting of the Office of Public Partnership Advisory Panel (Local Programs Section) to the National Council on the Arts which is being held on December 8, 1988, from 8:30 a.m.–5:30 p.m. and December 9, 1988, from 8:30 a.m.–4:00 p.m. in Room MO9 of the Nancy Hanks Center, 1100 Pennsylvania Avenue, NW., Washington, DC 20506 has been changed.

As you were previously notified, a portion of the meeting is to be open to the public on December 9, 1988, from 2:00–4:00 p.m. for a policy discussion.

Also as previously reported, a session of this meeting on December 9, 1988 from 8:30 a.m.–2:00 p.m. is for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including information given in confidence to the agency by grant applicants. In addition, a session on December 8, 1988, from 8:30 a.m.–5:30 p.m. will also be for the same purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1865, as amended, including information given in confidence to the agency by grant applicants. In accordance with the determination of the Chairman published in the **Federal Register** of February 13, 1980, these sessions will be closed to the public pursuant to subsections (c)(4), (6) and (9)(b) of section 552b of Title 5, United States Code.

If you need special accommodations due to a disability, please contact the Office for Special Constituencies, National Endowment for the Arts, 1100 Pennsylvania Avenue, NW., Washington, DC 20506, 202/682–5532, TTY 202/682–5496, at least seven (7) days prior to the meeting.

Further information with reference to this meeting can be obtained from Ms. Yvonne M. Sabine, Advisory Committee Management Officer, National Endowment for the Arts, Washington, DC 20506, or call 202/682–5433.

Yvonne M. Sabine,

Director, Council and Panel Operations, National Endowment for the Arts.

BILLING CODE 7537–01–M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–458]

Gulf States Utilities Co.; Consideration of Issuance of Amendment to Facility Operating License and Opportunity for Hearing

The United States Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF–47, issued to Gulf States Utilities Company (the licensee), for operation of the River Bend Station, Unit 1 located in West Feliciana Parish, Louisiana.

The amendment would delete the License Condition 2.C.(4), Attachment 2, Item 1 requirement to install an additional brace on the control rod drive hydraulic control units as used in the qualification testing in accordance with the licensee's application for amendment dated November 9, 1988.

Prior to issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

By January 2, 1989, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petiton for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the

Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition, and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceedings, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene shall be filed with the Secretary of the Commission, United States Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 2120 L Street NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner or representative for the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1-800-325-6000 (in Missouri 1-800-342-6700). The Western Union operator should be given Datagram identification Number 3737 and the following message addressed to Jose A. Calvo: Petitioner's name and telephone number; date Petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Troy B. Conner, Jr., Esq., Conner and Wetterhahn, 1747 Pennsylvania Avenue NW., Washington, DC 20006, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board, that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714 (a)(1)(i) through (v) and 2.714(d).

If a request for hearing is received, the Commission's staff may issue the amendment after it completes its technical review and prior to the completion of any required hearing if it publishes a further notice for public comment of its proposed finding of no significant hazards consideration in accordance with 10 CFR 50.91 and 50.92.

For further details with respect to this action, see the application for amendment dated November 9, 1988, which is available for public inspection at the Commission's Public Document Room, 2120 L Street NW., Washington, DC and at the Local Public Document Room, Government Documents Department, Louisiana State University, Baton Rouge, Louisiana 70803.

Dated at Rockville, Maryland, this 22nd day of November 1988.

For the Nuclear Regulatory Commission.

Jose A. Calvo,

Director, Project Directorate—IV, Division of Reactor Projects—III, IV, V and Special Projects, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-M

[Docket No. 50-458]

Gulf States Utilities Co.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 31 to Facility Operating License No. NPF-47, issued to Gulf States Utilities Company, (the licensee), which revised the Technical Specifications for operation of the River Bend Station, Unit 1, located in West Feliciana Parish, Louisiana.

The amendment was effective as of the date of its issuance.

The amendment revised the Technical Specifications to allow single recirculation loop operation.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter 1, which are set forth in the license amendment.

The Notice of Consideration of Issuance of Amendment was published in the **Federal Register** on May 13, 1988 (53 FR 17131). No request for a hearing or petition for leave to intervene was filed following the notices.

The Commission has prepared an Environmental Assessment related to the action and has determined not to prepare an environmental impact statement. Based upon the environmental assessment, the Commission has concluded that the issuance of this amendment will not have a significant effect on the quality of the human environment.

For further details with respect to the action, see: (1) The application for amendment dated April 6, 1988, as supplemented October 20, 1988; (2) Amendment No. 31 Facility Operating License No. NPF-47; and (3) the Commission's related Safety Evaluation and Environmental Assessment. All of these items are available for public inspection at the Commission's Public Document Room, 2120 L Street NW., Washington, DC 20555; at Government Documents Department, Louisiana State

University, Baton Rouge, Louisiana 70803. A copy of items (3) and (4) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Reactor Projects-II, IV, V and Special Projects.

Dated at Rockville, Maryland this 22nd day November, 1988.

For the Nuclear Regulatory Commission.

Walter A. Paulson, Project Manager,

Project Directorate-IV, Division of Reactor Projects–III, IV, V and Special Projects, Office of Nuclear Reactor Regulation.

[FR Doc. 88–27791 Filed 12–1–88; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–416]

Mississippi Power and Light Co., System Energy Resources, Inc., and South Mississippi Electric Power Association; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF–29 issued to Mississippi Power and Light Company, System Energy Resource, Inc., and South Mississippi Electric Power Associates, (the licensees), for operation of the Grand Gulf Nuclear Station (GGNS), Unit 1, located in Caliborne County, Mississippi.

Environmental Assessment

Identification of Proposed Action

The proposed amendment would change the Technical Specifications (TS) by separating the 24-hour surveillance test of emergency diesel generators from the surveillance test simulating a loss of offsite power in conjunction with an ECCS actuation signal.

The proposed action is in accordance with the licensees' application for amendment dated July 26, 1988.

The Need for the Proposed Action

The proposed change is needed to permit flexibility in scheduling surveillance tests during refueling outages. Present TS required that the loss of offsite power test be initiated within five minutes of completing the 24-hour test. The proposed TS would allow separate tests provided a warmup period to achieve operating temperatures preceded the loss of offsite power tests.

Environmental Impacts of the Proposed Action

The Commission has completed its evaluation of the proposed change to TS and has concluded that the proposed TS would provide a level of safety at least equivalent to the present TS. Therefore, the proposed amendment does not significantly increase the probability or consequences of any accident. The Commission also concludes that the amendment involves no significant increase in the amounts and no significant change in the types of any effluents that maybe released offsite and that there should be no significant increase in individual or cumulative occupational radiation exposure. Accordingly, the Commission concludes that this proposed action would result in no significant radiological environmental impact.

With regard to potential non-radiological impacts, the proposed change to the TS involves requirements with respect to installation or use of a facility component located with the restricted area as defined in 10 CFR Part 20. It does not affect non-radiological plant effluents and has no other environmental impact. Therefore, the Commission concludes that there are no significant non-radiological environmental impacts associated with the proposed amendment.

Alternative to the Proposed Action

Since the Commission concludes that there are no significant environmental effects that woud result from the proposed action, any alternatives with equal or greater environmental impacts need not be evaluated.

The principal alternative would be to deny the requested amendment. This would not reduce environmental impacts of plant operation and would result in reduced operational flexibility.

Alternative Use of Resources

This action does not involve the use of any resources not previously considered in the Final Environmental Statement related to the operation of "Grand Gulf Nuclear Station, Units 1 and 2," dated September 1981.

Agencies and Persons Consulted

The NRC staff reviewed the licensee's request and did not consult other agencies or persons.

Finding of No Significant Impact

The Commission has determined not to prepare an environmental impact statement for the proposed license amendment.

Based upon the foregoing environmental assessment, we conclude that the proposed action will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see the application for amendment dated July 26, 1988, which is available for public inspection at the Commission's Public Document Room 2120 L Street, NW., Washington, DC 20555 and at the Hinds Junior College, McLendon Library, Raymond, Mississippi 39154.

Dated at Rockville, Maryland, this 28th day of November 1988.

For the Nuclear Regulatory Commission.

Elinor G., Adensam,

Director, Project Directorate II–1, Division of Reactor Projects I/II.

[FR Doc. 88–27792 Filed 12–1–88; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–416]

Mississippi Power and Light Co., System Energy Resources, Inc., and South Mississippi Electric Power Association; Environment Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF–29 issued to Mississippi Power and Light Company, System Energy Resources, Inc. (SERI), and South Mississippi Electric Power Associates, for operation of the Grand Gulf Nuclear Station (GGNS), Unit 1, located in Claiborne County, Mississippi.

Environmental Assessment

Identification of Proposed Action

The proposed amendment would change the Operating License (OL) by changing the schedule for implementing the recommendations of Regulatory Guide 1.97 for monitoring neutron flux in the reactor following an accident.

The proposed action is in accordance with SERI's application for amendment dated July 1, 1988.

The Need for the Proposed Action

The proposed change to the OL is required in order to allow adequate time to effectively plan, design and install a neutron flux monitoring system according to the recommendations of Regulatory Guide 1.97.

Environmental Impacts of the Proposed Action

The Commission has completed its evaluation of the proposed delay in the installation of a post-accident qualified neutron flux monitoring system and has concluded that the delay would not significantly affect plant safety. During the initial phase of an accident, the existing neutron flux monitoring system would provide direct information on reactor power. Long-term post-accident information regarding reactor power can be deducted from other post-accident qualified instrumentation, such as control rod position indication, reactor pressure, suppression pool temperature, and safety relief valve actuation. Therefore, the proposed amendment does not significantly increase the probability or consequences of any accident. The Commission also concludes that the amendment involves no significant increase in the amounts and no significant change in the types of any effluents that may be released offsite and that there should be no significant increase in individual or cumulative occupational radiation exposure. Accordingly, the Commission concludes that this proposed action would result in no significant radiological environmental impact.

With regard to potential non-radiological impacts, the proposed change involves requirements with respect to installation or use of a facility component located within the restricted area as defined in 10 CFR Part 20. It does not affect non-radiological plant effluents and has no other environmental impact. Therefore, the Commission concludes that there are no significant non-radiological environmental impacts associated with the proposed amendment.

Alternative to the Proposed Action

Since the Commission concluded that there are no significant environmental effects that would result from the proposed action, any alternatives with equal or greater environmental impacts need not be evaluated.

The principal alternative would be to deny the requested amendment. This would not reduce environmental impacts of plant operation and would result in reduced operational flexibility.

Alternative Use of Resources

The action does not involve the use of any resources not previously considered in the Final Environmental Statement related to the operation of Grand Gulf Nuclear Station, Units 1 and 2, dated September 1981.

Agencies and Persons Consulted

The NRC staff reviewed SERI's request and did not consult other agencies or persons.

Finding of No Significant Impact

The Commission has determined not to prepare an environmental impact statment for the proposed license amendment.

Based on the foregoing environmental assessment, we conclude that the proposed action will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see the application for amendment dated July 1, 1988, which is available for public inspection at the Commission's Public Document Room, 2120 L Street, NW, Washington, DC 20555 and at the Hinds Junior College, McLendon Library, Raymond, Mississippi 39154.

Dated at Rockville, Maryland, this 28th day of November, 1988.

For the Nuclear Regulatory Commission.

Elinor G. Adensam,

Director, Project Directorate II-1, Division of Reactor Projects I/II.

SECURITIES AND EXCHANGE COMMISSION

[Rel. No. IC-16657; (811-3058)]

Equitable Money Market Account, Inc.; Application

November 28, 1988.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of application for de-registration under the Investment Company Act of 1940 (the "1940 Act").

Applicant: Equitable Money Market Account, Inc.

Relevant 1940 Act Section: Section 8(f) and Rule 8f-1 thereunder.

Summary of Application: Applicant requests an order under section 8(f) of the 1940 Act declaring that it has ceased to be an investment company.

Filing Dates: The application was filed on October 18, 1988.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a

hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on December 23, 1988. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicant with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit or, for attorneys, by certificate. Request with proof of service by affidavit or, for attorneys, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 Fifth Street NW., Washington, DC 20549; Applicant, 1345 Avenue of the Americas, New York, NY 10105.

FOR FURTHER INFORMATION CONTACT: James E. Banks, Staff Attorney (202) 272–2190, or Brion R. Thompson, Branch Chief (202) 272–3016 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person, or the SEC's commercial copier (800) 231–3282 (in Maryland (301) 258–4300).

Applicant's Representations

1. On May 7, 1980, Applicant registered under the 1940 Act as an open-end, diversified management investment company. Applicant filed a registration statement pursuant to the Securities Act of 1933 (the "1933 Act") on May 7, 1980, which registered an indefinite number of shares of its $.001 par value common stock. The registration statement became effective on October 16, 1980, and the initial public offering commenced shortly thereafter.

2. Applicant was organized as a Maryland corporation. On August 28, 1987, Applicant filed Articles of Dissolution with the Maryland State of Assessments and Taxation terminating its existence as a Maryland corporation. The Articles of Dissolution became effective upon filing.

3. On November 17, 1986, Applicant's Board of Directors approved an Agreement and Plan of Reorganization and Liquidation ("Plan") providing for (i) the sale of substantially all the assets of the Applicant's General Purpose portfolio to Alliance Capital Reserves Inc. (File No. 811–2835) in exchange for shares of beneficial interest of Alliance Capital Reserves to be distributed to shareholders of the General Purpose portfolio on the basis of their relative net asset values per share, (ii) the sale of substantially all the assets of Applicant's Government Securities portfolio to Alliance Government Reserves Inc. (File No. 811–2889) in exchange for shares of beneficial interest of Alliance Government Reserves to be distributed to shareholders of the Government Securities portfolio on the basis of their relative net asset value per share, and (iii) the subsequent dissolution of Applicant. Separate registration statements on Form N–14 were filed on December 22, 1986, registering the shares of beneficial interest of Alliance Capital Reserves and Alliance Government Reserves to be distributed pursuant to the Plan (File Nos. 33–10824 and 33–10828) ("Registration Statements"). The Registration Statements became effective on January 23, 1987. The Plan and the terms of the reorganization are set forth in those Registration Statements, which are incorporated by reference into the application.

4. On January 21, 1987, the respective Board of Trustees of Alliance Capital Reserves and Alliance Government Reserves approved the reorganization. Applicant's Board of Directors determined at their meeting that the reorganization was in Applicant's best interests and that the interests of its shareholders would not be diluted as a result of the reorganization. Accordingly, Applicant's Board recommended that the Plan be submitted to its shareholders for their approval.

5. On January 29, 1987, Applicant mailed a Prospectus/Proxy Statement forming a part of said Registration Statements to its shareholders of record. On February 27, 1987, a majority of the shareholders of the General Purpose and Government Securities Portfolios approved the Plan and subsequent dissolution of the Applicant.

6. On March 3, 1987, Applicant's reorganization and subsequent dissolution was consumated. The total number of shares of Alliance Capital Reserves distributed was 170,706,774, with an aggregate net asset value on such date of $170,706,774. The total number of shares of Alliance Government Reserves distributed was 5,648,931, with an aggregate net asset value on such date of $5,648,931.

7. Expenses of approximately $76,976 were incurred in connection with the reorganization, and consisted primarily of legal, printing and accounting costs. Alliance Capital Management Corporation, the Applicant's investment adviser, assumed these expenses.

8. Applicant does not have any shareholders and does not have any assets or liabilities which remain outstanding. Applicant is not a party to any litigation or administrative proceeding, and does not propose to engage in any business activities other than those necessary for the winding-up of its affairs.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

Applicant's Representations

1. On March 10, 1983, Applicant registered under the 1940 Act as an open-end, diversified management investment company. Applicant filed a registration statement pursuant to the Securities Act of 1933 (the "1933 Act") on March 10, 1983, which registered an indefinite number of shares of its $.001 par value common stock. The registration statement became effective on June 15, 1983, and the initial public offering commenced shortly thereafter.

2. Applicant was organized as a Maryland corporation. On August 28, 1987, Applicant filed Articles of Dissolution with the Maryland State Department of Assessments and Taxation terminating its existence as a Maryland corporation. The Articles of Dissolution became effective upon filing.

3. On November 17, 1986, Applicant's Board of Directors approved an Agreement and Plan of Reorganization and Liquidation ("Plan") providing for (i) the sale of substantially all of Applicant's assets to the General portfolio of Alliance Tax-Exempt Reserve Inc. (File No. 811–3586) in exchange for shares of beneficial interest of Alliance's General portfolio to be distributed to Applicant's shareholders on the basis of their relative net asset values per share, and (ii) Applicant's subsequent dissolution. A registration statement on Form N–14 was filed on December 22, 1986, registering the shares of beneficial interest of Alliance's General portfolio, which were distributed to the shareholders pursuant to the Plan (File No. 33–10825) ("Registration Statement"). The Registration Statement became effective on January 23, 1987. The Plan and the terms of the reorganization are set forth in the Registration Statement, which is incorporated by reference into the application.

4. On January 21, 1987, Alliance's Board of Trustees approved the reorganization. Applicant's Board of Directors determined at their meeting that the reorganization was in Applicant's best interests and that the interests of its shareholders would not be diluted as a result of the reorganization. Accordingly, Applicant's Board recommended that the Plan be submitted to Applicant's shareholders for their approval. On January 29, 1987, a Prospectus/Proxy Statement forming a part of the Registration Statement was mailed to Applicant's shareholders of record. On February 27, 1987, a majority of the Applicant's shareholders approved the Plan. Pursuant to the Plan, on March 3, 1987, Applicant transferred all its assets to Alliance's General Portfolio in exchange for shares of beneficial interest of the Alliance's General Portfolio. All of the shares of Alliance's General Portfolio received by Applicant were thereafter distributed to Applicant's shareholders in liquidation. The number of shares received by Applicant's shareholders was based on the relative net assets values per share of Applicant and Alliance's General Portfolio at the effective time of the reorganization, in accordance with the exchange ratio set forth in section 2(a) of the Plan. The total number of shares distributed was 14,208,536 with an aggregate net asset value on such date of $14,208,536.

5. Expenses of approximately $76,976 were incurred in connection with the reorganization, and consisted primarily of legal, printing and accounting costs. Alliance Capital Managment Corporation, the Applicant's investment adviser, assumed these expenses.

6. Applicant does not have any shareholders and does not have any assets or liabilities which remain outstanding. Applicant is not a party to any litigation or administrative proceeding, and does not propose to engage in any business activities other than those necessary for the winding-up of its affairs.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 4710–01–M

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

Petition for Waiver of Compliance; Consolidated Rail Corp.

In accordance with 49 CFR 211.9 and 211.41, notice is hereby given that the Federal Railroad Administration (FRA) has received a request for a waiver of compliance with a requirement of its railroad safety standards. The individual petition is described below, including the party seeking relief, the regulatory provision involved, and the nature of the relief being requested.

Consolidated Rail Corporation

Waiver Petition Docket Number SA–88–6

The Consolidated Rail Corporation (Conrail) requests a waiver of compliance with certain provisions of the safety appliance regulations (49 CFR Part 231). Conrail seeks a waiver of compliance with § 231.29, which incorporates by reference § 231.30(e)(2)(ii). The latter stipulates that, "On locomotives built before April 1, 1977, each vertical handhold must • • • Begin not less than five (5) inches nor more than thirty-two (32) inches above the safety tread surface • • •." Conrail is requesting a temporary waiver of compliance of 180 days' duration for its U23B class of locomotives numbered from 2700 to 2788, which have vertical handholds that begin at a point which is thirty-five (35) inches above the safety tread surface.

Conrail states that the subject locomotives were manufactured by the

General Electric Company in the time period of 1971 to 1974, with vertical handholds measuring thirty-five (35) inches above the switching step safety tread. The carrier is basing its petition on the fact that it knows of no reported injuries related to this deficiency over the 17 years that the locomotives have been in service. Conrail plans to fabricate new vertical handholds of increased length, to be applied at the various maintenance terminal locations within the 180-day time period.

Based on Conrail's presentation, FRA has tentatively approved Conrail's petition and granted an interim waiver of 180 days, permitting the carrier to begin the retrofitting of vertical handholds on the subject locomotives, while its petition is being announced for public comment, considered by FRA, and finally resolved.

Interested parties are invited to participate in this proceeding by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with this proceeding since the facts do not appear to warrant a hearing. If any interested parties desire an opportunity for oral comment, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

All communications concerning these proceedings should identify the appropriate docket number (here, Waiver Petition Docket Number SA–88–6) and must be submitted in triplicate to the Docket Clerk, Office of Chief Counsel, Federal Railroad Administration, Nassif Building, 400 Seventh Street, SW., Washington, DC 20590. Communications received before January 18, 1989 will be considered by FRA before final judgment is taken. Comments received after that date will be considered as far as practicable. All written communications concerning these proceedings are available for examination during regular business hours (9 a.m. to 5 p.m.) in Room 8201, Nassif Building, 400 Seventh Street, SW., Washington, DC 20590.

Issued in Washington, DC, on November 18, 1988.

J. W. Walsh,

Associate Administrator for Safety.

[FR Doc. 88–27774 Filed 12–1–88; 8:45 am]

BILLING CODE 4910–06–M

Petitions for Exemption or Waiver; Long Island Rail Road Co.

In accordance with 49 CFR 211.9 and 211.41, notice is hereby given that two railroads have petitioned the Federal Railroad Administration (FRA) for a waiver of compliance with certain requirements of the regulations entitled Hours of Service of Railroad Employees (49 CFR Part 228).

Long Island Rail Road Company (LIRR)

[FRA Waiver Petition Docket No. HS–88–22]

The LIRR seeks a permanent waiver of compliance with 49 CFR 228.17(a)(5), which requires that "Each carrier shall keep, for each dispatching district, a record of train movements made under the direction and control of a dispatcher who uses telegraph, telephone, radio, or any other electrical or mechanical device to dispatch, report, transmit, receive, or deliver orders pertaining to train movements. The following information shall be included in the record:

* * * Identification of enginemen and conductors and their times on duty * * *"

The LIRR states that it seeks this waiver of the records requirement of the Hours of Service of Railroad Employees because it currently operates over 800 passenger, equipment and freight trains daily, utilizing approximately 295 train and engine crews. The LIRR also states that it operates a 24-hour, 7-day-a-week centralized crew dispatchers' office which can provide the information required by 49 CFR 228.17(a)(5) in a matter of minutes, through a dedicated intercom system from the Chief Train Dispatcher to the crew dispatchers' office. The LIRR feels that due to the high volume of train traffic and their ability to track train and engine crews, that the burden of recordkeeping and reporting is excessive for the carrier's operation. The petitioner indicates that granting the exemption is in the public interest and will not adversely affect safety.

New Jersey Transit Rail Operations (NJTR)

[FRA Waiver Petition Docket No. HS–88–24]

New Jersey Transit Rail Operations seeks a permanent waiver of compliance with 49 CFR 228.17(a)(4), which requires that "Each carrier shall keep, for each dispatching district, a record of train movements made under the direction and control of a dispatcher who uses telegraph, telephone, radio, or any other electrical or mechanical device to dispatch, report, transmit, receive, or deliver orders pertaining to train movements. The following information shall be included in the record:

* * * Weather conditions at 6-hour intervals * * *"

NJTR states that it seeks this waiver of the records requirement of the Hours of Service of Railroad Employees because it currently has realized a substantial reduction of operators across the system as a result of rationalization projects. A total of 49 operator positions were abolished resulting in a loss of personnel, at initial and final terminals and other locations, who previously furnished the weather conditions in compliance with the regulation.

NJTR, realizing the importance of weather extremes as they relate to rail operations, contracts with a weather forecasting service from December 1 to May 1 of each year. Arrangements have been made with the forecasting service to divide the State of New Jersey into seven climatological zones, including southern New York State. The weather service furnishes reports twice daily, via telecopier, to the Chief Train Dispatcher's Officer. The daily reports are supplemented by warnings as necessary. NJTR further states that reporting by/ meteorolgists is vastly superior to reporting by operators; for example, an operator can read the temperature on the thermometer and observe overcast skies, but he is normally unaware that the zone is experiencing heavy snow fall, sleet or other extremes 10 miles from his location.

In addition, NJTR states that during other periods of the year, weather extremes are rare. Any impending storm is tracked by the Train Dispatcher's Officer utilizing the local weather bureau forecast for the area involved. During the period December 1 to May 1 of each year, the weather reports will be made part of the computerized train sheets and retained in compliance with FRA regulations. The petitioner indicates that granting the waiver is in the public interest and will not adversely affect safety.

Interested persons are invited to participate in these proceedings by submitting written views and comments. FRA has not scheduled an opportunity for oral comment since the facts do not appear to warrant it. If any interested party desires an opportunity for oral comment, he or she should notify FRA, in writing, before the end of the comment period and specify the basis for his or her request. Any communications concerning these proceedings should identify the appropriate docket number (here, Waiver Petition Docket Number HS–88–22 or Waiver Petition Docket Number HS–88–23) and must be submitted in triplicate to the Docket Clerk, Office of Chief Counsel, Federal Railroad Administration, Nassif Building, 400 Seventh Street, SW., Washington, DC 20590.

Communications received before January 18, 1989, will be considered by FRA before final action is taken. Comments received after that date will be considered as far as practicable. All comments received will be available for examination both before and after the closing date for comments during regular business hours (9 a.m.—5 p.m.) in Room 8201, Nassif Building, 400 Seventh Street, SW., Washington, DC 20590.

Issued in Washington, DC on November 18, 1988.

J.W. Walsh,

Associate Administrator for Safety.

[FR Doc. 88-27775 Filed 12-1-88; 8:45 am]

BILLING CODE 4910-06-M

Petitions for Exemption or Waiver; Sierra Railroad Co.

In accordance with 49 CFR 211.9 and 211.41, notice is hereby given that one railroad has petitioned the Federal Railroad Administration (FRA) for a waiver of compliance with the provisions of the Hours of Service Act (83 Stat. 464, Pub. L. 91-169, 45 U.S.C. 64a(e)).

The Hours of Service Act currently makes it unlawful for a railroad to require specified employees to remain on duty for a period in excess of 12 hours. However, the Hours of Service Act contains a provision that permits a railroad which employs not more than 15 employees who are subject to the statute to seek an exemption from the 12-hour limitation.

Sierra Railroad Company (SERA)

[FRA Waiver Petition Docket No. HS-8-23]

The SERA seeks this exemption so that it may permit certain employees to remain on duty not more than 16 hours in any 24-hour period. The SERA states that it is not its intention to employ a train crew over 12 hours per day under normal operating conditions, but that, if granted, this exemption would help its operation if it encountered unusual operating conditions or circumstances. The SERA provides service on over 49 miles of track from a connection with the Southern Pacific Transportation Company and The Atchison, Topeka and Santa Fe Railway Company at Oakdale, California, to Standard, California. Operations are based at Sonora, California.

The petitioner indicates that granting the exemption is in the public interest and will not adversely affect safety. Additionally, the petitioner asserts that it employs not more than 15 employees and has demonstrated good cause for granting this exemption.

Interested persons are invited to participate in these proceedings by submitting written views and comments. FRA has not scheduled an opportunity for oral comment since the facts do not appear to warrant it. If any interested party desires an opportunity for oral comment, he or she should notify FRA, in writing, before the end of the comment period and specify the basis for his or her request. Any communications concerning these proceedings should identify the appropriate docket number (e.g., Waiver Petition Docket Number HS-87-20) and must be submitted in triplicate to the Docket Clerk, Office of Chief Counsel, Federal Railroad Administration, Nassif Building, 400 Seventh Street, SW., Washington, DC 20590.

Communications received before January 18, 1989, will be considered by FRA before final action is taken. Comments received after that date will be considered as far as practicable. All comments received will be available for examination both before and after the closing date for comments during regular business hours (9 a.m.—5 p.m.) in Room 8201, Nassif Building, 400 Seventh Street, SW., Washington, DC 20590.

Issued in Washington, DC, on November 18, 1988.

J.W. Walsh,

Associate Administrator for Safety.

DEPARTMENT OF THE TREASURY

Public Information Collection Requirements Submitted to OMB for Review

Date: November 28, 1988.

The Department of Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Pub. L. 96-511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, Room 2224, 15th and Pennsylvania Avenue, NW., Washington, DC 20220.

Alcohol, Tobacco and Firearms

OMB Number: 1512-0059.
Form Number: ATF F 5120.29 (698 Supplemental).
Type of Review: Extension.
Title: Bonded Wineries-Formula and Process for Wine, Letterhead Applications and Notices Relating to Operations.
Description: ATF F 5120.29 is completed by proprietors of bonded wineries who intend to produce wine, to ensure that the formulas and processes used in the production of wine are in accordance with the regulations of the Federal Alcohol Administration Act and the Internal Revenue Code.
Respondents: Businesses or other for-profit, and Small businesses or organizations.
Estimated Number of Respondents: 832.
Estimated Burden Hours Per Response: 1 hour and 50 minutes.
Frequency of Response: On occasion.
Estimated Total Reporting Burden: 1,520 hours.

OMB Number: 1512-0116.
Form Number: ATF F 2145 (5200.11).
Type of Review: Extension.
Title: Notice of Release/Return of Tobacco Products, Cigarette Papers and Tubes.
Description: ATF F 2145 (5200.11) documents the removal or return of tobacco products, without payment of tax from U.S. Customs custody or return by a U.S. Government agency to bonded tobacco products factories and manufacturers of cigarette papers and tubes. The form identifies the establishment that is responsible for the tax on tobacco articles, products released from Customs custody, products returned and the authorizing Government official.
Respondents: Businesses and other for-profit, Federal agencies or employees, and Small businesses or organizations.
Estimated Number of Respondents: 153.
Estimated Burden Hours Per Response: 15 minutes.
Frequency of Response: On occasion.
Estimated Total Reporting Burden: 306 hours.

OMB Number: 1512.0392.
Form Number: ATF REC 5190/1.
Type of Review: Extension.
Title: Record of Things of Value Furnished to Retailers Under the Federal Alcohol Administration Act.
Description: These records (bills of sale, invoices) are used to show compliance with provisions of the Federal Alcohol Administration Act which prevents wholesalers, producers, or importers from giving things of value to retail liquor dealers. These records are commercial invoices showing the furnishing of goods to retailers.

Respondents: Individuals or housholds, Businesses or other for-profit and Small businesses or organizations.

Estimated Number of Recordkeepers: 12,665.

Estimated Burden Hours Per Recordkeeper: 1 hour.

Frequency of Response: On occasion.

Estimated Total Reporting Burden: 1 hour.

Clearance Officer: Robert Masarsky (202) 566–7077, Bureau of Alcohol, Tobacco and Firearms, Room 7011, 1200 Pennsylvania Avenue, NW., Washington, DC 20226.

OMB Reviewer: Milo Sunderhauf (202) 395–6880, Office of Management and Budget, Room 3208, New Executive Office Building, Washington, DC 20503.

BILLING CODE 4810–25–M

Office of Foreign Assets Control

Issuance by Government of Japan of Certificates Verifying Non-Cuban Origin of Nickel-Bearing Materials Manufactured by Certain Japanese Steel Corporations

AGENCY: Department of the Treasury.

ACTION: Notice.

FOR FURTHER INFORMATION CONTACT: Ms. Jan Brown, Senior Enforcement Policy Analyst, Office of Foreign Assets Control, Treasury Department, 1331 G Street, NW., Washington, DC 20220, tel.: 202/376–0431.

Certificates of origin are now available for importation into the United States from Japan of nickel-bearing materials produced by the Shunan Works of Nisshin Steel Corporation. These certificates are issued pursuant to an arrangement between the Government of Japan and the Government of the United States. The certificates, which are issued by the Japanese Ministry of International Trade and Industry, attest that the materials with respect to which they are issued do not contain nickel of Cuban origin. Each certificate will bear the following statement:

"The Ministry of International Trade and Industry (MITI) hereby certifies that the nickel-bearing products described herein do not contain nickel of Cuban origin and that this certificate has been issued in accordance with procedures administered by MITI to which prior consent was given by the Government of the United States on June 27, 1983." Each certificate shall bear as a footnote the statement: "Issued in connection with the United States Cuban Assets Control Regulations."

Nickel-bearing material produced by the Shunan Works of the Nisshin Steel Corporation may be imported under the general license in § 515.536(c) of the Cuban Assets Control Regulations (31 CFR Part 515) in accordance with the provisions of that section and of § 515.808 of the Regulations. Such merchandise will be permitted entry through United States Customs if a certificate of origin as described above and issued by MITI is presented to the U.S. Customs authorities at the point of entry. Nickel bearing material produced by other Japanese steel producers is not required to be accompanied by a certificate as a condition for entry into the United States.

(Sec. 5, 40 Stat. 415, as amended, 50 U.S.C. App. 5; Sec. 620(a), 75 Stat. 445, 22 U.S.C. 2370(a); Proc. 3447, 27 FR 1085, 3 CFR 1959–1963 Comp.; E.O. 9193, 7 FR 5205, 3 CFR Comp. Supp. p. 1174; E.O. 9989, 13 FR 4891, 3 CFR 1943–1948 Comp., p. 748)

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 737

Post Employment Conflict of Interest

AGENCY: Office of Personnel Management.

ACTION: Final regulation.

SUMMARY: The Office of Personnel Management is issuing a final regulation under the Ethics in Government Act of 1978 which (1) designates certain positions subject to the post employment conflict of interest regulations applicable to "Senior Employees," and (2) designates certain statutory and non-statutory agencies/bureaus for the purpose of limiting the application of the post employment rules which prohibit, for one year after leaving Government service, a former high-level "senior employee" from representing anyone in an attempt to influence his or her former agency on a matter pending before, or of substantial interest to, such agency.

EFFECTIVE DATE: December 2, 1988.

ADDRESS: Office of Government Ethics, P.O. Box 14108, Washington, DC 20044.

FOR FURTHER INFORMATION CONTACT: Karen Bovard or Robert Flynn at (202) 632-7642.

SUPPLEMENTARY INFORMATION: Subsection 207(d)(1)(C) of Title 18 U.S.C., contained in Title V of the Ethics in Government Act of 1978, as amended, ("the Act"), (Pub. L. 95-521), gives the Director of the Office of Government Ethics ("OGE") authority to designate (1) certain employee positions for purposes of the restrictions of 18 U.S.C. subsections 207(b)(ii) and 207(c), and (2) agencies and bureaus, within a parent department or agency, having separate and distinct subject matter jurisdiction; i.e., "separate non-statutory agencies/bureaus." Regulations implementing this authority were published on February 1, 1980 (45 FR 7402). Those regulations designated as "Senior Employees" all employees in a position in any pay system for which the basic rate of pay is equal to or greater than that for GS-17 of the General Schedule, as prescribed by 5 U.S.C. 5332, or positions which are established within the Senior Executive Service (SES) pursuant to the Civil Service Reform Act of 1978, subject to specific exemptions to be made by OGE. The regulations also set forth those separate statutory (18 U.S.C. 207(e)) agencies and bureaus and those separate non-statutory agencies/bureaus (18 U.S.C. 207(d)(1)(C)) as determined by the Director, OGE, to be qualified for designation at the time of publication.

Regarding "Senior Employee" designations, upon review of agency recommendations, made pursuant to the requirement set forth in 5 CFR 737.25(b)(1), the Director, OGE, determined that only those non-exempted positions, i.e., those subject to the prohibitions of 18 U.S.C. 207(b)(ii) and (c), would be published in the **Federal Register.** A partial list of such "designated" positions was contained in the February 1, 1980, **Federal Register** publication (45 FR 7402). That list was followed by another partial list which was published on February 8, 1980 (45 FR 8544). Annual amendments to the list were published on November 14, 1980 (45 FR 75500); March 5, 1982 (47 FR 9694); February 25, 1983 (48 FR 8188); March 15, 1984 (49 FR 9808); July 31, 1985 (50 FR 31096); July 16, 1986 (51 FR 25645); and November 12, 1987 (52 FR 43442). The combined lists represented all 18 U.S.C. 207(d)(1)(C) positions which were not exempted by the Director, OGE. This regulation consolidates and amends the previously published lists and is based upon a review of agency annual submissions made pursuant to 5 CFR 737.25(b)(1). All positions designated pursuant to 5 U.S.C. 207(d)(1)(C) not previously designated are marked by an asterisk. In accordance with 5 CFR 737.25(d), designation of such positions shall not become effective until the last day of the fifth full calendar month after this publication.

Section 737.25 of the final regulations sets forth the standards and procedures to be applied in determining which positions shall be designated. OGE also issued a memorandum to heads of departments, independent agencies, commissions and Government corporations/designated agency ethics officials dated April 26, 1979, giving additional information and guidance on this subject. Section 737.11 sets forth the standards and procedures to be applied in determining which separate statutory and non-statutory agencies and bureaus shall be designated.

The Director, OGE, in consultation with each department and agency concerned, has determined that the positions set forth below qualify for designation as "Senior Employee" positions. 5 CFR 737.33 is hereby amended accordingly. The Director has further determined, in consultation with each department or agency concerned, the separate statutory and non-statutory agencies/bureaus set forth below qualify for such designation.

The "Senior Employee" positions listed constitute all such positions designated under the provisions of subsection 207(d)(1)(C) of title 18 U.S.C. for the departments and agencies listed. In accordance with 5 CFR 737.25(d), subsequent designation of positions within the department or agencies listed shall not be effective until the last day of the fifth full calendar month after the first publication of a notice by the Director, OGE, of intention to so designate. Such fair notice shall not apply to subsequent designations made under the rule concerning position shifting set forth in 5 CFR 737.25(i).

In several cases, a position in one agency has been designated while a position of similar title in another has not. OGE has, in the exercise of its discretion, accorded some deference to the decision of a department or agency to designate a position where that decision was in favor of designation above minimum OGE standards. As OGE conducted the review necessary for these designations, it became apparent that, because of the subject matter of a department's or agency's business, the gravity of the "revolving door" problems varied significantly from agency to agency. Moreover, positions which were ostensibly similarly titled and described nevertheless had different roles from agency to agency. Also, OGE believes it desirable that the balance between post employment restrictions and impact on recruiting and retention be adjudged on an agency level, as long as minimum standards are met.

Positions automatically designated by 18 U.S.C. 207(d)(1) (A) and (B) are not included in this publication.

This is a final not a proposed regulation. The Director of the Office of Government Ethics, acting pursuant to 5 U.S.C. 553(b)(3)(A), has found good cause for waiving the general notice of proposed rulemaking and the 30 day delay in effectiveness. This regulation is interpretive in nature, exempt from 5 U.S.C. 553.

E.O. 12291, Federal Regulation

OGE has determined that this is not a major rule as defined under section 1(B) of E.O. 12291.

Regulatory Flexibility Act

I certify that this regulation will not have a significant economic impact on a substantial number of small entities, because it only effects Federal employees.

List of Subjects in 5 CFR Part 737

Conflicts of interest, Government employees.

U.S. Office of Personnel Management.

Frank Q. Nebeker,

Director, Office of Government Ethics.

Accordingly, the Office of Personnel Management is amending 5 CFR Part 737 as follows:

PART 737—[AMENDED]

1. The authority citation for Part 737 continues to read as follows:

Authority: Titles II and IV of Pub. L. 95–521 (October 26, 1978), as amended by Pub. L. 96–19 (June 13, 1979), 5 U.S.C. Appendix; Pub. L. 96–150 (November 11, 1983); 18 U.S.C. 207.

2. Section 737.31 is revised to read as follows:

§ 737.31 Separate statutory agencies: Designations.

In accordance with the provisions of 18 U.S.C. 207(e) and § 737.13, each of the following departments or agencies is determined, for purposes of 18 U.S.C. 207(c), to have within it separate statutory agencies or bureaus as set forth below:

Parent Agency: EXECUTIVE OFFICE OF THE PRESIDENT
Separate Statutory Components:
- Office of Management and Budget
- Council of Economic Advisers
- National Security Council
- United States Trade Representative
- Council on Environmental Quality
- Office of Science and Technology Policy
- Office of Administration
- White House Office and the Office of Policy Development
- Office of the Vice President

Parent Agency: DEPARTMENT OF THE TREASURY
Separate Statutory Components:
- Bureau of Alcohol, Tobacco and Firearms
- Bureau of Engraving and Printing
- Bureau of the Mint
- Comptroller of the Currency
- Internal Revenue Service
- Bureau of the Public Debt
- Financial Management Service
- United States Customs Service
- United States Secret Service

Parent Agency: FEDERAL EMERGENCY MANAGEMENT AGENCY
Separate Statutory Component: United States Fire Administration
Parent Agency: OFFICE OF PERSONNEL MANAGEMENT
Separate Statutory Component: Office of Government Ethics
Parent Agency: DEPARTMENT OF HEALTH AND HUMAN SERVICES
Separate Statutory Components:
- Food and Drug Administration
- Public Health Service
- Social Security Administration

Parent Agency: DEPARTMENT OF TRANSPORTATION
Separate Statutory Components:
- Federal Aviation Administration
- Federal Highway Administration
- Federal Railroad Administration
- Maritime Administration
- National Highway Traffic Safety Administration
- Saint Lawrence Seaway Development Corporation
- United States Coast Guard
- Urban Mass Transportation Administration

Parent Agency: DEPARTMENT OF LABOR
Separate Statutory Components:
- Bureau of Labor Statistics
- Mine Safety and Health Administration
- Occupational Safety and Health Administration

Parent Agency: DEPARTMENT OF JUSTICE
Separate Statutory Components:
- Bureau of Prisons (including Federal Prison Industries, Inc.)
- Community Relations Service
- Drug Enforcement Administration
- Federal Bureau of Investigation
- Foreign Claims Settlement Commission
- National Institute of Justice and Bureau of Justice Statistics [1]
- Immigration and Naturalization Service
- Independent Counsel
- United States Parole Commission

Parent Agency: DEPARTMENT OF DEFENSE
Separate Statutory Components:
- Department of the Army
- Department of the Navy
- Department of the Air Force
- Defense Mapping Agency

Parent Agency: DEPARTMENT OF ENERGY
Separate Statutory Component:
- Federal Energy Regulatory Commission

Parent Agency: DEPARTMENT OF COMMERCE
Separate Statutory Components:
- Economic Development Administration
- Patent and Trademark Office
- National Oceanic and Atmospheric Administration
- Bureau of the Census

Parent Agency: NATIONAL CREDIT UNION ADMINISTRATION
Separate Statutory Components:
- Central Liquidity Facility

Parent Agency: MERIT SYSTEMS PROTECTION BOARD
Separate Statutory Component:
- Office of the Special Counsel

3. Section 737.32 is revised to read as follows:

§ 737.32 Separate components of agencies or bureaus: Designations.

In accordance with the provisions of 18 U.S.C. 207(d)(1)(C) and § 737.14, each of the component agencies or bureaus as set forth below is determined, for purposes of 18 U.S.C. 207(c) and this Part 737, to be separate from the remaining agencies and bureaus of its parent agency (except such agencies and bureaus as specified):

Parent Agency: DEPARTMENT OF HEALTH AND HUMAN SERVICES
Separate Component:
- Health Care Financing Administration

[1] These two components shall not, for purposes of 18 U.S.C. 207(c), be considered separate from one another but only from other separate components of the Department of Justice.

Parent Agency: DEPARTMENT OF LABOR
Separate Components:
- Employment and Training Administration
- Employment Standards Administration

Parent Agency: DEPARTMENT OF DEFENSE
Separate Components:
- Defense Communications Agency
- Defense Intelligence Agency
- Defense Nuclear Agency
- National Security Agency
- Defense Logistics Agency

Parent Agency: DEPARTMENT OF STATE
Separate Statutory Components:
- Foreign Service Grievance Board
- International Joint Commission, United States and Canada (American Section)

Parent Agency: DEPARTMENT OF JUSTICE
Separate Statutory Components:
- Office of United States Attorney (for each judicial district (95))—however, each such Office is not designated as separate from the Office of the U.S. Marshal for the same judicial district.
- Office of the United States Marshal (for each judicial district (95))—however, each such Office is not designated as separate from the Office of the U.S. Attorney for the same judicial district.
- Antitrust Division
- Civil Rights Division
- Land and Natural Resources Division
- Tax Division
- Criminal Division
- Civil Division

Parent Agency: DEPARTMENT OF COMMERCE
Separate Components:
- International Trade Administration
- Minority Business Development Administration
- National Telecommunication and Information Administration

4. Section 737.33 is revised to read as follows:

§ 737.33 "Senior Employee" designations.

In accordance with § 737.25(b)(1), the following employee positions have been designated as "Senior Employee" positions for purposes of subsections 207(b)(ii) and (c) of Title 18, U.S.C., as amended.[2]

AGENCY: EXECUTIVE OFFICE OF THE PRESIDENT (OFFICE OF ADMINISTRATION)

Positions:

AD Director, Automated Systems Division.

AGENCY: EXECUTIVE OFFICE OF THE PRESIDENT (COUNCIL OF ECONOMIC ADVISERS)

Energy Conservation Program for Consumer Products; Proposed Rule and Notice

VOL 53 ISS 232 DE 2 1988 UMI

DEPARTMENT OF ENERGY

Office of Conservation and Renewable Energy

10 CFR Part 430

[Docket No. CE-RM-87-102]

Energy Conservation Program for Consumer Products; Proposed Rulemaking and Public Hearing Regarding Energy Conservation Standards for 3 Types of Consumer Products

AGENCY: Office of Conservation and Renewable Energy, DOE.

ACTION: Notice of proposed rule and public hearing.

SUMMARY: The Energy Policy and Conservation Act (EPCA), as amended by the National Energy Conservation Policy Act (NECPA) and the National Appliance Energy Conservation Act (NAECA), prescribes energy conservation standards for certain major household appliances, and requires the Department of Energy (DOE) to administer an energy conservation program for these products. NAECA requires DOE to consider amending the energy conservation standards for refrigerators, refrigerator-freezers, and freezers; to establish standards for small gas furnaces; and to consider establishing energy conservation standards for television sets.

The Department is not proposing a specific level within the range considered, rather, DOE is soliciting comments and information from the public to be considered in promulgating the final rule. The final rule will specify a specific level for refrigerators, refrigerator-freezers and freezers; the level selected could include no change to the standard level prescribed by NAECA.

For small gas furnaces, the Department is proposing to determine that standards would result in a significant conservation of energy and be economically justified.

Finally, for television sets, the Department is proposing to determine that an energy conservation standard would result in a significant conservation of energy but would not be economically justified.

DATES: Written comments on the proposed rule must be received by the Department by January 31, 1989.

Oral views, data, and arguments may be presented at the public hearing to be held in Washington, DC, on January 12, 1989. Requests to speak at the hearing must be received by the Department no later than 4:00 p.m., January 10, 1989.

The hearing will begin at 9:30 a.m., on January 12, 1989, and will be held at the U.S. Department of Energy, Forrestal Building, Room 1E-245, 1000 Independence Avenue, SW., Washington, DC.

ADDRESSES: Written comments, oral statements, requests to speak at the hearing and request for speaker lists are to be submitted to U.S. Department of Energy, Office of Conservation and Renewable Energy, Hearings and Dockets, Energy Conservation Program for Consumer Products, Docket No. CAS-RM-87-102, Room 6B-025, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-9320.

Copies of the transcript of the public hearing and written public comments received may be read at the DOE Freedom of Information Reading Room, U.S. Department of Energy, Forrestal Building, Room 1E-190, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-6020, between the hours of 9:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

For more information concerning public participation in this rulemaking proceeding, see section V, "Public Comment Procedures," of this notice.

FOR FURTHER INFORMATION CONTACT:
Michael J. McCabe, U.S. Department of Energy, Office of Conservation and Renewable Energy, Forrestal Building, Mail Station CE-132, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-9127.
Eugene Margolis, Esq., U.S. Department of Energy, Office of General Counsel, Forrestal Building, Mail Station GC-12, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-9507.
U.S. Department of Energy, CE-43.1, Docket No. CAS-RM-87-102, Forrestal Building, Room 6B-025, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-9320.

I. Introduction

a. Authority

Part B of Title III of the Energy Policy and Conservation Act (EPCA), Pub. L. 94-163, as amended by the National Energy Conservation Policy Act (NECPA), Pub. L. 95-619, by the National Appliance Energy Conservation Act (NAECA), Pub. L. 100-12, and by the National Appliance Energy Conservation Amendments of 1988 (NAECA 1988), Pub. L. 100-357,[1] created

[1] Part B of Title III of EPCA, as amended by NECPA, NAECA, and NAECA 1988, is referred to in this notice as the "Act." Part B of Title III is codified at 42 U.S.C. 6291 *et seq.* Part B of Title III of EPCA, as amended by NECPA only, is referred to in this notice as NECPA.

the Energy Conservation Program for Consumer Products other than Automobiles. The consumer products subject to this program (often referred to hereafter as "covered products") are: Refrigerators, refrigerator-freezers and freezers; dishwashers; clothes dryers; water heaters; central air conditioners and central air conditioning heat pumps; furnaces; direct heating equipment; television sets; kitchen ranges and ovens; clothes washers; room air conditioners; fluorescent lamp ballasts; and pool heaters; as well as any other consumer product classified by the Secretary of Energy. Section 322. To date, the Secretary has not so classified any additional products.

Under the Act, the program consists essentially of three parts: Testing, labeling, and mandatory energy conservation standards. The Department of Energy (DOE or Department), in consultation with the National Institute of Standards and Technology (NIST), is required to amend or establish new test procedures as appropriate for each of the covered products. Section 323. The purpose of the test procedures is to provide for test results that reflect the energy efficiency, energy use, or estimated annual operating costs of each of the covered products. Section 323(b)(3). A test procedure is not required if DOE determines by rule that one cannot be developed. Section 323(d)(1). One hundred and eighty days after a test procedure for a product is adopted, no manufacturer may represent the energy consumption of, or the cost of energy consumed by the product except as reflected in a test conducted according to the DOE procedure. Section 323(c)(2).

The Federal Trade Commission (FTC) is required by the Act to prescribe rules governing the labeling of covered products for which test procedures have been prescribed by DOE. Section 324(a). These rules are to require that each particular model of a covered product bear a label that indicates its annual operating cost and the range of estimated annual operating costs for other models of that product. Section 324(c)(1). Disclosure of estimated operating cost is not required under section 324 if the FTC determines that such disclosure is not likely to assist consumers in making purchasing decisions or is not economically feasible. In such a case, FTC must require a different useful measure of energy consumption. Section 324(c). At the present time there are FTC rules requiring labels for the following products: room air conditioners, furnaces, clothes washers, dishwashers, water heaters, freezers, refrigerators and refrigerator-freezers, and central air conditioners. 44 FR 66475, November 19, 1979, and 52 FR 46888, December 10, 1987.

For each of 12 of the covered products, the Act prescribes an initial Federal energy conservation standard. Section 325 (b) through (h). The Act establishes effective dates for the standards in 1988, 1990, 1992 or 1993, depending on the product, and specifies that the standards are to be reviewed by the Department within three to ten years, also depending on the product. Section 325 (b) through (h). After the specified three- to ten-year period, DOE may promulgate new standards for each product; however, the Secretary may not prescribe any amended standard which increases the maximum allowable energy use, or decreases the minimum required energy efficiency, of a covered product. Section 325(l)(1). The Department's first review of standards is for refrigerators, refrigerator-freezers and freezers. The Act requires DOE to publish a final rule for these products by July 1, 1989. Section 325(b)(3)(A)(i).

The Act also directs DOE to prescribe an energy conservation standard, no later than January 1, 1989, for small gas furnaces, i.e., gas furnaces having an input of less than 45,000 Btu per hour and manufactured on or after January 1, 1992. Section 325(f)(1)(B).

With regard to another covered product, television sets, the Act allows the Department to prescribe an applicable standard; however, such standard may not become effective before January 1, 1992. Section 325(i)(3).

These products (refrigerators, refrigerator-freezers, and freezers; small gas furnaces; and television sets) are the subject of this rulemaking.

Any new or amended standard is required to be designed so as to achieve the maximum improvement in energy efficiency that is technologically feasible and economically justified. Section 325(1)(2)(A).

Section 325(1)(2)(B)(i) provides that before DOE determines whether a standard is economically justified, it must first solicit comments on a proposed standard. After reviewing comments on the proposal, DOE must then determine that the benefits of the standard exceed its burdens, based, to the greatest extent practicable, on a weighing of the following seven factors:

(1) The economic impact of the standard on the manufacturers and on the consumers of the products subject to such standard;

(2) The savings in operating costs throughout the estimated average life of the covered product in the type (or class) compared to any increase in the price of, or in the initial charges for, or maintenance expenses of, the covered products which are likely to result from the imposition of the standard;

(3) The total projected amount of energy savings likely to result directly from the imposition of the standard;

(4) Any lessening of the utility or the performance of the covered products likely to result from the imposition of the standard;

(5) The impact of any lessening of competition, determined in writing by the Attorney General, that is likely to result from the imposition of the standard;

(6) The need for national energy conservation; and

(7) Other factors the Secretary considers relevant. In addition, the Act specifies criteria for petitions to DOE in regard to amendments to standards. Section 325(k). Under the Act, any person may petition the Department to conduct a rulemaking to amend a Federal energy conservation standard for any covered product. Section 325(k)(1). The Department must grant such a petition if it determines that an amended standard will result in significant conservation of energy, is technologically feasible and is cost effective. Section 325(k)(2).

Sections 325(k)(3) (A) and (B) stipulate that in no case may an amended standard apply to products manufactured within three years or five years, depending on the product, after publication of the final rule establishing a standard.

Prior to proposing a new or amended standard, DOE is required to publish an advance notice of proposed rulemaking which specifies the type (or class) of covered product to which the rule may apply and which provides a 60-day period during which interested persons may submit written comments. Section 325(m)(1) (A) and (B).

Section 325(q) provides that manufacturers having annual gross revenues not exceeding $8 million may apply to DOE for an exemption from all or part of the requirements of an energy conservation standard. This exemption may not extend beyond two years from the effective date of any standards requirement. This authority will not be exercised by DOE unless, after written consultation with the Attorney General, the Secretary finds that failure to allow the exemption would likely result in a lessening of competition.

Section 326 of the Act requires manufacturers to submit information or reports to assure that each covered

product to which a standard applies meets the required energy efficiency level. The Act also specifies that in determining information requirements, DOE consider existing sources of information, including nationally recognized trade association certification programs. Section 326(d).

Enforcement-related provisions of the Act provide for: (1) DOE to prescribe rules requiring manufacturers to allow the Department to observe testing and inspect results of testing conducted by the manufacturer (section 326 (b)(5)); (2) manufacturers to supply to DOE a reasonable number of products for testing purposes (section 326(b)(3)); (3) manufacturers to submit information or reports necessary to ensure compliance (section 326(d)); and (4) injunctive relief against any prohibited act, including distribution of noncomplying products (section 334).

Section 327 of the Act addresses the effect of Federal rules concerning testing, labeling, and standards on State laws or regulations concerning such matters. Generally, all such State laws or regulations are superseded by the Act. Section 327 (a) through (c). Exceptions to this general rule include: (1) State standards prescribed or enacted before January 3, 1987, and applicable to appliances produced before January 3, 1988, may remain in effect until the applicable standard begins (section 327(b)(1); (2) State procurement standards which are more stringent than the applicable Federal standard (section 327(b)(2) and (e)) and certain building code requirements for new construction, if certain criteria are met, are exempt from Federal preemption (section 327(b)(3) and (f)(1) through f(4)); (3) State regulations banning constant burning pilot lights in pool heaters; and (4) State standards for television sets effective on or after January 1, 1992, may remain in effect in the absence of a Federal standard for such product (section 327(b)(6) and 327(c)).

Another exception to Federal preemption concerns standards for refrigerators, refrigerator-freezers and freezers. The Act specifies that if DOE does not publish a final rule before January 1, 1990, relating to the revision of Federal standards for this product category, the State of California's December 14, 1984, standards (effective January 1, 1992) for these products, would become effective in California beginning January 1, 1993, and may not be preempted by any Federal standard prescribed on or after January 1, 1990. Section 325(b)(3)(A)(ii)(I) and section 327(c).

In addition, if DOE does not publish a final rule before January 1, 1992, relating to the revision of standards for refrigerators, refrigerator-freezers and freezers, any State regulation which applies to such products manufactured on or after January 1, 1995, is exempt from Federal premption until the effective date of a Federal standard. Section 325(b)(A)(ii)(II).

A State whose energy conservation standard is preempted may petition the Department for a rule that it not be preempted on the basis that the State regulation is needed to meet unusual and compelling State or local energy interests. Section 327(d). However, DOE cannot issue the requested rule if it is established that such State regulation will significantly burden marketing, manufacturing, distribution, sale or servicing of the covered products, or is likely to result in the unavailability in the State of any covered product with performance characteristics that are substantially the same as those generally available in the State at the time of DOE's determination. Section 327(d)(4).

The Act further provides that, except under certain energy emergency conditions, any State regulation for which exemption is granted shall apply to products manufactured three years after DOE publishes such a rule in the **Federal Register**, or five years after publication, if DOE finds that additional time is necessary for retooling and redesign. Section 327(d)(5).

b. Background

NECPA required DOE to establish mandatory energy efficiency standards for each of 13 covered products.[2] These standards were to be designed to achieve the maximum improvement in energy efficiency that was technologically feasible and economically justified.

NECPA provided, however, that no standard for a product be established if there were no test procedure for the product, or if DOE determined by rule either that a standard would not result in significant conservation of energy, or that a standard was not technologically feasible or economically justified. In determining whether a standard was economically justified, the Department was directed to determine whether the benefits of the standard exceeded its burdens by weighing the seven factors discussed above.

NECPA specified the priorities and procedures to be followed in adopting efficiency standards. Nine of the 13 covered products were given priority. These nine products were: Refrigerators and refrigerator-freezers; freezers; clothes dryers; water heaters; room air conditioners; home heating equipment not including furnaces; kitchen ranges and ovens; central air conditioners; and furnaces.

The Department published an advance notice of proposed rulemaking for the nine priority products on January 2, 1979. 44 FR 20. On December 13, 1979, DOE published an advance notice of proposed rulemaking for dishwashers, television sets, clothes washers, and humidifiers and dehumidifiers. 44 FR 72276. An advance notice for central air conditioners (heat pumps) was published on January 23, 1980. 45 FR 5602.

After receiving comments on the January 2 advance notice, on June 30, 1980, DOE published its first proposed rulemaking for the nine products. 45 FR 43976. (Hereafter referred to as the June 1980 proposal.) This NOPR set forth DOE's proposal concerning energy efficiency standards for the covered products. It also proposed comprehensive requirements for certification and enforcement of the standards, procedures for processing petitions by States that sought exemption for regulations subject to the general preemption requirements of NECPA, and small business exemptions.

On April 2, 1982, DOE issued a further notice of proposed rulemaking with respect to the nine priority products. 47 FR 14424. (Hereafter referred to as the April 1982 proposal). With respect to eight of the products, DOE proposed to make a determination that a standard would not result in significant conservation of energy and would not be economically justified.[3] The April 1982 proposal also proposed rules governing petitions to DOE both by States to obtain exemption from preemption of State or local energy efficiency standards, as well as by manufacturers to obtain preemption of State or local standards.

On Decmber 22, 1982, DOE published a final rule in which the Department determined that efficiency standards

[2] The consumer products covered by NECPA included: Refrigerators and refrigerator-freezers; freezers; dishwashers; clothes dryers; water heaters; room air conditioners; home heating equipment not including furnaces; television sets; kitchen ranges and ovens; clothes washers; humidifiers and dehumidifiers; central air conditioners; and furnaces.

[3] The April 1982 proposal did not propose any rule with respect to the product type "home heating equipment, not including furnaces," or with respect to that class of the product water heaters made up of heat pump water heaters, or with respect to those classes of the product central air conditioners that are heat pumps.

were not warranted for clothes dryers and kitchen ranges and ovens. 47 FR 57198. (Hereafter referred to as the December 1982 final rule.) At that time, DOE also adopted final procedures by which States might obtain exemption for State or local efficiency standards from Federal preemption, and by which manufacturers might obtain preemption of a State or local standard not otherwise preempted.

On August 30, 1983, DOE published a final rule with respect to the remaining six covered products: Refrigerators and refrigerator-freezers, freezers, water heaters, furnaces, room air conditioners and central air conditioners. 48 FR 39376. (Hereafter referred to as the August 1983 final rule). For each of the six products covered by the August 1983 final rule, except central air conditioners, DOE determined that an energy efficiency standard would not result in significant conservation of energy and would not be economically justified. With respect to central air conditioners, DOE found that an energy efficiency standard would result in significant conservation of energy, but not be economically justified.

On April 1, 1985, DOE published a proposed rule with respect to four covered products: Dishwashers, television sets, clothes washers and humidifiers and dehumidifiers. 50 FR 12966. (Hereafter referred to as the April 1985 proposal). For each of the four products covered by the April 1985 proposal, DOE proposed that an energy efficiency standard would not be economically justified and would not result in a significant conservation of energy.

During 1983, DOE's December 1982 and August 1983 final rules were challenged in a lawsuit brought by the Natural Resources Defense Council (NRDC) and others against the Department. On July 16, 1985, the U.S. Court of Appeals set aside DOE's December 1982 and August 1983 final rules. *NRDC* v. *Herrington*, 768 F.2d 1355 (D.C. Cir. 1985).

Consequently, on March 5, 1986, DOE published notices in the **Federal Register** removing the December 1982 and August 1983 final rules and withdrawing the April 1985 proposal. 51 FR 7549 and 51 FR 7582.

The National Appliance Energy Conservation Act, which became law on March 17, 1987, amended EPCA in part by: Redefining "covered products" (specifically, refrigerators, refrigerator-freezers, and freezers were combined into one product type from two; humidifiers and dehumidifiers were deleted; and pool heaters were added); establishing Federal energy conservation standards for 11 of the 12 covered products; and creating a schedule, according to which each standard is to be reviewed to determine if an amended standard is required.

More recently, the National Appliance Energy Conservation Amendments of 1988 (Pub. L. 100–357) established Federal energy conservation standards for a new covered product, fluorescent lamp ballasts. These amendments also created a review schedule for DOE to determine if an amended standard is required.

As stated above, the Act requires DOE to publish a final rule for small gas furnaces by January 1, 1989; for refrigerators, refrigerator-freezers, and freezers by July 1, 1989; and to consider establishing a standard for television sets. DOE is combining these rulemaking items into one action. The purposes of this rulemaking is three-fold: (1) To review the energy conservation standards for refrigerators, refrigerator-freezers, and freezers (hereafter referred to as refrigerators) that have been established by the Act; (2) to propose energy efficiency standards between 71 percent and 78 percent AFUE (annual fuel utilization efficiency) [4] for small gas furnaces, i.e., those having an input rate less than 45,000 Btu per hour; and (3) to consider the establishment of an energy conservation standard for television sets.

As directed by the Act, DOE published an advance notice of proposed rulemaking, with a 60-day comment period that ended February 5, 1988, as the Department considers prescribing applicable new or amended standards for these three products. 52 FR 46367, December 7, 1987. (Hereafter referred to as the advance notice). The advance notice presented the product classes that DOE planned to analyze, and provided a detailed discussion of the analytical methodology and analytical models that the Department expected to use in performing the analysis to support this rulemaking. The Department invited comments and data on the accuracy and feasibility of the planned methodology and encouraged interested persons to recommend improvements or alternatives to DOE's approach. The comments in response to the advance notice are addressed in sections II and III of this notice. In addition, on January 28, 1988, a public hearing was held on the advance notice.

[4] The Annual Fuel Utilization Efficiency (AFUE) is the ratio annual fuel output energy to annual fuel input energy, expressed as a percent.

II. General Discussion

As stated above, NAECA requires DOE to determine if the legislated standards for refrigerators should be amended, to establish a standard for small gas furnaces, and to consider establishing a standard for television sets.

The Act prohibits DOE from promulgating a standard for a product if (1) there is no test procedure for the product, (2) a standard is not technologically feasible, (3) DOE determines that a standard would not be economically justified, or (4) if a standard would not result in a significant conservation of energy. To measure possible energy savings and economic justification, DOE analyzed several possible standard levels for each product type (refrigerators and television sets) or class of product (small gas furnaces). Furthermore, the Act stipulates that any adjustment of a standard may only be toward stringent levels. With respect to each appliance, DOE analyzed various specific design options, including prototypes. A prototype can be either an individual component, e.g., high efficiency compressor, or a complete assembly with the design option installed, e.g., a condensing furnace. While a prototype design may be technologically feasible as an individual component or as part of a bread-board [5] assembly, it does not necessarily follow that techniques have been developed for mass production of the prototype design.

a. Test Procedures

For each product discussed in today's proposed rulemaking there is an applicable DOE test procedure to evaluate its energy efficiency. These test procedures also cover the various classes of products identified in today's notice. However, DOE has issued four test procedure waivers for refrigerator-freezers, all concerning variable defrost controls.[6] The engineering analysis for refrigerator-freezers for today's proposal is based upon the test procedures included in DOE's Decision and Orders concerning variable defrost controls. Research in support of the development of test procedures for refrigerator-freezers equipped with variable defrost controls has been completed. DOE issued a proposed rule concerning

[5] A bread-board unit is an experimental arrangement of the design made to test its feasibility.

variable defrost controls on September 26, 1988. (53 FR 37416).

b. Technological Feasibility

1. General

For those products and classes of products discussed in today's notice, DOE believes that the efficiency levels analyzed, while not necessarily in production, are technologically possible. The technological feasibility of the design options is addressed in the product specific discussion. DOE's criteria for evaluating design options for technological feasibility are that the design options are already in use by the respective industry or that research has progressed to the likely development of a prototype.

Several comments addressed the subject of technological feasibility. The California Energy Commission (CEC) recommended that DOE put no limits on design options for technological feasibility, that DOE include prototypes, foreign market designs and designs with long paybacks. (CEC, No. 35, at 4.) [7] The Association of Home Appliance Manufacturers (AHAM) identified the need for DOE to establish maximum technologically feasible levels separately from any economic inputs. (AHAM, No. 22, at 4.) The Natural Resources Defense Council (NRDC) recommended that DOE increase standard levels to the maximum technologically feasible designs, such as evacuated panel insulation for refrigerators. (NRDC, No. 19, at 9.)

2. Maximum Technologically Feasible Levels

The Act requires that in considering any new or amended standards, the Department must consider those that "shall be designed to achieve the maximum improvement in energy efficiency which the Secretary determines is technologically feasible and economically justified." (Section 325(l)(2)(A).) Accordingly, for each class of product under consideration in this rulemaking, a maximum technologically feasible design option was identified. This is the most efficient model of a class for which at least a prototype exists. A complete discussion of each maximum technologically feasible level and design options included in each is found in the Engineering Analysis. *See* Technical Support Document, Chapter 3, specifically sections 3.2.3 through 3.2.5, 3.3, and 3.4.1 through 3.4.3. These are presented in Table 2–1, below.

TABLE 2–1.—MAXIMUM TECHNOLOGICALLY FEASIBLE LEVELS

Products and product classes	Unit energy consumption
Refrigerators and Refrigerator-Freezers:	
Manual Defrost (16.6 cu. ft.)	380 kWh/yr.
Partial Automatic Defrost (18.1 cu. ft.).	435 kWh/yr.
Automatic Defrost Top Mount (20.8 cu. ft.).	515 kWh/yr.
Automatic Defrost Side-by-Side (24.1 cu. ft.).	599 kWh/yr.
Automatic Defrost Side-by-Side with Through-the-Door Service Features (31.9 cu. ft.).	776 kWh/yr.
Automatic Defrost Top Mount with Through-the-Door Service Features (20.8 cu. ft.).	525 kWh/yr.
Automatic Defrost Bottom Mount (20.4 cu. ft.).	535 kWh/yr.
Freezers:	
Chest, Manual Defrost (22.5 cu. ft.).	315 kWh/yr.
Upright, Manual Defrost (26.1 cu. ft.).	343 kWh/yr.
Upright, Automatic Defrost (29.9 cu. ft.).	505 kWh/yr.
Small Gas Furnaces:	
Non-Weatherized (Indoor)	[1] 97% AFUE.
Weatherized (Outdoor)	[1] 97% AFUE.
Television Sets:	
Monochrome (13")	46 kWh/yr.
Color (19"–20")	171 kWh/yr.

[1] 78 percent AFUE is the maximum standard level that is allowed by the Act for small gas furnaces.

The Department believes that these are the maximum technologically feasible energy conservation levels from an engineering standpoint; some or all of these levels will be evaluated in accordance with the economic justification factors specified in the Act to determine if the levels are economically justified. Specifically excluded from further analysis are the maximum technologically feasible levels for small gas furnaces, since these levels are beyond the range in which the Department must establish standards.

The New York State Energy Office (NYSEO) called for DOE to explain why it does not adopt any design option that conserves more energy than the maximum technologically feasible design. The NYSEO also stated that for those design options selected, DOE must ensure that development and commercial availability correspond to the dates standards become effective. (NYSEO, No. 32, at 4–6). Admiral Home Appliances (Admiral) stated that "innovation cannot be legislated," therefore, maximum technologically feasible design options are those that are fully developed and commercially available today. Admiral also stressed NAECA's requirement that DOE delete design options that would lessen utility to the consumer and affect performance, life, and reliability of the covered appliance. (Admiral, No. 31, at 3).

DOE proposes that the maximum technologically feasible level is one that can be carried out by the addition of design options, both commercially feasible and prototypes, to the baseline units without affecting the product's utility. DOE believes that there are no products available with the same utility and capacity that are more efficient than the maximum technological level. DOE believes that design options, including prototypes and foreign designs, must be capable of implementation by the effective date of a standard.

Each maximum technologically feasible level was evaluated to determine if it would be commercially viable, that is, economically justified, at the time of the effective date of the standard. Design options that have unacceptable impacts on consumers or manufacturers or result in the changing of the utility of the product were rejected.

DOE provided lists of design options for engineering analysis in the advance notice. DOE received a number of comments on these design options, which resulted in more detailed design options for DOE review. DOE has considered these suggestions and has addressed them in the product specific discussions in this notice.

The analysis process is described fully in the Technical Support Document. Computer models and manufacturers' data were used to predict improvements in product efficiencies and the costs associated with these improvements.

The Engineering Analysis addresses two statutory requirements. The first requirement is the Department's evaluation of the maximum improvements in energy efficiency that are technologically feasible. The second requirement relates to the lessening of utility to the consumer of any of the covered products due to the imposition of standards. The Engineering Analysis also provides information on efficiencies and manufacturing costs to other sections of the overall analysis. The product specific sections of this notice include the method of analysis for each of the products.

c. Energy Savings

1. Determination of Savings

The Department forecast energy consumption through the use of the Lawrence Berkeley Laboratory

[7] Comments on the advance notice have been assigned docket numbers and have been numbered consecutively. Statements that were presented at the January 28, 1988, public hearing are identified as Testimony.

Residential Energy Model (LBL-REM). The LBL-REM forecasts energy consumption over the period of analysis for candidate standards and the base case.[8] The Department quantified the energy savings that would be attributable to a standard as the difference in energy consumption between the standards case and the base case.

The LBL-REM, which is an improvement of the Oak Ridge National Laboratory Residential Energy End Use Model (ORNL Model) that was used by DOE in previous standards rulemakings is fully explained in the Technical Support Document. Appendix B to that document addresses the LBL-REM in detail. The LBL-REM contains algorithms to project average efficiencies, usage behavior, and market shares for each product. The model's assumptions and methods are described in the Technical Support Document. The market share algorithm used for the refrigerator analysis is the same as the one used in previous analyses. Since such products have no significant competition from technologies that use fuels other than electricity, the principal market share decisions are: purchase this product or not; and select among the available classes. The fraction of potential purchasers who actually purchase the product is determined each year by applying market share elasticities to the percent change in equipment price, operating expense (which includes changes in electricity price and in unit energy consumption), and income. The market share elasticities are constant over the projection period. The market share obtained by each class in any future year is assumed to be a constant fraction of total refrigerator sales. (*See* Technical Support Document, Table B.3). For refrigerators, the market shares range from a low of 0.7 percent for a top-mount refrgerator-freezer with through-the-door ice, to a high of 72.9 percent for a top-mount refrigerator-freezer without through-the-door ice service. If this assumption were changed, the results of the LBL–REM would be affected, e.g., for refrigerators, if the market share of less expensive and less energy consumptive products were to increase, the energy savings would be increased and the net present value would also likely be increased. If this scenario were to occur, consumers would sacrifice utility by purchasing refrigerators with fewer amenities. DOE requests comments on this issue.

On the other hand, a new market share algorithm for small gas furnaces had to be developed, since such products had not previously been analyzed separately. Market shares for small gas furnaces are determined using modifications to the algorithms developed for all heating and cooling end uses. *See* Technical Support Document section 4.2.3. Elasticities for heating equipment in new mobile homes, new large multifamily housing (five or more units), and all types of existing housing are calculated using methods and models developed by Lin, Hirst, and Cohn, *Fuel Choices in the Household sector*, Oak Ridge, TN: Oak Ridge National Laboratory, ORNL/CON–3, 1976. Those authors reported a cross-sectional analysis of residential fuel choices (equipment ownership market shares) for five major end uses, including space heating, air conditioning, water heating, food freezing, and cooking, using 1970 data from states.

For new single-family and new small (two to four units) multifamily housing, effective market share elasticities are derived from an econometric model originally developed by Electric Power Research Institute (EPRI), *Household Appliance Choice: Revision of REEPS Behavioral Models*, Palo Alto, CA: Electric Power Research Institute, EPRT EA–3409, Research Project 1918–1, 1984, and modified at Lawrence Berkeley Laboratory (LBL).

The model was established from a national data base disaggregated to the household level, using exogenous variables of equipment prices, operating expenses (which are proportional to fuel prices), household income, and other variables. The most significant difference between the EPRI model and the LBL model is the LBL model's characterization of a household discount rate for the choice of heating and cooling equipment as varying with maximum winter heat load and a measure of the oppressiveness of summer climate. Essentially, the data strongly support the hypothesis that households that are likely to use a particular piece of equipment frequently (because of a cold winter climate or a hot, humid summer climate) are likely to pay greater attention to future operating expenses. Such households are estimated as having lower discount rates, i.e., accepting longer payback periods for additional equipment expenses for heating or cooling appliances than those living in relatively mild conditions. Conversely, those households in milder climates give relatively greater weight to equipment price than to operating expense. *See* Technical Support Document, Appendix B, section B.5.

The LBL–REM is used to project residential energy use over the relevant time periods for: (1) Television sets with and without standards; (2) small furnaces at 71, 74, and 78 percent AFUE; and (3) refrigerators at different standard levels, including the NAECA-imposed 1990 standards, and several candidate amendment levels. By comparing the energy consumption projection at alternative standard levels or no standard (for television sets), at standards of 71 percent and 78 percent AFUE (for small furnaces), and at alternative standard levels or NAECA 1990 standards (for refrigerators), the Department estimated the amount of energy projected to be saved during the period 1992–2015.[9] The energy saved is expressed in Quads, i.e., quadrillion Btu. With respect to electricity, the savings are quads of source or primary energy, which is the energy necessary to generate and transmit electricity. The Act defines "energy use" as the quantity of energy directly consumed by a consumer product at point of use. This is generally called "site" energy, as opposed to "source" energy. There are great differences between these types of energy. In 1986, the amount of electrical energy consumed at the site was less than one-third of the amount of source energy that was required to generate and transmit the site electrical energy.[10] Therefore, it is important to identify whether the electricity involved is site or source energy.

The LBL–REM projections are dependent on many assumptions. Among the most important are responsiveness of household appliance purchases to changes in energy prices and consumer income, future energy prices, future levels of housing construction, and options that exist for improving the energy efficiency of appliances. As is the case with any complicated computer model simulation,

[8] For refrigerators the base case represents the NAECA 1990 standards; for small gas furnaces and television sets, the base case represents no-standards.

[9] LBL–REM was programmed to analyze a single standard level or alternative levels, over the entire period. That is, the fact that a standard might be revised during subsequent rulemakings was not considered by the model. The Department believes that it is not possible to predict what result such reviews may have, and therefore it would be speculative to model any particular result. Therefore, for purposes of this rulemaking, each standard level that was analyzed was projected to have been in place from the time of implementation to the year 2015.

[10] Energy Information Administration, *Electric Power Annual 1986*, Tables 7 and 41, DOE/EIA–0348(86), 1987.

the validity of the outputs is critically dependent on the inputs.

Several of the assumptions that were described in the advance notice were questioned in comments on the advance notice. These included the following:

Rebound Effect. NYSEO critiqued the existence of a "rebound effect" with more efficient refrigerators or television sets (NYSEO, No. 32, at 14–15). The Department believes that households respond to changes in operating expenses in three different ways. In the short run, they change the way they operate existing equipment, e.g., lower winter thermostat setting. In the long run, they also change equipment by switching from one fuel to another, and by improving the efficiency of their equipment, e.g., purchasing a more efficient water heater, or both. Thus, the elasticity of demand can be thought of as being separated into three elements—a usage elasticity, a technical efficiency elasticity, and an equipment/fuel choice (market share) elasticity. Household changes in equipment use in response to changes in fuel price and household income determine the usage elasticities. These elasticities are based on engineering possibilities and judgment in the original formulation of the ORNL model.[11] *See* Technical Support Document, Appendix B. DOE requests comments on the methodology and elasticities used and the appropriate values for the various elasticities, including usage elasticity (rebound effect).

In the analysis, the Department assumed that a more efficient refrigerator or television set would not be used more intensively because it is more energy efficient. Therefore, in estimating energy savings from different standard levels for refrigerators and television sets, the Department did not use a rebound effect. The Department does not have any data that consumers will use refrigerators and television sets any differently with changes in either energy prices or efficiency. However, the Department did include a "rebound effect" of 30 percent for small gas furnaces. *See* Technical Support Document, sections B.1 and B.6. The Department requests comments on the "rebound effect" for each product subject to today's proposal and for all space heating and cooling products, including the furnace categories not covered by this notice.

Discount Rate. NRDC and the CEC contended that the Department's use of five, seven and 10 percent discount rates was artificially high and would result in many capital-intensive candidate standard levels being excluded from consideration (NRDC, No. 19, at 21; and CEC, No. 35, at 7).

Since a dollar in the future is worth less than a dollar today, that future dollar must be discounted to determine its value today. If the discount rate chosen is too high, the present value of future dollars will be understated. Thus, higher discount rates tend to preclude more capital-intensive candidate standard levels. Nevertheless, the Department does not believe that the seven percent rate that was used in the analysis is artificially high. From the business perspective, a reasonable discount rate would be one that represented the private opportunity cost of capital used to meet any appliance conservation standard. A gauge of the private opportunity cost of capital is the most profitable alternative use of that capital. One measure of that cost could be the prime rate, that is, the interest rate that is offered by lending institutions to their most credit-worthy customers. In early October 1988, the prime rate was 10.0 percent. If such a business secured a loan at one of those rates of interest, and repaid it in the 1990–1995 time period, the real rate of interest would be 5.0 percent. This results because the expected annual rate of price increases in that time period is approximately five percent. Most businesses, however, are not eligible for loans at the prime rate of interest, so the estimated real rate of interest for these firms would probably be somewhat higher.

Similarly, from the consumer perspective, one approach to selecting an appropriate discount rate is to look at the interest payable on a consumer loan and depreciate that interest by the inflation rate. If a consumer secures a loan at 12 percent interest, and repays it in the 1990–1995 time period, the real rate of interest will be seven percent. Thus, DOE believes that from both the business and consumer perspectives, a seven percent discount rate is reasonable.

On the other hand, it may not be reasonable to require consumers to make an investment where there are inherent risks. For example, if consumers perceive a risk because of the uncertainty of energy prices and reliability and longevity of the equipment, they would require a greater return on their investment, i.e., a higher discount rate. It has been argued that the discount rate should be as high as 15 percent. Dubin and McFadden, "An Econometric Analysis of Residential Electric Appliance Holdings and Consumption," *Econometrica*, March 1984, pp. 345–361. DOE requests comments on the approach taken to select an appropriate discount rate, alternative approaches, and the consumer and business risks to be considered.

Several of the inputs, e.g., energy and equipment prices, were tested in sensitivity analyses to determine the effects of varying certain assumptions on the results of the analysis. By such sensitivity analyses, it is possible to determine those inputs where changes, including possible errors, are meaningful to the model's output, and those inputs for which changes are not meaningful. *See* the Technical Support Document, sections 4.3 and 5.4.

The savings attributable to the different standard levels are identified for each product in section III of this notice.

Modeling. Several comments offered suggestions on the LBL–REM modeling efforts. NYSEO and CEC critiqued the use of old data in LBL–REM in developing the baseline units for analysis. They contended that use of such old data could underestimate the impact that increased efficiency standards could have on saving energy. (NYSEO, No. 32, at 12; and, CEC, No. 35, at 3).

While some old data was used for the analysis of refrigerators, small gas furnaces, and television sets, these data points were merely the point of departure of the analysis. All of the data bases were updated to reflect current levels of efficiency in the marketplace, and, in the case of refrigerators, the baseline units were those with levels of efficiency that will be in the marketplace after the NAECA-imposed standards are in effect, i.e., after January 1, 1990. These data were then used to calculate annual energy consumption for the LBL–REM and life-cycle cost (LCC) analyses, based on the DOE test procedures. For example, in the LCC analysis, DOE used the test procedure annual average hours of use to calculate the annual cost of operation. This calculation does not account for variability in consumer usage patterns, nor does it reflect any changes in typical consumer usage behavior since the test procedures were developed. While the use of out-of-date usage values may affect the results of the LBL–REM and LCC analysis, DOE is not certain to what extent the results would be affected since, for example, the energy savings and net present value calculation of the LBL–REM would use

[11] Eric Hirst and Janet Carney 1978 "The Oak Ridge Engineering-Economic Model of Residential Energy Use." Oak Ridge National Laboratory, ORNL/CON–24.

the dated usage values in both the base case and standards case.

Several comments expressed confusion as to the difference between "baseline unit" and "base case." In the engineering analysis, the baseline unit for each product class under consideration is identified. These are units that are representative of units that are expected to be offered for sale in the beginning year of the analysis.[12]

Baseline refers only to the engineering analysis and is the first point identified in each cost-efficiency curve. It is the product to which design options are added to create more efficient units. On the other hand "base case" refers to the economic analysis forecast without standards for small gas furnaces and television sets, and for refrigerators, only those standards mandated by the Act.

2. *Significance of Savings*

Under section 325(1)(3)(B) of the Act, the Department is prohibited from adopting a standard for a product if that standard would not result in "significant" energy savings. While the term "significant" has never been defined precisely in the Act, the Department believes that a standard level option need not meet a threshold level of energy savings to be considered a "significant" saver of energy. The U.S. Court of Appeals, *NRDC* v. *Herrington, supra,* concluded that Congressional intent in using the word "significant" was to mean "non-trivial." *Id.* at 30. Thus, DOE believes that each candidate standard considered results in significant energy savings.

Two comments discussed the issue of significant energy savings. NRDC Noted that the use of engineering estimates to screen those design options that yield measurable energy savings is desirable and encouraged the Department not to establish (as it had in the past) a threshold of significance for energy savings. The Department has not established a significance threshold for energy savings. In addition, AHAM contended that, with regard to revision of refrigerator standards, if DOE found that incremental savings by the 1990 standards are "minor," the Department can "legally conclude that no revision is justified." (AHAM, No. 22, p. 7). DOE proposes that each candidate refrigerator standard saves a significant amount of energy.

[12] The baseline units for small gas furnaces and television sets are those with estimated average shipment-weighted energy factors (SWEF's) in 1987, while the baseline refrigerator units are ones with an estimated average SWEF in 1990.

d. Rebuttable Presumption

NAECA established new criteria for determining whether a standard level is economically justified. Section 325(1)(2)(B)(iii) states:

> If the Secretary finds that the additional cost to the consumer of purchasing a product complying with an energy conservation standard level will be less than three times the value of the energy savings during the first year that the consumer will receive as a result of the standard, as calculated under the applicable test procedure, there shall be a rebuttable presumption that such standard level is economically justified. A determination by the Secretary that such criterion is not met shall not be taken into consideration in the Secretary's determination of whether a standard is economically justified.

DOE believes that this provision means that if the added price of an appliance, caused by a conservation standard, would repay itself to the consumer in value of energy savings in less than three years, then it can be presumed that such standard is economically justified.[13] This presumption of economic justification can be rebutted by the seven factors of economic justification.

e. Economic Justification

As noted earlier, section 325(1)(2)(B)(i) of the Act, provides seven factors to be evaluated in determining whether a conservation standard is economically justified.

1. *Economic Impact on Manufacturers and Consumers*

The engineering analysis identified improvements in efficiency along with the associated costs to manufacturers for each class of product. For each design option, these costs constitute the increased per unit cost to manufacturers to achieve the indicated energy efficiency levels. Manufacturer, wholesaler, and retailer markups will result in a consumer purchase price higher than the manufacturer cost.

To assess the likely impacts of standards on manufacturers, and to determine the effects of standards on different-sized firms, the Department used a computer model that simulated hypothetical firms in the three industries under consideration. This model, the Lawrence Berkeley Laboratory Manufacturer Impact Model (LBL–MIM), is fully explained in the Technical Support Document. The LBL–MIM was formerly named the Lawrence Berkeley Laboratory Typical Year Model (LBL–TYM), which is the name that appeared in DOE's advance notice of this proposed rulemaking. LBL–MIM provides a broader array of outputs than the specified in the advance notice. The outputs are shipments, price, revenue, net income, and return on equity (ROE). An "Output Table" lists values for these in the base case and in each of the standards cases under consideration. It also gives a range for each of these estimates. A "Sensitivity Chart" shows how ROE would be effected by a change in any one of the model's nine control variables.

For consumers, a measure of economic impact is the life-cycle cost of a product, because it accounts for the increased first price, any increased maintenance expenses, and the reduced fuel expenses resulting from the product's greater efficiency. Under section 325 of the Act, life-cycle cost analysis is a separate factor to be considered in determining economic justification

2. *Life-Cycle Costs*

One measure of the effect of proposed standards on consumers is the change in life-cycle costs resulting from standards. This is quantified by the difference in life-cycle cost (LCC) between the base and standards case for the appliance classes analyzed. The LCC is the sum of the purchase price and the operating expense, including maintenance expenditures, discounted over the lifetime of the appliance.

The LCC is calculated at the estimated average efficiency for each class in the year standards are imposed using consumer discount rates of five, seven, and 10 percent. The purchase price is based on the factory costs in the Engineering Analysis, and includes a factory markup plus a distributor and retailer markup. As noted in the advance notice, energy price forecasts are inputs that are taken from the 1986 *Annual Energy Outlook* of the Energy Information Administration. Appliance usage forecasts are taken from the results of the LBL–REM. The Department seeks comments on the input to the LCC analysis including the discount rate and energy price forecasts.

The differences in life-cycle costs between the base case and various levels of standards for refrigerators and small gas furnaces are presented in Tables 6.1 through 6.3 of the Technical Support Document. These LCC's are calculated at a seven percent discount

[13] For this calculation, the Department calculated cost-of-operation based on the DOE test procedures. Therefore, the consumer is assumed to be "average" consumer as defined by the DOE test procedures. Consumers that use the products less than the test procedure assumes will experience a longer payback while those that use more than the test procedure assumes will have a shorter payback.

rate; a higher rate, e.g. 10 percent, gives a smaller difference, while a lower rate, e.g. five percent, produces a greater difference. As discussed above, it has been argued that discount rates as high as 15 percent should be used. The Department did not use 15 percent in the LCC analysis; however, as can be seen in the various LCC curves, the use of a higher discount rate would result in a flatter curve with the minimum life-cycle cost dropping, i.e., approaching the baseline unit. If a higher discount rate were used, e.g., 15 percent, and energy prices were lower than average, the minimum life-cycle cost point could be less efficient than the baseline unit.

When the LCC numbers are plotted graphically (on the Y axis) against unit energy consumption (on the X axis), the data generally produce a curve that is concave from above in shape. This means that at first the LCC curve will decline as efficiency improvements are made, will reach a minimum (which may or may not be discrete), and then rise. All this indicates is that the first efficiency improvements will produce energy savings, the value of which will more than pay for the design change. As efficiency improvements are made, it becomes increasingly costly to save more energy, and, eventually, the value of the energy savings will not cover the expenditures for the design improvements. *See* Technical Support Document, section 3.5.

The minimum of the LCC curve was of particular interest in the analysis. The minimum of the curve represents that level of efficiency improvements that maximizes the difference between the value of energy saved and the additional consumer expenditures for the relevant efficiency improvements. Therefore, design options that corresponded to the minimum point were of special consideration in establishing standard levels. Efficiency levels exceeding the LCC minima were generally rejected as standards as not being economically justified. At efficiency levels beyond the LCC minima, the incremental first cost of the product exceeds the value of the energy savings such that the average consumer does not realize a benefit from the investment.

The Department conducted a net present value (NPV) analysis to assess the differential economic impacts on consumers that would occur from the adoption of standards (for small gas furnaces and television sets) and amended standards (for refrigerators) compared to a base case with no-standards (for gas furnaces and television sets) and NAECA 1990 standards (for refrigerators). *See* Technical Support Document, Chapter 5. The LBL-REM calculates the total expenditure for each product (discounted total value of energy consumption from 1992 through the last year of use for those products purchased through the year 2015, plus the total discounted expenses for equipment purchased from 1992 through 2015) with and without standards (for televisions and small furnaces), and with more stringent standards and with NAECA 1990 standards (for refrigerators). The NPV analysis is similar to the LCC analysis, in that the greatest NPV should occur at the standard level that corresponds to the LCC minimum for the product.[14] The NPV for each product at the different standard levels is identified in section III of this notice. The NPV calculation, like the LCC analysis, is based on national average efficiency and usage values. This analysis does not take into account variations in energy prices and local usage rates. If for any product the covariances are zero, the results of the analysis will not be affected. If, however, the covariances are not zero, the results of the analysis will be affected. DOE does not have the data to determine if or to what extent the NPV calculation is affected by using average usage rates and energy prices. DOE requests comments on this issue.

3. Energy Savings

While the significant conservation of energy is a separate statutory requirement for imposing an energy conservation standard, the Act requires DOE, in determining the economic justification of a standard to consider the total projected savings that are expected to result directly from new or revised standards. DOE used the LBL–REM results, discussed earlier, in its consideration of total projected savings. The savings for the three products are provided in section III of this notice.

4. Lessening of Utility or Performance of Products

This factor cannot be quantified. In establishing classes of products and design options, the Department tried to eliminate any degradation of utility or performance in the three products under consideration in this rulemaking. That is, to the extent that comments or DOE's own research indicated that a product included a utility or performance-related feature that affected energy efficiency, a separate class with a different efficiency standard was created for that product. In this way the Department attempted to minimize the impact of this factor as a result of the standards that were analyzed. However, other factors, in conjunction with standards, could affect the utility or performance of products subject to standards. For example, the EPA limitations on CFC production could cause refrigerator manufacturers to adopt alternatives to the regulated CFC's which would affect the refrigerator's utility or performance. In this way, DOE is not able to assure that utility and performance could not be affected by standards.

Also, as discussed in section III of this notice, DOE was not able to establish separate classes for television features that provided a utility and which affected energy efficiency. DOE requests comments on the impacts that both legislated and revised standards could have on product utility and performance.

5. Impact of Lessening of Competition

It is important to note that this factor has two parts; on the one hand, it assumes that there could be some lessening of competition as a result of standards; and, on the other hand, it directs the Attorney General to gauge the impact of that effect, should it occur.

In order to assist the Attorney General in making such a determination, the Department studied the affected appliance industries to determine their existing concentrations, levels of competitiveness, and financial performances. This information will be sent to the Attorney General. *See* Technical Support Document, Chapter 7.

To afford the Attorney General the information that he may need to carry out his responsibility, we have forwarded copies of this notice and the Technical Support Document for his review.

6. Need of the Nation to Conserve Energy

One measure of the need of the Nation to conserve energy is the country's reliance on energy in the form of oil, especially imported oil. This was documented last year in a DOE report (*Energy Security: A Report to The President of The United States,* Washington, DC.: U.S. Department of Energy, March 1987.) In that report, U.S. energy security was essentially considered to be a function of free oil markets. The three products being considered here (namely, refrigerators, small gas furnaces, and television sets)

[14] The net present value (NPV) of a standard, per appliance, is calculated for all affected appliances that are purchased in the projection period, while the life-cycle cost (LCC) is calculated only for the lifetime of an appliance that is purchased in the first year of the relevant standard. Therefore, NPV and LCC estimates, per appliance, may not correlate exactly.

are all fueled by energy forms other than oil, specifically electricity for refrigerators and television sets, and natural gas for the small furnaces. While some oil is used to generate the electricity on which refrigerators and television sets operate, that is a very small part of our national energy picture. Specifically, only 5.5 percent of net electricity was generated by petroleum in 1986. Therefore, conservation of energy by these products will have little bearing on our national energy security.

7. Other Factors

This provision allows the Secretary of Energy, in determining whether a standard is economically justified, to consider any other factors that he deems to be relevant. The only such factor that has been identified is the EPA regulation to restrict the production of certain chlorofluorocarbons (CFCs).

III. Product-Specific Discussion

a. Refrigerators/Refrigerator-Freezers/Freezers

1. Classes

In the advance notice, the Department discussed its methodology for reviewing the energy conservation standards established by the Act for refrigerators to determine if the standards should be amended. NAECA currently prescribes maximum annual energy consumption level for refrigerators based on the adjusted volume of the model. The equations are different for each of the seven classes of refrigerators and refrigerator-freezers, and three classes of freezers. These standards are to become effective January 1, 1990.

The following are the classes that are being reviewed for amended standards:

Refrigerators and Refrigerator-Freezers with manual defrost.
Refrigerators and Refrigerator-Freezers—partial automatic defrost.
Refrigerators and Refrigerator-Freezers—automatic defrost with:
  Top-mounted freezer without through-the-door ice service.
  Side-mounted freezer without through-the-door ice service.
  Bottom-mounted freezer without through-the-door ice service.
  Top-mounted freezer without through-the-door ice service.
  Side-mounted freezer without through-the-door ice service.
Upright Freezers with:
  Manual defrost.
  Automatic defrost.
Chest Freezers and all other freezers.

2. Design Options

The following is a list of a design options that were examined:

(i) *Refrigerators and refrigerator-freezers.*
(A) Foam insulation substitution in doors.
(B) Increased door insulation thickness.
(C) High-efficiency compressor substitution.
(D) Anti-sweat heater switch.
(E) Increased cabinet insulation thickness.
(F) Increased evaporator surface area.
(G) Adaptive defrost control.
(H) Fan and fan motor improvement.
(I) Improved foam insulation.
(J) Evacuated insulation panels.
(ii) *Freezers.*
(A) Foam insulation substitution in cabinet.
(B) Foam insulation substitution in door.
(C) Increased cabinet insulation thickness.
(D) Increased door insulation thickness.
(E) High-efficiency compressor substitution.
(F) Double door gasket.
(G) Adaptive defrost control.
(H) Fan and fan motor improvement.
(I) Improved foam insulation.
(J) Evacuated insulation panels.

3. Comments on the Advance Notice of Proposed Rulemaking

During the comment period on the advance notice, the Environmental Protection Agency (EPA) published a proposed rulemaking on December 14, 1987, concerning CFC production restrictions. 52 FR 47486. Recent findings regarding depletion of the earth's ozone layer have pointed to certain CFC's as the probable cause of that depletion. As part of an international agreement to halt that deterioration, the EPA proposed production restrictions on the most harmful of those CFC's. These rules were finalized on August 12, 1988. 53 FR 30566. Persons commenting on the advance notice with regard to refrigerators voiced concern about EPA's proceeding, since many of the design options that were under consideration by DOE involved CFC's. The following is a summary of comments concerning refrigerators.

The manufacturers and the trade association expressed concern for the ozone layer and recommended that DOE policy set the reduction of CFC's as a priority over energy conservation; to do otherwise would create potential conflict between two government agency rulemakings. (White Consolidated Inc. (WCI), No. 17, at 2; Whirlpool, No. 10, at 1; Admiral, No. 31, at 2; and AHAM, No. 22, at 16). Each recommended that DOE reject all design options that would require increased use of CFC's. (Whirlpool, No. 10, at 7; WCI, No. 17, at 1; Admiral, No. 31, at 2; and AHAM, No. 22, at 18). Whirlpool stated further that substitutes for CFC 11 and 12 would not be available for approximately five to seven years. (Whirlpool, No. 10, at 2.)

NRDC stated that DOE should establish more stringent standards in an effort to replace CFC technology with new forms of technology such as vacuum panel insulation or improved refrigeration cycles and that this would reduce industry need for CFC 11 or 12. (NRDC, No. 19, at 9.) The Solar Energy Association of Oregon (SEAO) supported this opinion. (SEAO, No. 30, at 1.) NRDC believes that DOE has the authority under section 325(b) of the Act to respond to industry demands for leadtime by establishing a two-tier level or extension to provide maximum technologically feasible standards. (NRDC, No. 19, at 12.)

NAECA established the review cycles to provide industry with sufficient time to respond to regulated standard levels set by DOE. Intermediate standard levels could require manufacturers to retool more than once in a five-year period. Therefore, the Department does not consider the imposition of intermediate standard levels between reviews to be practicable.

The EPA testified that, if promulgated, its proposed rule would not eliminate CFC 11 or 12 from production, but would impose reductions in CFC production over 11 years (EPA, Testimony). EPA stated that its proposed rule would allow for market-based CFC distribution and use, providing for a flexible regulation suitable to the needs of business and consumers. (EPA, Testimony).

SEAO recommended that DOE analyze and follow one of two courses of action concerning CFC issues. First, DOE could follow EPA's proposed rule and apply limited availability to the cost analysis. Alternatively, DOE could anticipate the further or more rapid reduction of CFC's production due to developments in research on the ozone layer. (SEAO, No. 30, at 2.)

In commenting on the advance notice, E. I. DuPont de Nemours and Company (DuPont) described its work on alternatives to CFC 11 and CFC 12. While the company has some promising alternatives, it does not expect to have them available in commercial quantities until late 1992, at the earliest; and, even then, the alternatives (HFC–134, HCFC–123 and HCFC–141b) will be less energy efficient as well as much more expensive. (DuPont, No. 48, at 1–2.)

At the public hearing on the advance notice, the NRDC urged that the Department not establish standards that would require use of more of the harmful CFC's, and also advocated that such CFC's be banned. (NRDC, Testimony.)

In mid-March 1988, the National Aeronautics and Space Administration (NASA) announced the results of a 19-year international study that concluded that the depletion of the earth's ozone

layer was more extensive than had previously been indicated. Specifically, the study found that stratospheric ozone has decreased by as much as three percent over densely populated areas of North America and Europe since 1969, as well as wintertime drops of more than six percent in Alaska and the Scandinavian countries, and that this ozone depletion had been caused by certain CFC and other chemicals.

In late March 1988, DuPont urged a total phaseout of the destructive CFC and indicated its intent to cease production of those CFC's at some unspecified date. In announcing the decision, the company cited the significant ozone depletion that was documented in the NASA report.

In September 1988, EPA reported that nothing short of a halt in the use of CFC's can save the stratospheric ozone layer from further dangerous depletion. EPA projects a more extensive and faster-moving threat than previously realized. DOE's analysis does not consider the possibility that CFC's could be banned altogether. Furthermore, the possibility of a ban in CFC use is an example of the reason why DOE needs to exercise care in prescribing standards. For example, DOE is prohibited by NAECA from reducing the stringency of standards.

Because of limitations imposed on CFC's, whether by reduction in production levels or by production bans, refrigerator manufacturers may be required to utilize alternatives to the restricted CFC's to achieve energy efficiency requirements. DOE cannot be certain, however, that the new product would have the same utility or performance or be able to achieve the same level of energy efficiency. If standards are set at a level that, as a result of these or other factors, cannot be attained, the standards could have an adverse effect on manufacturers and consumers, since DOE is prohibited by NAECA from reducing the stringency of standards.

The Department believes that under present EPA regulations, there will be substitutes for CFC–11 and CFC–12, but with a cost and energy efficiency penalty. In addition, questions exist regarding the ability of appliance manufacturers to accommodate new refrigerants in their production processes. For example, if the new refrigerants are not as energy efficient as the CFC's being replaced, it would mean that more of them would be needed to achieve the same level of savings; and, this could result in a need to alter the refrigerator design in order to accommodate the substitute materials. Under these circumstances, any change in the need for CFC's could result in altering the expected results of the analysis by, for example, adversely affecting the estimates of manufacturing costs, consumer prices, and so on.

The Department is examining all design options, including those using CFC's. CFC's, while being reduced in quantity, are not banned from production. Supplementary information provided through DOE research shows that the residential refrigerator industry consumption of CFC–11 and CFC–12 currently represents approximately two percent of all consumption of the regulated CFC's.[15]

The engineering baseline unit for refrigerators was identified in the advance notice as the same unit used in the April 1982 proposal. The CEC and AHAM expressed concern that the data were too old for current use and that DOE should use a representative model. (CEC, No. 35, at 3; and AHAM, No. 22, at 27.)

DOE agrees, and has used as the baseline for each class, a refrigerator with a SWEF near that which is expected to prevail after the 1990 NAECA standards are in effect.

AHAM stated that data provided to LBL on 1987 refrigerator models had no single set of design options used by manufacturers to accomplish energy goals, making it difficult to identify a baseline unit. (AHAM, No. 22, at 27.) Furthermore, AHAM suggested removing from consideration, in this rulemaking, those design options that would be used to accomplish the 1990 standards. (AHAM, No. 22, at 28.) The Department did not include such design options in this analysis.

NRDC submitted data on the LaBrecque Cycle, as a possible means to shift from CFC–12 to CFC–22. (NRDC, No. 19, at 19.) While DOE agrees that this technology is a theoretical possibility, the Department has no knowledge of any prototype or laboratory assembly that demonstrates its potential. Furthermore, DOE does not have data to conclude that this technology could be adopted as a prototype by the time of the amended standard's 1993 effective date. Therefore, DOE did not include this technology in the engineering analysis.

NYSEO recommended that DOE investigate different configurations, changes in unit dimensions, number and location of doors, rotary compressors as well as conducting research into Japanese methods of refrigerator manufacturing. (NYSEO, No. 32, at 7.) DOE believes that the number and location of doors and dimensions of a refrigerator may have utility implications to the consumer, but it is uncertain whether there is any impact on energy efficiency. Many refrigerators are used as replacements and must therefore fit into the space used by previous models, which can make dimensions very restrictive. The concept of using rotary compressors as one of the design options is a good one. However, DOE believes that considering design options by compressor efficiencies, e.g., 5.0 or 5.3 energy efficiency ratio, rather than by design e.g., rotary compressor, allows manufacturers to select the appropriate compressor design.

The CEC was concerned that some design options will be incorporated to reach the 1990 standard levels, and should not be used again to evaluate 1993 levels. Also, the CEC requested that DOE identify the method of combining design options. (CEC, No. 35, at 6.)

The Department combined design options by beginning with those designs that were most cost-effective for consumers, and then adding progressively less cost-effective ones.

DOE has determined that certain design options will be part of the 1990 standard level design, and are in some current models, therefore, they are being treated as part of the base case for 1990. These options are: Foam insulation substitution in freezer section doors: and antisweat heater switch.

One design option, evacuated insulation panels, was mentioned throughout the comments as an energy saver that could also eliminate the need for CFC–11 in refrigerators. NRDC commented that evacuated panels have been researched in many forms, all showing high potential for saving energy. (NRDC, No. 19, at 17). AHAM provided information from its investigation of Japanese use of evacuated panels in refrigerators. AHAM stated that the models were discontinued, and speculated that it was due to concerns about a combination of cost, reliability and incompatibility with the manufacturing process. (AHAM, No. 22, at 31).

DOE has funded research at the Solar Energy Research Institute (SERI) and Oak Ridge National Laboratory (ORNL) to develop U.S. technology in evacuated panels. Completion of this research is expected to take approximately five years; however, independent research or

[15] "The Use of Chlorofluorocarbons in Refrigeration, Insulation and Mobile Air Conditioning in the United States," Terry G. Statt, DOE, paper prepared for EPA Conference on Substitutes and Alternatives to CFC's and Halons, Washington, DC, January 13–15, 1988.

a major breakthrough may bring this technology into place prior to 1993. Nevertheless, DOE believes that to specify standards that would require evacuated panel insulation in 1993 would be beyond the ability of the manufacturers to carry out commercially acceptable redesign and retooling successfully. Therefore, DOE is retaining evacuated insulation panels as a design option but proposes that it is not technologically feasible for implementation of 1993 standard levels. DOE believes that the scheduled reductions in CFC production will inspire industry to research non-CFC technology such as evacuated panels and provide prototypes and limited production models for the next review process of refrigerators.

Whirlpool requested that DOE evaluate the possible development of two new classes for refrigerators. The first is an all-refrigerator with automatic defrost and the second is for built-in refrigerators. Whirlpool recommended that the standard level for an all-refrigerator with automatic defrost be equivalent to a refrigerator-freezer, top mount, with automatic defrost and that the standard level for a built-in be approximately 10 to 15 percent above the non built-in class. (Whirlpool, No. 10, at S–6). AHAM supported the adoption of the all-refrigerator with automatic defrost class. (AHAM, No. 22 at 26).

DOE proposes to include the all-refrigerator with the class of top-mount, automatic defrost refrigerator-freezer. However, DOE does not have any information to conclude that built-ins, which provide utility to the consumer, affect energy consumption. Thus, DOE is not proposing a separate class for built-in refrigerators. DOE invites comments and data concerning the adoption of these classes.

4. Efficiency Levels Analyzed

DOE examined a range of standard levels, including the 1990 NAECA standards. As discussed above, the impacts of any revised standards were compared to the 1990 NAECA standards; therefore, the impacts of the base case are generally not presented because they are calculated to be zero.

Table 3–1 presents the efficiency levels, other than the base case, selected for analysis for 1993. Alternate levels were selected to generate a range of impacts for analysis. Initially, the levels were selected for the class of top-mount, automatic defrost refrigerator-freezer without through-the-door ice service. Level 5 corresponds to the highest efficiency level considered in the engineering analysis. It was felt that manufacturers eventually can produce appliances at this efficiency. Level 4 generally corresponds to the minimum life-cycle cost point. Levels 1 through 3 correspond to efficiencies lower than that of level 4. Each level was analyzed discretely in the engineering analysis. Standard levels for each of the other classes of refrigerators was based on the combination of design options for the top mount, automatic defrost refrigerator-freezer without through-the-door ice service.

TABLE 3–1.—ALTERNATIVE EFFICIENCY LEVELS FOR 1993 FOR REFRIGERATORS AND REFRIGERATOR-FREEZERS AND FREEZERS
[ENERGY CONSUMPTION KWH/YR.]

Product class	Level analyzed				
	1	2	3	4	5
Refrigerators and Refrigerator-Freezers with manual defrost	14.4 AV + 287	12.3 AV + 272	11.9 AV + 258	10.6 AV + 245	8.0 AV + 245
Refrigerator-Freezers—partial automatic defrost	16.7 AV + 333	15.2 AV + 317	14.1 AV + 305	12.5 AV + 290	8.9 AV + 273
Refrigerator-Freezers—automatic defrost with:					
Top-mounted freezer without through-the-door ice service [1]	19.3 AV + 384	17.8 AV + 372	16.8 AV + 363	14.4 AV + 334	10.0 AV + 306
Side-mounted freezer without through-the-door ice service	14.8 AV + 572	13.5 AV + 547	13.1 AV + 540	10.9 AV + 497	6.9 AV + 426
Bottom-mounted freezer without through-the-door ice service	21.1 AV + 410	19.1 AV + 499	17.9 AV + 386	15.2 AV + 353	10.5 AV + 321
Top-mounted freezer with through-the-door ice service	20.5 AV + 409	18.9 AV + 395	17.6 AV + 380	14.8 AV + 343	10.2 AV + 313
Side-mounted freezer with through-the-door ice service	17.2 AV + 662	15.7 AV + 635	15.2 AV + 625	12.8 AV + 582	8.1 AV + 517
Upright Freezers with: Manual defrost	14.7 AV + 213	13.2 AV + 191	12.3 AV + 181	10.4 AV + 177	7.0 AV + 157

[1] Including all refrigerators with automatic defrost.

Payback Period. Table 3–2 presents the payback period for the efficiency levels analyzed for the most prevalent class of product (20.8 cubic foot adjusted volume, automatic defrost refrigerator-freezer). Standard level 1 involves efficiencies achievable with foam door insulation and a 5.0 compressor, level 2 involves additional efficiencies achievable with K=0.11 foam insulation, level 3 substitutes a 5.3 compressor, level 4 substitutes K=0.10 foam insulation and adds more efficient fans as well as 2 inches of door insulation, and level 5 adds adaptive defrost and evacuated panel which the additional expense of purchasing a product at this efficiency level will be less than three times the value of the energy savings that the consumer will receive during the first year. The payback period for refrigerators that meet standard level 1 efficiency ranges from a low of 0.6 years for a side-by-side refrigerator-freezer with through-the-door services to a high of 2.0 years for a manual defrost chest freezer; the payback period for refrigerators that meet standard level 2 efficiency ranges from a low of 0.9 years efficiencies. For most classes, standard level 3 corresponds to the most stringent energy conservation standard level at for a side-by-side refrigerator-freezer without through-the-door services to a high of 1.9 years for a manual defrost chest freezer; the payback period for refrigerators that meet standard level 3 efficiency ranges from a low of 1.3 years for an upright, automatic defrost freezer to a high of 2.9 years for a manual defrost, chest freezer; and, the payback period for units that meet level 4 efficiency ranges from 2.7 years for an automatic defrost refrigerator-freezer with side freezer and through-the-door services to 4.1 years for a chest freezer. *See* Technical Support Document Table 3.31 through Table 3.40.

Significance of Energy Savings. By the year 2015, the weighted average energy consumption of new refrigerators sold in absence of revised standards is not projected to change compared to 1990 when the legislated standards become effective. This is because residential electricity rates are projected to decline from 1984 to 1995, then increase, reaching 1983 levels by 2015 (in real terms). Without upward pressure on operating expenses, the LBL–REM projects that there will be no major energy consumption improvements. When revised energy conservation standards are imposed, the LBL–REM projects that over the period 1992–2015, the following savings would be attributable to the increased standards:

Level 1—3.8 Quads
Level 2—5.1 Quads
Level 3—5.9 Quads
Level 4—8.1 Quads
Level 5—11.6 Quads

(*See* Technical Support Document, Table 5.8.)

On the basis of the above, DOE believes that the increased standard levels considered for refrigerators would result in a significant conservation of energy. However, DOE believes that the LBL–REM base case projections of no improvement in the efficiency of refrigerators compared to 1990 is unlikely. Over the last two decades the average efficiency of refrigerators has increased over 50 percent. During this time, the nation experienced both declining and increasing real energy prices. DOE believes there is no reason to conclude that the average efficiency of refrigerators will not continue to increase. Changes in SWEF can be brought about by a number of factors including heightened consumer awareness.[16] DOE requests comments on this issue, particularly the LBL–REM's forecast of refrigerator efficiency.

Economic Justification—A. *Economic Impact on Manufacturers and Consumers.* The per unit increased cost to manufacturers to meet the level 3 efficiency ranges from $12.60 for a 22.5 cubic foot (adjusted volume (AV)) chest freezer to $15.90 for a 31.9 cubic foot AV automatic defrost refrigerator-freezer with side freezer and through-the-door services. The cost for the most prevalent class of product (automatic-defrost refrigerator-freezer with top-mounted freezer) would increase $13.20. For level 4 efficiency, the per unit increased cost to manufacturers to meet that efficiency ranges from $22.40 for a 26 cubic foot chest freezer to $36.80 for a 31.9 cubic foot automatic defrost refrigerator-freezer with side freezer and through-the-door services. The cost for the most prevalent class of product (automatic-defrost refrigerator-freezer with top-mounted freezer) would increase $33.20. The per unit increased cost to manufacturers to meet the level 1 efficiency ranges from $4.60 to $6.90, while level 2 cost increases range from $7.70 to $10.30. For level 5, the cost increases from $47.30 to $79.60. *See* Technical Support Document, Tables 3.14 through 3.23.

The LBL–MIM, in the base case, projects manufacturers long-run return on equity (ROE) to be 9.54 percent for refrigerators and refrigerator-freezers and 8.25 for freezers. At level 3, the LBL–MIM predicts that a prototypical refrigerator and refrigerator-freezer manufacturer would have a gain in its ROE to 10.59 percent, a gain of 11.0 percent. At level 4, the manufacturer's ROE is expected to increase to 10.56 percent, a 10.7 percent gain. The corresponding gains for freezer manufacturers are 15.5 percent at level 3, and 6.9 percent at level 4. At levels 1 and 2, the refrigerator and refrigerator-freezer manufacturers' ROE are expected to improve respectively, to 10.08 percent (an improvement of 15.6 percent) and to 10.32 percent (an improvement of 8.2 percent). For freezer manufacturers, the ROE is expected to improve to 8.99 (an improvement of 12.8 percent) for levels 1 and 2, respectively. *See* Technical Support Document, Tables 7.9 and 7.10.

These industries have displayed periods of increasing consolidations that have been especially pronounced during periods of low earnings. By increasing profitability, as DOE projects, standards could lead to a reduction in the rate of such consolidations, thereby possibly contributing to more robust competitiveness than is likely in the base case. The increase in profitability is directly related to the LBL–REM projection of shipments. Shipments under standards are projected to increase slightly. *See* Technical Support Document, Table 5.34. If shipments were to decrease, however, the LBL–MIM's projection of ROE would likely decrease, resulting in reduced profitability and possibly increase industry concentration.

The Department's characterization of the prototypical manufacturer in the base case assumes that manufacturers' typical refrigerator, refrigerator-freezer and freezer designs are based on the combination of options presented in the Engineering Analysis for the baseline unit. If manufacturers use a different combination of design options to produce refrigerators that minimally comply with the 1990 NAECA standard, the Department may have inappropriately characterized the financial position of the prototypical manufacturer in the LBL–MIM. Furthermore, since financial data of the type needed to characterize the prototypical manufacturer are generally not available, DOE had to make a number of assumptions based on the limited data publically available, e.g., Securities and Exchange Commission 10K reports and company annual reports. Finally, DOE assumed that manufacturers would have sufficient quantities of the regulated CFC's. Because of the significant impact these assumptions could have on the results of the analysis, DOE requests comments on these issues, particularly from small manufacturers.

The sensitivity analysis, however, indicates the refrigerator, refrigerator-freezer and freezer industry is sensitive to price and operating expense elasticities. For example, the high price and low operating cost scenario indicates that the effects of standards would be to decrease return-on-equity for refrigerator, refrigerator-freezer and freezer manufacturers by nearly 1.5 percent and nearly 2.0 percent for freezers. *See* Technical Support Document, Tables 7.17 and 7.18. While these scenarios are theoretically possible, the Department expects that the original analysis will be the likely outcome.

For consumers, standard level 3 would cause price increases that would range from a low of $22.62 for an automatic defrost, upright freezer, to a high of $39.36 for an automatic defrost, side-by-side refrigerator-freezer. The corresponding range of price increases at standard level 4 would be a low of $48.13 for a manual defrost, chest

[16] On June 13, 1988, FTC published proposed rules to amend the appliance labeling program. (53 FR 22106). In particular, FTC requested comments on amendments to refrigerator labeling. Changes to the refrigerator label could increase consumer awareness of energy consumption.

freezer and a high of $96.70 for an automatic defrost, side-by-side refrigerator-freezer. *See* Technical Support Document, Tables 3.31–3.40.

B. *Life Cycle Cost and Net Present Value.* The LCC analysis indicates that for each possible standard level the increase in purchase price would be offset by savings in operating expenses. Standard level 4 generally corresponds to the minimum for each of the life-cycle cost curves. *See* Technical Support Document, Figures 3.13–3.22. This indicates that the standard level would not cause any economic burden on the average consumer. DOE examined the effect of different discount rates, 5, 7 and 10 percent, on the LCC curves and generally found little impact; however, the Department did not consider higher discount rates. Similarly, DOE did not consider different energy prices, including regional prices, or different usage rates in the LCC analysis.

The LBL–REM employs national average energy prices and usage rates. The appropriateness of this approach depends on the relationship between energy prices and consumer choice of efficiency levels and the relationship between consumers' expected usage and choice of energy efficiency level. If those consumers who face higher energy costs and/or expect to use their refrigerators more intensively, are on average, more likely to buy higher efficiency refrigerators, then a modeling approach that assumes that national average energy prices and usage rates apply to all consumers will yield results that overstate the net benefits that could be expected. The Department requests comments on the effects of energy prices and expected usage rates on consumer's choice of efficiency level as well as the potential biases that may be introduced by using national average energy prices and usage rates.

The net present value (NPV) analysis indicates that if a standard were adopted at level 3, there would be a net present value of $12.2 billion from energy savings over the period 1992–2015. At level 1, the corresponding NPV would be $8.5 billion, at level 2, $11.0 billion and at level 4, the corresponding NPV would be $13.9 billion. *See* Technical Support Document, Table 5.14. If, as discussed above, the NPV were calculated based on a 15 percent discount rate, the NPV at level 3 would be $2.5 billion; significantly less than calculated at seven percent.

C. *Energy Savings.* As discussed above, DOE proposes that standards, at each candidate standard level, would result in a significant saving of energy. The Department conducted several sensitivity cases, one of which was to assume that after 1990, the market would produce refrigerators of an efficiency that increases more than the standards would otherwise require.

The base case projects that there will be no increases in the SWEF of refrigerators after 1990, i.e., that the private sector will not continue to improve the efficiency of these appliances beyond the mandated levels. The sensitivity case assumes that after the 1990 standards are in place, the base case efficiency growth, instead of being flat or zero, will occur at some positive rate. The Department believes that the maximum improvement in market-induced refrigerator energy efficiency after 1990 would be that amount that would be characterized by the historical improvement in such efficiency. It would not be reasonable to assume that energy efficiency would improve at a greater than historical rate.

Therefore, the Department believes that the range of market-induced efficiencies that would occur after 1990 in the absence of additional Federal standards would be from a low or no improvement to a high of an historical average growth rate.

It is important to note that the energy savings results for refrigerator standards may overstate the results that would otherwise obtain. For example, as indicated above, the maximum savings attributable to standards on refrigerators would be 11.6 Quads of electricity. This level would require the use of evacuated panels in place of foam insulation. If, however, base case efficiency growth were to occur at its historical average rate, the LBL–REM projects that savings from standards would be reduced by as much as 4.09 Quads, i.e., 11.6 Quads minus 7.51 Quads over the 1992–2015 period. See Table 3.3. Similarly, the energy savings could be affected if a regional analysis, including regional energy prices and varying usage rates, were used. DOE did not perform this analysis because the Department does not have data to indicate that regional values would have an effect on energy savings due to standards.

TABLE 3–3.—SENSITIVITY ANALYSIS: CUMULATIVE ENERGY CONSUMPTION OF REFRIGERATORS, REFRIGERATOR-FREEZERS, AND FREEZERS IN THE PERIOD 1992–2015 (QUADRILLION BTU, PRIMARY)

[High efficiency sensitivity case]

Base case	Standard			Difference		
	Level 3	Level 4	Level 5	Level 3	Level 4	Level 5
41.64	39.41	37.52	34.13	2.23	4.12	7.51

D. *Lessening of Utility or Performance of Products.* As indicated above, DOE established classes of products in order to assure that the standards analyzed would not lessen the existing utility or performance of refrigerators. However, there is no assurance that future utility or performance of refrigerators would not be lessened as a result of disincentives caused by standards to investments in energy-using new features or as a result of redesign brought about by EPA's regulations affecting CFC production.

E. *Impact of Lessening Competition.* Since standards generally would result in greater industry profitability, and since historically in this industry mergers have resulted during periods of low profitability, one result of standards could be to reduce the rate of industry consolidation, therby leading to more competition than is likely under the less profitable base case. DOE concludes from the results of the LBL–MIM that standards could lead to a reduction in the rate of consolidation; therefore, standards would not lessen competition. However, this conclusion is based on DOE's forecast of increased ROE. DOE requests comments on the impact of standards, both legislated and possibly amended, on competition.

F. *Need to Save Energy.* Refrigerators use electricity as their energy source. Nearly seven percent of the nation's total electricity (which required source energy of 27.6 Quads in 1987) powers refrigerators, and nearly 13 percent of that seven percent would be saved by standards for this product at level 3, while almost 18 percent of that seven

percent would be saved at level 4. Levels 1 and 2 would save 8 and 11 percent respectively. The sensitivity analysis on the LBL–REM indicates that even if market improvements and consumer awareness of appliance efficiency continues, the projected savings at level 3 would be nearly 5.5 percent of that seven percent, while the savings at level 4 would be nearly ten percent of that seven percent.

G. *Other Factors.* In the Design Option discussion above, it was explained that many design options considered by DOE require the use of additional amounts of CFC, either CFC–11 or CFC–12. Both of these refrigerants are subject to an EPA rulemaking that would place restrictions on the manufacture of certain CFCs.

As noted above, the use of CFC's in the manufacture of refrigerators currently accounts for approximately two percent of the restricted CFC's. The 50 percent reduction in CFC manufacture prescribed by EPA, will likely result in the use of CFC's in refrigerators to exceed five percent of U.S. consumption. This increase in the percentage of CFC consumption accounted for refrigerators would be a result of the CFC production restriction along with increased CFC use to meet the legislated 1990 standards, and increased sale of these products. Presently, DOE is unaware of any currently available alternatives to CFC–11 or CFC–12 that have been demonstrated as acceptable replacements to the affected CFC's. However, likely alternatives have been identified, but have not been subjected to complete evaluation, including toxicology tests. Based upon the comments on the advance notice, DOE assumed that suitable alternatives will be developed; however, the schedule by which these alternatives will become available in sufficient quantities is unknown at this time. DOE believes that most of the increase in CFC usage will be made in order to meet the 1990 NAECA standards. Of the design options considered to meet standard levels 1 through 3, only the addition of foam doors for refrigerators and refrigerator-freezers (level 1) would require significant amounts of the affected CFC's. However, in order to meet the 1990 NAECA standards, manufacturers could consider the adoption of design options not included in DOE's baseline unit, including thicker walls. If manufacturers were to adopt this approach, substantially more CFC's would be required than the Department assumes. Furthermore, under this scenario, the supply of CFC's may not meet the demand at any standard level including the 1990 NAECA level. The impacts of the EPA rulemaking on CFCs are not specifically reflected in the LBL–MIM. DOE solicits comments on this issue, especially concerning the baseline unit and manufacturers' ability to meet the 1990 NAECA standards. DOE is particularly interested in receiving comments from small manufacturers of refrigerators.

Conclusion. After careful consideration of the analysis, the Department is proposing a revision of the refrigerator standards from a range of standards that includes continuing the 1990 NAECA standards to standard level 3. The Department proposes that each candidate standard level for refrigerators saves a significant amount of energy, and is economically justified. However, because of the analytical and policy questions discussed above, the Department is not proposing specific standard levels within the above range. Rather, DOE is presenting the results of the analysis and is soliciting additional comment and information to be considered in promulgating the final rule. The final rule will specify a specific level for refrigerators; the level selected could include no change to the 1990 NAECA standards.

As discussed above, DOE's analysis indicates that there would be substantial energy savings at each candidate standard level of efficiency. During the period 1992–2015, these savings would be nearly six Quads of primary electricity per year compared to the base case for level 3, five Quads for level 2 and nearly four Quads for level 1.

Although these standards would cause some increase in the initial price to the consumer, each standard is calculated to reduce substantially the typical consumer's life-cycle costs. In addition, of the standard levels analyzed, level 3 was the most stringent level that satisfied the rebuttable presumption test, i.e., that had a value of energy savings that repaid the initial purchase price increase to the average consumer in less than three years.

The technologies that may be necessary to meet each standard, level 1–3, will likely be available by 1993. These include compressors of near 5.3 EER. For manufacturers, level 3 standards are expected to produce long-run increases in their net income and return on equity of 18.2 percent and 11.0 percent, respectively. Levels 1 and 2 will result in similar increases.

Each standard level may involve the use of additional amounts of ozone-depleting CFC's; however, DOE believes this additional amount will come at the expense of other products that presently use the needed CFC's. If, however, EPA were to halt the production of CFC's, manufacturers would have to find alternatives to both CFC–11 and CFC–12. It has not been conclusively demonstrated to what extent, if any, alternatives would penalize the energy efficiency performance of refrigerators. Furthermore, if the standards were to be revised and it were to be shown that the CFC alternatives did have an efficiency penalty, DOE would not be able to adjust the standard downward.

In the base case (1990 NAECA standards), DOE believes the analysis likely underestimates the impacts of the 1990 NAECA standards. As discussed above, the Department believes that the LBL–REM overestimates energy consumption by forecasting no increases in refrigerator SWEF. Also, the characterization of the prototypical manufacturer in the LBL-MIM does not account for the possible impacts of the EPA's regulations concerning CFC manufacture, since the Department assumed that sufficient quantities will exist after the regulations go into effect.

In addition, not amending the 1990 NAECA standards would allow manufacturers time to adjust to the standards; would not increase refrigerator CFC use; and would allow time for research on alternative, lower CFC-using technologies.

For standard level 3, the Department proposes that there will be a significant conservation of energy and that the standards are projected to have little economic impact on manufacturers. Standards at this level would likely be met with existing technology and would reduce consumer life cycle costs. However, standards at this level would require the use of more CFC's and would increase prices to consumers. Furthermore, as discussed above, the LBL-REM forecast of energy savings is likely to be overestimated. The standards analysis may also underestimate the impact on manufacturers, since many are already involved in retooling to meet the 1990 NAECA standards and the EPA's CFC restrictions.

For standard level 2, the Department proposes that there will be a significant conservation of energy and that the standards will cause little increase in price to consumers. In addition, the analysis projects little economic impact on manufacturers and a substantial reduction in consumer life cycle costs. However, standards at this level will require the use of more CFC's. Also, the analysis may underestimate the economic impacts on manufacturers as

discussed above and it likely overestimates energy savings.

For level 1, the Department proposes that there will be a significant conservation of energy and that the standards would likely have little economic impact on manufacturers and consumers. In addition, the standards would substantially decrease consumer life cycle costs compared to the 1990 unit. However, significant improvements in efficiency are technologically feasible. Also, standards at this level would result in some increase in CFC use in refrigerators, and the impacts on manufacturers and energy savings estimates may be incorrect as described above.

The results of the analysis, including those for levels 1, 2, and 3 discussed above, could change if a different discount rate were used, energy prices drop, or if the use of national average energy prices and appliance usage rates introduces a bias. Furthermore, if amendments to the appliance labeling program are finalized by FTC, it could improve the effectiveness of the program, thereby reducing any benefits of standards. 53 FR 22106, June 13, 1988. DOE believes that programs such as the labeling program are preferable to standards since they result in the least amount of intervention in the marketplace and do not preclude products that may be the optimum for certain consumers.

More stringent standard levels were examined and rejected for the following reasons: First, the level 5 standard, the maximum technologically feasible option, involved the use of evacuated panels. While evacuated panels have existed for some time, and were previously even used in some Japanese refrigerators, the technology has not yet proven to be a reliable and durable one, and one suitable for mass production. Furthermore, even though one domestic manufacturer has patented an evacuated panel technology, there are no reasonable assurances that a reliable and durable evacuated panel design will be available when this standard is to be effective. Therefore, the Department has rejected this standard level. Moreover, in most cases this point is beyond the minimum life-cycle cost point which would prevent some consumers from being able to purchase the most cost-effective units for them.

Level 4 standards would involve a substantial increase in the initial consumer price of refrigerators; in fact, the improvements necessary to reach that level of efficiency are estimated to be so costly that the rebuttable presumption consideration is not satisfied for the most prevalent class. In addition, results of the engineering analysis and the life-cycle cost analysis indicate that while there is a substantial increase in the price of refrigerators between level 3 and 4, the corresponding decrease in operating costs results in a negligible life-cycle cost difference between these levels. Furthermore, this standard level assumes the use of more ozone-depleting CFC than the level 3 standard.

b. Small Gas Furnaces

1. Classes

Two classes of small gas furnaces,[17] weatherized (outdoor) and non-weatherized (indoor), were specified in the advance notice.

These classes are distinguished by their ability, or inability, to be installed outdoors, a performance-related feature that affects utility and efficiency. The weatherized (outdoor) furnace provides the owner with the utility of saving indoor space. The weatherized furnace typically is less energy efficient than a comparable nonweatherized (or, indoor) furnace because the "jacket" energy losses of a weatherized furnace will usually exceed the infiltration energy losses of an indoor furnace. The test procedures for furnaces recognize these differences and prescribe different efficiency calculation methods for these two types of furnaces.

2. Design Options

The Engineering Analysis identifies individual or combinations of design options with a potential for improving energy efficiency. Design options that are on the market, or that will be on the market by the time standards are effective, were considered. The following is a list of design options that were examined:

(A) Increased heat exchanger surface area.

(B) Intermittent ignition device (IID).

(C) Power burner or power vent.

(D) Increased insulation.

(E) Additional improvement of steady-state efficiency.

(F) Two-stage and modulating burners.

3. Comments on the Advance Notice of Proposed Rulemaking

Comments from the Edison Electric Institute (EEI) suggested that in evaluating the small furnace standard (between 71 and 78 percent AFUE), the Department consider the base case not to be the no regulation case, but rather the 78 percent case. In addition, EEI suggested that the Department examine 71 percent AFUE, 78 percent AFUE (as the base case), and two levels higher than 78 percent. (EEI, No. 20, at 3–4).

The Department rejects the idea of a base case at 78 percent AFUE since that would preclude the ability to show any energy savings at 71 percent AFUE and, therefore, it would *a priori* exclude the 71 percent AFUE case from consideration. As to EEI's other suggestion, DOE believes it would serve no purpose in this proceeding to examine two standards cases of efficiencies greater than 78 percent AFUE since the Act precludes DOE from setting a standard greater than 78 percent AFUE.

The American Gas Association (AGA) and Alabama Gas Association (AlG) maintained that the use of life-cycle cost (LCC) analysis is inappropriate in the small gas furnace market since much of the decision-making on new purchases is made by builders and contractors whose purchase decisions are influenced principally by initial price considerations. (AGA, No. 24, at 1; and, A1G, No. 8, at 3 and 6). Conversely, CEC suggested that the Department develop LCC curves for each product. (CEC, No. 35, at 6).

Indeed, while much of the small furnace market demand comes from builders and contractors, consumer life-cycle cost analysis is still appropriate since section 325(1)(2)(B)(i)(II) of the Act requires DOE, in determining whether a new or amended standard is economically justified, to "determine whether the benefits of the standard exceed its burdens by, to the greatest extent practicable, considering the savings in operating costs throughout the estimated average life of the covered product in the type (or class) compared to any increase in the price of, or in the initial charges for, or maintenance expenses of, the covered products which are likely to result from the imposition of the standard."

The AGA stated that the LBL–REM model disregards regional variations in housing unit growth rates (AGA, No. 24, at 15). The AGA is incorrect, since the inputs to LBL–REM include forecasts of regional housing starts. Specifically, LBL–REM's updated housing submodel includes several features:

(1) The model uses population projections, which are more stable than

[17] The Act requires the Department to establish minimum energy conservation standards for gas furnaces (other than furnaces designed solely for installation in mobile homes) having an input of less than 45,000 Btu per hour. The Department interprets this provision to be applicable only to gas, forced-air furnaces.

projections of housing completions because of the comparatively larger influence of economics, e.g., the stage of the business cycle, interest rates, and so on, on housing completions. In the long run, the number of housing units available is expected to agree with the need for housing units, which is determined by the size and composition of the population.

(2) The updated method utilizes population projections for states by house type. This feature, combined with climate data, permits estimation of the fraction of households with heat loads that could be met by small gas furnaces.

(3) Projections of the numbers of people in each age group in future years are used to project changes in the distribution of house types.

Lastly, with regard to the utility impact analysis, Lone Star Gas Company (LSG) and EEI suggested that the utility analysis examine the impact on gas, as well as electric, utilities. (LSG, No. 11, at 6; EEI, No. 20, at 6).

No direct analysis of gas utilities was performed, but impacts on residential gas sales were estimated. The Department believes that this is adequate to assess the gas utility impacts from standards on small gas furnaces that are intended for residential use, since the bulk of these impacts should be on future gas utility residential sales. Nevertheless, the Department welcomes detailed information and data from persons or organizations who believe that DOE has underestimated the likely impacts on gas utilities.

Also, two utilities suggested that results obtained for a region may differ greatly from results obtained for each separate utility system within a region. (Allegheny Power System (APS), No. 13, at 2; and, LSG, No. 11, at 6).

For the small gas furnace analysis, it was the Department's intention to capture as much of the regional variations as possible. LBL–REM used regional disaggregation in modeling space conditioning choice in new homes. While resource limitations prevented any further disaggregation of the marektplace, DOE is interested in receiving information and data on any specific regional problems that were overlooked.

Several gas distribution companies and gas suppliers, and the Southern Gas Association (SGA) and AGA endorsed the 71 percent AFUE furnace standard over the 78 percent AFUE. They cited various reasons for their preference for the lower efficiency, the predominant one being the impact on gas utilities of reduced load that would result from a 78 percent standard.[18] Comments in favor of the 78 percent AFUE were received from the Gas Appliance Manufacturers Association and the Edison Electric Institute. (GAMA, No. 23, at 1); (EEI, No. 20, at 2). Three comments encouraging a thorough analysis of all factors before a decision is made were submitted by the Natural Resources Defense Council, the New York State Energy Office, and the American Council for an Energy-Efficient Economy (ACEEE). (NRDC, No. 19, at 6–8; NYSEO, No. 32, at 7–8; ACEEE, Testimony).

Several comments favored DOE's approach of considering two standards cases, 71 percent and 78 percent, since efficiencies between 71 and 78 percent are not well-defined in terms of inherent design options. (PING, No. 3, at 3; Peo.G., No. 6, at 1; FNGA, No. 14, at 1; ENTEX, No. 15, at 2; AGA, No. 24, at 7; and SGA, No. 26, at 2).

Comments requesting consideration of a range of efficiencies between 71 and 78 percent were received from Southern Company Services Inc. (SCS). (SCS, No. 7, at 1).

While the Department still believes that 71 percent and 78 percent AFUE are the meaningful candidate levels, an analysis at 74 percent AFUE was also conducted.

The Edison Electric Institute suggested that the 78 percent AFUE level should be the base case or "default level" unless DOE justifies reducing it to 71 percent. (EEI, No. 20, at 3). The New York State Energy Office stated that DOE is required to investigate maximum technical feasibility efficiency levels for small furnaces and that while pulse combustion and heat exchangers are not on the list of design options to be examined, they should be. (NYSEO, No. 32, at 7–8).

The "max-tech" level of efficiency for small furnaces is 96 percent AFUE; therefore, it cannot be a candidate standard level for this rulemaking, because it falls outside of the range for consideration set by section 325(f)(1)(B)(ii) of the Act.

Only one comment addressed test procedure issues. York International (York) pointed out that "the measure of efficiency for furnaces under the FTC appliance labeling requirements is the annual fuel utilization efficiency (AFUE) and not the Energy Factor." (York, No. 1, at 1). The Act is explicit under the definition of "efficiency descriptor" stating "for furnaces and direct heating equipment, (it is) annual fuel utilization efficiency." Section 321 (a)(22)(A). The confusion in this matter has reference to section III of DOE's advance notice, in which outputs of the engineering analysis are listed as Energy Efficiency (expressed as the DOE energy factor) with a footnote stating "the energy factor is a measure of energy efficiency derived from the DOE test procedure for that product." The problem is that the DOE test procedure for furnaces includes an additional efficiency descriptor called Energy Factor which includes the electric energy in the calculation. This potential misinterpretation, that energy efficiency refers to the "Energy Factor," is being clarified by stating that energy efficiency refers to AFUE.

Maintenance Expense. Several gas companies referenced the need to consider higher maintenance expense for the 78 percent AFUE furnace standard. (A1G, No. 8, at 6; LSG, No. 11, at 4&8; FNGA, No. 14, at 4; VANG, No. 16, at 7; ALG, No. 26, at 2; and NG Co., No. 37, at 2). Since this efficiency level would require the use of a fan motor and its associated controls for induced draft, the maintenance expense was included in the Engineering Analysis.

Higher First Costs/Installation Costs. Several of the gas companies and associations cited increased installation expenses due to special venting requirements as being necessary to consider in the engineering and economic analyses for the 78 percent AFUE standard for induced draft type furnaces. (OKNG, No. 2, at 2; ETNG, No. 9, at 4 and 5; LSG; No. 11, at 8; ANR, No. 12, at 2; FNGA, No. 14, at 2; VANG, No. 16, at 5; AGA, No. 24, at 12; SGA, No. 25, at 4; UCG, No. 27, at 3; SCE&G, No. 28, at 3; and NG Co., No. 37, at 2). Generally, these comments addressed problems that would arise when a furnace and a water heater are installed with a common vent system.

[18] The gas utility companies and associations responding included:

These additional expenditures were cited as needed since a separate vent may be required to vent an induced draft type furnace. Also, the existing vent used for the water heater would then be oversized and possibly require a revised water heater vent or insulation of the vent to prevent condensation. Particular problems were cited for multifamily structures and accessibility to the existing venting for retrofit. GAMA disagreed, stating that venting of induced draft gas furnaces in multifamily housing would cost less, not more, than the atmospheric type of vent systems. (GAMA, No. 23, at 4). GAMA also encouraged DOE to examine further this comparative cost issue. This issue had not been addressed explicitly by LBL and additional analysis is planned before DOE will issue a final rule.

Regional Analysis. Several gas companies and their associations submitted comments suggesting that a regional analysis be included that accounts for the reduced heat load and energy savings that would prevail for the higher efficiency, i.e., 78 percent AFUE, in milder climates. (PING, No. 3, at 2; Peo.G., No. 6, at 2; A1G, No. 8, at 3&7; FNGA, No. 14, at 4; AGA, No. 24, at 14; SGA, No. 26, at 2; and SCE&G, No. 28, at 2).

A national estimate was made using LBL–REM. DOE recognizes that there are regional differences in climate. LBL–REM includes a heat load calculation for new houses in each state that is used for projecting market shares of small gas furnaces. The average unit energy consumption of small gas furnaces reflects the average climate where small gas furnaces are located, not a national population-based climate.

In addition, DOE performed a sensitivity analysis on the LCC analysis using regional energy prices and usage rates. *See Technical Support Document,* section 6.2. Because of the impact that usage and prices can have on the results, DOE requests comments on this issue.

Vent Installation—Ability to Use Common Venting. Many of the gas companies and their associations contended that a major issue to be considered in the 78 percent AFUE furnace (an induced draft type system) are code requirements which would prohibit the installation of this type furnace in a common vent with an atmospheric type burner system. This would be particularly important in the replacement market. (PING, No. 3, at 3; OKNG, No. 2, at 2; Peo.G, No. 6, at 2; A1G, No. 8, at 4; FNGA, No. 14, at 3; VANG, No. 16, at 7; SGA, No. 25, at 3; ALG, No. 26, at 2; NIGAS, No. 36, at 2).

The National Fuel Gas Code (ANSI Standard Z223.1), which is the major installation code for gas-fueled furnaces, addresses mechanical draft systems as follows: "Vent connection serving equipment vented by natural draft shall not be connected into any portion of mechanical draft systems operating under positive pressure." This would prohibit an installation of a gas water heater and a gas furnace in a common chimney venting arrangement. The operative words in the code are "systems operating under positive pressure."

GAMA stated that "over 90 percent of the non-condensing induced draft furnaces and boilers certified by the American Gas Association can be safely common vented with conventional atmospheric type gas appliances." (GAMA, No. 23, at 3). GAMA cited a September 1985 "White Paper" prepared by the American Gas Association Laboratories, entitled "Common Vent Study of Power and Non Power Vented Appliances," to substantiate its statement and which GAMA believes directly contradicts the testimony of AGA and SGA. GAMA also submitted a list of engineering reports published by the AGA Laboratories in the July 1987 issue of the AGA Laboratories Directory of Certified Appliances. GAMA stated that the purpose of these reports is to identify specific induced draft non-condensing furnaces that can be common vented with conventional combustion system equipment. GAMA further stated that AGA's White Paper concluded that before allowing common venting of fan or blown assisted combustion system appliances with draft hood equipped appliances, code authorities are requiring engineering data to show satisfactory performance.

Based on this information, DOE believes that draft induced appliances can be used safely in a common vent system with atmospheric type (draft hood equipped) water heaters. However, there remains a question of the degree of acceptability by local code officials of draft-induced furnaces using a common vent with an atmospheric type water heater. DOE will examine these issues before issuing a final rule for the small furnace standard. DOE invites comments on these issues, especially with respect to the acceptance within each State or local jurisdiction regarding the special testing requirements and AGA engineering reports that are being used.

Several Comments also suggested that a variety of housing types and climates be investigated. SCE&G cited the need for specialized cases to examine payback and economic analysis for mild climates, such as those with less than 2500 degree days (SCE&G, No. 28, at 2).

Utility Impact Analysis—Fuel Switching Impact. Several gas utility companies commented that the utility analysis should include costs of all utilities, not only electric utilities. (OKNG, No. 2, at 3; Peo.G, No. 6, at 2; SCS, No. 7, at 1; A1G, No. 8, at 3 and 7; ETNG, No. 9, at 6; ANR, No. 12, at 3; FNGA, No. 14, at 3 and 4; ENTEX, No. 15, at 2; VANG, No. 16, at 6; ALG, No. 18, at 2; AGA, No. 24, at 4–7 and 12; SGA, No. 25, at 3; UCG, No. 27, at 4; SCE&G, No. 28, at 3; NIGAS, No. 36, at 2; and NGCo., No. 37, at 2).

These companies believe that probable shifts of gas utility load to electricity generation should be included in the analysis when considering the higher 78 percent AFUE levels for small gas furnaces. For example, gas utilities could suffer a decreased market share resulting in an increased cost of gas per unit sold. (LSG, No. 11, at 6). Several of these companies also pointed out that when load is lost to electric resistance heat—particularly baseboard radiant heat—that future conversion to gas would be cost prohibitive. Gas utilities also contended that a switch to electric resistance heat with its attendant higher cost of operation will hurt the elderly and lower income customers. AGA stated that the proposed methodology should not consider load loss to heat pumps in assessing the potential load loss from gas utilities when evaluating the shift of gas heating to electric resistance heat, as required by the Act. (AGA, No. 24, at 4).

In considering candidate standard levels, the Department will calculate the potential load loss of gas utilities to electric resistance heat, and to other heating choices, e.g., heat pumps.

The South Carolina Electric Company (SCE&G), which supplies both gas and electricity to its customers, favors the lower 71 percent AFUE standard for small furnaces. SCE&G stated that fuel switching will produce a greater demand for electricity on the company's electric system, but this will not cause a corresponding increase in KWh sales because of the utility's climate area. (SCE&G, No. 28, at 3).

Alabama Gas Corp. (A1G, No. 8, at 4) stated what many other gas utility companies also implied—that when a gas furnace is not selected, a gas water heater often will not be selected. Specific comments that cited statistics or estimates included the following: "Seventy-eight percent AFUE would lose 20–25 percent of the market to electric resistance"—(OKNG, No. 2, at

3); "forty percent of new homes in Florida install electric resistance heat," (FNGA, No. 14, at 3); "although less than 10 percent of dwelling units priced above $120,000 use electric resistance heat, roughly one-third of the units priced less than $60,000 use electric resistance heat. AGA projections of load loss to gas utilities between the years 1993 and 2000 could be as high as 600 BCF if the 78 percent AFUE level is prescribed." (NG Co., No. 37, at 3).

Conversely, EEI stated that DOE's analysis should consider only those households that are both candidates to purchase gas furnaces and candidates to purchase gas supply, since the decision of a builder to choose electric space conditioning may be based on the availability, cost or convenience of electricity and gas. EEI also commented that DOE should modify the utility analysis to include the benefits that will occur from improved gas energy efficiency causing an extension of future gas reserves. (EEI, No. 20, at 5). While improvement in energy efficiency in small gas furnaces would seem to extend future gas reserves, the Department believes that the private individuals' values for those reserves, as expressed in the marketplace, captures fully the benefits to society of any extension of the reserves' lifetimes. Therefore, no additional benefits to society will be calculated for this potential effect.

Sierra Pacific Power (SPC) stated that the analysis should also include gas utilities which would be impacted by: Reduction in fossil fuel usage; input to environmental assessment; change in investment; change in revenue requirements; change in facilities, and change in residential load factors. (SPC, No. 33, at 1).

NRDC contended that the furnace standard analysis should consider the likelihood of the Department's implementation of ASHRAE Special Project 53, which would require greater thermal integrity in homes that are heated by electric resistance heat than for those that are heated by gas. The contention was that since this would raise the first-cost of electric resistance heating relative to gas heating, it would "reduce or eliminate fuel switching to electric resistance resulting from furnace standards by reducing the differential costs—both first cost and operating cost—of gas and electric resistance houses." (NRDC, No. 19, at 8–9).

The Department accepts this point; however, DOE has no authority to implement a mandatory program, incorporating provisions of ASHRAE Special Project 53, that would apply to non-Federal construction.

NRDC also suggested that consideration of the small gas furnace standard be done in the context of manufacturers having retooled to meet a 78 percent AFUE standard for gas furnaces greater than 45,000 Btu. Therefore, to produce a 71 percent AFUE unit would require setting up a separate production line which, because of the relatively small numbers of small furnaces produced, could result in higher unit cost than would a 78 percent standard for small furnaces. (NRDC, No. 19, at 6).

The Department's analysis evaluated the impacts of standards on small gas furnaces in the context of a 78 percent standard in effect on all furnaces greater than 45,00 Btu/hour input.

The NRDC contended, in advocating a 78 percent AFUE small gas furnace standard, that those consumers who are already willing and institutionally able to trade off higher first costs in return for lower operating costs will buy a small gas furnace, even at 71 percent efficiency. NRDC maintained,

> It would seem anomalous if a family that was willing to accept, say, a five-year payback on going from resistance heat to gas would not be willing to accept a similar or shorter payback with respect to increasing the efficiency of the gas furnace. We believe the model should reflect this syllogism. (NRDC, No. 19, at 7).

This comment contains implicit assumptions that are not necessarily valid. The payback on the higher efficiency furnace would be similar or shorter only if it had a less than proportional price increase to reach the higher efficiency. If the price increase for the higher efficiency unit were proportionately more expensive than the value of additional energy saved, then the payback period would, in fact, be longer.

The American Council for an Energy-Efficient Economy testified that claims about shifts in markets should be avoided unless supported by empirical evidence. (ACEEE, Testimony).

Future Market. Several gas utilities and associations commented that the future market for gas furnaces of less than 45,000 Btu/h input is considerably greater than may be projected by the LBL–REM. (A1G, No. 8, at 3–5; VANG, No. 16, at 6; AGA, No. 24, at 9, 11, and 15; SGA, No. 25, at 3; and ANR, No. 34, at 2).

The major reasons given to support this assertion were: Thermal integrity of buildings is improving due to either retrofit or to recent changes in model building codes; historical oversizing of gas furnaces has now been recognized and oversizing practices are being moderated (in some cases as a result of building codes); and, there are increased numbers of multifamily housing units with their smaller sizes and lower heating requirements. AGA provided data from its Space Heating Efficiency Improvement Program (SHEIP) showing that furnaces are typically 2½ times oversized, and all new and existing multifamily units could be served by less than 45,000 Btu/h furnaces. (AGA, No. 24, at 10).

AGA also commented that the assumption in the proposed methodology that the market for a small gas furnace is the single family house which is undefined by size, heat loss, geographic region, or socioeconomic group is questionable for existing construction, and is an incorrect assumption for new housing built from 1992 and beyond. (AGA, No. 24, at 9).

"AGA statistics indicate that average gas consumption for house heating customers declined 27.4 percent from 1973 baseline consumption levels, while the number of house heating customers increased 17 percent." AGA also comments that master meter prohibitions and rehabilitation of existing buildings are greatly expanding the market for the small gas furnace. (AGA, No. 24, at 10).

Impact of Builder and Developer Decisions. Several of the gas utility companies and their associations stated that DOE's methodology should evaluate builder decision-making regarding type of heating fuel selected. (PING, No. 3, at 3; OKNG, No. 5, at 2; A1G, No. 8, at 4 and 6; FNGA, No. 14, at 2; ENTEX, No. 15, at 2; VANG, No. 2, at 4 and 5; AGA, No. 24, at 11 and 12; SGA, No. 25, at 6; UCG, No. 27, at 3; and ANR, Nos. 12 and 34, at 3). ANR cited an opinion survey that concluded that builders are the decision-makers in selecting a heating system for single family residences. The objective of these comments was to show that builders' decisions were based on first cost, and that builders will switch to electric resistance because of the increased cost for the 78 percent AFUE furnace. (ANR, No. 34, at 3). NRDC contends that no further switch to electric is likely as a result of the small gas furnace standard going from 71 to 78 percent AFUE, since first cost is already significant for gas at 71 percent versus electric. EEI stated that if a builder decides not to purchase gas it may be for reasons other than whether the furnace is 71 percent or 78 percent AFUE, namely, reasons such as individual metering requirements, interruptible rate requirements, etc. (EEI, No. 20, at 5). Florida Natural Gas has stated that 40 percent of new homes in Florida are presently installed with

electric resistance heat. (FNGA, No. 14, at 3).

Comments on future market share have an overlapping consequence to this analysis if the future market share for small gas furnaces is as great as some have predicted. As a result of more thermally efficient homes, and, with less oversizing of furnaces, the principal market share that otherwise would have been 78 percent AFUE (the NAECA standard for furnaces greater than 45,000 Btu/h) would become 71 percent AFUE if the smaller furnace is predominant. One basis of setting standards for furnaces was predicated on the fact that builders determine the type of equipment to be installed and do so on first cost. If the 71 percent AFUE furnace is available, and attains a large share of the future market for small gas furnaces, the less efficient furnace may be used in structures where a greater than 45,000 Btu/h furnace (of 78 percent AFUE) would otherwise have been used.

In other words, the purpose of an energy efficiency standard as specified by the Act for the typical gas furnace at 78 percent AFUE would be circumvented by the availability to the builder market of a 71 percent AFUE furnace at lower cost. The more thermally efficient home, coupled with less oversizing, could lead to more small gas furnaces. The builder model that would otherwise have been a somewhat larger than 45,000 Btu/h, 78 percent AFUE furnace could become the less expensive 45,000 Btu/h, 71 percent furnace, in a structure that, because of improved construction (with lower heat loss), could then use the smaller furnace.

4. Efficiency Levels Analyzed

Table 3.4 presents the efficiency levels selected for analysis for 1992. Alternate levels were selected to generate a range of impacts for analysis. The initial level selected, level 3, corresponds to the highest efficiency level provided for in the Act. Standards above 78 percent AFUE were excluded from consideration because the Act specifies that such a standard may not be greater than 78 percent AFUE. Levels 1 and 2 correspond to efficiencies lower than level 3, with level 1 being the lowest level provided for in the Act. Levels 1 and 2 were analyzed discretely in the Engineering Analysis. Level 3, 78 percent AFUE, was based on engineering level 3, having an intermittent ignition device and induced draft. In addition, the engineering analysis considered design options that would result in furnace efficiencies as great as 92 percent AFUE. These more efficient designs, as mentioned above, were not considered for potential standards, but rather were used as input to the LBL–REM in order that the energy forecasting analysis would have a complete set of data upon which to make projections.

TABLE 3–4. STANDARD LEVELS ANALYZED FOR SMALL GAS FURNACES

Standard level	AFUE (percent)
1	71
2	74
3	78

Payback Period. Table 3.5 presents the payback period for the efficiency levels analyzed. For both classes, level 1 is the only energy conservation standard level in which the additional cost of purchasing a product at this efficiency level will be less than three times the value of the energy savings the consumer will receive during the first year. The payback period for units that meet level 1 efficiency ranges from 2.3 years for a warm air indoor gas furnace to 2.5 years for a warm air outdoor gas furnace. *See* Technical Support Document Tables 3.41 and 3.42.

TABLE 3–5. PAYBACK PERIODS OF DESIGN OPTIONS YEARS FOR GAS FURNACES (LESS THAN 45,000 BTU/HR.)

Standard level	Payback periods	
	Warm air indoor	Warm air outdoor
1	2.3	2.5
2	14.4	15.6
3	5.1	6.4

Significance of Energy Savings. By the year 2015, the weighted average energy efficiency of new small gas furnaces sold in the absence of standards is projected to be 80.3 percent AFUE. Standards, at standard levels 1 and 3, are expected to increase the average shipment weighted efficiency of small gas furnaces to between 81.6 and 84.3 percent AFUE, respectively. *See* Technical Support Document, Table 5.16. However, the aggregate annual energy consumption of small gas furnaces is projected to increase slightly. This increase in gas consumption for small gas furnaces comes at the expense of larger gas furnaces, heat pumps, and central electrical furnaces. *See* Technical Support Document, Table 5.18. While standards increase the efficiency and cost of small gas furnaces, the market for small furnaces is projected to increase at the same time. When energy conservation standards are imposed, the LBL–REM projects that over the period 1992–2015, the following increase in energy consumption of small gas furnaces would occur:

Level 1—0.01 Quads
Level 2—0.03 Quads
Level 3—0.05 Quads

Economic Justification—A. *Economic Impact on Manufacturers and Consumers.* The per unit increased cost to manufacturers to meet the level 3 efficiency ranges from $64 for an indoor gas furnace to $88 for an outdoor gas furnace. *See* Technical Support Document, Tables 3.24 and 3.25.

At that level of efficiency, the price to the consumer increases $215.10 for indoor gas furnaces and $257.60 for outdoor gas furnaces at level 3. *See* Technical Support Document, Tables 3.41 and 3.42.

The LBL–REM results indicate that standards at level 3 will result in nearly a five percent improvement in average shipment weighted efficiency when compared to standard level 1. This would result in a negligible drop in life cycle costs. *See* Technical Support Document, Table 5.16 and Figures 3.11 and 3.12.

In the LBL–MIM results for small gas furnaces, it was found that standards would cause manufacturers to lose even more money on these furnaces than they are projected to lose in the base or no-standards case. In the base case, manufacturers' returns on equity (ROE) are expected to be −2.02 percent for small furnaces, compared to a base case ROE of a −2.13 percent under standard level 3.

Small gas furnaces tend to have very low profit margins and thus they contribute little or nothing to a gas furnace manufacturer's profitability. DOE believes this is because of marketing considerations, in that manufacturers find it important for marketing purposes to carry a complete line of furnace capacities. Thus, manufacturers tend to carry small gas furnaces in their product lines, although many of these firms carry only one or two models.

LBL–MIM projects that a standard of either 71, 74, or 78 percent AFUE for small gas furnaces would result in slightly fewer shipments, higher product prices, and lower net income and ROE than would occur in the absence of standards.

The LBL–MIM predicts at level 3 that a prototypical furnace manufacturer would experience a .001 percent decrease in ROE. *See* Technical Support Document, Table 7.23. The sensitivity analysis, however, indicates the gas

furnace industry results are sensitive to consumer price elasticities and unit variable cost increases. For example, the sensitivity analysis indicates that the effects of standards could be to decrease return-on-equity for small gas furnace manufacturers by nearly 1.2 percent or to raise it by nearly the same amount. However, there is only a one percent chance of either of these sensitivity results occurring. *See* Technical Support Document, Table 7.25.

B. *Life Cycle Cost and Net Present Value.* The LCC analysis indicates that at each possible standard level the increase in purchase price would be offset by savings in operating expenses. *See* Technical Support Document, Tables 3.41 and 3.42. Also, of the three candidate standard levels, level 3 had the lowest consumer life-cycle cost. This indicates that the standard level would not cause any economic burden on the average consumer because of the decreasing life cycle costs.

The NPV analysis indicates that if a standard were adopted at level 3, there would be a net present value of a negative $17 million to consumers. This negative value is due principally to the increase in furnace shipments and a corresponding increase in total gas consumption in the standards cases. *See* Technical Support Document, Table 5.37.

C. *Energy Savings.* As indicated above, standards will result in an increase of gas consumption for small gas furnaces. If, however, the marketplace continues to demand changes in efficiency at the same rate as historically, the LBL–REM projects that there would be no savings from standards over the 1992–2015 period. This result occurs because in the base case, the efficiency, or SWEF of all new small gas furnaces is projected to exceed the 78 percent AFUE standard by the time it would come into effect. *See* Technical Support Document, Table 5.30, Reference 10.

D. *Lessening of Utility or Performance of Products.* As indicated above, DOE established classes of products in order to assure that the standards analyzed would not lessen the existing utility for performance of small gas furnaces.

E. *Impact of Lessening Competition.* The determination of this factor must be made by the Attorney General.

F. *Need to Save Energy.* Small gas furnaces use natural gas as their energy source. Nearly seven percent of the nation's natural gas consumption is used to operate small gas furnaces, and nearly five percent of that seven percent would be saved by standards for this product at level 3. However, the sensitivity analysis on the LBL–REM indicates that if consumer awareness of and concern with appliance efficiency continues the projected savings would be the same as with level 3 standards.

Conclusion. The Department is proposing a 78 percent AFUE standard on small gas furnaces. A 78 percent AFUE standard for small gas furnaces would result in a significant conservation of energy, and although the payback is greater than three years, the standard level was found to be economically justified.

In addition to producing the maximum unit energy savings of the candidate standards, this standard is beneficial to consumers and manufacturers alike.

For consumers, the 78 percent AFUE standard produces the lowest consumer life-cycle cost of the candidate levels. In addition, the initial purchase price increase may be lower than that which has been estimated. This result is possible because the 78 percent AFUE standard on small gas furnaces is the same level of efficiency that the Act imposes on larger gas furnaces, which presently comprise more than 95 percent of furnance sales. Therefore, to the extent that manufacturers can produce these small units on the same production lines, with the same design options that will be used for the larger furnaces, there may be economics of scale in the production of these units.

Small gas furnace manufacturers have strongly supported the 78 percent AFUE standard on their products. The analysis indicates that such a standard should have relatively little economic impact on them. The uniformity of a 78 percent AFUE standard on small furnaces and on larger units may make the production process simpler for the manufacturers. This occurs because as mentioned above, a uniform standard for all gas furnaces could result in fewer production lines.

In comments on the advance notice, several gas utilities contended that a 78 percent AFUE standard on small gas furnaces would cause them to lose market share to electric utilities. This analysis, however, indicates that such a loss of market share is not a likely result from a 78 percent AFUE standard. The LBL–REM projects that market share for small gas furnaces is likely to increase as a result of the level 3 standard.

One small drawback to the 78 percent AFUE standard on small gas furnaces is that it would eliminate units that may be, in some circumstances, the most cost-effective for some consumers. This is a result that could possibly occur in some Southern-tier States, where the most cost-effective small gas furnace could be one that is less efficient and whose first cost is less than the minimum LCC unit. This less efficient unit could cost the consumer less to operate, on a LCC basis, if the usage rate is extremely low. With low usage it is possible that any increase in purchase price may not be matched by reductions in annual operating costs. Nevertheless, while this is a possible outcome for some purchasers in some areas, the Department believes that such effects, should they occur at all, would be limited.

c. Television Sets

1. Classes

In accordance with the Act, the Department is considering the establishment of an energy conservation standard for television sets, to become effective no earlier than January 1, 1992. The advance notice proposed two classes of television sets, color and monochrome (black and white) to be evaluated for separate levels of efficiency. DOE identified eight design options and requested data on power demand characteristics.

The two classes are distinguished by the ability of one to reproduce images in color, a performance-related feature that affects utility and efficiency.

Color television sets usually consume more energy than comparable monochrome television sets, because of the use of multiple electron guns. For this reason, energy efficiency levels achieved by monochrome television sets are not achievable in color television sets. Since color television sets and monochrome television sets offer distinct differences in utility to the consumer, DOE is specifying separate classes for color and monochrome television sets.

Certain features on television sets, such as remote control and stereo components, provide utility to the consumer and may affect energy consumption. Although such characteristics typically would require the establishment of separate classes for television sets with such features, the Department was unable to analyze these features separately and, hence, is not establishing separate classes for them.

2. Design Options

The following is a list of design options that were examined for both color and black and white television sets:

(A) Remote control.
(B) Electronic tuning.
(C) Automatic color control.
(D) Vertical interval reference.
(E) Brightness sensor.

(F) Voltage regulating power source.
(G) Display device.
(H) One-gun tube.

3. Comments on the Advance Notice of Proposed Rulemaking

Three comments addressed specifically the issue of standards for television sets; these were offered by one manufacturer, one manufacturers' association, and one conservation group. Thompson Consumer Electronics, Inc. (Thompson), manufacturer-marketing company for Radio Corporation of America (RCA) and General Electric (GE) brand television sets, opposed the establishment of energy standards for television sets. Thompson claimed that the technological advancement of solid state electronics in replacing tubes had extensively increased the energy efficiency of television sets. (Thompson, No. 4, at 2). The company stated further that its research revealed an incremental improvement of only 5–48 kilowatt hours (Kwh) per year based on the standard operating time of 2200 hours per year. (Thompson, No. 4, at 3). These claims were supported by the Consumer Electronics Group of the Electronic Industries Association (EIA), an industry trade association representing television manufacturers. (EIA, No. 21, at 2).

Additional comments contended that manufacturers prefer to decrease energy use because of the adverse effects on reliability and performance that can be caused by the excess heat generated by inefficient electronics. (Thompson, No. 4, at 3; and EIA, No. 21, at 3).

NRDC supported the establishment of standards for television sets and maintained that a significant conservation potential exists for this product. (NRDC, No. 19, at 3). NRDC suggested that the list of design options be left open to allow for new and cost-effective energy efficient technologies. One of those recommended was based on the observed variation in power requirement between a 40-inch color set of 190 watts and a four inch monochrome portable of 3.6 watts. It was suggested that even allowing for color versus black and white difference, the 10-fold decrease in size inferred some technology of portability which could be employed in larger sets. (NRDC, No. 19, at 4). DOE has reviewed this comment and does not find a basis for the improvement potential suggested by NRDC. Therefore, the Department rejects NRDC's inference of improvement potential.

NRDC expressed the expectation that the Department would issue a standard for television sets as long as at least one of the design options analyzed has a favorable life cycle cost and meets the other impact criteria under which DOE is operating. (NRDC, No. 19, at 5).

EIA submitted that television sets no longer use significant amounts of energy and are "covered products" because of historical data obtained when tubes were used primarily in the circuits. (EIA, No. 21, at 2). EIA also commented that television sets are not similar to any other covered product. In addition, EIA claimed that standards could retard development of new television set designs. Specifically, EIA stated that standards would cause manufacturers to reallocate funds presently being used to support research on high-definition television (HDTV), research that is being coordinated by the Federal Communications Commission. (EIA, No. 21, at 3).

EIA and Thompson discussed the eight proposed design options.

1. *Remote control* is seen as a consumer utility using five watts or less. Statistics were provided showing that 68 percent of color sets sold in 1987 included remote control (EIA, No. 21, at 4). It was also noted that not all remote controls have the same features, thereby affecting power requirements (Thompson, No. 4, at 6). Furthermore, EIA indicated that while manufacturers are moving toward use of more energy consumptive remote control devices, such devices will result in a more efficient television set in the playing mode. EIA did not provide a specific example of how this condition could occur. (EIA, No. 21, at 4).

2. *Electronic tuning* is considered to have negligible power requirements. (EIA, No. 4, at 6).

3. *Automatic color control* is described as a feature which does not use energy and is a component of the picture stabilization system. (Thompson, No. 4, at 6; and EIA, No. 21, at 5).

4. *Vertical Internal Reference* (VIR) is no longer in production according to these comments. (Thompson, No. 4, at 6; and EIA, No. 21, at 5).

5. *Brightness sensor* is seen as an energy saver by EIA, while Thompson points out that this device performs the same function available to the consumer using the picture controls. Both comments agree that this device uses no power. (EIA, No. 21, at 5; and Thompson, No. 4, at 6).

6. *Voltage regulating power source* contributes measurably to the energy consumption of television sets depending on the type of power supply. (Thompson, No. 4, at 7). It was noted by EIA that transformers have become obsolete with the advent of solid-state voltage regulators. The ability to increase the efficiency of the solid-state components shows little potential (EIA, No. 21, at 5).

7. *The cathode ray* tube is seen by Thompson and EIA as the only efficient and reliable display device known for use in direct view sets. (Thompson, No. 4 at 7; and EIA, No. 21, at 5). The concept of Liquid Crystal Display (LCD) is functional in small sets but very restrictive and unreliable in larger sets (EIA, No. 21, at 5).

8. *One-gun tube* color television sets have been demonstrated as a prototype; however, its enormous cost and poor quality picture have placed serious limitations on its commercial feasibility, according to EIA. (EIA, No. 21, at 6).

4. Efficiency Levels Analyzed

Table 3.6 presents the efficiency levels selected for analysis for 1992. Alternate levels were selected to generate a range of impacts for analysis. The initial level selected, level 3, corresponds to the highest efficiency level, i.e., the "max-tech" level, identified in the engineering analysis. It was felt that manufacturers could produce products at this efficiency, and that these products would not have any reliability problems. Level 2 corresponds to the minimum life-cycle cost point. Level 1 corresponds to efficiency lower than that of level 2. These levels were analyzed discretely in the Engineering Analysis.

TABLE 3–6.—Standard Levels Analyzed for Television Sets (KWH/YR.)

Standard level	Standard	
	Monochrome	Color
1	NA	Standby power no greater than 2 W/h
2	47	7.3 S + 38
3	45	6.9 S + 42

S is screen size (diagonal) in inches.

Note that standard level 1 is not a performance standard. DOE's measures of energy consumption by television sets are receiver energy efficiency factor and annual energy consumption, both annual energy use measures. Standby power deals with energy consumption of the unit for that period when the unit is not in operation. Section 321(a)(6)(A) of the Act prescribes that a performance standard "prescribes a minimum level of energy efficiency or a maximum quantity of energy use." DOE's analysis assumed that for level 1, the baseline unit was unchanged except for the standby power.

However, a limitation on standby power does not necessarily have an effect on the energy efficiency or energy

consumption as defined by DOE at § 430.22. While standby power may be limited, changes to the design of the television set can result in more energy being consumed when the unit is on, thereby resulting in more total energy being used.

Payback Period. Table 3–7 presents the payback period for the efficiency levels analyzed. For the color class, level 1 is the only energy conservation standard level in which the additional price of purchasing a product at this efficency level will be less than three times the value of the energy savings the consumer will receive during the first year. No standard level for monochrome televisions pays back in less than 3 years. The payback period for units that meet level 1 efficiency is approximately three years for the color class.

TABLE 3–7.—PAYBACK PERIODS (IN YEARS) FOR TWO CLASSES OF TELEVISION SETS

Standard level	Payback periods	
	19" to 20" color	13" to 14" monochrome
1	2.9	NA
2	3.4	4.7
3	3.7	11.8

By the year 2015 the weighted average energy consumption of new television sets sold in absence of standards is projected to decline nearly 20 percent, compared to new sets sold in 1987.

Significance of Energy Savings. With energy conservation standards imposed, the LBL–REM projects that over the period 1992–2015, the following savings would be attributable to standards:

Level 1—.66 Quads
Level 2—.69 Quads
Level 3—.73 Quads

See Technical Support Document, Table 5.26. On the basis of the above, DOE believes that the standards considered for television sets would result in a significant conservation of energy.

Economic Justification—A. *Economic Impact on Manufacturers and Consumers.* The per unit increased cost to manufacturers to meet the level 1 efficiency ranges from $0.33 for a 13-inch monochrome set to $2.15 for a 19–20 inch color set. *See* Technical Support Document, Tables 3.29 and 3.30.

The purchase price to the consumer increases $4.30 for the 19/20-inch color television set. *See* Technical Support Document, Table 3.43.

LBL–MIM projects that television standards would result in ROE essentially unchanged, compared to the base case of no-standards. *See* Technical Support Document, Table 7.27.

The sensitivity analysis also indicates that the television set industry's ROE is relatively insensitive to standards. DOE believes this results from the proportion of manufacturing costs due to standards that can be passed on to consumers in the form of a higher price and a low consumer demand elasticity with respect to price and operating cost.

B. *Life Cycle Cost and Net Present Value.* The LCC analysis indicates that for each possible standard level, except level 3, the increase in purchase price would be offset by savings in operating expenses. However, the LCC analysis indicates that for color television sets, the savings over the products' lifetimes would be slight and that for each standard level the savings are less than $5.00. *See* Technical Support Document, Figure 3.23. For 13 inch to 14 inch black and white televisions, the LCC savings over the expected lifetimes of the products are even slighter, as each candidate standard level would save less than $1.00. *See* Technical Support Document, Figure 3.24. This indicates that the standard level would not cause any economic burden on the average consumer.

The NPV analysis indicates that if a standard were adopted at level 1, 2, or 3, there would be a net present value of $1 billion from energy savings over the period 1992–2015. *See* Technical Support Document, Table 5.29.

C. *Energy Savings.* As indicated above, the maximum savings attributable to standards would be .73 Quads of electricity. This level would require the reduction of standby power and reduction of screen power, including a more efficient screen display.

D. *Lessening of Utility or Performance of Products.* As indicated above, DOE is required to establish classes of products in order to assure that the standards analyzed would not lessen the existing utility or performance of the regulated appliance. However, for television sets, the Department was not able to establish classes to assure the utility of the product. Almost every feature present on a television set that provides utility to the consumer, also affects the product's energy consumption. For example, remote control and stereo sound both provide utility to the consumer and affect energy consumption. Therefore, separate classes would have to be established for each feature, as well as for those products that have both features and those without either feature, a total of four classes, in order not to lessen the product's utility. However, because of the existence of a number of different features that provide utility but for which DOE has limited data on their energy consumption, the Department was not able to set separate classes for each. In addition, because the electronics industry is changing so rapidly, DOE believes that it is likely that future utility or performance would be lessened as a result of disincentives caused by standards to investments in energy-using new features.

E. *Impact of Lessening Competition.* The determination of this factor must be made by the Attorney General.

F. *Need to Save Energy.* Television sets use electricity as their energy source. Nearly one percent of the nation's electricity powers television sets, nearly 10 percent of that one percent would be saved by standards for this product at level 3. However, the sensitivity analysis on the LBL–REM indicates that if consumer awareness of, and concern with, appliance efficiency continues, the projected savings would be less than three percent of that one percent.

G. *Other Factors.* Television sets are presently not covered by the Federal Trade Commission (FTC) labeling program. Testing and certification could be an unusual burden on manufacturers of this product since testing and certification could result in delays in the rapid introduction of new technologies that characterize this industry. For example, a standard for television sets, involving the diversion of research and development monies to complying with the standard, could have an impact on the development of high resolution televisions, which is an effort that is presently being supported by the Federal Communications Commission (FCC).

Conclusion. After reviewing the effects that energy conservation standards on television sets would have, the Department is proposing a "no-standard" standard. The Department proposes that while energy conservation standards for television sets would save a significant amount of energy, they are not economically justified.

DOE believes standards for television sets would have insignificant impacts on consumer life-cycle costs, and could harm manufacturers, especially in their ability to introduce new products, i.e., by diverting research and development funds to complying with energy conservation standards. Any increase in cost to manufacturers due to efficiency testing and certification reporting will reduce the already small LCC savings. Furthermore, the Department is

concerned that standards could adversely impact the efforts to develop high resolution televisions, adversely affecting the future utility of the products.

For these costs, at standard level 3, the energy savings that the Nation would experience is approximately three-fourths of a Quad over 24 years, i.e., 1992–2015, which would result in minimal LCC savings, i.e., less than $5.00. The individual consumer would save only about one percent of his expected life-cycle costs.

Because of the relatively small impacts on energy consumption for television set consumer life-cycle costs, DOE believes that the manufacturer impacts described above are the most noteworthy.

Furthermore, because of limited available data on television sets, the standards analysis was unable to account for the wide variety of television features. Because of that, the Department believes that the establishment of energy conservation standards on television sets would restrict the utility and performance of new products.

Finally, as noted earlier, level 1 standard (standby power no greater than 2 watts per hour) was rejected from consideration because it does not meet either of the Department's two measures of television set energy consumption, namely, receiver energy efficiency factor and annual energy consumption. Standby power could be viewed as either a design standard or efficiency standard for a component. DOE views section 321(a)(6) of the Act as prohibiting standby power requirements for television sets.

Weighing the anticipated benefits against the potential costs, the Department is proposing that energy conservation standards for television sets, at each standard level considered, are not economically justified.

IV. Environmental, Regulatory Impact, Takings Assessment, Federalism and Regulatory Flexibility Reviews

The Department has reviewed today's proposed action in accordance with the Department's obligations under:

- The National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321 *et seq.*), the Council on Environmental Quality regulations implementing the procedural provisions of NEPA (40 CFR Part 1500 *et seq.*), and the Department's own NEPA regulations (10 CFR Part 1021);
- Executive Order 12291 (46 FR 13193, February 19, 1981) which pertains to agency review of the impact of Federal regulations; and
- Executive Order 12630 (53 FR 8859, March 18, 1988) which pertains to agency consideration of Federal actions that interfere with constitutionally protected property rights.
- Executive Order 12612 (52 FR 41685, October 30, 1987) which pertains to agency consideration of Federal actions that would have a substantial direct effect on States, on the relationship between the National Government and the States, and on the distribution of power and responsibilities among the various levels of government.
- The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) which requires, in part, that an agency prepare an initial regulatory flexibility analysis for any proposed rule unless it determines that the rule will not have a "significant economic impact on a substantial number of small entities." In the event that such an analysis is not required for a particular rule, the agency must publish a certification and explanation of that determination in the **Federal Register**.

a. Environmental Review

DOE prepared an Environmental Assessment (EA) on the proposed standards pursuant to the National Environmental Policy Act of 1969, as amended, Pub. L. 91–190, 40 U.S.C. 4221 *et seq.*, and the implementing regulations of the Council on Environmental Quality (40 CFR Parts 1500 through 1808). The EA addresses the possible incremental environmental effects attributable to the application of the proposed standards to the design of three types of covered products: refrigerators, refrigerator-freezers, and freezers; small gas furnaces; and television sets.

A Finding of No Significant Impact (FONSI) is published in today's **Federal Register**. The FONSI concludes that the proposed standards would result in no significant environmental impacts and that an environmental impact statement is not required.

The EA is part of the Technical Support Document and is available at the DOE Freedom of Information Reading Room at the address provided at the beginning of this notice.

b. Regulatory Impact Review

Executive Order 12291 (46 FR 13193, February 19, 1981) directs that, in proposing a major rule,[19] an agency perform a regulatory analysis. Such an analysis presents major alternatives to the regulation that could substantially achieve the same regulatory goal at lower cost, as well as a description of the costs and benefits (including potential net benefits) of the proposed rule.

DOE has determined that this proposed rule is a "major rule." Accordingly, a Draft Regulatory Impact Review has been prepared.

The Regulatory Analysis is summarized below. This summary focuses on the major alternatives considered in arriving at the proposed approach to improving the energy efficiency of consumer products. The reader is referred to the complete draft "Regulatory Impact Analysis," which will be available for public comment as indicated at the beginning of this notice. It consists of: (1) A statement of the problem addressed by this regulation, and the mandate for government action; (2) a description and analysis of the feasible policy alternatives to this regulation; (3) a quantitative comparison of the impacts of the alternatives; and (4) the economic impact of the proposed standard.

It should be noted at the outset that none of the alternatives for refrigerators and small gas furnaces that were examined saved as much energy as the proposed rule. Also, most of the alternatives would require that enabling legislation be enacted, since authority to carry out those alternatives does not presently exist.

Alternatives for Achieving Consumer Product Energy Conservation

Six major alternatives were identified by DOE as representing feasible policy alternatives for achieving consumer product energy efficiency. These alternatives include:

- No New Regulatory Action.
- Informational Action:
  - —Product labeling.
  - —Consumer education.
- Prescriptive Standards.
- Financial Incentives:
  - —Tax credits.
  - —Rebates.
- Voluntary Energy Efficiency Targets.
- The Proposed Approach (Performance Standards).

Each alternative has been evaluated in terms of its ability to achieve significant energy savings at reasonable

[19] "Major rule" means any regulation that is likely to result in: (1) An annual effect on the economy of $100 million or more; (2) A major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) Significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

costs, and has been compared to the effectiveness of the proposed regulation.

If no new regulatory action were taken, then no new standards would be implemented for refrigerators, small gas furnaces, or television sets. This is essentially the "base case" for each appliance. In this case, between the years 1992 and 2015 there would be expected energy use of 46.94 Quads of primary energy, with no energy savings and a zero net present value.

Several alternatives to the base case can be grouped under the heading of informational action. They include consumer product labeling and DOE's public education and information program. Both of these alternatives are mandated by the Act. One base case alternative would be to estimate the energy conservation potential of enhancing these programs. To model this possibility, the Department assumed that market discount rates would be lowered by five percent for refrigerators and by two percent for purchasers of small gas furnaces. This resulted in no energy savings, with expected consumption equal to that of the base case.

Another method of setting standards would entail requiring that certain design options be used on each product, i.e., prescriptive standards. For refrigerators, this involved assuming a 1.5 inch foam door and 5.0 EER compressor, and, for small gas furnaces, a power burner. This resulted in energy consumption, between 1992 and 2015, of 43.14 Quads, and savings of 3.8 Quads. The net present value, in 1987 dollars, was $8.52 billion.

Various financial incentive alternatives were tested. These included tax credits and rebates to consumers, as well as tax credits to manufacturers. The tax credits to consumers were assumed to be 15 percent of the increased cost of higher energy efficiency features of these appliances, while the rebates were assumed to be 15 percent of the increase in equipment prices. The tax credits to consumers showed almost no change from the base case, i.e., this alternative would save less than .01 Quad with a net present value of $20 million. Consumer rebates however, would save .04 Quad with a net present value of $210 million.

The consumer rebate program and the tax credit program would return to the participating consumer exactly the same amount of money. However, it is expected that there will be more participants in the rebate program. Therefore, the rebate program would result in substantially more energy savings than the tax credit program would.

The most important difference to the consumer between rebate and tax credit programs is that a rebate can be obtained quickly, whereas a tax credit is delayed until income taxes are filed or a tax refund is provided by the Internal Revenue Service. This means that middle and low income purchasers, who generally have little ready cash to purchase more expensive products, are not so likely to take advantage of the program as are upper income purchasers. To simulate this impact, DOE has assumed that only 60 percent of consumers would purchase more energy efficient products as a result of the tax credit program.

Another financial incentive that was considered was tax credits to manufacturers for the production of energy-efficient refrigerators and small gas furnaces. In this scenario, an investment tax credit (ITC) of 20 percent was assumed. The tax credits to manufacturers had almost no effect, since the energy consumption estimates are 46.93 Quads with savings equal to .01 Quad, and a net present value equal to zero.

The impact of this scenario is so small because the ITC was applicable only to the tooling and machinery costs of the firms, i.e., the firms' fixed costs, and most of the design improvements that would likely be adopted to manufacture more efficient refrigerator and small gas furnaces would involve purchased parts. Expenses for purchased parts would not be eligible for an ITC.

Two scenarios of voluntary energy efficiency targets were examined; in the first one, the proposed energy conservation standards were assumed to be voluntarily adopted by all the relevant manufacturers in five years, and, in the second scenario, the proposed standards were assumed to be adopted in 10 years. In these scenarios, the five year delay would result in energy consumption by these appliances of 43.01 Quads, energy savings of 3.93 Quads, and a net present value of $8.41 billion; the 10 year delay would result in 44.75 Quads of energy being consumed, 2.19 Quads being saved, and a net present value of $5.47 billion.

These scenarios assume that there would be universal voluntary adoption of the energy conservation standards by the refrigerator and small gas furnace manufacturers, an assumption for which there is no reasonable assurance.

Lastly, all of these alternatives must be gauged against the performance standards that are being proposed in this notice. Such performance standards would result in energy consumption of refrigerators, small gas furnaces, and television sets to total an estimated 41.01 Quads of primary energy over the 1992–2015 time period. Savings would be 5.93 Quads, and the net present value would be an expected $12.23 billion.

As noted at the beginning of this section, none of the alternatives that were considered for refrigerators and small gas furnaces would save as much energy as the proposed rule.

c. "Takings" Assessment Review

Executive Order 12630 (53 FR 8859, March 18, 1988) directs that, in proposing a regulation, an agency conduct a "takings" review. Such a review is intended to assist agencies in avoiding unnecessary takings and help such agencies account for those takings that are necessitated by statutory mandate.

For purposes of the Order:

"Policies that have takings implications" refers to Federal regulations, proposed Federal regulations, proposed Federal legislation, comments on proposed Federal legislation, or other Federal policy statements that, if implemented or enacted, could effect a taking, such as rules and regulations that propose or implement licensing, permitting, or other condition requirements or limitations on private property use, or that require dedications or exactions from owners of private property.

It appears that there are three parts of the appliance standards program that could conceivably be viewed as having "takings implications." These are testing and certification requirements, the impacts of standard levels, and possible DOE testing of products for validation.

With regard to the first part, namely, testing and certification, the Department believes that such a requirement, implementing a long-established statutory mandate in a manner calculated to minimize adverse economic impacts does not constitute a "taking" of private property.

Similarly, the Department's possible validation testing does not constitute a "taking," within the limitations described above.

Lastly, the impact of standards could be viewed by some as a "taking." Nevertheless, the Department believes that the fact that while an energy conservation standard may limit some manufacturers in the range of appliance efficiencies that they can produce, such narrowing of the energy efficiency range does not constitute a "taking" in the sense described above.

In short, in none of the three parts of the appliance standards program does the Department believe that the provisions of E.O.12630 pertain.

d. Federalism Review

Executive Order 12612 (52 FR 41685, October 30, 1987) requires that regulations or rules be reviewed for any substantial direct effects on States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among various levels of government. If there are sufficient substantial direct effects, then Executive Order 12612 requires preparation of a federalism assessment to be used in all decisions involved in promulgating and implementing a regulation or a rule.

DOE has identified a substantial direct effect that today's regulation, when finalized, would have on State governments. It would initially preempt inconsistent State regulations. However, DOE has concluded that the initially preemptive effect is not sufficient to warrant preparation of a federalism assessment for two reasons. First, DOE does not have discretion under the Act to avoid promulgating a preemptive regulation because of a policy preference for State regulation as a general matter. Second, the Act provides for subsequent State petitions for exemption which necessarily means that the determination as to whether a State law prevails must be made on a case-by-case basis using criteria set forth in the Act. When DOE receives such a petition, it will be appropriate to consider preparing a federalism assessment consistent with the criteria in the Act.

e. Regulatory Flexibility Review

The Regulatory Flexibility Act of 1980 (Pub. L. 96–354) requires an assessment of the impact of proposed regulations on small businesses. Small businesses are defined as those firms within an industry that are privately owned and less dominant in the market.

In this rulemaking, three different products and, hence, industries, are being addressed. Regulatory flexibility for the television set industry, however, does not need to be considered since this notice is proposing no energy conservation standards on those manufacturers. Regulatory flexibility issues will be addressed for the two industries for which standards are being proposed.

First, the energy conservation standard of 78 percent AFUE on those small gas furnace manufacturers, who could be considered small businesses, will be discussed. There is no indication that the impact of standards will be directly related to firm size. Although different size firms have different cost structures, industry sources indicate that, overall, neither large nor small firms have a cost advantage and that neither large nor small firms tend to have a higher proportion of fixed cost. A corollary to this observation is that profits are also not correlated to firm size. Some large firms are quite profitable, others earn normal profits, while others are marginally profitable, and the same is true for smaller firms.

The Engineering Analysis indicates that the measures necessary to meet the standards levels under consideration involve using additional purchased parts. While larger firms may have some slight cost advantage from buying in larger quantities, the fact that the design options predominantly involve purchased parts tends to be an equalizing factor among different-sized firms.

Therefore, the fact that this energy conservation standard on small gas furnaces is not likely to "have a significant economic impact on a substantial number of small entities" suggests that the provisions of section 605(b) of the Regulatory Flexibility Act pertain. These provisions state that neither an initial nor a final regulatory flexibility analysis need be performed for a proposed or final rule "if the head of the agency certifies that the rule will not, if promulgated, have a significant economic impact on a substantial number of small entities."

Secondly, the proposed energy conservation standards on refrigerator manufacturers needs to be addressed. It is not at all clear that the standard levels being proposed will "have a significant economic impact on a substantial number of small firms." The LBL–MIM indicates through its predictions of an increase in typical ROE that standards are likely to slow down the consolidation process temporarily. This would lead to a temporary slowing down of the continuing decrease in this industry's competitiveness. However this prediction would be tempered by the observation that if standards were technologically difficult to meet they could hurt some smaller firms the most, since smaller firms tend to have less sophisticated research and development capabilities. This should not be a serious consideration for regulatory flexibility since the proposed standard levels on refrigerators will not be technologically difficult to meet.

Of the eight small refrigerator firms reviewed for this analysis, three make custom refrigerators, three make compact units (largely for mobile homes and recreational vehicles), and two make 3-in-1 units with range tops and sinks.

The analysis of combined-unit manufacturers is straightforward. Three-in-one units are not covered by the present standards, so these manufacturers will not be affected.

The custom refrigerator manufacturers seem to be fairly well protected for two reasons; they are not exposed to either direct foreign competition or direct competition from major domestic firms, and because they produce custom units they have a greater ability to make design changes compared to a large manufacturer. These two facts indicate that standards will probably not hurt the custom manufacturer's control of its market; however, its market may shrink due to price increases. This cannot be estimated without engineering data and an estimate of the elasticity of demand in this market. One thing must be remembered when analyzing this problem: standards will increase the price of standard refrigerators and this will offset (partly or more than completely) the impact of the price increase of custom refrigerators.

The three small manufacturers of compact refrigerators are probably at the greatest risk, both without standards and from standards. They face stiff foreign competition from large foreign manufacturers. Some anecdotal evidence indicates that part of their current competitive strategy is to use cheaper, less efficient compressors than their foreign competition. Depending on the level of standards, this option could be foreclosed, forcing them to buy compressors at a higher price than that paid by their larger competitors who either buy in volume or in some cases manufacture their own. Still, it would seem that these small manufacturers must have some advantages from the niche they occupy or they would have already succumbed to their competition. These advantages would need to be accounted for before a firm conclusion could be drawn.

Now consider the truly small firms—those that cater to very specialized niche markets. There are only about a dozen of these and they tend to be very small compared with the major firms. Because of this, they have little time to cooperate with data collection efforts and consequently relatively little is know about them. Specifically, engineering cost data is not separately available for small firms nor are demand elasticities available. Small firms are generally not members of AHAM. Consequently, most were not included in information provided by AHAM concerning the Department's analysis and, of the ones that were, only one was included. Because of this no

financial data specific to small firms are available.

The foregoing discussion suggests that only three of the eight small manufacturers on whom the effects of standards were evaluated, would possibly suffer from the proposed standards on refrigerators. The Department believes that in this industry, too, the provisions of section 605(b) are applicable, since there is no certainty that the proposed rule will "have a significant economic impact on a substantial number of small entities."

V. Public Comment Procedures

a. Participation in Rulemaking

DOE encourages the maximum level of public participation possible in this rulemaking. Individual consumers, representatives of consumer groups, manufacturers' associations, States or other governmental entities, utilities, retailers, distributors, manufacturers, and others are urged to submit written statements on the proposal. The Department also encourages interested persons to participate in the public hearing to be held in Washington, DC, at the time and place indicated at the beginning of this notice.

The DOE has established a comment period of 60 days following publication of this notice for persons to comment on this proposal.

b. Written Comment Procedures

Interested persons are invited to participate in this proceeding by submitting written data, views or arguments with respect to the subjects set forth in this notice. Instructions for submitting written comments are set forth at the beginning of this notice and below.

Comments should be labeled both on the envelope and on the documents, "Three Products Rulemaking (Docket No. CAS–RM–87–102)," and must be received by the date specified at the beginning of this notice. Ten copies are requested to be submitted. All comments received by the date specified at the beginning of this notice and other relevant information will be considered by DOE before final action is taken on the proposed regulation.

All written comments received on the proposed rule will be available for public inspection at the Freedom of Information Reading Room, as provided at the beginning of this notice.

Pursuant to the provisions of 10 CFR 1004.11, any person submitting information or data that is believed to be confidential and exempt by law from public disclosure should submit one complete copy of the document and 10 copies, if possible, from which the information believed to be confidential has been deleted. DOE will make its own determination with regard to the confidential status of the information or data and treat it according to its determination.

Factors of interest to DOE, when evaluating requests to treat information as confidential include: (1) A description of the item; (2) an indication as to whether and why such items of information have been treated by the submitting party as confidential, and whether and why such items are customarily treated as confidential within the industry; (3) whether the information is generally known or available from other sources; (4) whether the information has previously been made available to others without obligation concerning its confidentiality; (5) an explanation of the competitive injury to the submitting person that would result from public disclosure; (6) an indication as to when such information might lose its confidential character due to the passage of time; and (7) whether disclosure of the information would be in the public interest.

c. Public Hearing

1. Procedure for Submitting Requests to Speak

The time and place of the public hearing are indicated at the beginning of this notice. DOE invites any person who has an interest in these proceedings, or who is a representative of a group or class of persons having an interest, to make a written request for an opportunity to make an oral presentation at the public hearing. Such requests should be labeled both on the letter and the envelope, "Three Products Rulemaking (Docket No. CAS–RM–87–102)," and should be sent to the address, and must be received by the time specified, at the beginning of this notice. Requests may be hand-delivered or phoned in to such address between the hours of 8:30 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

The person making the request should briefly describe the interest concerned and, if appropriate, state why he or she is a proper representative of the group or class of persons that has such an interest, and give a telephone number where he or she may be contacted. Each person selected to be heard will be so notified by DOE as to the time they will be speaking.

Each person selected to be heard is requested to submit 10 copies of the statement at the beginning of the hearing. In the event any persons wishing to testify cannot meet this requirement, that person may make alternative arrangements with the Office of Hearings and Dockets in advance by so indicating in the letter requesting to make an oral presentation.

2. Conduct of Hearing

DOE reserves the right to select the persons to be heard at the hearing, to schedule the respective presentations, and to establish the procedures governing the conduct of the hearing. The length of each presentation is limited to 20 minutes.

A DOE official will be designated to preside at the hearing. The hearing will not be a judicial or an evidentiary-type hearing, but will be conducted in accordance with 5 U.S.C. 533 and section 336 of the Act. At the conclusion of all initial oral statements at each day of the hearing, each person who has made an oral statement will be given the opportunity to make a rebuttal statement, subject to time limitations. The rebuttal statement will be given in the order in which the initial statements were made. The official conducting the hearing will accept additional comments or questions from those attending, as time permits. Any interested person may submit to the presiding official written questions to be asked of any person making a statement at the hearing. The presiding official will determine whether the question is relevant, and whether time limitations permit it to be presented for answer.

Further questioning of speakers will be permitted by DOE. The presiding official will afford any interested person an opportunity to question, with respect to disputed issues of material fact, other interested persons who have made oral presentations, as well as employees of the United States Government who have made written or oral presentations, relating to the proposed rule. This opportunity will be afforded after any rebuttal statements, to the extent that the presiding official determines that such questioning is likely to result in a more timely and effective resolution of disputed issues of material fact. If the time provided is insufficient or inconvenient, DOE will consider affording an additional opportunity for questioning at a mutually convenient time. Persons interested in making use of this opportunity must submit their request to the presiding official no later than shortly after the completion of any rebuttal statements and be prepared to state specific justification, including why the issue is one of disputed fact and how the proposed questions would expedite their resolution.

Any further procedural rules regarding proper conduct of the hearing will be announced by the presiding official.

A transcript of the hearing will be made, and the entire record of this rulemaking, including the transcript, will be retained by DOE and made available for inspection at the DOE Freedom of Information Reading Room as provided at the beginning of this notice. Any person may purchase a copy of the transcript from the transcribing reporter.

d. Issues Requested for Comment

As discussed above in today's notice, DOE has identified a number of issues where comments are requested. These issues include, but are not limited to the following:

- The refrigerator baseline units and the base case;
- Refrigerator market share elasticities;
- Rebound effect for refrigerators, television sets, small gas furnaces and all other space heating and cooling products;
- Refrigerator usage elasticities;
- Appropriate discount rates, including those for consumer analyses (LCC and LBL–REM) and the use of a social discount rate (LBL–REM);
- Energy price forecasts;
- The characterization of prototypical firms for the manufacturer impact analysis (LBL–MIM);
- Impacts of the EPA restriction on CFC manufacture; and
- Refrigerator efficiency forecasts.

In consideration of the foregoing, it is proposed to amend Part 430 of Chapter II of Title 10, Code of Federal Regulations, as set forth below.

Issued in Washington, DC, November 22, 1988.

John R. Berg,

Assistant Secretary, Conservation and Renewable Energy.

List of Subjects in 10 CFR Part 430

Administrative practice and procedure, Energy conservation, Household appliances.

PART 430—ENERGY CONSERVATION PROGRAM FOR CONSUMER PRODUCTS

1. The authority citation for Part 430 continues to read as follows:

Authority: Energy Policy and Conservation Act, Title III, Part B, as amended by National Energy Conservation Policy Act, Title IV, Part 2, National Appliance Energy Conservation Act of 1987, and National Appliance Energy Conservation Amendments of 1988 (42 U.S.C. 6291–6309).

2. Subpart C of Part 430 is revised to read as follows:

Subpart C—Energy Conservation Standards

Sec
430.31 Purpose and scope.
430.32 Energy Conservation Standards.

Subpart C—Energy Conservation Standards

§ 430.31 Purpose and scope.

This subpart contains any energy conservation standards for classes of covered products that are required to be administered by the Department of Energy pursuant to the energy conservation program for consumer products other than automobiles under the Energy Policy and Conservation Act, as amended (42 U.S.C. 6291 *et seq.*).

§ 430.32 Energy conservation standards.

The energy conservation standards for the covered product classes are:

(a) Refrigerators/refrigerator-freezers/freezers.

Product class	Energy standards equations January 1, 1993 [2]
1. Refrigerators and refrigerator-freezers with manual defrost	(16.3AV + 316) to (11.9AV + 258).
2. Refrigerator-freezers-partial automatic defrost	(21.8AV + 429) to (14.1AV + 305).
3. Refrigerator-freezers-automatic defrost with top-mounted freezer without ice [1]	(23.5AV + 471) to (16.8AV + 363).
4. Refrigerator-freezers-automatic defrost with side-mounted freezer without ice	(27.7AV + 488) to (13.1AV + 540).
5. Refrigerator-freezers-automatic defrost with bottom-mounted without ice	(27.7AV + 488) to (17.9AV + 386).
6. Refrigerator-freezers-automatic defrost with top-mounted freezer with through the door ice service	(26.4AV + 535) to (17.6AV + 380).
7. Refrigerator-freezers-automatic defrost with side-mounted freezer with through the door ice	(30.9AV + 547) to (15.2AV + 625).
8. Upright freezers with manual defrost	(10.9AV + 422) to (12.3AV + 181).
9. Upright freezers with automatic defrost	(16.0AV + 623) to (18.0AV + 264).
10. Chest freezers and all other freezers	(14.6AV + 223) to (11.2AV + 163).

[1] Including all refrigerators with automatic defrost.
[2] The Energy Standards Equations selected will be from these ranges.
AV = Total adjusted volume, expressed in Ft [3].

(b)–(d) [Reserved]

(e) Furnaces.

Product class	Annual fuel utilization efficiency (percent)	Effective date
1.–2. [Reserved]		
3. Small furnaces (input rate less than 45,000 Btu/hours:		
(A) Weatherized (outdoor)	78	January 1, 1992.
(B) Non-weatherized (indoor)	78	January 1, 1992.

(f)–(k) [Reserved]

(l) Television Sets.

No standard.

DEPARTMENT OF ENERGY

Office of Conservation and Renewable Energy

Energy Conservation Program for Consumer Products; Finding of No Significant Impact

AGENCY: Department of Energy.

ACTION: Finding of No Significant Impact (FONSI) on proposed rulemaking for energy conservation standards for 3 types of consumer products.

SUMMARY: The Energy Policy and Conservation Act (EPCA), as amended by the National Energy Conservation Policy Act (NECPA) and the National Appliance Energy Conservation Act (NAECA), prescribes energy conservation standards for certain major household appliances, and requires the Department of Energy (DOE) to administer an energy conservation program for these products. As a general matter, these Federal standards preempt State and local standards and any other State and local requirements with respect to energy efficiency or energy use of these products. Among other things, NAECA requires DOE to consider amending the energy conservation standards for refrigerators, refrigerator-freezers, and freezers; to establish standards for small gas furnaces; and to consider establishing energy conservation standards for television sets.

In accordance with NAECA, the Department has reviewed possible standards for refrigerators, refrigerator-freezers and freezers, small gas furnaces and television sets as discussed in today's notice of proposed rulemaking.

For refrigerators, refrigerator-freezers and freezers, the Department is proposing a range of standards that includes not increasing the stringency of the standard level. DOE is soliciting comments and information from the public to be considered in promulgating the final rule. As discussed in the proposed rule, the final rule will specify a specific level for refrigerators, refrigerator-freezers and freezers.

For small gas furnaces, the Department is proposing to determine that standards would result in a significant conservation of energy and be economically justified. Therefore, the Department is today proposing to amend 10 CFR Part 430 to add standards for this product.

Finally, for television sets, the Department is proposing to determine that an energy conservation standard would result in a significant conservation of energy but would not be economically justified. Therefore, the Department is proposing to amend Part 430 to include a determination of no standard for television sets.

Based on an Environmental Assessment (EA), DOE has determined that none of the proposed standards, including the "no standard" for television sets, are a major federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act (NEPA). Therefore an Environmental Impact Statement will not be prepared. The EA is part of the Technical Support Document for the proposed standards and is available on request at the following address.

Public Availability

Hearings and Dockets Branch, Office of Conservation and Renewable Energy, U.S. Department of Energy, Docket Number CE–RM–87–102, 1000 Independence Avenue SW., Room 6B–025, Washington, DC 20585: (202) 586–9320.

FOR FURTHER INFORMATION CONTACT:

Michael J. McCabe, U.S. Department of Energy, Office of Conservation and Renewable Energy, Forrestal Building, Mail Station CE–132, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–9127.

Donald E. Henninger, U.S. Department of Energy, Office of NEPA Project Assistance, Forrestal Building, Mail Station EH–25, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586–4600.

Martha S. Crosland, U.S. Department of Energy, Office of General Counsel, Forrestal Building, Mail Station GC–11, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586–6947.

SUPPLEMENTARY INFORMATION: DOE prepared an Environmental Assessment (EA) on the proposed standards pursuant to the National Environmental Policy Act of 1969, as amended, Pub. L. 91–190, 40 U.S.C. 4221 *et seq.*, and the implementing regulations of the Council on Environmental Quality (40 CFR Parts 1500 through 1808). The EA addresses the possible incremental environmental effects attributable to the application of the proposed standards to the design of refrigerators, refrigerator-freezers, and freezers; and small gas furnaces. The EA also looked at the impact of energy conservation standards for television sets. As discussed in the General Findings, the "no standard" standard for televisions will not change the status quo and therefore will not result in any environmental impact. The effect of the proposed standards range from no change to a slight improvement in the outdoor environment as discussed in the General Findings below.

Approach Used in the Analysis

This assessment evaluates the environmental impacts resulting from the proposed setting of new or amended energy-efficiency standards for refrigerators, refrigerator-freezers, freezers, and small gas furnaces and the proposed setting of no standards for television sets in accordance with the NAECA. A complete description of the Engineering and Economic Analysis of the proposed standards may be found in the Technical Support Document (TSD).

The two main environmental concerns addressed are emissions from fossil fuel fired electricity generation and the chlorofluorocarbons used in the production of rigid insulation foam.

Four of the fourteen scenarios for product design changes described in the Engineering Analysis of the TSD were chosen for study based on their relative importance as design measures. Values for energy savings that result from product design changes are also taken from the TSD.

An in-depth analysis of particulate emissions is not included in this assessment because particulate emissions are relatively small compared to sulfur and nitrogen oxide emissions. Current electricity generating methods are far cleaner than those of the past. In 1984, power plants contributed only 7 percent of U.S. total particulate emissions as compared to contributions of 83 percent and 34 percent to total SO_2 and NO_2 emissions, respectively (EPA, 1986).

General Findings

1. Refrigerators, Refrigerator-Freezers and Freezers

The proposed standards for refrigerators, refrigerator-freezers, and freezers range from retaining the federally mandated standards contained in NAECA, up to three more stringent standards. The greatest impacts of the proposed standards, other than the minimum NAECA standards, are the result of generating less electricity. Power plants' main environmental effects on air and water result from emissions of sulfur oxides (SO_x), nitrogen oxides (NO_x), and carbon dioxide (CO_2). All SO_x and NO_x emissions are expressed in the equivalent weights of SO_2 and NO_2, respectively. Carbon dioxide emissions are commonly expressed as tons of carbon. Additionally, there would be some shifting of CFC use. General findings are summarized below:

A. Sulfur Dioxide

The greatest decrease in air pollution will occur for sulfur dioxide. The possible reductions range from no change up to 151,000 tons or 0.9 percent of the U.S. SO_2 emissions expected to be emitted by power plants by the year 2010 for the most stringent standard proposed.[1]

B. Nitrogen Dioxide

The possible reductions in NO_2 range from no change up to 100,000 tons or 1.0 percent of the total NO_2 emissions expected to be emitted by power plants by the year 2010 for the most stringent standard proposed.[2]

C. Carbon Dioxide

The possible reductions in CO_2 range from no change up to the equivalent of 9,180,000 tons or 0.2 percent of the worldwide CO_2 emissions for the year 2010 for the most stringent standard proposed.[3]

D. Chlorofluorocarbons

An additional effect of some design change scenarios is an increased consumption of CFC's. CFC–11 is contained in the rigid foam insulation used in the appliances and CFC–12 is the heat exchange fluid used in refrigerators and freezers. The possible increased use ranges from no change to one percent of the 1985 total United States CFC–11 and CFC–12 consumption for the most stringent standards proposed. However, since CFC production has been limited, any extra consumption would have to come from other uses and would not result in a net increase in CFC production.

None of the environmental impacts from the savings of SO_2, NO_2, or CO_2 from the range of proposed standards are considered to be significant.

2. Small Gas Furnaces

The greatest impact of the proposed standard for small gas furnaces is a decrease in electricity consumption as some households shift from electric heating to small gas furnaces and decreases in gas and oil burned in homes. General findings are summarized below:

A. Sulfur Dioxide

The reduction in SO_2 would be 6800 tons or 4.2 percent of the emissions estimated to come from residential fuel combustion during 2010.

B. Nitrogen Dioxide

The reduction in NO_2 would be 5100 tons or 1.3 percent of the emissions estimated to come from residential fuel combustion during 2010.

C. Carbon Dioxide

The reduction in CO_2 would be equivalent to 569,000 tons of carbon or .01 percent of the worldwide CO_2 emissions for the year 2010.

None of the environmental impacts from the savings of SO_2, NO_2, or CO_2 from the proposed standard are considered to be significant.

3. Television Sets

The proposed "no standard" standard for television sets results in no impact on the environment since it will not change the status quo. DOE is unaware of any State or local energy conservation standards concerning television sets that would be preempted by the "no standard" standard. The only state standard for television sets of which DOE is aware is the New York State standard that bans the "instant-on" feature of tube type televisions. However, since tube type television sets are no longer manufactured, such standards currently have no effect.

Determination

Based upon the EA, DOE has determined that the proposed interim standards do not constitute a major federal action significantly affecting the quality of the human environment, within the meaning of NEPA. Therefore, an Environmental Impact Statement is not required.

Issued in Washington, DC, November 7, 1988.

Ernest C. Baynard III,

Assistant Secretary, Environment, Safety and Health.

Environmental Protection Agency

Proposed Guidelines for Exposure-Related Measurements and Request for Comments; Notice

VOL 53 ISS 232 DE 2 1988 UMI

ENVIRONMENTAL PROTECTION AGENCY

[FRL-3484-8]

Proposed Guidelines for Exposure-Related Measurements

AGENCY: Environmental Protection Agency.

ACTION: Proposed guidelines for exposure-related measurements and request for comments.

SUMMARY: The U.S. Environmental Protection Agency (EPA) is proposing risk assessment guidelines for exposure-related measurements, and invites public comment.

The Proposed Guidelines for Exposure-Related Measurements are intended to assist those who must recommend, conduct, or evaluate an exposure assessment. These proposed guidelines were developed as part of an interoffice guideline development program under the auspices of EPA's Risk Assessment Forum. The current proposal incorporates comments from external and internal peer reviewers. EPA's Science Advisory Board (SAB) will review these proposed guidelines at a meeting to be held on December 2, 1988. For further details regarding the SAB review, contact Jan Kurtz at (202) 382–2552.

DATES: Comments must be postmarked by March 2, 1989.

ADDRESS: Comments may be mailed or delivered to: Michael A. Callahan, Director, Exposure Assessment Group, Office of Health and Environmental Assessment (RD–689), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460.

Inspection and copies: References, support documents, and other relevant materials will be available for inspection and copying at the Public Information Reference Unit (202–382–5926), EPA Headquarters Library, 401 M Street SW., Washington, DC, between the hours of 8:00 a.m. and 4:30 p.m.

FOR FURTHER INFORMATION CONTACT: John Segna or Michael Callahan, telephone: 202–475–8909.

SUPPLEMENTARY INFORMATION: In its 1983 book "Risk Assessment in the Federal Government: Managing the Process", the National Academy of Sciences recommended that Federal regulatory agencies establish "inference guidelines" (1) to promote consistency and technical quality in risk assessment, and (2) to ensure that the risk assessment process is maintained as a scientific effort separate from risk management. A task force within EPA accepted that recommendation and requested that Agency scientists begin to develop such guidelines.

In 1984, EPA scientists began work on risk assessment guidelines for carcinogenicity, mutagenicity, suspect developmental toxicants, chemical mixtures, and exposure assessment. Following extensive scientific and public review, these five guidelines were issued on September 24, 1986 (51 FR 33992–34054).

The guidelines proposed today continue the guidelines development process initiated in 1984. Like the guidelines issued in 1986, the new proposal sets forth principles and procedures to guide EPA scientists in the conduct of Agency risk assessments and to inform Agency decision-makers and the public about these procedures. In particular, the guidelines emphasize that risk assessments will be conducted on a case-by-case basis, giving full consideration to all relevant scientific information. This case-by-case approach means that Agency experts study scientific information on each chemical under review and use the most scientifically appropriate interpretation to assess risk. The guidelines also stress that this information will be fully presented in Agency risk assessment documents, and that Agency scientists will identify the strengths and weaknesses of each assessment by describing uncertainties, assumptions, and limitations, as well as the scientific basis and rationale for each assessment.

The guidelines are formulated in part to bridge gaps in risk assessment methodology and data. By identifying these gaps and the importance of the missing information to the risk assessment process, EPA wishes to encourage research and analysis that will lead to new risk assessment methods and data.

Work on the Proposed Guidelines for Exposure-Related Measurements began in 1986. The draft guidelines were developed by Agency work groups composed of scientists from throughout the Agency, and the drafts were peer-reviewed by experienced professionals from environmental groups, industry, EPA, and other governmental agencies. During the public comment period, reviewers are requested to comment specifically on the guidance for interpreting contaminated blanks vs. field data (section 2.5.4), the interpretation of data at or near the limit of detection (section 3.3.2), approaches to assessing uncertainty (section 3.4) and, the Glossary of Terms. Public comment is also invited on the following questions: Should these guidelines be combined with the 1986 guidelines? Is the current state-of-the-art in making measurements of population activities for the purpose of exposure assessment advanced to the point where the Agency can construct guidelines in this area? Given that these guidelines are not necessarily a protocol or detailed literature review, is the level of detail of these guidelines useful and appropriate, especially in the area of statistics?

After SAB and public comment, Agency staff will prepare summaries of the comments and analyses of major issues presented by the commentors. The comments will be considered by EPA's Risk Assessment Forum and Risk Assessment Council in the development of final guidelines.

Date: November 22, 1988.

John A. Moore,

Chairman, Risk Assessment Council.

1. Introduction

1.1. Purpose of the Guidelines

In 1984, EPA organized a new program to ensure scientific quality and technical consistency in the Agency's risk assessments. Included in the program's goals was the development of Agencywide guidelines for risk assessment. The first group of five guidelines was issued in 1986 and included The Guidelines for Estimating Exposures (U.S. EPA, 1986a). The Proposed Guidelines for Exposure-Related Measurements is a companion and supplement to the Guidelines for Estimating Exposures.

The Guidelines for Estimating Exposures were developed to help avoid inadvertent mistakes of omission. They present the risk assessor with a set of questions to be considered in carrying out an exposure assessment and provide a procedural framework for estimating the degree of human contact with a chemical of concern. The Guidelines for Estimating Exposures set forth internal Agency procedures that facilitate consistency by developing common approaches to exposure assessments and by promoting the quality and accuracy of science underlying EPA exposure assessments.

As stated in the Guidelines for Estimating Exposures, "Ideally, exposure measurements are based on measured data. EPA recognizes that gaps in data will be common, but the Guidelines will nevertheless serve to assist in organizing the data that are available, including new data developed as part of the exposure assessment. In the absence of sufficient reliable data and the time to obtain appropriate measurements, exposure assessments may be based on validated mathematical models. Whenever possible, exposure assessments based on modeling should be complemented by reliable measurements." Comments received on the Guidelines for Estimating Exposures, including comments from EPA's Science Advisory Board (SAB), suggested a supplement dealing in more detail with how to make and use measurements in exposure assessment. In accord with these suggestions, the Agency prepared the Proposed Guidelines for Exposure-Related Measurements.

This document focuses primarily on chemical measurements in various physical and biological media. The guidelines are intended to help exposure assessors make informed choices regarding collection and interpretation of these types of data. Other types of exposure-related measurements (e.g., activity profiles) are not considered in detail here.

The Proposed Guidelines for Exposure-Related Measurements (hereinafter Guidelines) are not intended to serve as a step-by-step instructional guide, but to convey general principles. They represent a collection of information already refined by consensus approval. As the Agency performs more exposure assessments and incorporates various novel approaches, these Guidelines will be revised.

1.1.1. Intended Audience

These Guidelines are intended to assist those who must recommend, conduct, or evaluate an exposure assessment. Exposure assessment is a multidisciplinary process that should reflect the combined input of analytical and environmental chemists, biologists, engineers, statisticians, and others as appropriate. To ensure a credible exposure assessment, the assessor must be familiar with the site or program-specific needs and the factors that affect how well these needs will be fulfilled.

Important aspects to be considered when generating new data (i.e., making measurements) include sampling plans, field activities, and analytical methodologies. Exposure assessors will enhance their expert judgment with sample designs that provide objective measurements. The purpose of sampling an environmental medium, or of sampling exposures directly for an individual, or of sampling tissues or body fluids, is to make an inference about the nature of quality of the whole medium, population, or absorbed dose. Statistics, while a useful tool, cannot alone provide the rationale for the link between the sample and the whole. It is the exposure assessor, as builder of the assessment, who must provide the explanation and justification for this link, usually through carefully laid out logic as to why the sample is accurate and representative. Statistics, and the help of a statistician, however, are often essential parts of establishing the link between the sample and the population of inference.

When evaluating data (i.e., using exposure-related measurements) exposure assessors should carefully examine the relationship between the population on which the measurements were made and the population about which inferences are desired. Another matter to be considered and understood is the possible difference between statistical significance and practical significance. The former term relates to whether observed differences could be the result of the variability of the data used in a decision process. The latter relates to whether the difference, if real, would be of practical importance. For a given set of circumstances, measures of statistical significance should not vary from one assessor to another because they are calculated using established procedures, while statements on practical significance are very likely to vary from assessor to assessor since they are matters of opinion.

1.1.2. Organization of the Guidelines

These Guidelines consist of three parts. The introduction describes some general aspects of exposure assessment and some major sources of measurement data used in exposure assessment. The second chapter discusses the making (i.e., generation) of measurements for exposure assessments including the role of the exposure assessor, sampling plans, uncertainty analysis, quality assurance, quality control, and method selection. The third chapter describes the use of measurements in exposure assessments including evaluation of uncertainty in the use of measurements, the role of limit-of-detection values, and the use of surrogate data.

1.1.3. Role of Technical Support Documents

It is impracticable to create guidelines that give specific step-by-step instructions for every situation. The assessor should consult technical support documents, such as those referred to in these Guidelines, for more specific information.

BEST COPY AVAILABLE

1.2. Exposure Assessment

The National Research Council (NRC) in 1983 described risk assessment as containing some or all of the following four steps: *Hazard identification* (the determination of whether a particular chemical is or is not causally linked to particular health effects), *dose-response assessment* (the determination of the relation between the magnitude of exposure and the probability of occurrence of the health effects in question), *exposure assessment* (the determination of the extent of human exposure before or after application of regulatory controls), and *risk characterization* (the description of the nature and often the magnitude of human risk, including attendant uncertainty).

Once a dose-response relationship is established, and often this is done in a controlled situation such as a laboratory, one can make statements such as, "if the dose is 'x,' then the response should be 'y.' " A major problem confronting risk assessors when trying to apply the dose-response relationship to an actual "real-world" problem is the question of what dose to as representative of the actual situation. The primary purpose of an exposure assessment is usually to estimate the real-world dose value to use in a dose-response relationship.

The EPA Guidelines for Estimating Exposure (U.S. EPA, 1986a) define exposure as the contact with a chemical or physical agent. The magnitude of this contact is determined by measuring or estimating the amount of an agent available at the exchange boundaries (i.e., lungs, gastrointestinal tract, skin) during some specified time. Once the agent is absorbed through these boundaries, the amount crossing the boundary becomes the absorbed dose. Exposure assessment is the qualitative or quantitative determination/estimation of the magnitude, frequency, duration, and route of exposure. Exposure are sometimes referred to in the literature in terms of "administered dose" or "applied dose," which describe contact with the organism, but not absorption. These terms tend to be confusing and should not be used to describe exposure if avoidable. Exposures assessments often present not only the exposures, but also the absorbed doses, which can be calculated from exposure if the absorption fraction is known (see the Glossary of Terms).

Over the last decade, exposure assessors have generally approached the evaluation of real-world exposures in three ways: by trying to measure the exposure directly while it is taking place ("the direct measurement approach"), by trying to reconstruct an absorbed dose from evidence within an organism after the exposure and absorption have taken place ("the reconstructive approach"), or by trying to make estimates of the distribution of the chemical and the organism separately, then linking them ("the predictive approach"). All of these approaches involve measurements of some kind, and the measurements used in these approaches to determine or estimate exposure are generally termed "exposure-related measurements." This term applies to measurements taken for use in an exposure assessment, whether or not they measure actual exposures directly, or directly provide information upon which exposure will ultimately be estimated.

1.3. Sources of Measurement Data

This section describes some of the methods currently used to provide reliable measurements for exposure assessment needs. The methodologies discussed below focus on direct measurement of exposure, measurement of biological markers, and measurements for characterization of media for predictive assessments. These Guidelines will not discuss the collection of data on population activity patterns, although it is recognized that these data play an important role in exposure assessment.

The reader should keep in mind that the measurements discussed in sections 1.3.1 through 1.3.3 share s similarity in that for most of them, a substance or medium is being analyzed for chemical content. However, the *use* of the resulting measurement data is fundamentally different for the three different approaches to exposure assessment, and therefore considerations in *making* these measurements vary also.

1.3.1. Direct Measurement of Exposure

Direct measurement of exposure measures the contact of a chemical with an organism (human or nonhuman) while it occurs, by measuring the chemical concentrations at human physical exchange boundaries (skin, lungs, etc.) as a function of time (e.g., throughout a day) to obtain an exposure profile. A number of individual profiles can be statistically aggregated to make statements about the exposure profiles for human or nonhuman populations, provided the individuals sampled have a known relationship to the entire population.

As the name implies, the direct measurement method relies essentially on measured data. The best-known example of the direct measurement of exposure is the radiation dosimeter, a small badge-like device worn in areas where exposure to radiation is possible. The dosimeter effectively measures exposures to radiation while it is taking place, then indicates when a preset level has been exceeded. Another example of direct measurement of pollutant exposure is provided by the Total Exposure Assessment Methodology (TEAM) studies (U.S. EPA, 1987a) conducted by EPA. In the TEAM studies, a small pump with a collector and absorbent is attached to a person's clothing and measures the exposures to airborne solvents or other pollutants while the exposure takes place. The absorbent cartridges are then analyzed for a variety of chemicals. A third direct measurement example is given by the carbon monoxide (CO) studies done by EPA in the 1980s, where a small CO measuring device was carried by a number of people over several days (U.S. EPA, 1984a). The device had a recording capability which allowed the assessor to analyze the exposure to CO over that time period. In all three of these examples, the key to direct measurement techniques is that the measurements must be taken at the interface between the person and the environment and measure the exposure while it is taking place.

1.3.2. Biological Monitoring for Reconstructive Exposure Assessment

Another method, yielding useful measurement data for reconstructive exposure assessments, involves biological monitoring. Biological tissue or fluid measurements that reveal the presence of a chemical may indicate directly that an exposure has occurred, provided the chemical is not a metabolite of other chemicals. There has been much interest in relating biological sample levels to exposure, particularly for occupational exposure where chemical concentrations are high enough to permit easier detection.

Four types of measurements using biological monitoring can be used to evaluate the amount of a chemical in the body:

1. Measurement of the concentration of the chemical itself in various biological tissues or fluids (blood, urine, breath, hair, adipose tissue, etc.) (body burden).
2. Measurement of the concentration of one or more of the biotransformation products (metabolites) of the chemical.
3. Measurement of a biological effect that occurs as a result of human exposure to the chemical (e.g., alkylated hemoglobin) (types of biomarkers).
4. Measurement of the amount of a chemical bound to target molecules (e.g.,

DNA adducts or chromosome aberrations) (types of biomarkers).

The results of biomonitoring can be used to estimate the amount of chemical uptake during a specific interval if the relationship between uptake and the markers selected is known (i.e., pharmacokinetics are known) and if background levels before the exposure interval are known.

Reconstructive exposure assessment relies heavily on measured data. However, the data on body burden or biomarker values cannot be used directly for exposure assessment unless a relationship can be established between these levels and absorbed dose, and interfering reactions (e.g., from metabolism of nonrelated chemicals) can be accounted for or ruled out. Biological monitoring for exposure assessment usually involves sampling tissues or fluids for the purpose of making inferences about absorbed dose.

1.3.3. Measurements for Predictive Exposure Assessment

In predictive exposure assessment, the assessor attempts to match, or link, individuals or collections of individuals with the concentrations of chemicals or agents they are contacting. Usually, the assessor addresses the characterization of the individuals or population separately from the characterization of the chemical or agent. Population characterization involves identifying those individuals who are exposed and the activities (habits) that bring them into contact with the chemical or agent. This may involve demographics, survey statistics, behavior observation, activity diaries, or other means of obtaining this information. Although population characterization may involve measurements, these measurements are fundamentally different from the chemical/media characterization discussed in these Guidelines, and therefore will not be specifically discussed further here.

Measurements employed in characterizing the chemical or agent in predictive exposure assessments are quite varied, but they all share a common purpose: to use sampling to make inferences about the distribution of chemical/agent concentrations in the media being sampled. Measurements are often used as inputs to models. Once the concentration distribution has been estimated or measured, this information can be combined with the population characterization to estimate exposure.

The following are a few examples of the types of measurements used in predictive exposure assessment to characterize the concentrations of chemicals or agents in various media. *Fixed location monitoring* has been used by the Agency and other groups to provide a record of pollutant concentration at one spot over some length of time. Nationwide air and water monitoring programs have been established to provide continuous monitoring of pollutant concentration so that "baseline" values in these environmental media can be documented. *Measurements in environmental media* can also be done in focused studies which look for specific chemicals or agents in specific places and time. *Indoor air measurements* simply refer to the geographic zone monitored. There are valid reasons for differentiating indoor measurements from outdoor ones, since when performing an exposure assessment, the considerable time spent indoors for most persons needs to be linked with the concentrations they are exposed to indoors. The home, office, automobile, or other defined areas are often called *microenvironments*, and are used in predictive exposure assessment to better link chemical concentrations with individuals or populations. *Breathing zone measurements*, usually associated with industrial hygiene studies of worker exposure, refer to measurements taken by a fixed location device situated at approximately head height at or near where the worker spends a substantial amount of time. Note that this differs from direct measurement, since the monitor is fixed rather than moving with the worker. *Food and drinking water measurments* are often made to characterize these potential exposure pathways. General characterization of these media, such as market basket studies, shelf studies (where foodstuffs are taken from store shelves and analyzed), or drinking water quality surveys are linked in a predictive exposure assessment with the characterization of the individuals or population assessed. (Again, this differs from direct measurement of exposure, where measurements of food and drinking water are taken as split samples simultaneously as an individual is ingesting them.) *Source characterization measurements* usually refer to sampling to determine the rate of release of chemicals or agents into the environment from a point of emission such as an incinerator, landfill, industrial or municipal facility, or other source. Often these measurements are used to estimate emission factors, or a relationship between releases and operating parameters of a facility (x mg of chemical released per ton of waste burned, etc.). The release rates are often combined in a predictive exposure assessment with environmental transport and transformation (environmental fate) data or models, resulting in an estimate of the distribution of the release in the environment over time. This distribution must then be linked to individuals or populations before exposures can be estimated. *Consumer or industrial product analysis* is sometimes done to characterize the concentrations of chemicals or agents in products with which individuals came in contact. In predictive exposure asssessment, this information can be linked with population activities to estimate exposures, provided information is known about how much the individual actually comes in contact with the product. (For example, when holding a product, an individual does not usually contact the entire product, nor do the chemical additives immediately become available on the surface being contacted, etc.)

31.4. Quality Assurance and Quality Control Requirements

While the preceding discussion has described a number of types of measurements, all of them must provide sufficient proof of reliability. This proof is embodied in the form of quality assurance and Quality Control. The Agencywide quality assurance policy stipulates that every monitoring and measurement project undertaken by the Agency must have a written, approved Quality Assurance Project Plan (QAPjP) and Data Quality Objectives (DQOs).

EPA's Office of Research and Development (U.S. EPA, 1983) has published "Interim Guidelines and Specifications for Preparing Quality Assurance Project Plans", which describes the sixteen elements required in every QAPjP and establishes criteria for plan preparation, review, and approval. Every QAPjP should contain procedures that can be used to document and report precision, accuracy, and completeness of environmental measurements.

Individual EPA program offices have prepared more specific guidance based on this general guidance package.

1.5 Other Requirements

An exposure assessor must also be aware of other requirements that are important in specific types of assessments. For example, one must consider that in the process of obtaining direct measurements of exposure in all Federally-funded exposure studies that mandatory submission of a complete survey design to the Office of

Management and Budget (OMB) may be necessary. The guidelines for all such submissions are outlined in the Federal Paperwork Reduction Act (U.S. OMB, 1988).

2. Guidelines for Making Measurements for Exposure Assessments

2.1 Responsibilities of the Exposure Assessor

As noted in section 1.2, the exposure assessor's task is to obtain or estimate dose information representative of actual exposure situations for use in the dose-response relationships which are generally established under controlled conditions, usually in a laboratory. Since dose involves both the organism and the chemical, obtaining representative dose information involves establishing a link between the organism and the chemical. Again, exposure assessors commonly attempt to make this link in any of several ways: by direct measurement, by predictive relationships involving individual study of the distribution of the organisms and chemical in time and space, or by reconstructing the dose after it has occurred. In most cases, the exposure assessor works from individual organism exposures and aggregates these to make statements, inferences, or conclusions about the exposure profiles of collections of individuals (subpopulations, populations, etc.).

In order to make these inferences and conclusions, the assessor often uses measurements along with the concept of sampling. A sample is a small portion of a whole (e.g., specimens of water from the entire drinking water distribution system, 10 cubic meter portions of air within a home, several individuals in a town of 25,000) intended to represent the nature or quality of the whole. The most important responsibility of the exposure assessor is to understand and explain the relationship between the measurement data (samples) and the conclusions drawn about exposure to the subpopulation or population being assessed (the whole).

Good planning, sound statistics, and adequate quality control will go a long way toward building that link between sample and whole. The ultimate utility of new measurements taken for exposure assessment is strongly influenced by sampling strategy (sampling locations, sampling frequency, sampling duration), quality assurance (e.g., sample preparation, handling, and preservation), and knowledge about systematic and random sampling errors (American Chemical Society, 1983). It is incumbent on the exposure assessor to be well informed and to participate in such decisions relating to the making of measurements so that the sampling process is relevant to the questions being asked of the assessor. In addition, the exposure assessor should be involved (along with an analytical chemist and statistician) in selecting the appropriate analytical methods. Likewise, the exposure assessor needs to be involved in quality assurance, control, and assessment. The following discussion is intended to assist the exposure assessor in the highly complex process of making measurements for exposure assessments. The subject areas described below are often interrelated and, even though the process of planning and executing exposure-related measurements is described in a sequential manner, the exposure assessor must recognize the interative nature of the entire process.

2.2 Defining Objectives

A critical choice which must be made early in the process of conducting exposure-related measurements is the decision regarding exactly what is to be measured, what data quality is required, and what resources are available to carry out the study. In order to accomplish this, the exposure assessor must first explicitly define the overall objectives including the type of assessment (i.e., direct, predictive, or reconstructive) that the study is intended to support, the approach to be followed, and the nature of the decisions that will be made based on the data. Studies can range form being scoping in nature, intended to develop a hypothesis for further testing, to detailed investigations for the purpose of deciding on remedial actions or to support regulatory decision-making. In every case proper planning prior to data collection is essential to ensure that the results of the study are consistent with the anticipated uses of the data.

To facilitate this planning, the exposure assessor should keep some basic questions in mind:

Why is the study being conducted? What questions (hypotheses) does the study intend to address and to what uses will the results be put?

Where does the study area begin and where does it end? Is the intent of the study to make inferences on a national, regional, or local scale?

Who is to be monitored? Will the study involve human and/or nonhuman populations? How are they to be identified, characterized, and stratified?

What substances and what media will be measured? What is known about the environmental fate as well as the fate of the substance within the receptor organism? What are the important exposure pathways? What is known about expected concentration levels, analytical methods, and detection limits?

What will the samples be collected? How frequently will the sampling be conducted? Is the intent to characterize exposure as a function of specified variables?

By addressing each of these questions, the exposure assessor will develop a clear and concise definition of study objectives that will form the basis for further planning. The following list of overall objectives illustrates the range of data requirements in terms of variety, quantity, and quality that will result from this process. Generally, the requirements and, therefore, the effort and associated costs increase as one proceeds down the list.

Example Study Objectives

Determining whether exposure occurs to support the need for toxicity testing.

Establish mean or peak exposures.

Establish the fraction of a given area or the percent of time that exposures exceed a particular level for purposes of demonstrating compliance or the need for remedial action.

Establish trends in exposures and the efficacy of risk management decisions.

Determine exposures as a function of location, population characteristics, activity patterns, or other factors.

2.3. Developing a Sampling Strategy

Having decided on the overall objectives of the measurements effort, the exposure assessor should then be prepared to advance to the next level in planning the study which involves making decisions regarding the types of measurements to be undertaken. Data from health or ecological effects studies can be used in deciding such issues as which route of exposure or which medium is most important to sample and the level of detection that is required. Frequency considerations might depend on whether the effects studies have examined average concentrates of the chemical of interest or the effect of peak exposures. Much more frequent sampling must be undertaken to determine peak exposures versus average exposure. Besides the number of sampling locations and samples to be collected, the frequency of sampling is the most significant cost multiplier in a sampling program.

As discussed in section 1.2, there are three approaches useful in exposure assessment. Each of these three approaches (namely, direct measurement methods, predictive methods, and reconstructive methods) has particular strengths and weaknesses and each has different data requirements. When direct measurement of exposure is not possible, indirect methods (i.e., predictive or

reconstructive) are used, the most common being predictive methods. In general, predictive methods link sources, environmental pathways, monitoring data, and population (individual) activity patterns through use of models and exposure scenarios to estimate exposures. The reconstructive approach is almost always combined with one of the other methods to form a better assessment. In fact, many exposure assessments are a combination of two or all three approaches; the TEAM study is a good example of an assessment that combines direct measurement with the microenvironmental predictive approach and breath measurements for the reconstructive approach (U.S. EPA, 1987a).

2.3.1. Direct Exposure Measurements

Directly measuring human exposure to environmental pollution is a rapidly emerging science. In such studies measurements are made of the actual pollutant concentrations contacting a person's body by essentially using split samples of the air breathed, the food eaten, and the water consumed, and by using patch or other techniques to estimate dermal exposure. Availability of appropriate measurement methodology is, therefore, an essential element in planning a direct exposure monitoring study. Existing methodology developed for occupational exposure or environmental monitoring may not be adequate to meet the special demands of direct measurement of exposure. This is especially true with air or respiratory measurements where the monitoring device must be sufficiently small and lightweight to be worn or carried by the person or animal. Although much has been accomplished in certain areas, such as the development of small personal monitors for carbon monoxide (CO) and volatile organic chemicals (VOCs) and the development of sensitive methods for sampling exhaled air, new technology must be developed to accurately determine the exposure to many, if not most, of the airborne pollutants of concern at nonoccupational levels. A highly useful bibliography covering models, field data, and emerging research methodologies which should be consulted in planning direct exposure studies is "Total Human Exposure and Indoor Air Quality" (U.S. EPA, 1988a).

2.3.2. Reconstructive Exposure Measurements

Measurements in support of reconstructive exposure assessments can be characterized as being one of four types: (1) Measurement of the chemical or (2) its metabolites in biological media, (3) determination of a biological effect related to the internal dose, e.g., determination of alkylated hemoglobin, and (4) measurement of the amount of chemical bound to the target molecules e.g., (DNA adducts) or other molecular changes (e.g., chromosome aberrations). Collectively, these measurements are known as biomonitoring of exposure. The principal advantage of biomonitoring is it confirms entry of an environmental pollutant into an organism and, thereby, removes a major assumption in most current exposure assessments (i.e., that the material enters the body) and thus considerably strengthens risk assessments. Theoretically, biomonitoring can integrate total intake to the body from multiple sources and, if the substance is stable, it can integrate exposure over time. For many chemicals of interest, application of biomonitoring to exposure and risk assessments is limited by the availability of appropriate analytical techniques, cost of the assay, and sufficient understanding of the relationship between external exposure, body burden, internal dose, and adverse effects.

In general, most reconstructive environmental studies have focused on monitoring chemicals that are moderately to highly persistent in human tissues. This is based on the reasoning that there is greater potential for exposure and, therefore, adverse effects to result from exposure to more persistent chemicals. Occupational exposure studies have, on the other hand, focused more on transient exposure levels, and the TEAM studies have used breath measurements to help evaluate exposures to VOCs.

The kinds of specimens to be collected in a reconstructive study will vary depending on the following factors: accessibility, prevention of contamination, and existence of analytical procedures. Accessibility is determined first by whether materials will be collected from living persons or cadavers. From living persons typical sampling involves blood, urine, hair, fingernails, and feces. For cadavers (or surgical patients), one can sample adipose tissues, liver, kidney, and other organs. For example, many studies include liver because it is both an accumulating organ and a site of pollutant detoxification and hence a site where many pollutants are likely to be found. It is also present in large enough quantities to obtain individual samples and it tends to be more homogeneous in its distribution of trace substances. Adipose tissue is the ideal depository for lipophilic compounds where many chemicals, including chlorinated pesticides and biphenyls, are concentrated to levels that can be three orders of magnitude more than in the blood. Adipose tissue is available in large quantities from cadavers and is quite homogeneous in its trace contaminant distribution. Blood and urine are often chosen as indicators of recent as well as long-term exposure. They can be sampled repeatedly from the same individual, over a period of years. Samples can be readily obtained, are inexpensive, and information about lifestyle and occupation of the donor can provide clues to exposure routes and sources of the toxicants.

2.3.3. Predictive Exposure Measurements

As mentioned previously, direct exposure measurements may not be feasible in a given situation due to cost, time constraints, unavailability of direct measurement methods for the chemicals of interest, or when the assessment of past or future exposures is desired. Presently, predictive methods, which attempt to link sources, environmental processes, ambient concentrations, target organisms, and activity patterns through models and exposure scenarios, are the most widely used for the Agency's risk assessments.

Although the environmental media are primarily responsible for the wide dispersion of anthropogenic chemicals that reach the environment and sometimes serve as major reservoirs of pollutant residues, the mere presence of a substance within an environmental medium does not indicate the extent to which exposure might occur. It is worth emphasizing here that ambient concentrations of a pollutant are not exposures to a pollutant. Ambient pollutant levels can give distorted estimates of exposure levels for many pollutants by failing to account for other sources of exposure. Moreover, ambient pollutant concentrations fail to account for time-activity patterns that affect exposure in segments of the population (i.e., there is no exposure if the organism is not present). Ambient measurements only indicate the amount of a chemical potentially reaching the exposed individual, and these data must be combined with other information through the use of environmental fate models and exposure scenarios to come up with realistic exposure assessments.

The exposure assessor should use caution in applying long-term monitoring data to specific exposure assessments, since the strategy that was used in siting the particular stations in the network may not correspond to the strategy needed to answer the questions at hand.

For example, although NASQAN (National Stream Quality Accounting Network) stations are located all across the nation, their siting is not based on a probability sample of stream locations designed to reflect water quality (U.S. Government Accounting Office, 1986). Likewise, aerometric monitoring sites are usually established to measure compliance with air quality standards rather than produce a statistically representative data base from which valid inferences of population exposure can be drawn. When ambient monitoring data are needed for an exposure assessment, the optimum approach is to site the sampling stations to address the specific objectives of the exposure assessment. However, this may be impracticable due to time or resource limitations, and existing monitoring locations may be used but only after the assessor has examined the purpose and design of the existing network and its appropriateness for providing the requisite data.

Air Measurements: Air pollutants exist, usually at trace levels, in the atmosphere in one or more physical states. These pollutants may be present as gases or vapors, as surface or bulk constituents of aerosol particles and droplets, or as constituents of cloud liquid water. The low concentrations (typically, in the ppt to ppb range) of most substances poses particular problems for separation and detection. In planning ambient air monitoring studies, the exposure assessor must recognize that for some air pollutants (especially primary pollutants, e.g., CO, as well as a variety of volatile organics) actual human exposures are not well represented by outdoor measurements but are better represented by a series of microenvironmental measurements (see section 3.2.3), including indooor measurements.

Vapor pressure and polarity are the two most important properties governing the succees of sampling organic compounds from air. These properties govern whether the chemical will be found in the gaseous, condensed, or adsorbed phase and will affect the ability to separate, identify, and quantify its concentration. For compounds having medium-to-high vapor pressures, components of interest are usually concentrated from large volumes of air with a solid sorbent material. Collection of whole air samples in stainless steel canisters, which have been specially electropolished to prevent decomposition of the collected compounds, has become an attractive alternative to sorbent sampling. Low vapor pressure compounds are normally associated with particles, and filtration of large volumes of air is the usual means of sampling. Recently, the status of a number of important techniques for sampling air have been reviewed (American Chemical Society, 1988); the exposure assessor should consult this review and the references contained therein for a detailed discussion of their advantages and disadvantages.

Surface and Ground Water Measurements: Water is a major vehicle whereby chemical pollutants are transported and transformed to other substances. Concentrations within a given water body may fluctuate widely as a function of rate and turbulence of flow. Natural water bodies can be very difficult to sample because of large diurnal, seasonal, and local variations. In the case of ground water, one of the toughest questions to answer is "How to obtain a sample that is representative of the aquifer" because of the heterogeneity and complexity of the matrix. Several references describing sampling techniques have been reviewed recently (American Chemical Society, 1988), and these should be consulted by the exposure assessor in planning such studies.

Soil and Sediment Measurements: Soils often exhibit extreme variability even within a small area. Variations of properties such as pH and organic carbon content within soil types can significantly alter the environmental behavior of chemicals so that their persistence, mobility, extractability, and bioavailability are altered. The interpretation of soil analysis is further complicated by the fact that concentrations of a particular substance in soils may bear little immediate relationship to its exposure potential. Guidance on performing soil monitoring studies has been developed (U.S. EPA, 1984b) and should be consulted in planning such studies. Sediments have been repeatedly shown to accumulate toxic chemicals, and many chemicals reach higher concentrations in sediments than in the overlying water column. As in the case of soils, however, there are many questions regarding the bioavailability of sediment-bound chemicals and their significance to the biosphere. The sampling techniques most frequently used fall into two broad categories: bottom grab (dredge) sampling and core sampling. Guidance for designing, implementing, and overseeing a sediment sampling program is available (U.S. EPA, 1985i).

Other Measurements: In addition to environmental concentration measurements, predictive exposure assessments use data on the physical/chemical properties of the substance, its production, use, and disposal patterns, release rates to specific media, environmental fate, exposed populations (size, location, activity patterns), concentrations in drinking water and food, bioavailability, and pharmacokinetics (see Table 3–1). It is beyond the scope of this document to provide a discussion of the considerations and approaches to measuring each of the factors that may go into a predictive exposure assessment. In reality, most predictive exposure assessments use a mix of measured, surrogate, and estimated data. Several methodology documents have been prepared (U.S. EPA, 1985a–h, U.S. EPA, 1986b) which, although not a series of "how-to" books, they do provide a catalogue of information sources and describe the use of the data in predictive exposure assessments. These documents provide a useful starting point in planning a study.

2.4 Setting Data Quality Objectives

All data are subject to some error, and errors can be introduced at various stages of data collection. Some types of error can be expressed quantitatively, but others can only be described qualitatively. The magnitude of the error assigned to a data set is related to data quality. As the magnitude of the error increases, the quality of the data decreases. Depending on the particular decisions that will be made with the data and the way the data will be used to support those decisions, specified levels of error may be tolerable. Data Quality Objectives (DQOs) are statements of the level of uncertainty that an exposure assessor is willing to accept in results derived from environmental data.

The setting of realistic data quality requirements is essential for proper planning because data of insufficient quality will have little value for problem solving, and data of excess quality may provide few, if any, additional advantages. DQOs should be established based on cost-effective consideration of the needs of the exposure assessment and the capability of the measurement process. Knowledge of the expected variability of the samples is required to estimate the number of samples to be taken and the number of measurements to be made on each sample.

Although the term connotes quality, DQOs also are intended to clarify the objectives of the study. They force the exposure assessor to crystallize

beforehand, in his or her mind, how the data will be used once it is collected.

The process of establishing the data criteria begins with the exposure assessor proposing limits (based on best judgment) on the level of uncertainty that will be acceptable for each conclusion to be drawn from new data, taking into consideration the resources available for the study. These limits include the uncertainty resulting from both the analytical and sampling components of the plan. Thus, the DQO process consists of an analytical component and a sampling component. The analytical component results in the selection of a cost-effective chemical analysis method that, when integrated with the selected sampling plan (see section 2.5), will satisfy the given objective. Frequently, the detection limit of a "standard" analytical method exceeds the concern level for the substance (this is particularly true for many suspected carcinogens) and, therefore, more costly procedures will be required. The sampling component involves specifying a sampling plan (including numbers, types, locations, and levels of sampling quality control) that takes into account the expected sample variability (may have to be determined by a pilot study), and, when combined with the analytical component, will provide data consistent with the DQOs.

The DQOs should include the following:

1. A description of the data to be obtained and the media from which samples will be collected.
2. A statement of the desired performance for each data-dependent element that specifies in as much detail as possible the acceptable probabilities associated with false positive and false negative situations of varying degrees of magnitude. This statement should indicate the level of uncertainty that can be tolerated if the result is to be included in a decision-making process.
3. A clear statement of the objectives of the study.
4. The scope of study objectives including the smallest part of the data set from which a separate result will be calculated, and the largest unit (area, time period, or group of objects) that the data are expected to represent.
5. A discussion of how the results will be tested, including the following: Statistics that will be used to summarize the data; any standards, reference values, or action levels to which the statistics will be compared; and a statement of the rationale for and specifics of the mathematical and/or statistical procedures that will be used to derive the result.
6. Initial estimates of the time and dollar resources expected to be expended for the data collection effort.

The quality of a data set is represented in terms of precision, accuracy, representativeness, completeness, and comparability. Only precision and accuracy can be expressed in purely quantitative terms. The other statistics are best expressed using a mixture of qualitative and quantitative terms. Brief descriptions of these terms are given below:

Precision—Precision is a measure of the reproducibility of the analyses under a given set of conditions. Specifically, it is a quantitative measure of the variability of a group of measurements compared to their average value. Sampling precision is determined by analyzing multiple samples chosen at random from the same population, i.e., collected at the same point in time and space so as to be considered identical. Analytical precision is determined by the analysis of separate aliquots of a homogenized sample or separate aliquots of a spiked matrix and its replicates. Precision is usually stated in terms of sample standard deviation, but other estimates such as the coefficient of variation (sample relative standard deviation), the range (maximum value minus minimum value), and the relative range are common. Analytical precision is much easier to control and quantify than sampling precision.

Accuracy—Accuracy is a measure of the correctness of the data that takes into account the variability and bias that may exist in a measurement system. Unlike precision, accuracy is difficult to measure for the entire data collection activity. Sources of error include the sampling process, field contamination, preservation, handling, sample matrix, and analysis. Accuracy can only be estimated by evaluating all sources of variability and bias, to that extent possible. Accuracy is usually determined by analysis of a well-characterized sample or reference material, or is stated in terms of the mean recovery determined by analysis of a matrix spike and its replicates.

Representativeness—Representativeness expresses the degree to which sample data accurately and precisely represent a characteristic of a population, parameter variations at a sample point, or an environmental condition. Representativeness is a qualitative parameter that is very important in the proper design of the sampling plan, since it is related to the relevance of the data to exposure (see section 3.2). Representativeness is best addressed by describing sampling techniques and the rationale used to select the sampling locations. Samples can be biased (based on existing data, surveys, observations, etc.) or unbiased (completely random or stratified-random approaches). Later, in using the data for exposure assessment, this information will help build the logical link between the samples and the characterization of the whole media (see section 3.1).

Completeness—Completeness is a measure of the amount of valid data obtained from a measurement system compared to the amount that was expected to be obtained under normal conditions. Completeness is usually expressed as a percentage. Site access, sampling problems, analytical problems, and the data validation process can all contribute to missing data. Missing data may reduce the precision of estimates, introduce bias, and lower the level of confidence in the conclusions. A completeness goal must be included in the process to make sure that enough data of sufficient quality are obtained from the measurement system to fulfill the objectives of the study.

Comparability—Comparability describes the confidence with which one data set can be compared to another. Comparability refers to such issues as using standard field and analytical techniques and reporting data in the same units. For this data collection step, the assessor must consider whether two or more data sets are comparable. For example, if more than one field team is collecting samples or more than one laboratory is analyzing the samples, equivalent methods must be used to ensure that everyone is measuring the same thing in the same way. In this manner conclusions may be drawn from the totality of existing data.

2.5. Sampling Plan

The quality of the analytical data used in an exposure assessment depends on the choice of the sample and the adequacy of the sampling and analytical programs. As discussed earlier, the exposure assessor must first have a clear understanding of the overall goals of the study and have decided on the nature of the sampling and the data quality objectives. Once this has been achieved one can then proceed to the development of the sampling plan.

A *sampling plan* is a set of rules or procedures that specify how a sample is to be selected and handled. An inadequate plan will often lead to biased, meaningless, or unreliable results; good planning, on the other hand, maximizes the efficient use of limited resources and is more likely to produce valid results.

2.5.1. Sampling Design

Sampling for the purposes of exposure assessment is a complex process. The

heterogeneous nature of the environment poses particular problems in obtaining a representative sample. The sampling design specifies the number and type of samples needed to achieve the data quality objectives. Factors to be considered in developing the sampling design include the study objectives, sources of variability (e.g., environmental heterogeneity in time and space, analytical variability) and their relative magnitudes, relative costs, and practical limitations of time, cost, and personnel.

Decisions are made regarding replication in time and space, compositing (combining several samples into one prior to analysis), and multiple determinations on a single sample. A statistical (or environmental process) model, which may be simple or complex depending on the circumstances, is used to allocate sampling effort in the most efficient manner. For example, consideration of sources of variability together with cost may suggest multiple analyses of individual samples in one case and single analyses of a large number of samples in another case.

Prior knowledge of environmental factors may suggest designs that take into account expected physical or spatial relationships. Stratified random sampling is one approach that involves subdivision of the sampling universe into strata (e.g., according to geographical region, soil type, etc.). Appropriate choice of strata leads to more efficient use of sampling resources compared with simple random sampling when prior knowledge is available. Kriging, developed initially for geostatistical applications, is a statistical interpolation method that uses models of the spatial correlation between measurements. It is particularly suited for developing contour map representations of, for example, chemical concentrations in soil. As with stratified random sampling, an appropriate choice of model allows more efficient use of sampling resources compared with simple random sampling. Model selection, however, involves professional judgment and therefore may be subject to criticism. The sampling approach should be thoroughly reviewed to identify its strengths and weaknesses prior to implementation. An example of both approaches being used in tandem is provided in "Data Quality Objectives for Remedial Response Activities" (U.S. EPA, 1987b), in which stratified random sampling is used in the initial phase of a site remediation investigation, followed by the use of geostatistical techniques to effectively target subsequent sample collection.

The difference between survey and experimental approaches should be recognized. The survey approach seeks to estimate exposure of a population based on the measured exposure of a statistically representative sample from the population. In some situations the study objectives may be better served by an experimental approach which seeks to describe the relationship between two or more factors, e.g., the relationship between house construction and a particular indoor air pollutant. In the experimental approach, experimental units are selected to cover a range of situations (e.g., different housing types) and do not reflect the frequency of those units in the population of ultimate interest. An understanding of the relationship between factors gained from an experiment can be combined with other data (e.g., distribution of housing types) to estimate exposure. An advantage of the experimental approach is that it may provide more insight into underlying mechanisms that may be important in targeting regulatory action. A properly conducted survey has the additional benefit, however, of providing representative estimates of population characteristics with known uncertainty. To justify the experimental approach one has to argue, as in all experimental work, that the relationships revealed by the experiment apply beyond the situation of the particular experiment.

A single study may use a combination of survey and experimental approaches and involve a variety of sampling techniques. Relevant EPA reference documents include "Survey Management Handbook", Vols. I and II (U.S. EPA, 1984c). A detailed description of methods for enumerating and characterizing populations exposed to chemical substances is contained in "Methods for Assessing Exposure to Chemical Substances", Vol. 4 (U.S. EPA, 1985d). Statistical input is essential during this planning stage to make the most efficient use of available resources and to ensure that the number and type of samples collected are likely to achieve the data quality objectives.

2.5.2. Sampling Location and Frequency

Factors to be considered in selecting possible sampling sites include population density, historical environmental sampling results, patterns of environmental contamination and variability (such as prevailing wind direction or stream flow), access to the sample site, types of samples, frequency and duration of sample collection desired, and health and safety of field personnel.

There are many sources of information on methods for selecting sampling locations. Schweitzer and Black (1985) and Schweitzer and Santolucito (1984) give statistical methods for selecting sampling locations, particularly for sampling ground water, soil, and hazardous wastes. A practical guide for ground-water sampling is also available (U.S. EPA, 1985h) as well as a handbook for stream sampling (U.S. EPA, 1986c).

The term *sampling frequency* indicates the time interval between the collection of successive samples. The type of sample to be taken and the physical and chemical properties of the chemical of concern will usually dictate the sampling frequency. For example, determining the concentration of a volatile chemical in surface water would require a higher sampling frequency than necessary for ground water because the chemical concentration of the surface water would be changing more rapidly.

The optimum number, spacing, and sampling frequency can best be estimated after a preliminary survey. Factors to be considered in determining the number of samples to be obtained include technical objectives, resources available, the schedule of the program, types of analyses, and the constituents to be evaluated. Examples for air, surface water, and ground water of the application of statistical techniques for determining the optimum number of samples required to give data with specific limits of confidence include Shaw et al. (1984), Sanders and Adrian (1978), and Nelson and Ward (1981). The best assurance of obtaining a good sampling plan is to rely on a professional statistician.

2.5.3. Sampling Duration

The duration of sampling depends on the analytical method chosen, the limits of detection, the physical/chemical properties of the analyte, chemical concentration, and knowledge of transport/transformation mechanisms. For example, sampling duration may be extended to ensure adequate collection of a low concentration chemical and may be curtailed to prevent the breakthrough of a relatively high concentration of volatile chemical. Also, duration of sampling is directly related to selection of statistical analyses, such as trend versus cross-sectional analyses.

2.5.4. Sample Preparation

A major analytical concern is to ensure that the samples are not biased by the introduction of field or laboratory contamination. If the validity of the

sample is in question, all the analytical results will be questionable. Field and laboratory spiked samples and blank samples should be analyzed concurrently to validate results.

While conducting the sampling plan, careful attention should be given to collecting, preparing, preserving, and analyzing samples according to the established protocols.

The method for interpreting and using the results from blank samples should be specified in the sampling plan. The following EPA documents provide examples.

For *volatiles and semivolatiles* the action in the case of unsuitable blank results depends on the circumstances and the origin of the blank. No positive sample results should be reported unless the concentration of the compound in the sample exceeds 10 times the amount in any blank for the following contaminants: methylene chloride, acetone, toluene, 2-butanone, and common phthalate esters. The amount for other volatiles and semivolatiles should exceed 5 times the amount in the blank (U.S. EPA, 1988b). If a compound is found in a blank but not found in a sample, no action is taken.

For *pesticides/PCBs* no positive sample results should be reported unless the concentration of the compound in the sample exceeds 5 times the amount in the blank (U.S. EPA, 1988b). If a pesticide/PCB is found in a blank but not found in a sample(s), no action is taken.

For *inorganics*, no positive sample results should be reported if the sample results are greater than the instrument detection limit (IDL) and less than 5 times the amount in any blank (U.S. EPA, 1988c). Any blank with a negative result whose absolute value is greater than the IDL must be carefully evaluated to determine its effect on the sample data.

2.6 Evaluating Uncertainty

In evaluating and reporting uncertainty associated with measurements, sampling errors, laboratory analysis errors, and data manipulation errors are three categories of errors that should be evaluated. These are discussed in the next sections.

2.6.1. Sampling Errors

There are two kinds of sampling errors: systematic errors (often referred to as biases) that result from the sampling process, and random errors that result from the variability of both the population and the sampling process.

A biased sample can result from faulty assumptions. For example, one may assume that only the liquid phase of an aquatic system is important and may therefore ignore colloidal matter, suspended material, and sediment. A biased conception of an environmental situation could thus result. Unfounded discrimination with respect to speciation (chemical and biological) is another example of sample bias. Experimental failure to realize a proper discriminatory feature of an assumption could be another source of bias. For example, sampling a "respirable" fraction of particles in an atmosphere depends both on an appropriate definition of what is respirable and the use of a sampling device that has the required size discrimination. The presence or absence of such biases must never be assumed without experimental evidence. A sampling operation can be biased by faulty calibration of critical components such as flow meters, thermometers, pressure sensors, sieves, or any device that influences the sample or is used to quantitatively modify a measured result.

Biases of a different kind can result from contamination, losses, interactions with containers, deteriorations, and displacement of phase or chemical equilibria. Sources of bias must be considered in every sampling operation. A good procedure is to develop a "bias budget" wherein individual items are evaluated for significance, quantitatively when appropriate. Tolerances should be established to hold them within acceptable bounds, and adequate calibrations should be made of all critical components.

2.6.2. Laboratory Analysis Errors

Generally, laboratory errors are smaller than sampling errors. Preparation of accurate calibration standards helps minimize measurement bias as much as possible, since calibration is a major source of systematic error in analysis. This requires standards that suitably match the samples of interest in both matrix and level of analyte of concern. Other sources include chemical operations such as sample dissolution, concentration, extraction, and reactions. Blanks arising from the chemical operations, storage and handling of samples, sampling and transfer lines, and laboratory environment (including its personnel) must be controlled and evaluated.

Another type of error in laboratory analysis is the uncertainty of intercomparison of standards and samples. The measurement system must be in a state of statistical control, i.e., it must be stable and capable of producing a limiting mean value; the individual observations must be randomly distributed around the mean, and they must have a stable variance. Furthermore, each individual observation must be independent of others in a data set.

A system is statistical control will be stabilized but not necessarily optimized. Accordingly, its standard deviation will need to be evaluated and monitored on a continuing basis.

2.6.3. Data Manipulation Errors

Uncertainties that arise from errors in data manipulation are due to the operation of the measurement process and can be evaluated experimentally. Blunders, however, cannot be evaluated, so sufficient care must be exercised to prevent them to the extent possible.

Data manipulation errors can be of several kinds. These include errors of calculation, errors of transposition, errors of transmission, use of wrong units, use of improper conversion factors, spatial or temporal averaging information loss, and misassociation errors that confuse samples and numerical results. A measurement program should have built-in mechanisms to detect these errors. These can include, where appropriate:

1. Proofreading and hand checking calculations.
2. Ion balance.
3. Mass balance.
4. Comparison of results found for similar samples.
5. Graphical plots.
6. Tests for outliers.

A data set should not be released until it has been screened for possible blunders. The quality assurance program should include a prescribed procedure for data release, and any request to bypass it (premature release of data) should be resisted.

2.6.4. Reporting Data Near the Detection Limit

Oftentimes, extrapolation methodologies applied to toxicological studies result in acceptable risk levels which necessitate measuring environmental concentrations at or near the limit of detection (LOD). The limit of detection is defined as the lowest concentration level that can be determined to be statistically different from a blank (American Chemical Society, 1983). Data measured at or near the detection limit have considerably more uncertainty associated with them than when measurable amounts are present. To understand what a reasonably certain measure or a reliable detection is, the exposure assessor must understand the method of measurement as well as the statistical approach that

VOL 53 ISS 232 DE 2 1988 UMI

was used to calculate the limit of detection. Different statistical approaches will produce different limits of detection. It is beyond the scope of this document to discuss the various methods for calculating limit of detection values. Instead, the assessor should consult a statistician and become familiar with the advantages and disadvantages of each method (e.g., Long and Winefordner, 1983).

As a general rule, the exposure assessor should report all data that contribute to an understanding of the true situation including the extent to which data have been adjusted for recovery or other factors. If the exposure assessor reports individual values, the American Chemical Society's Committee on Environmental Improvement (1983) recommends that:

1. If the measured value is less than the limit of detection, report "not detected" together with the value for the LOD.

2. If the measured value is larger than the LOD but smaller than the limit of quantification (LOQ), report "detected but not quantifiable" together with the value for the LOQ. The LOQ is the level above which quantitative results can be obtained with a specified degree of confidence.

3. If the measured value is greater than the LOQ, report the value and its uncertainty.

The American Chemical Society recommendation sets the LOD at 3 standard deviation units above the mean value of the blank responses and the LOQ at 10 standard deviations above the blank responses.

2.7. Quality Assurance, Control, and Assessment

Quality assurance is a system of activities designed to provide the producer or user of a product or service with the assurance that the product meets defined standards of quality with a stated level of confidence. The quality assurance process involves quality control and quality assessment.

Quality control is the overall system of activities whose purpose in to control the quality of a product or service so that it meets the needs of users. The aim is to provide quality that is satisfactory, dependable, and economical. A quality control program should include developing and strictly adhering to priciples of good laboratory practice, consistently using standard operational procedures, and following carefully designed protocols for specific measurement programs. Qualified personnel, reliable and well-maintained equipment, appropriate calibrations and standards, and close supervision of all operations are essential components of a sound quality control program. A quality control program should foster a measurement system that operates in a state of statistical control, which means that errors have been reduced to acceptable levels and have been characterized statistically.
